Turning Over a New Leaf - Erik Kwakkel 2012
"Books before print -manuscripts- were modified continuously throughout the medieval period. Focusing on the ninth and twelfth centuries, this volume explores such material changes as well as the varying circumstances under which handwritten books were produced, used and collected. An important theme is the relationship

between the physical book and its users. Can we reflect on reading practices through an examination of the layout of a text? To what extent can we use the contents of libraries to understand the culture of the book? The volume explores such issues by focusing on a broad palette of texts and through a detailed analysis of manuscripts from all corners of Europe"--

Respawn - Colin Milburn 2018-11-15

In *Respawn* Colin Milburn examines the connections between video games, hacking, and science fiction that galvanize technological activism and technological communities.

Discussing a wide range of games, from *Portal* and *Final Fantasy VII* to *Super Mario Sunshine* and *Shadow of the Colossus*, Milburn illustrates how they impact the lives of gamers and non-gamers alike. They also serve as resources for critique, resistance, and insurgency, offering a space for players and hacktivist groups such as Anonymous to challenge obstinate systems and experiment with alternative futures. Providing an essential walkthrough guide to our digital culture and its high-tech controversies, Milburn shows how games and playable media spawn new modes of engagement in a computerized world.

The African American Male School

Adaptability Crisis (Amsac) - Joe L. Rempson
2016-03-12

The African American Male School Adaptability Crisis (AMSAC) cannot be solved by the school alone. It is a race problem which can only be solved if we black males provide the leadership in tackling our three major demons which now mainly account for the problem: IQ lag-fatherless families-crime. AMSAC had its origin about 100 years ago when, after the death of Washington, DuBois gained ascendancy in our African American Garden of Eden and replaced Washingtons brains, property, and character gospel with a civil rights agenda. That agenda has led to a civil-rights fixation and our second bondage, Victimology, wherein being the victim has become part of our core identity and made us psychological slaves. Rather than being proud and self-reliant, disproportionately, we have come to see ourselves as victims who are entitled to system help and special treatment. This bondage and it is a bondage -- vitiates our manhood and the energy and drive required to pursue the adaptation pathway paved by

Washington, but demonized by DuBois. Return to that pathway and we can confront and conquer AMSAC and our three major demons. Guided by history and the research evidence, this book details how. Its 20 chapters make for long reading, but, just by reading the first and last chapters, you can get the message. The motto of the proposed evidence-based experimental program, the African American Male Career Pathway Program (AMCAP). A special appeal is made to black athletes and entertainers to help propagate this motto and support the proposed high school student clubs (Student AMCAPs) in its implementation.

Beyond Zuccotti Park - Ronald Shiffman
2012-10-02

Protests from Tahrir Square to Zuccotti Park have brought the crisis of public space to the forefront of our attention: Where can the public congregate? How can city planning, design, and policies support First Amendment rights to public assembly and free speech? Forty experts in

social science, planning, design, civil liberties, urban affairs, and the arts use the Occupy movement as a springboard for original, multidisciplinary essays that address these exigent questions. This foundational book puts issues of democracy and civic engagement back into the center of dialogue about the built environment.

The Bible in American Life - Philip Goff
2016-02-29

There is a paradox in American Christianity. According to Gallup, nearly eight in ten Americans regard the Bible as either the literal word of God or inspired by God. At the same time, surveys have revealed gaps in these same Americans' biblical literacy. These discrepancies reveal the complex relationship between American Christians and Holy Writ, a subject that is widely acknowledged but rarely investigated. *The Bible in American Life* is a sustained, collaborative reflection on the ways Americans use the Bible in their personal lives. It also

considers how other influences, including religious communities and the Internet, shape individuals' comprehension of scripture. Employing both quantitative methods (the General Social Survey and the National Congregations Study) and qualitative research (historical studies for context), *The Bible in American Life* provides an unprecedented perspective on the Bible's role outside of worship, in the lived religion of a broad cross-section of Americans both now and in the past. The Bible has been central to Christian practice, and has functioned as a cultural touchstone. From the broadest scale imaginable, national survey data about all Americans, down to the smallest details, such as the portrayal of Noah and his ark in children's Bibles, this book offers insight and illumination from scholars across the intellectual spectrum. It will be useful and informative for scholars seeking to understand changes in American Christianity as well as clergy seeking more effective ways to preach and teach about

scripture in a changing environment.

Public Space Reader - Miodrag Mitrašinović
2021-03-30

Recent global appropriations of public spaces through urban activism, public uprising, and political protest have brought back democratic values, beliefs, and practices that have been historically associated with cities. Given the aggressive commodification of public re- sources,

public space is critically important due to its capacity to enable forms of public discourse and social practice which are fundamental for the well-being of democratic societies. Public Space Reader brings together public space scholarship by a cross-disciplinary group of academics and specialists whose essays consider fundamental questions: What is public space and how does it manifest larger cultural, social, and political processes? How are public spaces designed, socially and materially produced, and managed? How does this impact the nature and character of public experience? What roles does it play in the struggles for the just city, and the Right to The City? What critical participatory approaches can be employed to create inclusive public spaces that respond to the diverse needs, desires, and aspirations of individuals and communities alike? What are the critical global and comparative perspectives on public space that can enable further scholarly and professional work? And, what are the futures of public space in the face of

global pandemics, such as COVID-19? The readers of this volume will be rewarded with an impressive array of perspectives that are bound to expand critical understanding of public space. **The Announcement** - Michael J. Gajda 2014-02 "You drive down a road for the hundredth time and notice a house you've never noticed before. You look at a picture and never saw that green spot before. You pick veggies or fruit and think you've cleared the area, then go back and see all the ones you missed. It's all in your point of view. There's a new perspective, a different angle - and you see things differently. and that's where the Announcement comes in. It provides that different point of view, that new perspective, that different angle, and does so with a purpose, It's for anyone who would like to see the world be a better place, but will challenge your ideas of what "better" is. and when you're done, and have had a chance to absorb the Announcement, think of others who would hate this book. Then give it to them and cajole, bribe, beg or whatever you

have to do to get them to read it, because they are the ones who desperately need it." Bill Sturk, artist and musician

The Leaf Detective - Heather Lang 2021-02-09
2022 Green Earth Book Award Winner NCSS
Septma Clark Award, Elementary Level Honoree
NSTA/CBC Best STEM Book Junior Library Guild
Selection John Burroughs Association Riverby
Award Honorable Mention, Sigurd F. Olson Nature
Writing Award This picture book biography tells
the story of Meg Lowman, a groundbreaking

female scientist called a "real life Lorax" by National Geographic, who was determined to investigate the marvelous, undiscovered world of the rainforest treetops. Meg Lowman was always fascinated by the natural world above her head — the colors, the branches, and, most of all, the leaves and mysterious organisms living there. Meg set out to climb up and investigate the rain forest tree canopies — and to be the first scientist to do so. But she encountered challenge after challenge. Male teachers would not let her into their classrooms, the high canopy was difficult to get to, and worst of all, people were logging and clearing the forests. Meg never gave up or gave in. She studied, invented, and persevered, not only creating a future for herself as a scientist, but making sure that the rainforests had a future as well. Working closely with Meg Lowman, author Heather Lang and artist Jana Christy beautifully capture Meg's world in the treetops. "Meg Lowman or 'Canopy Meg' is a true hero, a courageous explorer, who made

amazing discoveries high in the forest canopy. The Leaf Detective captures the magic of that little-known world with its clear, informative text and fabulous illustrations. Young readers everywhere will be fascinated and inspired to learn more about nature." —Jane Goodall, PhD, DBE, Founder of the Jane Goodall Institute and Pioneer of Peace "Margaret Lowman is a pioneer scientist in a discipline that demands exceptional imagination, courage, and physical rigor. But of equal importance, she has created an extraordinarily important branch of environmental and conservation research. Heather Lang and Jana Christy, in this charming introduction, have invited us to climb on up and visit her." —Edward O. Wilson, Pulitzer Prize winner and Professor Emeritus, Harvard University

The Folded Leaf - William Maxwell 1959

Indigenous Interfaces - Jennifer Gómez Menjívar 2019-05-07

Cultural preservation, linguistic revitalization, intellectual heritage, and environmental sustainability became central to Indigenous movements in Mexico and Central America after 1992. While the emergence of these issues triggered important conversations, none to date have examined the role that new media has played in accomplishing their objectives. *Indigenous Interfaces* provides the first thorough examination of indigeneity at the interface of cyberspace. Correspondingly, it examines the impact of new media on the struggles for self-determination that Indigenous peoples undergo in Mexico and Central America. The volume's contributors highlight the fresh approaches that Mesoamerica's Indigenous peoples have given to new media—from YouTubing Maya rock music to hashtagging in Zapotec. Together, they argue that these cyberspatial activities both maintain tradition and ensure its continuity. Without considering the implications of new technologies, *Indigenous Interfaces* argues, twenty-first-

century indigeneity in Mexico and Central America cannot be successfully documented, evaluated, and comprehended. *Indigenous Interfaces* rejects the myth that indigeneity and information technology are incompatible through its compelling analysis of the relationships between Indigenous peoples and new media. The volume illustrates how Indigenous peoples are selectively and strategically choosing to interface with cybertechnology, highlights Indigenous interpretations of new media, and brings to center Indigenous communities who are resetting modes of communication and redirecting the flow of information. It convincingly argues that interfacing with traditional technologies simultaneously with new media gives Indigenous peoples an edge on the claim to autonomous and sovereign ways of being Indigenous in the twenty-first century. Responsibility and Governance - David Crowther
2018-07-02

This book examines various aspects of changes

to business behavior through the lenses of the "twin pillars" of sustainability - responsibility and governance. It discusses whether the focus of corporate social responsibility has changed so much that we need to think about redefinitions of key concepts in the field, and analyses both the theory and practice in a variety of ways to enable conclusions to be drawn about the changes needed to any definitions. This approach is based on the tradition of the Social Responsibility Research Network, which in its 15-year history has sought to broaden the discourse and to treat all research as inter-related and relevant to business. This book consists of the best contributions from the 16th International Conference on Corporate Social Responsibility and 7th Organisational Governance Conference held in Derby, United Kingdom in August/September 2017.

Reliquiæ Sacræ Carolinæ. Or The Works -

Charles I (koning van Groot-Brittannië) 1657

Father of the Comic Strip - David Kunzle

2010-12-01

Sixty years before the comics entered the American newspaper press, Rodolphe Töpffer of Geneva (1799-1846), schoolmaster, university

professor, polemical journalist, art critic, landscape draftsman, and writer of fiction, travel tales, and social criticism, invented a new art form: the comic strip, or “picture story,” that is now the graphic novel. At first he resisted publishing what he called his “little follies.” When he did, they became instantly popular, plagiarized, and imitated throughout Europe and the United States. Töpffer developed a graphic style suited to his poor eyesight: the doodle, which he systematized and also theorized. The drawings, with their “modernist” spontaneous, flickering, broken lines, forming figures in mad hyperactivity, run above deft, ironic captions and propel narratives of surreal absurdity. The artist's maniacal protagonists mix social satire with myth. By the mid-nineteenth century, Messrs. Jabot, Festus, Cryptogame, and other members of the crazy family, comprising eight picture stories in all, were instant folk heroes. In a biographical framework, Kunzle situates the comic strips in the Genevan and European

culture of the time as well as in relation to Töpffer's other work, notably his hilarious travel tales, and recounts their curious genesis (with an initial imprimatur from Goethe, no less) and their controversial success. Kunzle's study, the first in English on the writer-artist, accompanies Rodolphe Töpffer: The Complete Comic Strips, a facsimile edition of the strips themselves, with the first-ever translation of these into English.

The Shadow Glass - Josh Winning 2022-03-22

A thrilling race against the clock to save the world from fantasy creatures from a cult 80s film. Perfect for fans of Henson Company puppet classics such as *Labyrinth*, *Dark Crystal* and *The Never-Ending Story*. Jack Corman is failing at life. Jobless, jaded and on the "wrong" side of thirty, he's facing the threat of eviction from his London flat while reeling from the sudden death of his father, one-time film director Bob Corman. Back in the eighties, Bob poured his heart and soul into the creation of his 1986 puppet fantasy *The Shadow Glass*, a film Jack loved as a child, idolising its fox-like hero Dune. But *The Shadow*

Glass flopped on release, deemed too scary for kids and too weird for adults, and Bob became a laughing stock, losing himself to booze and self-pity. Now, the film represents everything Jack hated about his father, and he lives with the fear that he'll end up a failure just like him. In the wake of Bob's death, Jack returns to his decaying home, a place creaking with movie memorabilia and painful memories. Then, during a freak thunderstorm, the puppets in the attic start talking. Tipped into a desperate real-world quest to save London from the more nefarious of his father's creations, Jack teams up with excitable fanboy Toby and spiky studio executive Amelia to navigate the labyrinth of his father's legacy while conjuring the hero within--and igniting a Shadow Glass resurgence that could, finally, do his father proud.

Distant sisters - James Keating 2020-09-29
In the 1890s Australian and New Zealand women became the first in the world to win the vote. Buoyed by their victories, they promised to lead a global struggle for the expansion of women’s electoral rights. Charting the common trajectory of the colonial suffrage campaigns, *Distant Sisters* uncovers the personal and material networks that transformed feminist organising. Considering intimate and institutional connections, well-connected elites and ordinary women, this book argues developments in Auckland, Sydney, and Adelaide—long considered the peripheries of the feminist world—cannot be separated from its glamorous metropolises. Focusing on Antipodean women,

simultaneously insiders and outsiders in the emerging international women’s movement, and documenting the failures of their expansive vision alongside its successes, this book reveals a more contingent history of international organising and challenges celebratory accounts of fin-de-siècle global connection.

Interrogating Motherhood - Lynda R. Ross
2016-12-30

It has been four decades since the publication of Adrienne Rich’s *Of Woman Born* but her analysis of maternity and the archetypal Mother remains a powerful critique, as relevant today as it was at the time of writing. It was Rich who first defined the term “motherhood” as referent to a patriarchal institution that was male-defined, male controlled, and oppressive to women. To empower women, Rich proposed the use of the word “mothering”: a word intended to be female-defined. It is between these two ideas—that of a patriarchal history and a feminist future—that the introductory text, *Interrogating Motherhood*,

begins. Ross explores the topic of mothering from the perspective of Western society and encourages students and readers to identify and critique the historical, social, and political contexts in which mothers are understood. By examining popular culture, employment, public policy, poverty, “other” mothers, and mental health, *Interrogating Motherhood* describes the fluid and shifting nature of the practice of mothering and the complex realities that define contemporary women’s lives.

The Lonely Mind of God - Sherman O'Brien
2021-01-26

Current students of philosophy or armchair
philosophers... Want the answer to the Primordial
Existential Question: Why is there something
rather than nothing? While history has produced
no shortage of attempted answers, clearly none
is the answer. Now comes the unique perspective
of acosmism to provide a complete and plausible
answer. After a lifetime of reflection, acosmist
Sherman O'Brien offers this analysis of the issues
and a thoughtful, reasoned answer to
philosophy's most vexing question. The acosmic
answer requires no faith whatsoever, either in
supernatural or unexplained causes; in fact, it
discourages it. Acosmism rejects both traditional
religion and philosophically neglectful science. As

a metaphysical system, it is based on an
epistemological insight, with implications for
immortality, determinism, ethics, and ultimate
purpose. Reasoned wholly from the ground up,
its conclusion is the very meaning of existence.
The solution to the Omniscience Riddle becomes
the key to understanding how the question is
best stated and understood. This book represents
one person's effort to make sense of what is true
and what only seems to be so. Why is there
something rather than nothing? What is your
potential role in the entirety of experience? This
foray into acosmism offers a path to the genuine
understanding of both existence and reality.

How Games Move Us - Katherine Isbister
2017-10-27

An engaging examination of how video game
design can create strong, positive emotional
experiences for players—with examples from

popular, indie, and art games. This is a renaissance moment for video games—in the variety of genres they represent, and the range of emotional territory they cover. But how do games create emotion? In *How Games Move Us*, Katherine Isbister takes the reader on a timely and novel exploration of the design techniques that evoke strong emotions for players. She counters arguments that games are creating a generation of isolated, emotionally numb, antisocial loners. Games, Isbister shows us, can actually play a powerful role in creating empathy and other strong, positive emotional experiences; they reveal these qualities over time, through the act of playing. She offers a nuanced, systematic examination of exactly how games can influence emotion and social connection, with examples—drawn from popular, indie, and art games—that unpack the gamer’s experience. Isbister describes choice and flow, two qualities that distinguish games from other media, and explains how game developers build upon these

qualities using avatars, non-player characters, and character customization, in both solo and social play. She shows how designers use physical movement to enhance players’ emotional experience, and examines long-distance networked play. She illustrates the use of these design methods with examples that range from Sony’s *Little Big Planet* to the much-praised indie game *Journey* to art games like Brenda Romero’s *Train*. Isbister’s analysis shows us a new way to think about games, helping us appreciate them as an innovative and powerful medium for doing what film, literature, and other creative media do: helping us to understand ourselves and what it means to be human.
