Aldo Leopold - 2012

For the Health of the Land - Aldo Leopold 2012-07-16

Aldo Leopold's classic work A Sand County Almanac is widely regarded as one of the most influential conservation books of all time. In it, Leopold sets forth an eloquent plea for the development of a "land ethic" -- a belief that humans have a duty to interact with the soils, waters, plants, and animals that collectively comprise "the land" in ways that ensure their well-being and survival. For the Health of the Land, a new collection of rare and previously unpublished essays by Leopold, builds on that vision of ethical land use and develops the concept of "land health" and the practical measures landowners can take to

sustain it. The writings are vintage Leopold -- clear, sensible, and provocative, sometimes humorous, often lyrical, and always inspiring. Joining them together are a wisdom and a passion that transcend the time and place of the author's life. The book offers a series of forty short pieces, arranged in seasonal "almanac" form, along with longer essays, arranged chronologically, which show the development of Leopold's approach to managing private lands for conservation ends. The final essay is a never before published work, left in pencil draft at his death, which proposes the concept of land health as an organizing principle for conservation. Also featured is an introduction by noted Leopold scholars J. Baird Callicott and Eric T. Freyfogle that provides a brief biography of Leopold and places the essays in the context of his life and work, and an afterword by conservation biologist Stanley A. Temple that comments on Leopold's ideas from the perspective of modern wildlife management. The book's conservation message and practical ideas are as relevant today as they were when first written over fifty years ago. For the Health of the Land represents a stunning new addition to the literary legacy of Aldo Leopold.

A Sand County Almanac - Aldo Leopold 1968-12-31

First published in 1949 and praised in The New York Times Book Review as "a trenchant book, full of vigor and bite," A Sand County Almanac combines some of the finest nature writing since Thoreau with an outspoken and highly ethical regard for America's relationship to the land. Written with an unparalleled understanding of the ways of nature, the book includes a section on the monthly changes of the Wisconsin countryside; another part that gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; and a final section in which Leopold addresses the philosophical issues involved in wildlife conservation. As the forerunner of such important books as Annie Dillard's *Pilgrim at Tinker Creek*, Edward Abbey's *Desert Solitaire*, and Robert Finch's *The Primal Place*, this classic work remains as relevant today as it was forty years ago.

Aldo Leopold and the Ecological Conscience - Richard L. Knight 2002-04-11

In *Aldo Leopold and the Ecological Conscience* ecologists, wildlife biologists, and other professional conservationists explore the ecological legacy of Aldo Leopold and his *A Sand County Almanac* and his contributions to the environmental movement, the philosophy of science, and natural resource management. Twelve personal essays describe the enormous impact he has had on each author, from influencing the daily operations of the U.S. Fish and Wildlife Service and the creation of a land-use ethics guide for Forest Service personnel, to much needed inspiration for continuing on in today's large, complex and often problematic world of science. Here is Aldo Leopold as a mentor, friend, and

companion and an affirmation of his hope that science will continue to be practiced in the cause of conservation.

Aldo Leopold's Odyssey, Tenth Anniversary Edition - Julianne Lutz Warren 2016-05-24

In 2006, Julianne Lutz Warren (née Newton) asked readers to rediscover one of history's most renowned conservationists. Aldo Leopold's *Odyssey* was hailed by The New York Times as a "biography of ideas," making "us feel the loss of what might have followed *A Sand County Almanac* by showing us in authoritative detail what led up to it." Warren's astute narrative quickly became an essential part of the Leopold canon, introducing new readers to the father of wildlife ecology and offering a fresh perspective to even the most seasoned scholars. A decade later, as our very concept of wilderness is changing, Warren frames Leopold's work in the context of the Anthropocene. With a new preface and foreword by Bill McKibben, the book underscores the ever-growing importance of Leopold's ideas in an increasingly human-dominated landscape. Drawing on unpublished archives, Warren traces Leopold's quest to define and preserve land health. Leopold's journey took him from Iowa to Yale to the Southwest to Wisconsin, with fascinating stops along the way to probe the causes of early land settlement failures, contribute to the emerging science of ecology, and craft a new vision for land use. Leopold's life was dedicated to one fundamental dilemma: how can people live prosperously on the land and keep it healthy, too? For anyone compelled by this question, the Tenth Anniversary Edition of Aldo Leopold's *Odyssey* offers insight and inspiration.

Round River - Aldo Leopold 1972-03-30

To those who know the charm of Aldo Leopold's writing in *A Sand County Almanac*, this collection from his journals and essays will be a new delight. The journal entries included here were written in camp during his many field trips--hunting, fishing, and exploring--and they indicate the source of ideas on land ethics found in his longer essays. They reflect as well two long canoe

trips in Canada and a sojourn in Mexico, where Leopold hunted deer with bow and arrow. The essays presented here are culled from the more contemplative notes which were still in manuscript form at the time of Leopold's death in 1948, fighting a brush fire on a neighbor's farm. Round River has been edited by Leopold's son, Luna, a geologist well-known in the field of conservation. It is also charmingly illustrated with line drawings by Charles W. Schwartz. All admirers of Leopold's work--indeed, all lovers of nature--will find this book richly rewarding.

The Land Pyramid as Philosophy and Structure in Aldo Leopold's "Sand County Almanac" - Susanne Hefekäuser 2012-07-05

Seminar paper from the year 2007 in the subject American Studies - Literature, grade: 1,0, Johannes Gutenberg University Mainz (Department of English and Linguistics), course: Nature Writing, language: English, abstract: The essays which compose Aldo Leopold's A Sand County Almanac and Sketches Here and There have been written in a time span of over thirty years, some

dating back to the 1910's. Therefore, the work could rather be seen as a collection of essays than a monographic book. Additionally, Leopold writes about such a diversity of places and species, that the work as a whole seems to be very fragmented. However, this style of composition is not as randomized as it seems at first glance. Instead, as a whole, the essays of A Sand County Almanac form the structure of an ecosystem with interdependent parts supporting and challenging each other. In this paper, I will first explore Leopold's own definition of an ecosystem as he describes it in the subchapter "The Land Pyramid". Then, I will demonstrate that A Sand County Almanac mirrors the complex structures of such a system.

Wolves - Julie Argyle 2022-04-12

An up-close look at the beautiful, yet fierce wolves of the greater Yellowstone area and their fight for survival. In Wolves: Western Warriors, the life of the powerful and majestic North American wolf, often considered to be vermin and dangerous, is presented, showing the struggle they have to simply survive in the wild and in a world where many people don't appreciate wolves and often set out to exterminate them. Argyle explores their behavior, their family dynamics, and what it means to be a wolf in the wilderness of the greater Yellowstone area through her stunning photography. She includes information about the reintroduction of wolves to Yellowstone and the ongoing struggle with keeping wolves listed as endangered species, while also offering her personal observations about the Wapiti Lake pack, among others, and several notable individual wolves. The strikingly beautiful images and the information and stories woven throughout the pages of the book showcase this frequently misunderstood, yet completely incredible species. "If you talk to the animals they will talk with you and you will know each other. If you do not talk to them you will not know then and what you do not know, you will not fear. What one fears, one destroys." — Chief Dan George, Tsleil-Waututh Nation, British Columbia, Canada.

Living a Land Ethic - Stephen A. Laubach 2014-07-24

A significant and important story about how a small group of landowners, inspired by Aldo Leopold, pioneered private conservation and ecological restoration. It offers an insightful reflection on what it means to live the 'land ethic' that is quite relevant to today's growing conservation challenges.--Tia Nelson

Aldo Leopold 2: "A Sand County Almanac" - 2015

"If the eco of ecology has literary cornerstones, they are Thoreau's 'Walden,' Marsh's 'Man and Nature,' Carson's 'Silent Spring,' and Leopold's 'A Sand County Almanac.'" -Sierra Club Magazine "The power of 'A Sand County Almanac' is that it helps us see in so many ways that the land is an organism, a circulating system, of which we are but a part. If and when we tinker, we must exercise ultimate care." -Woodnotes Published the year after Aldo Leopold died, *A Sand County Almanac*, a literary landmark in conservation, which blends poetic prose with keen observations of the natural world, was the naturalist's most influential work. Having been translated into nine languages, it has sold millions of copies worldwide and is considered to be a cornerstone for modern conservation science, policy, and ethics. This classic program, narrated by Lorne Greene (Bonanza), is based on the ecologist's famous book and includes his personal collection of beautiful nature sketches and philosophical essays on ecology and ethics.

Game Management - Aldo Leopold 1986-11-15

'One of the most influential books about the natural world ever published' Paul Kingsnorth, Guardian 'There are some who can live without wild things, and some who cannot,' begins Aldo

Leopold's totemic work of ecological thought. Ranging from lyrical observations of the changing seasons over a year on his Wisconsin farm to his hugely influential idea of a 'land ethic' signifying moral equilibrium between humans and all other life on earth, A Sand County Almanac changed perceptions of the natural world and helped give birth to the modern conservation movement. 'An unequivocal statement of conscience that will carry down the generations ... his argument seems more urgently true now than ever' The New York Times

The Top 50 Sustainability Books - Wayne Visser 2017-09-08

This unique title draws together in one volume some of the best thinking to date on the pressing social and environmental challenges we face as a society. These are the Top 50 Sustainability Books as voted for by the University of Cambridge Programme for Sustainability Leadership's alumni network of over 3,000 senior leaders from around the world. In addition to profiles of all 50 titles, many of the authors share their most recent reflections on the state of the world and the ongoing attempts by business, government and civil society to create a more sustainable future. Many of these authors have become household names in the environmental, social and economic justice movements - from Rachel Carson, Ralph Nader and E.F. Schumacher to Vandana Shiva, Muhammad Yunus and Al Gore. Others, such as Aldo Leopold, Thomas Berry and Manfred Max-Neef, are relatively undiscovered gems, whose work should be much more widely known. By featuring these and other seminal thinkers, The Top 50 Sustainability Books distils a remarkable collective intelligence - one that provides devastating evidence of the problems we face as a global society, yet also inspiring examples of innovative solutions; it explores our deepest fears and our highest hopes for the future. It is a must-read for anyone who wants to tap into the wisdom of our age.

Aldo Leopold: A Sand County Almanac & Other Writings on Conservation and Ecology (LOA #238) - Aldo Leopold 2013-03-21

A special edition of one of the greatest masterpieces of the environmental movement—plus original photographs and other writings on environmental ethics Since his death in 1948, Aldo Leopold has been increasingly recognized as one of the indispensable figures of American environmentalism. A pioneering forester, sportsman, wildlife manager, and ecologist, he was also a gifted writer whose farsighted land ethic is proving increasingly relevant in our own time. Now, Leopold's essential contributions to our literature—some hard-to-find or previously unpublished—are gathered in a single volume for the first time. Here is his classic *A Sand County Almanac*, hailed—along with Thoreau's *Walden* and Carson's *Silent Spring*—as one of the main literary influences on the modern environmental movement. Published in 1949, it remains a vivid, firsthand, philosophical tour de force. Along with *Sand County* are more than fifty articles, essays, and lectures exploring the new complexities of ecological science and what we would now call environmental ethics. Leopold's sharp-eyed, often humorous journals are illustrated here for the first time with his original photographs, drawings, and maps. Also unique to this collection is a selection of over 100 letters, most of them never before published, tracing his personal and professional evolution and his efforts to foster in others the love and sense of responsibility he felt for the land. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

The Primal Place - Robert Finch 2007-05-09

From acclaimed author and naturalist Robert Finch, a richly detailed observance of Cape Cod's seemingly vanished natural and human past, as it clings to its present landscape. This is a voyage of discovery, a personal odyssey into the nature of a single Cape Cod neighborhood. It is a rich portrait, beautifully drawn, of a landscape and a community whose essential character lies in their penetrating interface with the sea. But it is also an individual quest, a journey of the heart and mind in which the author seeks "entrance, or rather re-entrance" into "that vast living maze stretching out beyond my lines of sight."

The Sand Country of Aldo Leopold - Susan Flader 1973

Aldo Leopold's Odyssey - Julianne Lutz Warren 2008-02-22

A household icon of the environmental movement, Aldo Leopold (1887-1948) may be the most quoted conservationist in history. A *Sand County Almanac* has sold millions of copies and Leopold's writings are venerated for their perceptions about land and how people might live in concert with the whole community of life. But who is the man behind the words? How did he arrive at his profound and poetic insights, inspiring generations of environmentalists? Building on past scholarship and a fresh study of Leopold's unpublished archival materials, Julianne Lutz Newton retraces the intellectual journey generated by such passion and intelligence. *Aldo Leopold's Odyssey* illuminates his lifelong quest for answers to a fundamental issue: how can people live prosperously on the land and keep it healthy, too? Leopold's journey took him from Iowa to Yale to the Southwest to Wisconsin, with fascinating stops along the way to probe the causes of early land settlement failures, contribute to the emerging science of ecology, and craft a new vision for land use. More than a biography, this articulate volume is a guide to one man's intellectual growth, and an inspirational resource for anyone pondering the relationships between people and the land.

Aldo Leopold's Shack - Nancy Nye Hunt 2011

This charming children's book tells the tale of an extraordinary family's efforts to restore a worn-out Wisconsin farm during the Depression and the 1940s. Noted conservationist Aldo Leopold—along with his wife, Estella, and their five children and two dogs—spent most weekends and vacations living and working at the Sand County farm they called the Shack, which is now a national historic landmark. Leopold's time there led to his foundational work of environmental writing, *A Sand County Almanac*, which was based on the scientific observations recorded in his family's "Shack journals." Drawing from these journals, historic family photographs, and interviews, and writing from the perspective of Leopold's daughter Nina, Nancy Nye Hunt captures here the spirit of this famous family's experiences on the land.

A Sand County Almanac - A. Leopold 2000

[Thinking Like a Mountain](#) - Susan L. Flader 1994-08-01

When initially published more than twenty years ago, *Thinking Like a Mountain* was the first of a handful of efforts to capture the work and thought of America's most significant environmental thinker, Aldo Leopold. This new edition of Susan Flader's masterful account of Leopold's philosophical journey, including a new preface reviewing recent Leopold scholarship, makes this

classic case study available again and brings much-deserved attention to the continuing influence and importance of Leopold today. *Thinking Like a Mountain* unfolds with Flader's close analysis of Leopold's essay of the same title, which explores issues of predation by studying the interrelationships between deer, wolves, and forests. Flader shows how his approach to wildlife management and species preservation evolved from his experiences restoring the deer population in the Southwestern United States, his study of the German system of forest and wildlife management, and his efforts to combat the overpopulation of deer in Wisconsin. His own intellectual development parallels the formation of the conservation movement, reflecting his struggle to understand the relationship between the land and its human and animal inhabitants. Drawing from the entire corpus of Leopold's works, including published and unpublished writing, correspondence, field notes, and journals, Flader places Leopold in his historical context. In addition, a biographical sketch draws on personal interviews with family, friends, and colleagues to illuminate his many roles as scientist, philosopher, citizen, policy maker, and teacher. Flader's insight and profound appreciation of the issues make *Thinking Like a Mountain* a standard source for readers interested in Leopold scholarship and the development of ecology and conservation in the twentieth century.
