Revisiting Austria - Gundolf Graml 2020-04-01

Following the transformations and conflicts of the first half of the twentieth century, Austria's emergence as an independent democracy heralded a new era of stability and prosperity for the nation. Among the new developments was mass tourism to the nation's cities, spa towns, and wilderness areas, a phenomenon that would prove immensely influential on the development of a postwar identity. Revisiting Austria incorporates films, marketing materials, literature, and first-person accounts to explore the ways in which tourism has shaped both international and domestic perceptions of Austrian identity even as it has failed to confront the nation's often violent and troubled history.

How to STEM - Carol Smallwood
2013-12-05

During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums. The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with

Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs. Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

The Death and Life of Great American Cities - Jane Jacobs 2016-07-20

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

62 Projects to Make with a Dead

Computer - Randy Sarafan 2010-02-11 Computer hacking takes on a whole new meaning when you're going at it with a screwdriver and hammer: announcing the most wildly inventive, eco-friendly craft book on repurposing everyday objects since Generation T. Except in this case the raw material isn't a T-shirt, but the stuff we all have lying around and have no idea what to do with, or even how to get rid of properly—your old cell phone, a broken printer, irredeemable iPod, busted digital camera, mysterious thatches of cables and wires, orphaned keyboards, and of course, those dead PCs and laptops. Created by a Parsons design graduate who's obsessed with navigating the intersection of art and technology, here are 62 ingenious projects that are irresistibly geek-chic. An iMac Terrarium—how cool is that? A laptop Digital Photo Frame. The impressively green Scanner Compost Bin. Plus a power strip Bird Feeder, Walkman Soap Dish, My First Squiggle Bot, Qwerty Hair Tie, Flat-screen Ant Farm. Each project has complete, step-by-step instructions, is rated by

difficulty—in a thorough first chapter the author covers all the tools and skills needed to take apart electronics safely—and is arranged by use, from stuff for the house, to fashion, toys, arts and crafts, items for pets, and more.

Landmark Cases in Succession Law - Brian Sloan 2019-10-31

The Landmark Cases series highlights the historical antecedents of what are widely considered to be the leading cases in a discipline, and seeks to provide contexts in which to better understand how and why certain cases came to be regarded as the 'landmark' cases in any given field. Succession law's long pedigree, near-universal application, immense capacity for human interest stories, somewhat uncertain future in England and Wales, and close connection to demographics make it an ideal candidate for a Landmark Cases volume. The distinguished contributors to this collection consider cases ranging from 1720 to 2017, covering issues such as will-making and interpretation, the position of beneficiaries and personal representatives, testamentary promises, and the extent of testamentary freedom in England and Wales and beyond. The cases are relevant not only to scholars and students of succession law per se, but also those working in fields such as tax, trusts, tort and land law. They raise issues as diverse as class, colonialism, familial dynamics, expectations and obligations, mental health, and the proper roles of the legal profession and the welfare state. The collection will provoke much discussion on what makes a 'landmark' case, as well as

on the peculiarities and limitations of the case law method.

Pain, Death, and the Law - Austin Sarat 2009-09-11

This collection of essays examines the relationship between pain, death, and the law and addresses the question of how the law constructs pain and death as jurisprudential facts. The empirical focus of these essays enables the reader to delve into both the history and the theoretical complexities of the pain-death-law relationship. The combination of the theoretical and the empirical broadens the contribution this volume will undoubtedly make to debates in which the right to live or die is the core issue at hand. This volume will be an important read for policy makers and legal practitioners and a valuable text for courses in law, the social sciences, and the humanities. Austin Sarat is William Nelson Cromwell Professor of Jurisprudence and Political Science, Amherst College.

The Union Must Stand - John Quincy Adams Campbell 2000

Only rarely does a Civil War diarist combine detailed observations of events with an intelligent understanding of their significance. John Campbell, a newspaperman before the war, left such a legacy. A politically aware Union soldier with strong moral and abolitionist beliefs, Campbell recorded not only his own reflections on wartime matters but also those of his comrades and the southerners--soldiers, civilians, and slaves--that he encountered. Campbell served in the Fifth Iowa Volunteer Infantry from 1861 to 1864. He participated in the war's major theaters and saw early action at Island No. 10, Iuka, and Corinth. His diary is especially valuable because he viewed the war as both a field-commissioned officer able to make intelligent comments about combat and as a former enlisted man with a feel for the soldier's

life. He was present during Grant's campaign at Vicksburg and depicted the bloody failure of the May 22 storming of Confederate fortifications in unsparing terms; he then went on to fight at Chattanooga and took Gen. William T. Sherman to task for his poor leadership at Missionary Ridge. The Union Must Stand contains more than Campbell's journal. Editors Mark Grimsley and Todd Miller have written an introduction that provides background information and places the diary in the context of current debate over the ideological commitments of Civil War soldiers. An appendix reproduces fifteen of Campbell's letters to his hometown newspaper, in which he shared his impressions of both war and slavery. With its unique point of view, valuable insights into the conduct of various campaigns, and some of the most vivid depictions of Civil War combat ever set to paper, Campbell's diary offers both a wealth of new primary material for historians and exciting reading for enthusiasts. Combining a journalist's accuracy with a zealot's idealism, it makes a forceful statement about why one man went to war. The Editors: Mark Grimsley is an associate professor of history at the Ohio State University and the author of *The Hard Hand of War: Union Military Policy Toward Southern Civilians, 1861-1865*. Todd D. Miller is a history teacher and an independent researcher for Time-Life Books' Civil War series. He lives in Ashland, Ohio.

The Coldest Touch - Isabel Sterling
2021-12-07

"Vampires going to high school, but make it queer. Sterling delivers a fresh, thoughtful take on beloved paranormal tropes with a delightfully bloody romance." -Mara Fitzgerald, author of *Beyond the Ruby Veil* From the author of *These Witches Don't Burn* comes another paranormal romance for fans of Richelle Mead and Stephenie Meyer. Elise Beaumont is cursed. With every touch, she experiences exactly how her loved ones will die. And after her brother's death—a death she predicted but was unable to prevent—Elise is

desperate to get rid of her terrible gift, no matter the cost. Claire Montgomery also has a unique relationship with death, mostly because she's already dead. Technically, anyway. Claire is a vampire, and she's been assigned by the Veil to help Elise master her rare Death Oracle powers. At first, Elise is reluctant to work with a vampire, but when she predicts a teacher's imminent murder, she's determined to stop the violent death, even if it means sacrificing her own future to secure Claire's help. The trouble is, Claire and Elise aren't the only paranormals in town—a killer is stalking the streets, and Claire can't seem to shake the pull she feels toward Elise, a romance that could upend the Veil's mission. But as Elise and Claire grow closer, Elise begins to wonder—can she really trust someone tasked with securing her loyalty? Someone who could so easily kill her? Someone who might hold the key to unraveling her brother's mysterious death?
