Developing and Validating Test Items -

Thomas M. Haladyna 2013-07-18

Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved

distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible - No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity - Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples - The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large

numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research - A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

Best of Five MCQS for the European Specialty Examination in Gastroenterology and

Hepatology - Thomas Marjot 2021-02-05

The new edition of *The Best of Five MCQS for the European Specialty Examination in Gastroenterology and Hepatology* is a question

book designed to assist in preparations for the European Specialty Examination in Gastroenterology and Hepatology (ESEGH). The book has been fully updated to reflect the new examination introduced in 2018 and the most recent guidelines. Containing a foreword by Sir Ian Gilmore, former president of both the British Society for Gastroenterology and the Royal College of Physicians, the book adopts the same Best of Five question format used in the ESEGH and covers the breadth of the curriculum. It has been designed to exactly match the relative proportion of questions on each topic area found in the examination. Each of the 300 questions contained in the book is accompanied by an answer, a set of three succinct bullet points of key 'take-home' messages, and a short summary of the relevant background, evidence-base and up-to-date European guidelines. The book ends with a chapter of 50 questions, which again matches the proportions of topic areas found in the ESEGH, and is designed to act as a mock-

examination for use in the final stages of preparation.

MCQs & EMQs in Human Physiology, 6th edition - Ian Roddie 2004-05-28

There has been a marked change in examination strategy over the last five years; EMQs (extended matching questions) are popular with tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation. The new edition of MCQs in Physiology has been subject to a complete overhaul to become MCQs and EMQs in Physiology. This reflects the current methods of examination techniques and will

provide the student with a complete revision resource book. Packed with MCQs and EMQs along with clear and simple explanations of each answer, this book covers all the main physiological systems. The questions stretch from basic to applied and interpretative and are written with the modern integrated syllabus firmly in mind. Presented alongside other core revision books such as EMQs in Clinical Medicine this book will soon be seen as a must-have for any medic's shelf.

Intensive Care Medicine MCQs - Shoneen Abbas 2015-04-01

Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge

and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will

appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This new book will complement the existing international best-selling title 'Multiple Choice Questions in Intensive Care Medicine' (ISBN 978 1 903378 64 9), also written by Dr Steve Benington.
