How to Write a Lot - Paul J. Silvia 2007-01

All students and professors need to write, and many struggle to finish their stalled dissertations, journal articles, book chapters, or grant proposals. Writing is hard work and can be difficult to wedge into a

frenetic academic schedule. In this practical, light-hearted, and encouraging book, Paul Silvia explains that writing productively does not require innate skills or special traits but specific tactics and actions. Drawing examples from his own field of psychology, he shows readers how to overcome motivational roadblocks and become prolific without sacrificing evenings, weekends, and vacations. After describing strategies for writing productively, the author gives detailed advice from the trenches on how to write, submit, revise, and resubmit articles, how to improve writing quality, and how to write and publish academic work.

Beyond Convention - Christine M. Tardy 2016

"Reading this book did more than just make me more aware of something I already, somewhat subconsciously, was doing, however. It pushed my thinking about if, when, and how writing teachers should encourage students to push genre boundaries and to innovate." ---Foreword by Dana R. Ferris, author of *Treatment of Error and Teaching College Writing to Diverse Student Populations* This book attempts to engage directly with the complexities and tensions in genre from both theoretical and pedagogical perspectives. While struggling with questions of why, when, and how different writers can manipulate conventions, Tardy became interested in related research into voice and identity in academic writing and then began to

consider the ways that genre can be a valuable tool that allows writing students and teachers to explore expected conventions and transformative innovations. For Tardy, genres aren't "fixed," and she argues also that neither genre constraints nor innovations are objective--that they can be accepted or rejected depending on the context. *Beyond Convention* considers a range of learning and teaching settings, including first-year undergraduate writing, undergraduate writing in the disciplines, and the advanced academic writing of graduate students and professionals. It is intended for those interested in the complexities of written communication, whether their interests are grounded in genre theory, academic discourse, discourse analysis, or writing instruction. With its attentiveness to context, discipline, and community, it offers a resource for those interested in English for Academic Purposes, English for Specific Purposes, and Writing in the Disciplines. At its heart, this is a book for teachers and teacher educators.

Essential Actions for Academic Writing - Nigel A. Caplan 2022-03-09

Essential Actions for Academic Writers is a writing textbook for all novice academic students, undergraduate or graduate, to help them understand how to write effectively throughout their academic and professional careers. While these novice writers may use English as a second or additional language, this book is also intended for students who have done little writing in their prior education or who are not yet confident in their academic writing. *Essential Actions* combines genre

research, proven pedagogical practices, and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments, such as explaining, summarizing, synthesizing, and arguing. Part I introduces students to rhetorical situation, genre, register, source use, and a framework for understanding how to approach any new writing task. The genre approach recognizes that all writing responds to a context that includes the writer's identity, the reader's expectations, the purpose of the text, and the conventions that shape it. Part II explores each essential action and provides examples of the genres and language that support it. Part III leads students in combining the actions in different genres and contexts, culminating in the project of writing a personal statement for a university or scholarship application.

Writing a Research Paper in Political Science - Lisa A. Baglione 2018-12-31

Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. *Writing a Research Paper in Political Science* breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. Mathematics for Machine Learning - Marc Peter Deisenroth 2020-04-23

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics.

These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

The Productive Graduate Student Writer - Jan E. Allen 2019-07-02

This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to:

- reduce (or write in spite of) their anxiety and fear of writing
- manage their time, work, energy (and advisor) for greater productivity

While Jan Allen recognizes that

writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer you are, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer.

Other Floors, Other Voices - John M. Swales
2013-11-05

The author describes this volume as a "textography" because it combines certain elements of both text analysis and ethnography. Through analysis of texts, textual forms, and systems of texts, it shows the lives, life commitments, and life projects of people deeply embedded in the literate culture of the university. The people examined work in a single building, but their textual lives are maintained in different times and spaces, measured by the dimensions of text production and text circulation in their fields of work. These domains of text time and space are to some degree differentiated by the three specialties that mark the three floors of a small building at a major research university--the ethnographic site of this journey into textual lives--computing, taxonomic botany, and English as a

second language. This research site provides the opportunity to re-examine the concept of discourse community and to investigate the nature and origination of academic discourse from a new perspective. The author is a distinctive member of the applied linguistics and composition communities, an original stamped by the global village of language education in which he has lived his life, and revealed in his own autobiographical account embedded within this book. This book now reveals him as a person making text about how people are embedded in making their textual lives within the discursive landscapes their communities afford. In doing so, he shows not only his own love of language as a way of life, but also his appreciation of how all his subjects find their labors of love in the language they create. This book has been written to appeal to a general academic audience as well as to specialists in rhetoric, discourse analysis, and composition.

2021-04-02

An A to W of Academic Literacy is designed for graduate students of all language backgrounds and at any level of study. It is created as a comprehensive reference for graduate students. As a glossary of terms, it can also be used as a supplemental textbook for graduate workshops and seminars and by writing consultants and instructors across the disciplines. The guide includes 65 common academic literacy terms and explores how they relate to genres, writing conventions, and language use. Each entry briefly defines the term, identifies variations and tensions about its use across disciplines, provides examples, and includes

reflection questions. An appendix lists further readings for each entry. Unique to this volume are comments featuring the experiences of the graduate students who wrote the entries, comments that bring each entry to life and build a bridge to graduate student readers.

The Handbook Of Academic Writing: A Fresh Approach - Murray, Rowena 2006-10-01

Writing is one of the most demanding tasks that academics and researchers face. In some disciplines we learn some of what we need to know to be productive, successful writers; but in other disciplines there is no training, support or mentoring of any kind.

Inside Academic Writing - Grace Canseco 2010

Inside Academic Writing is designed to prepare students in any academic discipline for graduate-level writing. The text situates students within their writing communities by prioritizing the steps of learning; students are directed to use common threads of academic writing across disciplines. The goal of Inside Academic Writing is to give students the opportunity to write for a variety of audiences and to develop the knowledge necessary to recognize how to write for different audiences and purposes. Inside Academic Writing allows students to examine basic assumptions about writing before they learn specific strategies for targeting the audience or mapping the flow of information. Through the material in this textbook, students will create a portfolio of writings that includes a biographical statement and a research interest essay—important pieces of writing that are rarely taught in courses. Other types of writing featured are a summary, a problem-solution text, a comparative structure paper, and a commentary. Other textbooks prepare students for graduate writing, but Inside Academic Writing was designed to bridge the gap between non-academic writing and the writing required within an academic community, with one's peers, colleagues, and field experts. In addition, Inside Academic Writing offers guidance on writing materials for grants,

fellowships, conferences, and publication.

Introduction to Academic Writing - Alice Oshima 2007

This book helps "students to master the standard organizational patterns of the paragraph and the basic concepts of essay writing. Graduate Writing Across the Disciplines - Marilee Brooks-Gillies 2020-11-02

In Graduate Writing Across the Disciplines, the editors and their colleagues argue that graduate education must include a wide range of writing support designed to identify writers' needs, teach writers through direct instruction, and support writers through programs such as writing centers, writing camps, and writing groups. The chapters in this collection demonstrate that attending to the needs of graduate writers requires multiple approaches and thoughtful attention to the distinctive contexts and resources of individual universities while remaining mindful of research on and across similar programs at other universities.

Thesis and Dissertation Writing in a Second Language - Brian Paltridge 2007-06-11

The relationship of supervisor to student has traditionally been seen as one of apprenticeship, in which much learning is tacit, with the expectation that the student will become much like the tutor. The changing demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing, using language that is accessible to research supervisors

from any discipline.

The Elements of Academic Style - Eric Hayot

2014-08-26

Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

The International Student's Guide to Writing a Research Paper - Janine Carlock 2017-06-13

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* (by Lionel Menasche, 1998) and partly a companion to *The ESL Writer's Handbook*. Each section of the book includes a discrete task called a Building Block, which requires students to apply the skills learned toward the development of their own paper. This step-by-step approach allows

students to construct knowledge as they become more familiar with the process, making writing a research paper a less intimidating task. Special features: This guide uses simple direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first-year writing class, including two sample papers—one in APA and one in MLA. A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.
