The Informalisation of the EU's External Action in the Field of Migration and Asylum - Eva Kassoti
2022-01-11

This contributed volume examines the trend whereby the EU resorts ever more often to informal arrangements and deals with third countries in an

effort to curb and manage migration flows towards the EU and facilitate the return of irregular migrants to their countries of origin or transit. The perceived success of the EU-Turkey deal provided a strong impetus for the continuation of this trend. The contributions collected and presented in this book aim to shed light on the implications of this trend for the EU constitutional order, the human rights of those affected by these deals, the third countries with which the EU cooperates, and the global refugee protection regime. They demonstrate how these deals raise more issues than they solve; by, for instance, sidestepping established Treaty rules and procedures, violating the human rights of those affected, and overburdening the nascent migration

and asylum systems of third country partners. This book, the first volume to appear in the Global Europe Series, will be of great interest to researchers and policy makers working in the field of migration and asylum. Eva Kassoti and Narin Idriz work in the Research Department of the T.M.C. Asser Institute in The Hague.

Facebook, the Media and Democracy -
Leighton Andrews 2019-08-29

Facebook, the Media and Democracy examines Facebook Inc. and the impact that it has had and continues to have on media and democracy around the world. Drawing on interviews with Facebook users of different kinds and dialogue with politicians, regulators, civil society and media commentators, as well as detailed documentary scrutiny of legislative and regulatory proposals and

Facebook's corporate statements, the book presents a comprehensive but clear overview of the current debate around Facebook and the global debate on the regulation of social media in the era of 'surveillance capitalism.' Chapters examine the business and growing institutional power of Facebook as it has unfolded over the fifteen years since its creation, the benefits and meanings that it has provided for its users, its disruptive challenge to the contemporary media environment, its shaping of conversations, and the emerging calls for its further regulation. The book considers Facebook's alleged role in the rise of democratic movements around the world as well as its suggested role in the election of Donald Trump and the UK vote to leave the European

Union. This book argues that Facebook, in some shape or form, is likely to be with us into the foreseeable future and that how we address the societal challenges that it provokes, and the economic system that underpins it, will define how human societies demonstrate their capacity to protect and enhance democracy and ensure that no corporation can set itself above democratic institutions. This is an important research volume for academics and researchers in the areas of media studies, communications, social media and political science.

The Global Smartphone - Daniel Miller
2021-05-06

The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their

research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual

communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world. Islam, Blasphemy, and Human Rights in Indonesia - Daniel Peterson

2020-01-07

Using the high-profile 2017 blasphemy trial of the former governor of Jakarta, Basuki 'Ahok' Tjahaja

Purnama, as its sole case study, this book assesses whether Indonesia's liberal democratic human rights legal regime can withstand the rise of growing Islamist majoritarian sentiment. Specifically, this book analyses whether a 2010 decision of Indonesia's Constitutional Court has rendered the liberal democratic human rights guarantees contained in Indonesia's 1945 Constitution ineffective. Key legal documents, including the indictment issued by the North Jakarta Attorney-General and General Prosecutor, the defence's 'Notice of Defence', and the North Jakarta State Court's convicting judgment, are examined. The book shows how Islamist majoritarians in Indonesia have hijacked human rights discourse by attributing new, inaccurate meanings to key liberal

democratic concepts. This has provided them with a human rights law-based justification for the prioritisation of the religious sensibilities and religious orthodoxy of Indonesia's Muslim majority over the fundamental rights of the country's religious minorities. While Ahok's conviction evidences this, the book cautions that matters pertaining to public religion will remain a site of contestation in contemporary Indonesia for the foreseeable future. A groundbreaking study of the Ahok trial, the blasphemy law, and the contentious politics of religious freedom and cultural citizenship in Indonesia, this book will be of interest to academics working in the fields of religion, Islamic studies, religious studies, law and society, law and development, law reform,

constitutionalism, politics, history and social change, and Southeast Asian studies.

Beyond the Valley - Ramesh Srinivasan
2020-09-01

How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for

our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the “design labs” of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public

figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.

Alpha Status - Nathan Ikon Crumpton

If capitalism were a person, who
would it be? Where would it live?
Who, how, and what would it love?
Dive into the salacious world of
hedge funds, high finance, and
penthouse sex dungeons. This raucous
tale of a wildly successful New York
fund manager and his globetrotting
adventures reflects the stark new
reality of contemporary uber-wealth,
and the capitalist system which
created it. Become enraptured with -
or repulsed by - the heinously
opulent world of the anonymous
protagonist and his class of modern
billionaires. But challenging the
protagonist's high-flying escapades
in finance and sexual conquest is his
twin brother, a maudlin comparative

literature professor and single father. With a life defined by tragedy, the brother becomes the countervailing voice of reason and social tranquility. Filled with equal parts fictitious plotline and broadly researched non-fiction sources, this book offers pointed analysis of the 21st century socio-economic landscape, and begs critical questions about how capitalism can try to reconcile its avaricious nature with a world demanding a more equitable division of resources. Enlightening yet critical. Serious yet absurd. Fictitious yet factual. This non-fiction novel provides graphic and unapologetic scrutiny from both extremes of the contemporary socio-economic spectrum.

App Kid - Michael Sayman 2022-08-30
An inspiring and deeply personal

coming of age memoir from one of Silicon Valley's youngest entrepreneurs—a second-generation Latino immigrant who taught himself how to code as a thirteen-year-old and went on to claim his share of the American dream. As his parents watched their restaurant business collapse in the wake of the Great Recession, Michael Sayman was googling “how to code.” Within a year, he had launched an iPhone app that was raking in thousands of dollars a month, enough to keep his family afloat—and in America. Entirely self-taught, Sayman headed from high school straight into the professional world, and by the time he was seventeen, he was Facebook's youngest employe ever, building new features that wowed its founder Mark Zuckerberg and are now being used by

more than half a billion people every day. Sayman pushed Facebook to build its own version of Snapchat's Stories and, as a result, engagement on the platform soared across all demographics. Millions of Gen Z and Millennials flocked to Facebook, and as teen engagement rose dramatically on Instagram and WhatsApp, Snapchat's parent company suffered a billion-dollar loss in value. Three years later, Sayman jumped ship for Google. App Kid is the galvanizing story of a young Latino, not yet old enough to drink, who excelled in the cutthroat world of Silicon Valley and went on to become an inspiration to thousands of kids everywhere by following his own surprising, extraordinary path. In this candid and uplifting memoir, Sayman shares the highs and lows, the successes and failures, of his

remarkable journey. His book is essential and affirming reading for anyone marching to the beat of their own drum.

Intelligence analysis in social media

- Emil Girdan 2021-02-28

The global security environment, dominated and dependent on information and communication technology, generates an accumulation of disruptive factors for society. This volume, in direct accordance with technological developments that have facilitated information avalanche and (anonymous) communication, has required interdisciplinary research in areas such as: psychology, sociology, computer science, social media communication and legislation. The research aims to establish whether social media platforms, through the

actions they facilitate, can pose risks and threats to national security and to identify premises in order to stimulate strategies that should be followed to avoid transforming various forms of online communication into a potentiating and generating factor of crime, radical or extremist opinions, mass manipulation, etc. At the same time, the research offers an alternative vision on approaching the concept of intelligence in the context of the development of social media networks (SocMInt) and promotes ways to improve and streamline how to achieve objectives that can be successfully applied, including in business intelligence. In this regard, a case study is conducted on the effects of CoVid-19 pandemic (SARS-CoV-2 coronavirus) from the perspective of

law enforcement agencies. Although the individually exploitation of SocMInt does not provide a comprehensive answer, it must be used in the initial stages of decision-making and effort-making, due to the low costs compared to other Int disciplines. The volume does not present a solution to current problems, but through its didactic, documentary and informative nature it offers professional support at high standards to analysts and managers in decision making.

Super Thinking - Gabriel Weinberg

A WALL STREET JOURNAL BESTSELLER!
"You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to

have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read Super Thinking, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Crime and Punishment in Indonesia - Tim Lindsey 2020-12-14
Indonesia’s criminal law system faces major challenges. Despite the country’s transition to democracy, both the Criminal Code and the Criminal Procedure Code are badly out of date, the former only superficially changed since colonial times and the latter remaining as it was under Soeharto’s authoritarian New Order regime. Law enforcement officers and judges are widely seen as corrupt or incompetent, and new laws, including new Islamic laws passed at the regional level, often contradict the Criminal Code and national statutes, including human

rights laws. This book, based on extensive original research by leading scholars in the field, provides an overall assessment of the state of criminal law, law enforcement and penal policy in Indonesia, considers in depth a wide range of specific areas of criminal law, and discusses recent efforts at reform and their prospects for success.

Windswept: Walking the Paths of Trailblazing Women - Annabel Abbs
2021-09-07

Named a Pick of the Month by Apple Books and a Best Book of Fall by Powell's and The Story Exchange "A gorgeous and revelatory blend of memoir, travelogue, and long-forgotten history."—Abbott Kahler
Annabel Abbs's *Windswept: Walking the Paths of Trailblazing Women* is a

beautifully written meditation on connecting with the outdoors through the simple act of walking. In captivating and elegant prose, Abbs follows in the footsteps of women who boldly reclaimed wild landscapes for themselves, including Georgia O'Keeffe in the empty plains of Texas and New Mexico, Nan Shepherd in the mountains of Scotland, Gwen John following the French River Garonne, Daphne du Maurier along the River Rhône, and Simone de Beauvoir—who walked as much as twenty-five miles a day in a dress and espadrilles—through the mountains and forests of France. Part historical inquiry and part memoir, the stories of these writers and artists are laced together by moments in Abbs's own life, beginning with her poet father who raised her in the Welsh

countryside as an “experiment,” according to the principles of Rousseau. Abbs explores a forgotten legacy of moving on foot and discovers how it has helped women throughout history to find their voices, to reimagine their lives, and to break free from convention. As Abbs traces the paths of exceptional women, she realizes that she, too, is walking away from her past and into a radically different future. Windswept crosses continents and centuries in a provocative and poignant account of the power of walking in nature.

The End of Copycat China - Shaun Rein
2014-10-20

China's changing course, and sustainable success requires a shift in strategy The End of Copycat China helps business executives and investors understand how China's

economy is shifting from one based on heavy investment to one on services and consumption by providing insight that help shape effective strategy. Drawing from over 50,000 interviews with entrepreneurs, venture capitalists, private equity investors, private Chinese companies, and multinationals, this book describes how Chinese firms are increasingly focused on innovation rather than copying what worked in America and how consumers are evolving with their hopes, dreams and aspirations. China's growth model of the last three decades is becoming increasingly ineffective, as relying on heavy investment and exports is becoming less and less feasible. Fifty percent of China's growth in 2013 stemmed from consumption, the government is establishing a Free

Trade zone in Shanghai and ending the dominance of state-owned enterprises. This book provides a roadmap for companies and investors looking to navigate these changes and capture emerging trends, with deep insight and practical guidance on what innovation looks like in the new China. Survey the development of innovation taking place in China's economy, from an insider's perspective Consider the changes that must take place to shore up the broken growth model Examine the consumer trends emerging in the midst of rapid market evolution Understand how China's rise will impact its neighbors like Japan, Vietnam, Indonesia, and Cambodia China's dramatic shift toward consumption presents a tremendous opportunity for foreign business, but traditional

tactics are outdated at best, financially fatal at worst, as local competitors focus on innovation and move up the value chain and as consumers look for new brands and categories to spend money on. New strategies are needed to keep pace with the changing regulatory and consumer environments, and "business as usual" won't get very far. The End of Copycat China is the business guide to this emerging market, with expert guidance from the inside.

Digital Economic Policy - Mario Mariniello 2022-06-30

The emergence of new technologies and business models such as data analytics, online platforms, and artificial intelligence has shaken the economy and society at their foundations. Recently, it has become apparent that public authorities must take a pro-active role to define the rules of the newly emerged markets before potential issues and concerns

cement. How rules are currently written determines who will exert a stronger influence on the economy and society in the coming years. This is key reason why digital policymakers are currently exposed to tremendous pressure by stakeholders. This book takes a journey through all the main areas in the digital economy that beg for policy action. Readers may learn about the general features of a digital economy and the EU long term strategic plans to govern it. They may learn about telecom markets, the data economy, the digitization of the public sector, cybersecurity, the platform economy, liability for online content, e-commerce, the sharing economy, the impact of technology on labour markets, digital inequality, disinformation, and artificial intelligence. This book

provides students with the background knowledge and analytical tools necessary to understand, analyse, and assess the impact of EU digital policies on the European economy and society. The approach is both theoretical and applied. The main goal is to prepare students to give informed and economically sound advice to an EU policymaker for digital affairs.

Social Warming - Charles Arthur
2021-06-24

Nobody meant for this to happen. Facebook didn't mean to facilitate a genocide. Twitter didn't want to be used to harass women. YouTube never planned to radicalise young men. But with billions of users, these platforms need only tweak their algorithms to generate more 'engagement'. In so doing, they bring unrest to previously settled communities and erode our relationships. Social warming has happened gradually – as a by-product of our preposterously convenient digital existence. But the gradual deterioration of our attitudes and behaviour on- and offline – this vicious cycle of anger and outrage –

is real. And it can be corrected. Here's how.

Television and the Second Screen -
James Blake 2016-11-10

Television is changing almost beyond recognition. In the battle for consumers, social media sites, smart phones and tablets have become rivals to traditional linear TV. However, audiences and producers are also embracing mobile platforms to enhance TV viewing itself. This book examines the emerging phenomenon of the second screen: where users are increasingly engaging with content on two screens concurrently. The practice is transforming television into an interactive, participatory and social experience. James Blake examines interactive television from three crucial angles: audience motivation and agency, advances in TV production

and the monetisation of second screen content. He also tracks its evolution by bringing together interviews with more than 25 television industry professionals - across the major UK channels - including commissioning editors, digital directors, producers and advertising executives. These reveal the successes and failures of recent experiments and the innovations in second screen projects. As the second screen becomes second nature for viewers and producers, the risks and opportunities for the future of television are slowly beginning to emerge. Television and the Second Screen will offer students and scholars of television theory, industry professionals and anyone with an abiding interest in television and technology, an

accessible and illuminating guide to this important cultural shift.
