**Guild and State** -

Guild and State examines the values of social solidarity and fraternity that emerged from medieval guilds and city-communes, and the effect of traditional corporate

organization of labor on socioeconomic attitudes and theories of the state. What ordinary guildsmen and townsmen thought about these issues can be gleaned from chronicles, charters, and reported slogans. But in tracing attitudes toward the guilds of early Germanic times to today's equivalent-trade unions-a distinction must be made between popular "ethos" and learned "philosophy." In Europe, from the twelfth to the seventeenth centuries, the corporate organization of labor and of town-market communities developed side-by-side with the ideals of personal liberty, market freedom, and legal equality. Self-governing labor organizations and civil freedom developed together as coherent practices. The values of mutual aid and craft honor on the one hand, and of personal freedom and legal equality on the other, formed the moral infrastructure of our civilization. Alternate ideals balanced, harmonized, and

even cross-fertilized one another-as in the principle of freedom of association. Contrary to preconceptions, however, corporate values were seldom expressed philosophically in the Middle Ages. Political theory and the world of learning from the start emphasized liberal values. It was only after the Reformation that guild and communal values found expression in political theory. Even then only a few philosophers acknowledged that solidarity and exchange-the poles around which the values of guild and civil society, respectively, rotate-are not opposites but complementary, and attempted to weave these together into a texture as tough and complex as that of urban society itself. By showing that the ideals of social solidarity and workers rights have often been intertwined with liberty and equality rather than in opposition to them, this book provides an unexpected explanation and

rationale for the "Third Way." The Enlightenment and industrialization led to an apotheosis of liberal values. Guilds disappeared and were only in part replaced by labor unions; the values of market exchange have since been in the ascendant-though Hegel, Durkheim, and more recently, advocates of liberal corporatism maintain the possibility of a symbiosis between corporate and liberal values. In *Guild and State* there emerges an alternative history of political thought, which will be fascinating to the general as well as the specialist reader.

The Decline of the Ancient World - A.H.M. Jones 2014-06-17

This celebrated account of the decline of the ancient world describes the fall of the Roman Empire and the beginning of the emergence of the new medieval European order.

Teaching in Lifelong Learning 3e A guide to theory and practice - James Avis 2018-11-29

Addressing the Professional Standards for Teachers and Trainers, this bestselling textbook helpfully balances theory and practice, introducing key theories and concepts relating to learning and assessment as well as providing practical advice on teaching. Extensively revised and

updated to reflect the current educational policy environment, this textbook for teaching provides thorough and extensive coverage of the topics for higher-level awards in Education and Training. The textbook provides a logical progression through the essential aspects of teaching, such as planning and assessment; it considers key related areas including teacher professionalism, equality and diversity, and mentoring and coaching; and it presents this invaluable guidance in an accessible and readable format. In outlining the challenges, opportunities, and debates in and around lifelong learning, the editors and contributing authors draw on their extensive teaching experience, as well as offering an evidence-based approach with a wide range of research. Teaching in Lifelong Learning: A Guide to Theory and Practice is core reading for those teaching or preparing to teach in further, higher and community

education as well as in public sector contexts and in private training organisations, including those studying for CertEd/PGCE and related awards, such as the Level 4 Certificate and Level 5 Diploma in Education and Training. 'Teacher education in FE continues to be an important and unresolved issue, and this book is a great asset in supporting individuals in understanding and developing their practices. With a focus on developing critical, inquiring practitioners, the text reads like an experienced mentor sharing pointers, questions, and useful readings over a collegial cup of coffee'. Dr Tim Herrick, Senior University Teacher, University of Sheffield, UK

*World Yearbook of Education 1995* - Leslie Bash 2012-12-06

This annual summary of educational policies and practices worldwide includes discussion of multi-skills and flexibility, school-work

links, qualifications, and education for skills versus education for status.

Engineering Empires - B. Marsden  
2004-12-07

Engineers are empire-builders. Watt, Brunel, and others worked to build and expand personal and business empires of material technology and in so doing these engineers also became active agents of political and

economic empire. This book provides a fascinating exploration of the cultural construction of the large-scale technologies of empire.

**Workforce Development and Skill Formation in Asia** - John Benson  
2013-05-29

Asia has undergone rapid transformation over the past several decades as many countries have embraced new technologies and the processes of globalisation. Over this period the inflow of foreign capital into the region, the level of trade amongst these countries, and trade with other parts of the world has increased substantially. The ensuing economic growth has led to some significant changes in labour markets and the demand for skilled employees and their deployment within organisations. Focusing on a number of developed and developing Asian economies, this book explores the dynamics of workforce development and

skill formation, and considers questions of both skills shortages and skills gaps. The book assesses the current state of training in the selected Asian economies, the weaknesses and strengths of their various training approaches, and what the present state of training means for the future economic development of these economies.

**The Crisis of the University** - Peter Scott  
2018-10-11

Originally published in 1984, *The Crisis of the University* looks at the way in which changes to intellectual life relate to the development of the different institutions that make up higher education. It examines the evolution of the liberal university that flourished in the 19th and early 20th centuries into the modern university that has grown up since 1945. It also looks at the more detailed experience of British higher education, with separate chapters on what the Robbins expansion meant for the

universities and why it was thought necessary to construct an alternative in the shape of the polytechnics. Looking to the future, the book argues first that the present structure of British higher education needs reform and speculates on the future intellectual and social demands that may be made of higher education.

*London Statistics* - London County Council  
1927

Statistics of the Administrative County of London ... together with certain statistics of the adjacent districts.
