Long Story Short - Serena Kaylor 2022-07-26
“Like the best of the Bard himself, Long Story Short combines dazzling repartee with iconic, nuanced characters and the kind of charged, perfectly paced

romance fit for the world stage...a sparkling Shakespearean homage and a wonderful debut.” –Emily Wibberley and Austin Siegemund-Broka, authors of *Always Never Yours* In Serena Kaylor's sparkling debut, a homeschooled math genius finds herself out of her element at a theater summer camp and learns that life—and love—can't be lived by the (text)book. Growing up homeschooled in Berkeley, California, Beatrice Quinn has always dreamed of discovering new mathematical challenges at Oxford University. She always thought the hardest part would be getting in, not convincing her parents to let her go. But while math has always made sense to Beatrice, making friends is a problem she hasn't been able to solve. Before her parents will send her halfway across the world, she has to prove she won't spend the next four years hiding in the library. The compromise: the Connecticut Shakespearean Summer Academy and a detailed list of teenage milestones to check off. If Beatrice wants to live out her Oxford dream, she has to survive six weeks in the role of “normal teenager” first. Unfortunately, hearts and hormones don't follow any equations. When she's adopted by a group of eclectic theater kids, and immediately makes an enemy of the popular—and annoyingly gorgeous—British son of the camp's founders, Beatrice quickly learns that relationships are trickier than calculus. With her future on the line, this girl genius stumbles through illicit parties, double dog dares, and more than her fair share of Shakespeare. But before the final curtain falls, will Beatrice realize there's more to life than what she can find in the pages of a book?

Reflexive Leadership - Mats Alvesson 2016-11-24

Lecturers/Instructors - Request a free digital inspection copy here Making a case for a reflexive approach to leadership, the authors draw upon decades of carrying out in-depth studies of professionals trying to "do" leadership. Through interviews with managers and their subordinates, getting a good understanding of organizational context, and critically interpreting

their observations considering both leadership theories and a wealth of other perspectives, their celebration of reflexivity is used to question dominant leadership thinking. Considering and challenging various departures from lines of reasoning results in a book that draws upon rich empirical material and which has a number of new, provocative, critical and constructive ideas that help to develop sharper and more thoughtful thinking and practice - both in academic and practical contexts. Suitable for leadership and organisation courses at upper-level undergraduate and upwards (including MBA-classes and Executive Education) and a thought provoking read for practitioners and management development professionals interested in leadership thought.

Hyper-organization - Patricia Bromley 2015

Hyper-Organization offers an institutional explanation for the expansion of formal organization in the contemporary era-in numbers, internal complexity, social

domains, and national contexts. Much expansion is hard to justify in terms of technical production or political power, it lies in areas such as protecting the environment, promoting marginalized groups, or behaving with transparency. The authors argue that expansion is supported by widespread cultural rationalization characterized by scientism, rights and empowerment discourses, and an explosion of education. These cultural changes are transmitted through legal, accounting, and professionalization principles, driving the creation of new organizations and the elaboration of existing ones. The resulting organizations are constructed to be proper social actors, as much as functionally effective entities. They are painted as autonomous and integrated but depend heavily on external definitions to sustain this depiction. So expansion creates organizations that are, whatever their actual effectiveness, structurally arational. This book advances theories of social organization in three main ways. First, by giving an account of the expansive rise of 'organization' rooted in rapid worldwide cultural rationalization. Second, explaining the construction of contemporary organizations as purposive actors, rather than passive bureaucracies or loose associations. Third, showing how the expanded actorhood of the contemporary organization, and the associated interpenetration with the environment, dialectically generate structures far removed from instrumental rationality.

Constructing Organizational Life - Thomas B. Lawrence
2019

Across the social sciences, scholars are increasingly showing how people 'work' to construct organizational life, including the rules and routines that shape and enable organizational activity, the identities of people

who occupy organizations, and the societal norms and assumptions that provide the context for organizational action. The idea of work emphasizes the ways in which people and groups engage in purposeful, reflexive efforts rooted in an awareness of organizational life as constructed in human interaction and changeable through human effort. Studies of these efforts have identified new forms of work including emotion work, identity work, boundary work, strategy work, institutional work, and a host of others. Missing in these conversations, however, is a recognition that these forms of work are all part of a broader phenomenon driven by historical shifts that began with modernity and dramatically accelerated through the twentieth century. This book introduces the social-symbolic work perspective, which addresses this broader phenomenon. The social-symbolic work perspective integrates diverse streams of research to examine how people purposefully and reflexively work to construct organizational life, including the identities, technologies, boundaries, and strategies that constitute their organizations. In this book, the authors define social-symbolic work and introduce three forms - self work, organization work, and institutional work. Social-symbolic work highlights people's efforts to construct the social world, and focuses attention on the motivations, practices, resources, and effects of those efforts. This book explores eight distinct streams of social-symbolic work research, drawing on a broad range of examples from the worlds of business, politics, sports, social movements, and many others. It provides researchers, students, and practitioners with an integrative theoretical framework useful in understanding social-symbolic work, a survey of the main forms of social-symbolic work, a rich set of theoretical

opportunities to inspire new studies, and practical methodological guidance for empirical research on social-symbolic work.

The Nvivo Qualitative Project Book - Patricia Bazeley
2000-10-13

'A great basic book, which can be used by the novice qualitative researcher. The advice is friendly, almost folksy with clear conceptual explanation of how the program works. A very welcome contribution to this field' - Martha Ann Carey, Albert Einstein College of Medicine, New York 'Qualitative researchers continue to be criticized because they rely too much on their own interpretations and avoid analytical and theoretical issues. This book provides ways to integrate the thinking about a project and the data you have with practical ways that the software can facilitate the process. I recommend it for both the new user as well as the experienced one' - Marilyn Lichtman, Forum for

Qualitative Social Research - follow the link below to read the complete review This book invites readers to learn how to use qualitative data analysis software in the context of doing their research project. The reader follows basic steps for creating and conducting a real project with real data, using the new-generation software package, QSR NVivo. The software tools are introduced only as needed and explained in the framework of what is being asked. The reader is the craftsman, trialling those tools in the processes of getting started, tentative interpretation, drawing links, shaping data, and seeking and establishing explanations and theories. The NVivo Qualitative Project Book allows the researcher to work through their own project, or work with data provided from a real project. The authors draw on decades of experience of research and training researchers around the world, and take the reader through each step in a style combining informality and authority, with frequent tips and reflections on what is being done. Demonstration software is provided on the enclosed CD-ROM, with data to help create (a researcher's project) a project about researchers and researching, and with multiple stages arranged sequentially in the development of a real project. As a practical tool to help researchers understand qualitative data analysis software using NVivo, and a guide through the sometimes complex processes of doing a research project, this book will be invaluable reading for researchers and students undertaking qualitative research. Pat Bazeley provides training and consulting services in research design and data analysis through her company, Research Support. Lyn Richards is Director of Research Services at Qualitative Solutions and Research, the developers of NUD·IST and NVivo software.

NVivo is distributed by Scolari, SAGE Publications Software.

Tom Cockcroft, an authority on the subject, addresses a range of contemporary issues including diversity, police reform and police professionalisation. This invaluable review:
- Identifies and discusses differing conceptions of police culture;
- Explores the contribution of different disciplinary and methodological approaches to our understanding of police culture;
- Assesses how culture relates to many different operational aspects of policing;
- Contextualises our understanding of police culture in relation to both contemporary police agendas and wider social change. For students, researchers and police officers alike, this is an accessible and timely

appraisal of police culture.

A Process Theory of Organization - Tor Hernes 2014-05-15

This book presents a novel and comprehensive process theory of organization applicable to 'a world on the move', where connectedness prevails over size, flow prevails over stability, and temporality prevails over spatiality. The framework developed in the book draws upon process thinking in a number of areas, including process philosophy, pragmatism, phenomenology, and science and technology studies. Salient ideas from these schools are carefully woven into a process theory of organization, which makes the book not only a thought provoking theoretical contribution, but also a much-needed glimpse into the challenges of organizing in a complex and moving world. Taking a distinctly temporal view of organizational life the author shows how actors continually carve out their temporal existence from being in the flow of time. This on-going work, in which technologies, concepts, and social actors take part, is crucial for the making of any type of organizational formation. A key construct of the book is that of events, which provide force, movement, and historicity to organizational life. The book is suitable for scholars and advanced level students in organization studies, management studies, technology studies, and sociology. It contains a number of practical examples to illustrate the theoretical framework.

Leadership: A Very Short Introduction - Keith Grint
2010-07-29

The subject of leadership raises many questions: What is it? How does it differ from management and command? Are leaders born or bred? Who are the leaders? Do we actually need leaders? Inevitably, the answers are provocative and partial; leadership is a hugely important topic of debate. There are constant calls for 'greater' or 'stronger' leadership, but what this actually means, how we can evaluate it, and why it's important are not very clear. In this Very Short Introduction Keith Grint prompts the reader to rethink their understanding of what leadership is. He examines the way leadership has evolved from its earliest manifestations in ancient societies, highlighting the beginnings of leadership writings through Plato, Sun Tzu, Machiavelli and others, to consider the role of the social, economic, and political context undermining particular modes of leadership. Exploring the idea that leaders cannot exist without followers, and recognising that we all have diverse experiences and assumptions of leadership, Grint looks at the practice of management, its history, future, and influence on all aspects of society. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of

titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Psychosocial Criminology - David Gadd 2007-09-18

'This is a well written, thought provoking, and highly challenging book for anyone who claims to be a criminologist or for whom crime is of central concern. It should be required reading on all undergraduate and post-graduate criminology courses. A truly innovative take on some well established criminological dilemmas.'

- Sandra Walklate, Eleanor Rathbone Chair of Sociology, University of Liverpool

What makes people commit crime? Psychosocial Criminology demonstrates how a psychosocial approach can illuminate the causes of particular crimes, challenging readers to re-think the similarities and differences between themselves and those involved in crime. The book critiques existing psychological and sociological theories before outlining a more adequate understanding of the criminal offender. It sheds new light on a series of crimes - rape, serial murder, racial harassment, 'jack-rolling' (mugging of drunks), domestic violence - and contemporary criminological issues such as fear of crime, cognitive-behavioural interventions and restorative justice. Gadd and Jefferson bring together theories about identity, subjectivity and gender to provide the first

comprehensive account of their psychoanalytically inspired approach. For each topic, the theoretical perspective is supported by individual case studies, which are designed to facilitate the understanding of theory and to demonstrate its application to a variety of criminological topics. This important and lucid book is written primarily for upper level undergraduates, postgraduates and teachers of criminology. It is particularly useful for students undertaking a joint degree in criminology and psychology. It will also appeal to critical psychologists, psychoanalysts, students of biographical methods and those pursuing social work training. David Gadd is Senior Lecturer in Criminology at Keele University. Tony Jefferson is Professor of Criminology at Keele University.
