The Beginners Guide to Meditation - Briana Jones 2016-02-24

The very essence of meditation is finding peace within the chaos that enshrouds us all in our daily lives,

and if we can just get ourselves to look at that daunting word a little bit differently, we will come to see that we don't need to have that sacred temple or shrine wherein we seek to cast aside our thoughts and enter the blissful state of no mind we so desperately seek to attain. In this book you will learn all about the techniques that you will be able to use most effectively where it comes to performing meditation anywhere and anytime. You will come to see that what you once believed was a task best left to rishis and sages in the mystical Himalayas, is really something you can perform with the utmost ease, several times a day.

To Preserve and Protect - Anastasia Dukova 2020-09-02

Early Australian policing had its roots on the streets of Dublin and London, where many of Australia's first law and order enforcers hailed from. Intrigued by this connection, historian Anastasia Dukova has researched and recreated the lives of colonial police officers and criminals in her adopted home city of Brisbane. Through exploring their personal stories, Dukova highlights how biography and history are inextricably linked and reveals the differences between metropolitan aspirations and colonial reality. *To Preserve and Protect* exposes political power abuse, corruption, mismanagement, professional burnout,

and gendered justice, issues which continue to challenge police forces.

Internal Combustion Engines - Institution of Mechanical Engineers 2014-10-10

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence

on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Blown to Bits - Harold Abelson 2008

'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.

Advances in Earth Science - P R Sammonds 2007-06-21

Advances in Earth Science outlines the latest developments and new research directions currently being made world-wide in the earth sciences. It contains invited and refereed articles by leading younger researchers on their cutting-edge research, but aimed at a general scientific audience. This exciting volume explains how powerful methodologies such as satellite remote sensing and supercomputing simulations are now profoundly changing research in the earth sciences; how the earth system is increasingly being viewed in a holistic way, linking the atmosphere, ocean and solid earth; and how the societal impact of the research in the earth sciences has never been more important. Published by Imperial College Press in collaboration with the Royal Society of London, the book features many articles originating from invited papers published in the Philosophical Transactions of the Royal Society. Eleven of the distinguished contributors hold prestigious Royal Society Research Fellowships. Contents: Environmental Change: The Price of Climate Change (D S Reay) Carbon in the Atmosphere and

Terrestrial Biosphere in the Early Anthropocene (Y Malhi) Dust in the Earth System: The Biogeochemical Linking of Land, Air, and Sea (A Ridgwell & K E Kohfeld) The Late Permian Mass Extinction Event and Recovery: Biological Catastrophe in a Greenhouse World (R J Twitchett) Dynamics of the Earth: Space-Plasma Imaging – Past, Present and Future (C N Mitchell) Fault Structure, Stress, Friction and Rupture Dynamics of Earthquakes (E Fukuyama) Some Remarks on the Time Scales of Magmatic Processes Occurring Beneath Island Arc Volcanoes (S P Turner) The Break-Up of Continents and the Generation of Ocean Basins (T A Minshull) Properties and Evolution of the Earth's Core and Geodynamo (F Nimmo & D Alfè) Applied Earth Science: Giant Catastrophic Landslides (C R J Kilburn) Remote Monitoring of the Earthquake Cycle Using Satellite Radar Interferometry (T J Wright) Human Influence on the Global Geochemical Cycle of Lead (D J Weiss et al.) Natural and Artificial Platinum and Palladium Occurrences World-Wide (H M Prichard) Data Assimilation and Objectively Optimised Earth Observation (D J Lary & A Koratkar) Readership: General scientific readers interested in the new research directions in the earth sciences; researchers and students in the earth and environmental sciences, geophysics, environmental chemistry, biology and evolution.

International Economics - Dennis R. Appleyard 2008

Appleyard, Field, and Cobb's International Economics, 6th Edition is an International Economics textbook that offers a consistent level of analysis and treatment of the two main subdivisions of international economics—international trade theory and policy and

international monetary theory and policy. Comprehensive and clear, the text helps students move beyond recognition toward an understanding of current and future international events. As with each prior edition, the authors provide current and timely information on the wide variety of international economic phenomena in the 6th Edition. New boxed items were added to cover emerging issues in the global economy. Chapter material was updated to include recent developments in U.S. trade policy, major changes in the European Union, progress in the transition from command to market economies, and special issues related to developing nations. These improvements are designed to help readers both understand and appreciate the growing importance of the global economy in their lives.

Killing for Krishna - Henry Doktorski
2018-01-08

The 1986 murder of Hare Krishna devotee Steven Bryant (Sulochan dasa) was arguably the darkest moment in the fifty-two year history of the International Society for Krishna Consciousness—a new branch of the Chaitanya-Bengali-Vaishnava religion founded in New York City in 1966 by an Indian spiritual teacher and guru, His Divine Grace A. C. Bhaktivedanta Swami Prabhupada (1896-1977). A mere nine years after the disappearance of this beloved spiritual father, one of their own was hunted down and assassinated. This brutal killing was achieved through a cooperative effort by "spiritual" leaders, senior managers and hit men enforcers from West Virginia, Ohio, and Southern California ISKCON temples. The murdered whistle-blower had discovered many secrets and threatened to reveal to the world the immoral acts and criminal dealings of a set of self-appointed, illegitimate successors to Swami Prabhupada: a

corrupt oligarchy of new ISKCON "gurus." He had also, perhaps foolishly, advocated using violence against the gurus to evict them from their posts. ISKCON leaders took his threats seriously, and they hunted down and assassinated the passionate reformer. How did the peaceful, shaven-headed, saffron-clad Hare Krishna devotees regress from their blissful activities of chanting, dancing, and selling incense in the streets to this? The author, himself a former ISKCON devotee, probes deeply into the disturbing direction of a new religious movement. In this book, he exposes the danger of philosophical errors and deranged devotion that practically ensured that bloody tragedy would eventually occur. The author has engaged in years of painstaking research by poring over tens of thousands of pages of trial transcripts, newspaper and magazine articles, ISKCON publications, and confidential ISKCON documents, while also interviewing dozens of eyewitnesses. His effort culminates in a thoroughly-engaging and extremely well-documented thesis exposing the hidden inside story of the conspiracy to murder Steven Bryant, including its genesis, development, blunders involved in it, execution, cover up, as well as a stunning aftermath after the deed was done.

Evocative Objects - Sherry Turkle
2011-09-30

Autobiographical essays, framed by two interpretive essays by the editor, describe the power of an object to evoke emotion and provoke thought: reflections on a cello, a laptop computer, a 1964 Ford Falcon, an apple, a mummy in a museum, and other "things-to-think-with." For Sherry Turkle, "We think with the objects we love; we love the objects we think with." In *Evocative Objects*, Turkle collects writings by

scientists, humanists, artists, and designers that trace the power of everyday things. These essays reveal objects as emotional and intellectual companions that anchor memory, sustain relationships, and provoke new ideas. These days, scholars show new interest in the importance of the concrete. This volume's special contribution is its focus on everyday riches: the simplest of objects—an apple, a datebook, a laptop computer—are shown to bring philosophy down to earth. The poet contends, "No ideas but in things." The notion of evocative objects goes further: objects carry both ideas and passions. In our relations to things, thought and feeling are inseparable. Whether it's a student's beloved 1964 Ford Falcon (left behind for a station wagon and motherhood), or a cello that inspires a meditation on fatherhood, the intimate objects in this collection are used to reflect on larger themes—the role of objects in design and play, discipline and desire, history and exchange, mourning and memory, transition and passage, meditation and new vision. In the interest of enriching these connections, Turkle pairs each autobiographical essay with a text from philosophy, history, literature, or theory, creating juxtapositions at once playful and profound. So we have Howard Gardner's keyboards and Lev Vygotsky's hobbyhorses; William Mitchell's Melbourne train and Roland Barthes' pleasures of text; Joseph Cevetello's glucometer and Donna Haraway's cyborgs. Each essay is framed by images that are themselves evocative. Essays by Turkle begin and end the collection, inviting us to look more closely at the everyday objects of our lives, the familiar objects that drive our routines, hold our affections, and open out our world in unexpected ways.

How Sweet It is - Sophie Gunn

2011-01-01

"How Sweet It Is will set your heart on fire" -- Robyn Carr, New York Times bestselling author "One sweet read! Everything I love best: humor, warmth, emotions that pull at the heartstrings, characters that step off the page, and a wonderful love story." -- Mariah Stewart, New York Times bestselling author How Sweet It Is Single mom Lizzie Bea Carpenter learned long ago that no white knight was coming to save her. A hardworking waitress at the local diner, she's raising her daughter to be like the independent women in her "Enemy Club"--high school rivals turned best friends, promising to always tell each other the whole truth and nothing but! Yet part of Lizzie wishes she did have a man's help, just for small stuff, like fixing up the house. Her fairy godmother must have been listening, because Dante "Tay" Giovanni soon appears. He's sexy, kind, and offering assistance--no strings attached. Slowly, steadily, Lizzie's heart opens. But the grip of the past is fierce, and nothing in life is ever really free. Tay has his own tragedies to overcome, but if he can, he'll fix more than Lizzie's home. He'll show her just how sweet it is to be loved by him.
