Design with Life - Mitchell Joachim 2021-06-21
Design with Life chronicles the breakthroughs and projects of a nonprofit that is defining resolute new directions in socio-ecological design and other deep-seated intersections of synthetic biology, architecture, and urban systems. In the challenging context of accelerating climate dynamics, the core discipline of architectural design is evolving and embracing new forms of action. New York-based nonprofit Terreform ONE has established a distinctive design tactic that investigates projects through the regenerative use of natural materials, science, and the emergent field of socio-ecological design. This kind of design approach uses actual living matter (not abstracted imitations of nature) to create new functional elements and spaces. These future-based actions are not only grounded in social justice, but are also far-reaching in their application of digital manufacturing and maker culture. Terreform ONE tackles urgent environmental and urban social concerns through the integrated use of living materials and organisms.

The Bugatti Queen - Miranda Seymour 2015-04-09

Born in 1900 to a soon-to-be-widowed postmaster's wife in a small French village,

Hélène Delangle's background offered no suggestion of the extraordinary life she was to lead. The first step was to leave the country behind and head to the city -- in this case, a Paris in the grip of an intoxicating 1920s blend of creativity and debauchery. She became a dancer, and then a stripper. But the demi-monde of gauze veils and admirers was not enough. A visit to the Actors' Championships, a uniquely French meeting of the theatrical world with the race-track, opened her eyes to the glamorous combination of machines and speed. Quickly establishing herself as a racer of uncommon talent and audacity, the beautiful woman now known as Hellé Nice -- Hellish Nice to her British fans -- then caught the attention of none other than Ettore Bugatti, founder of the marque with which her name will always be associated. And yet, despite the fame and the fortune she amassed in an unprecedented career, she died penniless and alone, an old woman in a crumbling Nice flat surrounded only by memories. THE BUGATTI QUEEN is the story of a great pioneer of motor racing who happened to be a woman. Re-creating her rollercoaster career with great verve and panache, Miranda Seymour brilliantly shows us a life now forgotten -- and makes it unforgettable.

Wireless and Mobile Networking - Jozef Wozniak 2012-03-14

Recent spectacular achievements in wireless, mobile, and sensor networks have dramatically changed our lives in many ways. However, the rapid evolution of wireless systems not only promises increased functionality, reliability, availability, and security, as well as putting a wide variety of new services at the users' disposal ? it also creates a number of design challenges that our research community is now facing. Scientists and engineers need to come up with, and promptly implement, novel wireless network architectures, while system operators and planners rethink their business models and attend to the growing expectations of their customer base. To provide a suitable forum for discussion between researchers, practitioners, and industry representatives interested in new developments in the respective research area, IFIP WG 6. 8 launched three separate series of conferences: MWCN (Mobile and Wireless Communications Networks), PWC (Personal

Wireless Communications), and WSAN (Wireless Sensor and Actors Networks). In 2008, MWCN and PWC were merged into the IFIP Wireless and Mobile Networking Conference (WMNC 2008), held in Toulouse, France, from September 30 to October 2, 2008. MWNC 2008 and PWC 2008 topics were subsequently revised with a view to covering the whole spectrum of hot issues in wireless and mobile networking. As a result, IFIP WG 6. 8 decided to add WSAN as another WMNC track.
