With insightful writing,  
up-to-date reviews of  
major attractions, and a  
lot of "local"  
knowledge, The  
Unofficial Guide to Las  
Vegas has it all.  
Compiled and written by  
a team of experienced  
researchers whose work  
has been cited by such  
diverse sources as USA  
Today and Operations  
Research Forum, The  
Unofficial Guide to Las  
Vegas digs deeper and

offers more than can any  
single author. This is  
the only guide that  
explains how Las Vegas  
works and how to use  
that knowledge to make  
every minute and every  
dollar of your time  
there count. With advice  
that is direct,  
prescriptive, and  
detailed, it takes out  
the guesswork. Eclipsing  
the usual list of

to have fun and  
understand the crazy

environment that is today's Vegas. It's a keeper.

### The Fourth Industrial Revolution - Klaus Schwab 2017-01-03

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial

intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving

this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

**Communities in Action** - National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health

inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. *Nanocosmeceuticals* - Malay K. Das 2022-08-31 Cosmetics are a fast-

growing segment in the global personal care industry and the application of nanocosmeceuticals are on the rise. Conventional cosmetics greatly lack specific delivery systems, prolong effects and relatively heavy doses may be necessary. One of the common complaints of consumers is rather short-term activity of cosmetics, especially in face care products. Nanocosmeceuticals, having more advanced nutrient delivery mechanisms, carry more task specific nutrients to the skin deep where it can be metabolized and used to nourish cells. It can help to increase the aesthetic appeal of a product influencing the purchase decision of a consumer. *Nanocosmeceuticals: Innovation, Application and Safety* highlights the trends and

applications of nanotechnology in cosmeceuticals for more advance and task specific nutrients delivery and long term effects of personal care products using liposome, solid lipid nanoparticles, nanostructured lipid carriers, transferosomes, niosomes, phytosomes, nanoemulsions, silver nanoparticles, chitin nanofibrils etc. It also provides the detailed information on regulatory laws, safety and marketing aspects of cosmeceuticals. This book offers an indispensable guide for professors, researchers, students, formulation chemists as well as formulation scientists in academia and industry; beauticians and decision-makers in consumer organizations. First book on 'Nanocosmeceuticals'

Serves as a valuable resource of scientific innovations, novel applications, safety and regulations of Nanocosmeceuticals Offers an updated and highly structured reference material for students, researchers, professors, formulation chemists and scientists *Price Setting and Price Regulation in Health Care* - OECD 2019-06-26 The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study

aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

**Heartfelt Connections** -  
Anne E. Beall PhD  
2016-08-04

What is the nature of the connection between people and animals? Or, put another way, how do the relationships that form between humans and our animal companions have profound influences on our lives? From beloved family companions to therapy animals, search and rescue canines, and

other animals who help their human partners heal, learn, and grow, there are compelling reasons to believe that animals and people are inextricably and deeply connected to one another. In *Heartfelt Connections: How Animals and People Help One Another*, author and social psychologist Anne E. Beall explores the relationships that occur between humans and animals, and she describes the many people whose lives have been changed tremendously by animals. With narratives and research about horses who heal, dogs who help children read, cats who save the lives of their owners, and pigs, sheep, ducks, and llamas who help reduce stress and lift the spirits of people, Beall shows how animals are in action across the United States at nursing homes, at

hospitals, and at rehabilitation centers and are making a difference in the lives of many people. Beall finds that even a household pet can make people feel better about the world and about themselves, and these pets can also provide comfort and friendship in times of need. And as therapy and rehabilitation animals help victims of abuse, trauma, and even war overcome their own challenges, the bond between humans and animals grows even stronger a deep connection that is truly heartfelt.

PRODUCT INNOVATION

TOOLBOX Discover how to

implement consumer-

centric innovation to

help create new product

development in this

latest edition In recent

years, behavioral approaches, social media listening, and other new techniques and technologies—digital techniques, augmented intelligence, machine learning, and advanced biometrics, among others—have been foregrounded in innovation research. A focus on the evolving fields of data science and neuroscience is a driving force for both researchers and the people they study. These digital and mobile technologies have enabled researchers to augment listening, observing and categorizing methods, and to adapt new techniques in attempting to better understand consumers. On the other hand, digitized mobile societies, spurred by faster and cheaper internet access, emphasize an interconnectedness that

drastically alters human behaviors and creates borderless influences. Even so, the tenets and approaches to insightful deep learning for consumers and other actors, from discovery through to the launch of successful products, remains an intrinsic part of assessing the market. Product Innovation Toolbox brings together key thought leaders and seasoned consumer researchers from corporate R&D, academia, and marketing research companies to share their experiences, advanced consumer research tools and practical tips for successful and sustainable product innovation. By offering these leading-edge tools and insights, the book ensures consumer-centric innovation by linking strategy and a designed approach. The new edition focuses on the

integration and connection of all data—both structured and unstructured—for deep learning and activation, rather than a differentiated qualitative—quantitative approach, reflecting the shifting relationships involved in the latest developments in the field. The second edition of Product Innovation Toolbox also includes: Revised material for more than 70% of the manual, with 11 new and extensively updated chapters New tools sections on digital technologies to create novel ways to stimulate and elicit insights from participants, such as Virtual Reality (VR) and Digital Augmentation Upgraded versions of tools in each updated section, with fresh examples New case studies created using the tools from the

previous edition, including cases regarding cross-continental marketplaces and cross-cultural societies An emphasis on tools with global applications Product Innovation Toolbox is an essential resource for product developers, marketers, and technologists. Clinician's Guide to Treating Companion Animal Issues - Lori R. Kogan 2018-09-14 Clinician's Guide to Treating Animal Companion Issues: Addressing Human-Animal Interaction is the first of its kind—a groundbreaking resource for mental health professionals who want the knowledge, skills and awareness to successfully work with pet-owning clients. The book trains clinicians across multiple disciplines to feel more comfortable and

confident addressing companion-related issues—both when those issues are the primary reason for seeking therapy or a critical component in better understanding client needs. The book uses current human-animal interactions theories as a foundation to explore pet-related issues utilizing behavioral, cognitive behavioral, family systems, humanistic and contemporary psychodynamic therapeutic orientations. Users will find sections on the many issues that arise during the lifespan of pet owners (e.g., children, young adults, elderly), as well as issues pertinent to specific populations (e.g., men, homeless, ethnically diverse). Additional topics include the violence link, pet death and

bereavement, and behavioral issues. As the first book to approach human-animal interactions (HAI) from a multi-theoretical perspective, it helps clinicians appropriately acknowledge and incorporate relevant HAI issues within therapy to achieve goals. Provides practical information for immediate use in practice Focuses on common issues relating to companion animals Addresses bereavement, attachment, behavior, and more Includes interactive readings, case studies and therapeutic exercises Contains multiple theoretical orientations (behavioral, cognitive behavioral, family systems, humanistic and psychodynamic approaches)

Encyclopedia of Hair: A Cultural History, 2nd Edition - Victoria

Sherrow 2023-03-30

How we style our hair has the ability to shape the way others perceive us. For example, in 2017, the singer Macklemore denounced his hipster undercut hairstyle, a style that is associated with Hitler Youth and alt-right men, and in 2015, actress Rose McGowan shaved her head in order to take a stance against the traditional

Hollywood sex symbol stereotype. This volume examines how hair—or lack thereof—can be an important symbol of gender, class, and culture around the world and through history. Hairstyles have come to represent cultural heritage and memory, and even political leanings, social beliefs, and identity. This second edition builds upon the original volume, updating all entries that have evolved over the last decade, such as by discussing hipster culture in the entries on beards and mustaches and recent medical breakthroughs in hair loss. New entries have been added that look at specific world regions, hair coverings, political symbolism behind certain styles, and other topics. An appendix of illuminating primary documents has also been added.

**Milady Standard  
Cosmetology - Milady  
2015-01-01**

Milady has evolved for over 85 years to become what it is today, the cornerstone of beauty and wellness education. We are very excited and proud to announce the latest edition of Milady Standard Cosmetology, the most commonly used resource in cosmetology education. For decades since our first textbook published, it has been our commitment to provide students with the foundation in the principles and skills needed to master the science and art of cosmetology, and with this latest version that commitment has not waived. For the new edition, celebrity stylist Ted Gibson served as Creative Director on the project. The result is a brilliant new design with over 750 new photos

and a gorgeous layout, providing a visually stunning resource to engage today's learner. We also recruited a team of twelve authors, made up of top professionals and educators in the industry, to provide the most current information on concepts and techniques. During our extensive peer review and development process, we were asked for a resource that placed emphasis on essential content needed for licensure success, and we feel confident that we delivered. Milady Standard Cosmetology will continue to be a source of education that students can count on, not only while in school, but throughout their careers. *Handbook of Formulating Dermal Applications* - Nava Dayan 2016-12-15  
The conceptualization and formulation of skin care products intended for topical use is a multifaceted and evolving area of science. Formulators must account for myriad skin types, emerging opportunities for product development as well as a very temperamental retail market. Originally published as "Apply Topically" in 2013 (now out of print), this reissued detailed and comprehensive handbook offers a practical approach to the formulation chemist's day-to-day endeavors by: Addressing the innumerable challenges facing the chemist both in design and at the bench, such as formulating with/for specific properties; formulation, processing

and production techniques; sensory and elegancy; stability and preservation; color cosmetics; sunscreens; Offering valuable guidance to troubleshooting issues regarding ingredient selection and interaction, regulatory concerns that must be addressed early in development, and the extrapolation of preservative systems, fragrances, stability and texture aids; Exploring the advantages and limitations of raw materials; Addressing scale-up and pilot production process and concerns; Testing and Measurements Methods. The 22 chapters written by industry experts such as Roger L. McMullen, Paul Thau, Hemi Nae, Ada Polla, Howard Epstein, Joseph Albanese, Mark Chandler, Steve Herman, Gary Kelm, Patricia Aikens, and Sam Shefer,

along with many others, give the reader and user the ultimate handbook on topical product development.

**Alliances for Action: Guide for export promotion** - Food and Agriculture Organization of the United Nations  
2022-09-02

This guide presents a step-by-step approach to assist development practitioners, national authorities and the private sector in facilitating the development of export promotion programs through building multi-stakeholder value chain (VC) alliances to compete in international markets. The guide draws from the Alliances for Action (A4A) approach, which was developed by the International Trade Centre (ITC). A4A has been proven to be effective in mobilizing VC and supporting participants in an

ecosystem around a shared purpose to transform VC performance in terms of competitiveness, value addition, and export growth, among other targets. **Natural Bio-active Compounds** - Mallappa Kumara Swamy 2019-09-19  
Nature has consistently provided human beings with bioactive compounds that can be used directly as drugs or indirectly as drug leads. Some of the major classes of natural bioactive compounds include phenolics, alkaloids, tannins, saponins, lignin, glycosides, terpenoids,

and many more. They possess a broad range of biological activities and are primarily useful in the treatment of various health issues.

At the same time, the search for new and novel drugs is never-ending and, despite major advances in synthetic chemistry, nature remains an essential resource for drug discovery. Therefore, more and more researchers are interested in understanding the chemistry, clinical pharmacology, and beneficial effects of bioactive compounds in connection with solving human health problems. This book presents a wealth of information on natural metabolites that have been or are currently being used as drugs or leads for the discovery of new drugs. In addition, it highlights the

importance of natural products against various human diseases, and their applications in the drug, nutraceuticals, cosmetics and herbal industries. Accordingly, the book offers a valuable resource for all students, educators, and healthcare experts involved in natural product research, phytochemistry, and pharmacological research.

The Pivot - Kurt Campbell 2016-06-07  
From former assistant secretary of state Kurt M. Campbell comes the definitive analysis and explanation of the new major shift in American foreign policy, its interests and assets, to Asia. There is a quiet drama playing out in American foreign policy far from the dark contours of upheaval in the Middle East and South Asia and the

hovering drone attacks of the war on terror. The United States is in the midst of a substantial and long-term national project, which is proceeding in fits and starts, to reorient its foreign policy to the East. The central tenet of this policy shift, aka the Pivot, is that the United States will need to do more with and in the Asia-Pacific hemisphere to help revitalize its own economy, to realize the full potential of the region's dramatic innovation, and to keep the peace in the world's most dynamic region where the lion's share of the history of the twenty-first century will be written. This book is about a necessary course correction for American diplomacy, commercial engagement, and military innovation during a time

of unrelenting and largely unrewarding conflict. While the United States has intensified its focus on the Asia-Pacific arena relative to previous administrations, much more remains to be done. The Pivot is about that future. It explores how the United States should construct a strategy that will position it to maneuver across the East and offers a clarion call for cunning, dexterity, and ingenuity in the period ahead for American statecraft in the Asia-Pacific region. *Access to Asia* - Sharon Schweitzer 2015-04-27 Create meaningful relationships that translate to better business *Access to Asia* presents a deeply insightful framework for today's global business leaders and managers, whether traveling from Toronto to Taipei, Baltimore to Bangalore,

**Pain Management and the Opioid Epidemic** - National Academies of Sciences, Engineering, and Medicine 2017-09-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two

public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a

particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

**The SAGE Handbook of Qualitative Research in the Asian Context** -

Safary Wa-Mbaleka  
2022-05-05

Qualitative research is growing in Asia and globally. In an Asian context, this requires an awareness of a completely different set of norms, practices, and expectations than those covered by books from a western perspective. This handbook truly celebrates these differences. Spanning the full research process, from philosophy and ethics to design and methods and through data collection, management, analysis, and dissemination, it focuses specifically on the practicalities needed to conduct effective and culturally responsive research in

the Asian context. This handbook extends beyond researchers actually in Asia and also speaks to researchers working with Asian participants, researching in Asian immigrant neighbourhoods, and studying the larger global topics like socioeconomic challenges, climate change, or technological advancement. This is the first book to focus specifically on qualitative research in the Asian context and includes diverse

contributors from Asia such as the Philippines, Singapore, Thailand, India, Oman, China, South Korea, Indonesia, Kazakhstan, Hong Kong, and from other continents such as North America, South America, Africa, Europe, and Oceania. Section 1: Foundations of Qualitative Research in Asia Section 2: Qualitative Research Designs Section 3: Best Practices in Dealing with Qualitative Research Data Section 4: Other Qualitative Research Topics
