Sharon E. Shaffer

2020-10-13

International Thinking on Children in Museums introduces current research, theory, and practice about young learners in museums around the world. The book imparts vital knowledge about the nature of childhood and children's learning that will improve understanding of the very youngest museum-goers. Including contributions from practitioners, scholars, and consultants around the globe, this volume examines museum practices and children's learning across a range of distinct cultural and

geographic locales. The framework of the book is based on research and current thinking in the realm of developmental psychology, sociology, and anthropology, allowing the contributors to examine the evolution of early learning and children's programs through a sociocultural lens. This broad-based look at international museum practices for children offers a rare view of the field from an important, but oft-neglected perspective: that of society and culture. *International Thinking on Children in Museums* will broaden understanding of museum practice across cultures and geographic regions and, as such, will be of interest to scholars and students engaged in the study of museum education, museum studies, and early learning. It should also

provide a much-needed source of inspiration for museum practitioners working around the world.

Healthy Buildings - Joseph G. Allen

2022-10-18

A revised and updated edition of the landmark work the New York Times hailed as “a call to action for every developer, building owner, shareholder, chief executive, manager, teacher, worker and parent to start demanding healthy buildings with cleaner indoor air.” For too long we’ve designed buildings that haven’t focused on the people inside—their health, their ability to work effectively, and what that means for the bottom line. An authoritative introduction to a movement whose vital importance is now all too clear, *Healthy Buildings* breaks down the science and makes a compelling business case for creating healthier offices, schools, and homes. As the COVID-19 crisis brought into

sharp focus, indoor spaces can make you sick—or keep you healthy. Fortunately, we now have the know-how and technology to keep people safe indoors. But there is more to securing your office, school, or home than wiping down surfaces. Levels of carbon dioxide, particulates, humidity, pollution, and a toxic soup of volatile organic compounds from everyday products can influence our health in ways people aren’t always aware of. This landmark book, revised and updated with the latest research since the COVID-19 pandemic, lays out a compelling case for more environmentally friendly and less toxic offices, schools, and homes. It features a concise explanation of disease transmission indoors, and provides tips for making buildings the

first line of defense. Joe Allen and John Macomber dispel the myth that we can't have both energy-efficient buildings and good indoor air quality. We can—and must—have both. At the center of the great convergence of green, smart, and safe buildings, healthy buildings are vital to the push for more sustainable urbanization that will shape our future.

30 Over 40 - Holly O.

Brien 2011-05

Holly O'Brien began her fitness career in her early 20's in several fitness clubs, worked with pro ball players then gave it up for stunt work in film. She later migrated her entertainment career into behind the scenes technical operations in television broadcasting, post production and animation. That was until one day while

managing a video-on-demand control room arguing over the picture quality of a movie she had an epiphany; why was she doing that which would only keep people on the couch? She wanted people to get off the couch and go exercise and she realized her own career certainly wasn't helping. After careful review of the challenges involved she gave up her 23 year entertainment career and re-certified her pedigrees with International Sports Sciences Association, teamed up as a coach for a Fitness Boot Camp and took on a roster of private clients only to discover what seemed to be a unilateral problem. Folks were stuck, really stuck and she was more stunned by why. She decided to approach a fix from a very different angle; one that folks could do on their own. A Fitness

Guide written with a light hearted spirit to assist folks who wish to train themselves. A guide that covers free weights, aerobics, understanding your own metabolic rate, utilizing food for fitness and tackles the continually frustrating mission of how to loose stored body fat. It's fun, fast with plenty of tools to create your own program, loose stored body fat and pursue a sport or two. As a labor of love she hopes you'll drag this book around with you and use it often to assist with clearing up the confusion, inspire new activities where they may not be any, bury old frustrations forever and have some fun along the way.

Quaker Writings - Thomas D. Hamm 2011-01-25

An illuminating collection of work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives

a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in
