**Original Nation Approaches to Inter-National Law** - Hiroshi Fukurai 2021-04-08

This book introduces the Original Nation scholarship to examine the historical genealogy of the nation's struggles against the state. A fundamentally different portrait of history, geography, politics, and the role of law emerges when the perspective of the nation and peoples is placed at the center of geopolitical analysis of global affairs. In contrast to traditional and canonical state-centric narratives, the Original Nation scholarship offers a diametrically distinct "on-the-ground" and "bottom-up" portrait of the struggle, resistance, and defiance of the nation and peoples. It exposes persistent global patterns of genocide, ecocide, and ethnocide that have resulted from attempts by the state to occupy, suppress, exploit, and destroy the nation. The Original Nation scholarship offers a powerful and widely applicable intellectual tool to examine the history of resilience, emancipatory struggles, and collective efforts to build a vibrant alternative world among the nation and peoples across the globe.

**Black Identities** - Mary C. WATERS 2009-06-30

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

[The Un Convention on the Elimination of All Forms of Discrimination Against Women and Its Optional Protocol](#) - Patricia Schulz 2023-03-02

This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol. It reflects the developments during the decade following the publication of the first edition in 2012, which has also seen a notable rise in individual complaints (more than 85), ten new General Recommendations, and six new inquiry procedures as well as numerous statements, partly in conjunction with other UN human rights bodies. The Convention is a key international human rights instrument and the only one exclusively addressed to women. It has been described as the United Nations' 'landmark treaty in the struggle for women's rights'. At a time when the backlash against women's human rights and the concept of gender-based discrimination is increasingly challenged by governments and powerful societal actors, the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention. The Commentary analyses the interpretation of the Convention through the work of

its monitoring body, the Committee on the Elimination of Discrimination against Women. It comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol, including a separate chapter on the cross-cutting substantive issue of violence against women. The sources relied on are the treaty language and the general recommendations, concluding observations, and case law under the Optional Protocol (individual complaints and inquiries), through which the Committee has interpreted and applied the Convention. Each chapter is self-contained, but the Commentary is conceived of as an integral whole. The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women's human rights worldwide.

**The Man Who Founded the ANC** - Bongani Ngqulunga 2017-06-19

In 1912, just over a year after returning from his studies at Columbia and Oxford, the thirty-year-old Pixley ka Isaka Seme succeeded where others had failed in forming a political organisation that represented all black South Africans. Seme also established a national newspaper, became one of the pioneering black lawyers in South Africa, bought land from white farmers for black settlement at the time when opposition to it was gaining momentum, became an adviser and confidant to African royalty, and was considered a leading visionary for black economic empowerment. And yet, when he became president general of the ANC in the 1930s, he brought it to its knees through sheer ineptitude and an authoritarian style of leadership. On more than one occasion he was found guilty for breaching the law, which partly led to him being struck off the roll of attorneys. This book discusses in detail Seme's extraordinary life, tracing it back to his humble beginnings at Inanda Mission to his triumphs and disappointments across the continents, in his public and private life. When Seme died in 1951 he was bankrupt and his political standing had suffered greatly. And yet he was praised as one of the greatest South Africans ever to have lived. For all this, he has largely been forgotten. This biography brings the remarkable life of this extraordinary South Africa back to public consciousness.

[Advances in Nano-Fertilizers and Nano-Pesticides in Agriculture](#) - Sudisha Jogaiah 2020-12-01

Advances in Nano-Fertilizers and Nano-Pesticides in Agriculture explores the use of nanotechnology as it provides new approaches for the controlled delivery of pesticides, herbicides and fertilisers to improve safety of products with increasing the efficiency of food production and decreased environmental pollution. The development of nanodevices such as smart delivery systems to target specific sites, as well as nanocarriers for chemical controlled release are currently important aspects in novel agriculture and require a strong foundation of understanding not only the technology but the resulting impacts. Fills key knowledge- gaps of bio-nanotechnology, how they interact with plant cells and their biological consequences Focused on the agro-nanotechnology which can be utilized for developing healthy seeds Explores the possibilities of macronutrient nano-based fertilizers

Northern Lights on Civic and Citizenship Education - Heidi Biseth 2021-02-26

This open access book presents an in-depth analysis of data from ICCS. An international group of scholars critically address the state of civic and citizenship education in the four Nordic countries that participated in the IEA International Civic and Citizenship Education Study (ICCS) in 2009 and 2016. The findings are of particular relevance to educators at all levels, from school education through to teacher education. Nordic countries have long traditions of democracy and their students have performed relatively well in the ICCS assessments. Nonetheless, citizenship education continues to evolve and has received increasing attention in recent educational reforms, indicating policymakers understanding that schools play an important role in establishing democratic values among future citizens. Data from ICCS can be used to analyze, discuss, and reflect on the status of civic and citizenship education and can contribute to the discourse on the potential role of education in contributing to sustainable democracies for a common future. However, teaching citizenship and learning democracy are two different things. While young people can be taught about democracy in school, it is vital that schools work together with the wider community in which youth operate to strengthen civic understanding and values for all young people regardless of their social and economic background.

Transport Development Challenges in the 21st Century - Michal Suchanek 2021-04-27

This proceedings present current trends in the transport growth. It presents transport solutions both at a micro-level, such as that of a single city or a single company, as well as at a macro-level of a whole transportation system. The transport decisions made by an individual in regards to the transport mode and route, add up to the structure and efficiency of the whole system. Transport systems cannot grow extensively anymore, due to lack of space or the amount of additional costs, so the authors presents new solutions, ones which are innovative and sustainable, while also increasing the efficiency of transport operations. These solutions are analyzed for performance at a scale of individual cities or companies, as well as whole transport systems. The researchers, who are often also practitioners in the field of transport, provide not only the theoretical background for the transport analysis but also empirical data and practical experience.

**Contemporary Inter-regional Dialogue and Cooperation between the EU and ASEAN on Non-traditional Security Challenges** - Naila Maier-Knapp 2019-12-20

This book provides an analysis of non-traditional security (NTS) crises and cooperation between the European Union (EU) and Southeast Asia. Using case studies – transboundary air pollution, marine life endangerment, illegal migration, and terrorism – from both Southeast Asia and Western Europe between 2009 and

2016, this book offers a contemporary understanding of the EU as a collective actor within the Association of Southeast Asian Nations (ASEAN)-EU and Asia-Europe Meeting (ASEM) inter-regional dialogue formats and affiliated programmes. Through new empirical insights into the regional and inter-regional institutional dynamics of the EU and ASEAN in times of crisis and rising nationalism in both regions the author demonstrates, in particular, the relevance of the EU as a security and normative actor and the value of inter-regionalism as a foreign and security tool of the EU in Southeast Asia. Thus, this book underlines the importance of regional organisations in the management of contemporary transboundary NTS challenges within global governance. Enhancing topical debates and offering a timely assessment of crisis-induced regionalism and inter-regionalism in world affairs, this book will be of interest to scholars studying International Relations, International Security, Southeast Asian Studies, European Studies, and Public Policy.

**The Future of Gas Networks** - Meysam Qadrdan 2019-08-30

This book investigates the role of gas networks in future low-carbon energy systems, and discusses various decarbonisation pathways, providing insights for gas network operators, developers, and policy makers. As more countries around the world move towards low-carbon energy systems and increase their exploitation of renewable energy sources, the use of natural gas and the associated infrastructure is expected to undergo a substantial transformation. As such there is a great uncertainty regarding the future role of gas networks and how they will be operated in coming years. The topics addressed include: Fundamentals of gas network operation The impact of variable renewable electricity generation on the operation and expansion of gas networks The impact of decarbonising heat supplies on gas networks Opportunities and challenges of utilising gas networks to transport alternative low-carbon gases such as bio-methane and hydrogen

*Public Transport* - Peter R. White 2016-12-01

Public Transport provides an accessible introductory text to the field of public transport systems, covering bus, coach, rail, metro, domestic air and taxi modes. The market structure is set out, together with data collection methods. The technology of bus and rail systems is introduced with particular reference to peak capacity and energy consumption. An analysis of cost structures and costing methods leads into a review of pricing concepts and their application. In addition to issues related to urban systems, specific chapters cover rural public transport and the long-distance sector. A concluding chapter examines long-run policy

issues, such as likely population changes and scope for substitution of travel. The primary context taken is that of the British Isles, drawing extensively on data such as the National Travel Survey in England. However, the principles and findings are also broadly applicable to countries of similar per capita income and population density. This sixth edition introduces a new chapter on data collection and survey methods for public transport systems in addition to a general update of the text to reflect the latest statistical evidence, research findings and policy changes. Public Transport is an essential textbook for both students in transport and those in related fields. This is an invaluable resource for transport planners in local authorities and consultancies.

**Physics, Chemistry And Application Of Nanostructures: Reviews And Short Notes To Nanomeeting-2017** - Borisenko Victor E 2017-04-27

This book presents invited reviews and original short notes of recent results obtained in studies concerning the fabrication and application of nanostructures, which hold great promise for the new generation of electronic, optoelectronic and energy conversion devices. They present achievements discussed at Special Sessions "Frontiers of Molecular Diagnostics with Nanostructures" and "Nanoelectromagnetics" organized within Nanomeeting-2017. Discussing exciting and relatively new topics such as fast-progressing nanoelectronics and optoelectronics, molecular electronics and spintronics, nanoelectromagnetics, nanophotonics, nanosensorics and nanoenergetics as well as nanotechnology and quantum processing of information, this book gives readers a more complete understanding of the practical applications of nanotechnology and nanostructures.

*Recent Discoveries in Human Serious Foodborne Pathogenic Bacteria: Resurgence, Pathogenesis, and Control Strategies* - Lanming Chen 2019-02-06

Food is the first necessity for humans to survive with huge amounts of food consumed daily worldwide. Globalization of food industry results in an increasingly complex food chain, making food safety a universal issue. Many millions of people in the world become sick while hundreds of thousand die annually due to consumption of contaminated food. Pathogenic bacteria contaminate food at any stages in the food chain, including production, processing, supplying, and storage. The most commonly known bacterial pathogens associated with human foodborne diseases worldwide are Salmonella enterica, Campylobacter jejuni, Escherichia coli, Listeria monocytogenes, Cronobacter sakazakii, Vibrio cholerae, and Vibrio parahaemolyticus. This eBook includes publications on recent discoveries in genetic diversity, prevalence, resistance and novel transmission vectors; molecular mechanisms underlying the pathogenesis; and new compounds and treatment strategies for better control of the human foodborne pathogenic bacteria. The information in the articles supports the urgent need for improving food safety and public health, particularly in globalization background.

The Theatre of Anthony Neilson - Trish Reid 2017-07-27

Anthony Neilson is one of the most exciting and challenging voices in contemporary British theatre. For more than two decades he has been in the vanguard of new writing and has acquired a formidable reputation for innovation and experimentation. His major stage plays include Penetrator, The

Censor, Stitching, Realism, Unreachable and his 2004 masterpiece The Wonderful World of Dissocia, arguably one of the finest Scottish plays of the new millennium. This volume provides the first full-length study of Neilson's plays and his innovative rehearsal methodology. As well as providing a detailed account of each play Trish Reid includes an extensive new interview with Neilson and additional contributions from important scholars and commentators in the field. This is essential reading for anyone who wants to develop a better understanding of one of British theatre's most original artists.

**Media & Entertainment Law** - Ursula Smartt 2019-11-12

The fourth edition of Media and Entertainment Law has been fully updated, analysing some of the most recent judgments in media law from across the United Kingdom, such as Cliff Richard v the BBC, Max Schrems v Facebook and the Irish Information Commissioner, developments on the 'right to be forgotten' (NT1 and NT2) and ABC v Daily Telegraph (Sir Philip Green). The book's two main themes are freedom of expression and an individual's right to privacy. Regulation of the communication industries is covered extensively, including discussion of the print press and its online editions following Leveson, traditional broadcasting regulations for terrestrial TV and radio as well as media activities on converged devices, such as tablets, iPads, mobile phone devices and 'on demand' services. Intellectual property law (specifically copyright) in the music and entertainment industries is also explored in the book's later chapters. Also new to this edition are sections on: A focus on freedom of expression: its philosophical foundations; the struggles of those who have fought for it; and the varied ways in which the courts interpret freedom of expression regarding the taking and publishing of photographs. The 'right to be forgotten', data breaches, and the General Data Protection Regulation (GDPR). The media's increasing access to the courts, particularly when considering the privacy of those who are suspected of sexual offences. Press regulators, broadcasting and advertising regulations, and film and video regulations. Election and party-political broadcast regulations, with a focus on social media and recent election fraud. The emergence of online music distribution services, internet radio and free digital streaming music services, and their effect on the music industry. The fourth edition also features a variety of pedagogical features to encourage critical analysis of case law and one's own beliefs.

**James** - Luke L. Cheung 2018-12-31

Criminals in Hong Kong and China are often superstitiously religious. Ironically, both they and police officers worship the same folk god, Guan Gong, who represents righteousness! But their religiosity has no moral consequences - what both groups are seeking is protection from their opponents. Unfortunately, some Asian Christians have a similar model of religiosity. They want God's protection and blessings, but they do not want God to affect how they live. James will have none of this. He is convinced that our devotion to God must be reflected in the way we live, and so he writes a letter that is full of sound, practical advice. He exhorts us to control our tongues, he speaks against greed, envy, and wrong desires, and he gives wise advice about enduring suffering, praying for ailing believers, and restoring believers who are tempted to depart from the truth. Using Asian applications, this commentary of James highlights the relevance the triune God has in all contexts of life. The Asia Bible Commentary Series empowers Christian believers in Asia to read the Bible from within their respective contexts. Holistic in its approach to the text, each exposition of the biblical books combines exegesis and application. The ultimate goal is to strengthen the Body of Christ in Asia by providing pastoral and contextual exposition of every book of the Bible.

**Challenging Life: Existential Questions as a Resource for Education** - Jari Ristiniemi 2018

There is an increasing recognition today that young people need to have knowledge about religions and world views in order to live and work in diverse societies. What kind of 'maps' are they provided with through religious, values and ethics education? Does education address the challenging existential questions that children and adolescents ask about life and the world? This

volume addresses different aspects of how existential questions have been dealt with in educational research. It especially draws attention to the Swedish research tradition of focusing on life questions and the interpretation of life in education, but with contemporary international research added. It also addresses issues of ethics education and discusses possible options for the future of existential questions as a resource for education.

*The National Security Strategy of the United States of America* - United States. President (2001-2009 : Bush) 2002

The great struggles of the twentieth century between liberty and totalitarianism ended with a decisive victory for the forces of freedom and a single sustainable model for national success: freedom, democracy, and free enterprise. In the twenty-first century, only nations that share a commitment to protecting basic human rights and guaranteeing political and economic freedom will be able to unleash the potential of their people and assure their future prosperity. People everywhere want to be able to speak freely; choose who will govern them; worship as they please; educate their children male and female; own property; and enjoy the benefits of their labor. These values of freedom are right and true for every person, in every society and the duty of protecting these values against their enemies is the common calling of freedom-loving people across the globe and across the ages. Today, the United States enjoys a position of unparalleled military strength and great economic and political influence. In keeping with our heritage and principles, we do not use our strength to press for unilateral advantage. We seek instead to create a balance of power that favors human freedom: conditions in which all nations and all societies can choose for themselves the rewards and challenges of political and economic liberty. In a world that is safe, people will be able to make their own lives better. We will defend the peace by fighting terrorists and tyrants. We will preserve the peace by building good relations among the great powers. We will extend the peace by encouraging free and open societies on every continent. Defending our Nation against its enemies is the first and fundamental commitment of the Federal Government. Today, that task has changed dramatically. Enemies in the past needed great armies and great industrial capabilities to endanger America.

**COVID-19, Law, and Regulation** - Belinda Bennett 2023-01-19

COVID-19 is the most severe pandemic the world has experienced in a century. This book analyses major legal and regulatory responses internationally to COVID-19, and the impact the pandemic has had on human rights and freedoms, governance, the obligations of states and individuals, as well the role of the World Health Organization and other international bodies during this time. The authors examine notable legal challenges to public health measures enforced during the pandemic, such as lockdown orders, curfews, and vaccine mandates. Importantly, the book contextualizes the legal analysis by examining the broader social and economic dimensions of risks posed by the pandemic. The book considers how COVID-19 impacted the operation of the criminal justice system, civil litigation concerning negligently caused deaths and business losses arising from contractual breaches, consumer protection litigation, disciplinary regulation of health practitioners, coronial inquests and other investigations of unexpected deaths, and occupational health and safety issues. The book reflects on the role of the law in facilitating the remarkable scientific and epidemiological achievements during the pandemic, but also the challenges of ensuring the swift production and equitable distribution of treatments and vaccines. It concludes by considering the possibilities that the legal and regulatory responses to this pandemic have illuminated for effectively tackling future global health crises.
