Citizen - Somebody is watching you! Security Guide - Part I, Language Version: English - Louis Melloy 2023-03-18
Experts share their knowledge so you can live carefree! It has never been more dangerous and at the same time easier than today to entrust one's privacy and personality to strangers. If people are regarded as digital goods and they hardly notice it themselves due to a lack of knowledge, this will cost freedom, security and livelihoods. Creating more security for everyone should be the top priority. This includes protection against data and identity loss. Data security issues are unmistakable. Millions of identities are stolen every year. The Internet and our worldwide network has degenerated into a pure propaganda and manipulation tool. Exacerbated by poor quality and excessive use, the Internet and connected

systems have become the No. 1 resource and time waster. Data protection laws alone are not enough, so concepts like the S.o.P. are a must in our time! The whole world is a stage and all women and men are mere players, they perform and leave again.
