The Palgrave Handbook of Minority Entrepreneurship -
Thomas M. Cooney 2021-04-17

Bringing much needed clarity and definition to the term 'minority entrepreneur,' this authoritative and timely handbook explores the distinctive challenges that minority communities face when founding and managing new ventures. The handbook is inclusive of any community who might be considered disadvantaged or under-represented in terms of entrepreneurial activity and included are women, youths, seniors, disabled, immigrants, Indigenous peoples, LGBTQ+, ex-offenders, Roma, refugees and many others. Chapters highlight the idiosyncratic nature of

the many communities examined before offering frameworks and models that draw together the various findings. With a cast of international contributors, this scholarly handbook discusses the surrounding literature of minority entrepreneurship and takes an all-encompassing approach to its interpretation. It also addresses the sorely under-researched area of entrepreneurial behaviour among minorities and disadvantaged groups. This is particularly important for policymakers tasked with designing and delivering initiatives that are appropriate for the needs of these communities. Ultimately this handbook contributes to existing

knowledge by: • providing a current understanding of the literature for each of the communities; • investigating the uniqueness of the entrepreneurial behaviour within the communities; • offering new frameworks/models from which future researchers can build new knowledge. The handbook provides a comprehensive account of an important and fast emerging field of entrepreneurship, and is an invaluable resource for students, researchers and policymakers.

Understanding Contexts Of Business In Western Asia: Land Of Bazaars And High-tech Booms - Leo-paul Dana

2022-05-05

Not one size fits all. Yet, some books teach business with minimal focus on the context for business. In reality, firms – large and small – are highly affected by the context in which they operate; yet, context is not uniformly conceptualized, theorized, and operationalized by scholars of business and management. While most theories have come from developed countries with bountiful contexts, the diverse contexts of Western Asia are little understood. Religious factors are profoundly dominant in Western Asia, and businesses in this diverse area operate with considerations that are rarely considered in research. This book reveals a variety of schools of thought that have molded several business models and mechanisms, which are, to some extent, different from the context of Western economies. *Democratization in South Asia* - Mahfuzul H. Chowdhury 2003

This text looks at the problems of democratization and development as they relate to building democratic institutions in newly democratizing countries such as Bangladesh, India and Pakistan. It is necessary to investigate these cases with the intention of

identifying and analysing the unique conditions of the countries and to find out their common problems as well. In doing this, some lessons may be learned from developed democratic systems in places such as the United States.

Managerial Strategies and Solutions for Business Success in Asia - Ordóñez de Pablos, Patricia 2016-11-22

Globalization, sustainable development, and technological applications all affect the current state of the business sector in Asia. This complex industry plays a vital part in the overall economic, social, and political aspects of this region, as well as on a larger international scale. *Managerial Strategies and Solutions for Business Success in Asia* is an authoritative reference source for the latest collection of research perspectives on the development and optimization of various business sectors across the Asian region and examines their role in the globalized economy.

Highlighting pertinent topics across an interdisciplinary scale, such as e-commerce, small and medium enterprises, and tourism management, this book is ideally designed for academics, professionals, graduate students, policy makers, and practitioners interested in emerging business and management practices in Asia.

Asia's "miracle" Economies - Jon Woronoff 1986

Handbook of East Asian Entrepreneurship - Tony Fu-Lai Yu 2014-10-03

With the shift of the global economic gravity toward emerging economies and the roaring economic growth of the past three decades in China, East Asian catching-up growth strategies have profound implications for latecomer economies. While there are many handbooks on entrepreneurship in general, there is no reference on

East Asian entrepreneurship. This is the first of its kinds in the market. The volume provides a useful reference for those who want to know East Asian entrepreneurship and business systems. It also provides many excellent cases and illustrations on the growth of entrepreneurial firms and the rise of branded products in East Asia. Policy makers or scholars who are interested in entrepreneurship, small and medium sized enterprises, Asian business systems, international business, innovation and technology management, economic development, strategic management and East Asian studies would benefit from this volume. The volume contains two parts. The first part is the key concepts associate with entrepreneurship and East Asian firm growth and transformation. The second part presents cases of entrepreneurial firms and their founders in East Asia, including Japan, South Korea, Taiwan, Hong Kong and China. With the handbook, scholars, students and policy makers can grab some basic ideas how entrepreneurs and firms in East Asia compete and survive in the world market and understand why and how East Asia economies can emerge as one of the most dynamic regions in the world. Part I concepts: relating to Entrepreneurship: Guanxi Catching-up strategies Types of entrepreneurship Business System Strategic Management Leadership Part II cases cover variedly from manufacturing to services industries, and specifically including traditional and newly corporations ranging from toys, convenient stores, fast fashion, high-tech, to catering and service. Written by experts in their respective areas, Handbook of East Asia entrepreneurship is an excellent review of theories, policies and empirical evidences on important topics in Entrepreneurship in East Asian economic development. The book is both a superb teaching tool and

a valuable handbook in development economics.

China, India and Southeast Asia - Edmund Terence Gomez
2018-12-07

This volume studies the outcomes of the two-way flow of investments and people between China and India, and Southeast Asia. These cross-border flows have led to new settlements in Southeast Asia from which new outlooks have emerged among locally born generations that have given rise to new forms of solidarity and identification. The advent of new generations of ethnic Chinese and Indians in Southeast Asia, with no ties to China or India, has spawned important debates about identity shifts which have not been registered by government leaders in Southeast Asia, China and India, as reflected in policy statements and investment patterns. Identity changes are assessed in forms where they best manifest themselves: in social life and in business ventures forged, or unsuccessfully nurtured, through tie-ups involving foreign and domestic capital. A state-society distinction is employed to determine how the governments of these rapidly developing countries envision development, through state intervention as well as with the employment of highly entrepreneurial ethnic groups, and the outcomes of this on their societies and on their economies. The chapters were originally published as a special issue in The Round Table.

Confucian Capitalism - Yao Souchou 2002

This book interrogates the Confucian capitalism thesis which dominates the approach to Chinese business behaviour in management and social sciences.

Female Entrepreneurship in East and South-East Asia -
Philippe Debroux 2010-08-05

This detailed study of female entrepreneurship in Asia examines the high economic growth that is increasingly

driven by market-oriented economic reforms favouring entrepreneurship. There is a higher awareness by women of their political and socio-economic rights and recognition by society at large of social legitimacy of women pursuing business activities in their own right. This book assesses socio-cultural and economic factors influencing female entrepreneurship in Asia as well as the process and the tools and challenges that accompany it. Opportunity to acquire knowledge on the socio-economic roles played by women as entrepreneurs in the region Description and analysis of the issue in countries at different stages of economic development and with different socio-economic and cultural environment A broad approach encompassing historical, political, sociological, economics and businesses-related aspects of female entrepreneurship

Doing Business in Asia - Gabriele Suder 2020-10-10

A focused look into the business and management practices across Asia, from an author team located across three Asian-Pacific countries and experience of leading organisations spanning over more than two decades.

China and Southeast Asia - Gungwu Wang 1999

All this is not surprising, even understandable. But the danger of exaggeration to the point where efforts to predict what China and the Chinese will do become merely alarmist, and the predictions become self-fulfilling, has to be guarded against.

Global Entrepreneurship - Nir Kshetri 2018-09-07

This second edition of a Choice Outstanding Academic Title improves coverage of the global environments in which entrepreneurs operate. In *Global Entrepreneurship: Environment and Strategy*, Nir Kshetri explores and illuminates the economic, political, cultural,

geographical, and technological environments that affect entrepreneurs as they exploit opportunities and create value in economies around the world. Grounded in theory, the book begins by laying out the concepts, indicators, and measurements that have unique impacts on entrepreneurs in different regions. This framework sets the scene for a close examination of global variations in entrepreneurial ecosystems and finance. Kshetri methodically examines entrepreneurship patterns in diverse economies through the lenses of economic system, political system, culture and religion, and geography (both by country and continent) – and for the first time, includes an entire chapter on entrepreneurship in Latin America. All new for this edition, *Global Entrepreneurship* offers case studies at the end of each chapter to illustrate relevant concepts, as well as two detailed cases in an appendix, to encourage broader reflection. The book is accompanied by online resources, bringing additional value for instructors and students in entrepreneurship and international business classes.

Immigrant Entrepreneurship - Beata Glinka 2020-06-07

Immigration is currently one of the most vivid challenges the European Union faces. Ways of introducing new migrants to society and economy pose significant challenges, thus some guidelines for the policy design towards migrations are in need. This book points out patterns of approaches leading to entrepreneurial activities, implemented by the immigrants from the Far East: China, Vietnam, South Korea, India, and Philippines. At these stage comparisons with other countries are both possible and necessary, as many countries all over the world face challenges connected with defining migration policies. From the studies included in the book, readers will gain first-hand

knowledge about immigrant entrepreneurship in Poland against the Western European or USA background of similar processes described by researchers in other countries. The areas covered in the studies include the main reasons for starting new ventures and the sources of opportunities, processes of defining customers and factors influencing the choice between an ethnic and local business, immigrants' approaches to building market position, defining success and development, as well as the issues of cultural, institutional, legal and economic differences. The studies show that significant differences in entrepreneurial activities appear between the first and second generations of immigrants. They also depict how entrepreneurial activities help in assimilation processes, as well as in building ties between the immigrants and host societies. Moreover, the study will deepen the understanding of entrepreneurial activities of immigrants in countries that are traditionally considered to be less attractive targets for migration. Thus, the processes of migration will be not only better understood and described but will also allow to provide some guidelines both for policymakers and future researchers

Family Businesses in Transition Economies - Léo-Paul Dana 2015-03-25

□This book presents the reader a comprehensive understanding of the development of family business in transitional economies. Throughout eastern Europe, post-Communist countries transitioning to market-based economies are obtaining a variety of results due to diverse policy approaches. Expert contributions in this book draw from a wealth of information in this context and include thought-provoking policy prescriptions for the future. This book concentrates on the challenges to

predict the direction emerging markets will take, particularly when dealing with the wide-ranging social and economic situations taking place in post-Communist Eastern Europe. This reference volume for policymakers, educators, investors, and researchers also provides a much-needed and timely survey of family firms in the transitioning markets of post-Communist Europe.

The Future of Asian Capitalism - Simon Commander
2022-10-27

Asia's powerful networks tying together business and politicians threaten risk derailing Asia's claim to the 21st century.

Managerial Strategies and Practice in the Asian Business Sector - Aung, U Zeyar Myo 2015-12-22

Due in part to globalism and economic development, the Asian business sector has been rapidly expanding. Thanks to the increasing industrialization and economic growth of China and India in particular, tourism as well as business opportunities in the Asian sector are booming. Managerial Strategies and Practice in the Asian Business Sector is a comprehensive reference source for theories and practices related to business integration in Asian countries. The research presented within this timely resource closely examines a number of essential topics such as ethics, competition, and entrepreneurship in an era of globalization and economic expansion.

Illustrating innovative insights concerning the development of business strategies in this growing region, this book is an invaluable reference for business executives, students of business, academics, policy makers, or any professional concerned with globalism and the intricacies of Asian business and information technology integration in the Asian business sector.

World Encyclopedia of Entrepreneurship - Léo-Paul Dana
2021-01-29

This second edition of a classic reference work, written by some of the most eminent academics in the field, contains over 30 per cent more entries on entrepreneurship. Comprehensive in scope, it includes topics from business angels, to export services to family business and uncertainty and venture capital. There are also entries on individuals including George Eastman, Howard Hughes, Joseph Schumpeter and Walt Disney. Providing its readers with a unique point of reference, as well as stimulus for further research, this Encyclopedia is an indispensable tool for anyone interested in entrepreneurship, particularly students, scholars and researchers.

Economic Development and Entrepreneurship in Transition Economies - Jovo Ateljević 2016-04-05

This book contributes to a better understanding of entrepreneurship in transition economies. Current literature reflects the more traditional schools of thought on entrepreneurship, which are influenced by the Western perspective, and fail to fully address the scenario in transition economies. There is a broad consensus among academics, policy makers, and practitioners that a fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new, private businesses, and particularly SMEs. This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers, which were inherited from the old system, remain in place, thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment. The contributions

featured in this book focus on how much progress has been achieved so far with regard to these aspects, as well as identify which current barriers and issues still need to be resolved. Themes include innovation performance, financing, venture capital, educational factors, and entrepreneurial learning.

International Entrepreneurship - Robert D. Hisrich 2010
Combining robust narrative with a wide variety of interesting cases, *International Entrepreneurship: Starting, Developing, and Managing a Global Venture* focuses on the need for every entrepreneur to at least consider entering the global market in today's hypercompetitive world. As an ever-growing number of countries become market oriented and developed, the distinction between foreign and domestic markets is becoming less pronounced, and entrepreneurs increasingly need to develop skills to identify opportunities and then manage these opportunities on a global basis. *International Entrepreneurship* is an ideal resource for students, professors, government officials, and practitioners throughout the world who are interested in this vital, growing area. Key Features Includes chapter-opening international scenarios that feature a global entrepreneur or a global entrepreneurial venture to set the scene for the issues that follow Demonstrates global entrepreneurial issues through real-life cases from countries throughout the world Draws content from a wide variety of disciplines, including anthropology, economics, geography, history, jurisprudence, and language Includes chapter-ending class exercises, discussion questions, and suggestions for additional reading to provide readers with hands-on learning opportunities and avenues for future research Helpful Teaching Ancillaries Instructor Resources are available

on a password-protected website at <http://www.sagepub.com/hisrichinstr>. These resources include chapter outlines, end of chapter discussions, chapter exercises, and teaching notes. International Entrepreneurship is appropriate as a core text for courses such as Global Entrepreneurship or International Entrepreneurship or as a supplement in upper-level undergraduate and MBA courses in Entrepreneurship, New Venture Management, and Entrepreneurship Strategy. In addition, it can be used as an ancillary text in International Business and International Management courses.

Guanxi And Business (Third Edition) - Luo Yadong
2020-04-22

Handbook of Research on Ethnic Minority Entrepreneurship

- Leo Paul Dana 2007

Professor Dana and his colleagues have carefully and successfully put together a collection of chapters on ethnic minority entrepreneurship from all parts of the world. The book comprises eight parts and 49 chapters. Undoubtedly, given the massive size and content of a 835-page book, it is fair to ask, is it value for money? The answer is unequivocally yes! A further comment on the content of the book should probably reassure potential readers and buyers of the book. . . This collection is undoubtedly rich, creative and varied in many respects. Therefore, it will be of great benefit to researchers and scholars alike. . . I will strongly recommend this book to researchers, students, teachers and policy-makers. Aminu Mamman, International Journal of Entrepreneurial Behaviour and Research The volume presents an impressive panorama of studies on ethnic entrepreneurships ranging from Dalits in India to Roma

entrepreneurs in Hungary. B.P. Corrie, Choice From a focus on middle-man minorities in the 1950s, the study of minority ethnic entrepreneurship has evolved into a vast undertaking. A major ingredient in this expansion is the massive population movements of the past thirty years that have created ethnic minority communities in almost all advanced economies. From New York to San Francisco, from Birmingham to Hamburg, from the Chinese in Canada, to the Turks in Finland, to the Ghanians in South Africa to the Lebanese in New Zealand, more than twenty chapters in this volume treat small-scale ethnic entrepreneurship and the cultural and institutional resources which support it. At the other end of the spectrum, the ethnic Chinese have created ever larger multi-divisional enterprises in the host societies of Southeast Asia. At the mid-point of the spectrum, analyzed in an elegant paper by Ivan Light, is the recently identified transmigrant entrepreneur acculturated in two societies but assimilated in neither whose special endowments have provided the lynchpin for for much of the international trade expansion in the global economy over the past decade. And Dana and Morris provide us with much more Afro-American entrepreneurship, caste and class, the theory of clubs, women ethnic entrepreneurs, minority ethnicity and IPOs. In the quality of its contributions and in the reach of its coverage, this Handbook attains a very high standard. Peter Kilby, Wesleyan University, US The new Handbook of Research on Ethnic Minority Entrepreneurship, edited by Léo-Paul Dana, constitutes a major contribution to the literature on ethnic enterprise. Unlike previous work, which tended to focus on one country or one region of the world, this book is global in scope. You will find chapters on America,

Europe, and Asia, as well as integrative essays that review important principles and concepts from the literature on ethnic entrepreneurship. I particularly appreciate the historical and evolutionary framework within which the contributions are situated. This book belongs on the shelf of everyone who has an interest in immigration and entrepreneurship or ethnic entrepreneurship more generally. Howard Aldrich, University of North Carolina, US This exhaustive, interdisciplinary Handbook explores the phenomena of immigration and ethnic minority entrepreneurship in light of marked changes since the mid-twentieth century and the advent of easier, more affordable travel and more open and integrated national economies. The international contributors, key experts in their respective fields, illustrate that myriad ethnic minorities exist across the globe, and that their entrepreneurship can and does significantly influence national economies. The contributors go on to promote our understanding of which factors make for successful entrepreneurship, and, perhaps more importantly, how negative political consequences that members of successful entrepreneurial ethnic minorities might face can be minimized. This extensive collection of current research on entrepr

Immigration and Entrepreneurship - Ivan Hubert Light Many nations invite foreigners to work within their borders, but few welcome them. Those countries that do receive a torrent of immigrants create pressures that analysts expect to intensify as population growth and social unrest mount in the less developed countries of the world. *Immigration and Entrepreneurship*, now in paperback, offers a comparative analysis of worldwide immigration issues while focusing more specifically on

the emerging influence of entrepreneurship as a potent factor in the economic and social integration of immigrants. In linking the common immigrant and settler experiences with the upsurge in self-employment, the contributors to this volume use California as their base of comparison. The state has both a huge and varied immigrant population and an entrepreneurial economy that has facilitated the formation of immigrant-owned firms. The Los Angeles riots of the nineties indicated the volatility of the mix. Aided by ethnic and familial networks, such firms have served as a route of economic advancement. *Immigration and Entrepreneurship* offers a comparative perspective unique in the literature of immigration by broaching the topic from both global and local perspectives. Whereas most studies examine the experience of a single group or groups in a particular destination economy, this volume emphasizes variations in the way different nations receive immigrants as causes of differences in immigrant behavior. Among the innovative themes discussed by a range of international scholars are the entrepreneurial efforts and tensions in the garment industry in Los Angeles, Paris, and Berlin; Koreans' enterprise and identities in Los Angeles and Japan; and U.S. immigration policies. The result is a genuinely global methodology. Ivan Light is professor of sociology at the University of California, Los Angeles. He is the author of numerous articles and books on immigration, entrepreneurs, and urban sociology, including *Ethnic Enterprise in America* and *Cities in World Perspective*. Parminder Bhachu is professor of sociology at Clark University, a former Henry R. Luce professor of Cultural Identities and Global Processes, and was director of the Women's Studies program. She is the author of *Twice Migrants* and *Dangerous Designs*.

Startup Asia - Rebecca A. Fannin 2011-09-26

Find out where the new innovation hot spots are, what the next consumer waves will be, and where to catch them Asia's innovation hot spots are fast emerging as first-choice destinations for bright, young entrepreneurs. From Taiwan to Singapore, technology center hubs are forming to rival the original Silicon Valley. Startup Asia gives you a close-up view into the key growth trends shaping entrepreneurship in China and India, plus the new frontier market of Vietnam. Showing how entrepreneurs and investors can start up in Asia and go global, the book provides a first-hand, on-the-ground tour of the new technology centers that are gaining momentum all over Asia. Interviews with the most successful venture capitalists and entrepreneurs reveal their winning strategies and show how a new generation of entrepreneurs in China and India are no longer looking to the West for their cues—but are instead crafting their own local business models and success strategies. Shows entrepreneurs and investors how they can pursue their dreams of launching successful startups in Asia Reveals that many of the same venture investors that first funded young businesses in Silicon Valley moved into China, then India, and are now finding their way to Vietnam Addresses the risks of doing business in Asia's developing markets, including lack of intellectual property protection, political and regulatory shifts, bribery, and corruption From high-profile Forbes contributor Rebecca Fannin, Startup Asia is the essential guide for anyone looking to trek into this new frontier.

Rivals - Bill Emmott 2008

Groundbreaking new take on the growing rivalry between China, India and Japan-- and what it means for America,

the global economy and the twenty-first century.

The New Economy in East Asia and the Pacific - Peter Drysdale 2004-08-02

This title looks at the experience with the new economy in North America. It sets out the problems of measuring the effects of technological change on economic progress.

The Oxford Handbook of Asian Business Systems - Michael A. Witt 2014-01-30

Much of the existing literature within the "varieties of capitalism " (VOC) and "comparative business systems " fields of research is heavily focused on Europe, Japan, and the Anglo-Saxon nations. As a result, the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context. The Oxford Handbook of Asian Business Systems aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia. Drawing on the deep knowledge of 32 leading experts, this book presents an empirical, comparative institutional analysis of 13 major Asian business systems between India and Japan. To aid comparison, each country chapter follows the same consistent outline. Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes. A further three chapters provide perspectives on the influence of history and institutional change. The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia. The Handbook is a major reference

work for scholars researching the causes of success and failure in international business in Asia.

Asian Models of Entrepreneurship - Leo Paul Dana 2007

In this landmark book, Leo-Paul Dana makes it clear that entrepreneurship is a global phenomenon, but much can be learned about the nature of entrepreneurial activity when we delve into the unique characteristics of different regions of the world. The profound differences both among and within the countries of Asia become vividly apparent in the pages of this book. Dana juxtaposes the explosion in entrepreneurial growth within China against the struggles to build an entrepreneurial community in Japan, or the enlightened public policy leadership in Singapore against the crisis-driven developments in Korea. The range of factors identified within each of the 15 countries examined by Dana are not random influences on the entrepreneurial process, they can be construed in more systematic and logical ways. Thus, the book uncovers the Chinese model of gradual transition, the Royal Cambodian model, the Doi-Moi model, and others. The reader is challenged to grasp these different models, and identify their commonalities and differences.

Entrepreneurship and Religion - Léo-Paul Dana 2010-01-01

'I wish this book had been around when I tried to teach about entrepreneurship in its social context; life would have been much easier with these informed sources.' – Alistair R. Anderson, Aberdeen Business School, UK This rich and detailed book makes a very timely contribution to extending our understanding of entrepreneurship in its social context. Using selected examples, the respected contributors show how the values developed in religious beliefs and practices shape entrepreneurship. For too long the entrepreneur has been characterized as

an isolated, economically driven individual, thus ignoring how enterprise and entrepreneurs are products of their society, their culture and their religion. This innovative book discusses both entrepreneurship and religion, as well as indicating how the synthesis of beliefs and practices combine in entrepreneurial endeavours. It provides a conceptually useful way of framing the individualistic entrepreneur in his or her social and cultural context, demonstrating how entrepreneurial agency operates within and through a variety of religious contexts. Illustrated with original photographs, this captivating book will be warmly welcomed by students and researchers with interests in entrepreneurship, sociology, religion and cultural studies. Government policy-makers in immigration will also find this book an invaluable read.

New Frontiers in Free Trade - Razeen Sally 2008

This compelling analysis of today's rapidly growing and interdependent global economy provides a sharp look at the key trends that are significantly shaping the future of free trade and international commerce. Author Razeen Sally explores the spread of protectionist reactions to globalization and their increasingly negative impact on trade and commerce.

Imperial Japan and National Identities in Asia, 1895-1945 - Li Narangoa 2003

The volume includes chapters on the Japanese imperial campaign in India, Tibet, Siberia, Mongolia, Korea, Manchukuo, China, Taiwan, Vietnam, Thailand, the Philippines, and Indonesia.

Organising Entrepreneurship And Msmes Across India - Leo-paul Dana 2020-12-15

In order to sustain their ventures in the Indian market, businesses developed an ecosystem to promote their

current and future business. Over time, more and more small business owners emerged and organised their own settings to sustain business activities. Contemporary times challenge emerging economies – like India – to adopt entrepreneurship in order to boost its economy. Micro, Small and Medium Enterprises (MSMEs) are the preferred way of addressing these challenges; however, the ecosystem required to promote these MSMEs poses significant challenges and requires change to be sustainable. This book examines original case studies, quantitative studies and qualitative research highlighting the organisation of new business, reflecting a wide range of sectors across India. The book offers new insights to budding entrepreneurs to help organise new and established firms to infuse entrepreneurial intentions among the workforce.

Modern South Asia - Sugata Bose 1998

Drawing on the newest and most sophisticated historical research and scholarship in the field, *Modern South Asia* is written in an accessible style for all those with an intellectual curiosity about the region. Jointly written by two leading Indian and Pakistani historians, it offers a rare depth of historical understanding of the politics, cultures and economies that shape the lives of more than a fifth of humanity. This book is a work of synthesis and interpretation covering the entire spectrum of modern South Asian history - social, economic and political. The authors offer an understanding of this strategically and economically vital part of the world and provide new insights into the structure and ideology of the British raj, the meaning of subaltern resistance, the refashioning of social relations along lines of caste, class, community and gender, the different strands of anti-colonial

nationalism and the dynamics of decolonization.

Cluster-Based Industrial Development - Tetsushi Sonobe
2006-10-31

Despite its utmost importance, the issue of industrial development has been largely neglected in the literature for the last few decades. The authors have conducted comparative case studies between Chinese and Japanese industries.

Handbook of Research on Elderly Entrepreneurship -
Adnane Maâlaoui 2019-04-26

This handbook introduces readers to the concept of elderly entrepreneurship, and analyzes key issues concerning individuals and institutions. In addition, it presents theoretical and empirical studies exploring the reasons why elderly persons choose to pursue entrepreneurship, despite their advanced age. To investigate this comparatively new entrepreneurial phenomenon, the contributors address psychological, sociological and gerontological aspects, and share unique interdisciplinary insights. The book's chapters are methodologically diverse, and the scale of analysis ranges from individual cases to country-level patterns. At a time when the world's major economies are facing a demographic challenge due to ageing populations, elderly entrepreneurship may provide new economic opportunities and motivate more inclusive policymaking.

Entrepreneurship in Pacific Asia - Leo Paul Dana 1999
Entrepreneurs are now internationalising, and many more are likely to internationalise in the future. Yet, most small firms expand in an opportunistic fashion, because entrepreneurs seldom have the time and resources to gather reliable data about opportunities in foreign countries. Leo-Paul Dana has conducted extensive international field research with a view to compiling

key information on the business environment throughout Pacific Asia. Thus, the book is not just another "how to" guide. It reflects what is happening in an important region of our global economy. With this book, businessmen and business analysts, investors, academics and business students will gain invaluable insights into the conditions and opportunities for enterprise in these countries in this region.

Social Enterprise in Asia - Eric Bidet 2019-05-29

In the absence of a widely accepted and common definition of social enterprise (SE), a large research project, the "International Comparative Social Enterprise Models" (ICSEM) Project, was carried out over a five-year period; it involved more than 200 researchers from 55 countries and relied on bottom-up approaches to capture the SE phenomenon. This strategy made it possible to take into account and give legitimacy to locally embedded approaches, thus resulting in an analysis encompassing a wide diversity of social enterprises, while simultaneously allowing for the identification of major SE models to delineate the field on common grounds at the international level. These SE models reveal or confirm an overall trend towards new ways of sharing the responsibility for the common good in today's economies and societies. We tend to consider as good news the fact that social enterprises actually stem from all parts of the economy. Indeed, societies are facing many complex challenges at all levels, from the local to the global level. The diversity and internal variety of SE models are a sign of a broadly shared willingness to develop appropriate—although sometimes embryonic—responses to these challenges, on the basis of innovative economic/business models driven by a social mission. In

spite of their weaknesses, social enterprises may be seen as advocates for and vehicles of the general interest across the whole economy. Of course, the debate about privatisation, deregulation and globalised market competition—all factors that may hinder efforts in the search for the common good—has to be addressed as well. The first of a series of four ICSEM books, *Social Enterprise in Asia* will serve as a key reference and resource for teachers, researchers, students, experts, policy makers, journalists and other categories of people who want to acquire a broad understanding of the phenomena of social enterprise and social entrepreneurship as they emerge and develop across the world.

Cooperatives As A Catalyst For Sustainability: Lessons Learned From Asian Models - Leo-paul Dana 2023-01-04

The cooperative movement has played a vital role in economic development around the world. Cooperatives also contribute to the achievement of the United Nations' Sustainable Development Goals (SDGs). They generate revenue for economic growth, support the development of communities and local culture and help protect the environment. Cooperatives in Asia have been leaders in their approaches with comprehensive and supportive policies. Across Asia, there are unique models of cooperatives – some of which can be replicated internationally. They utilise collectivisation as an economic model with the cooperation of their populations. Cooperatives from Bangladesh, India, Israel, Japan, Nepal and the United Arab Emirates are also well-known for their proactive approach to sustainability. This book seeks to document the governance, leadership and sustainable best practices of cooperatives, to pave the way for the development of

cooperatives internationally, utilising the sustainable cooperatives of Asia as examples. Addressing the current gap in research about cooperatives, the chapters showcase lessons for the cooperative world in its movement towards sustainability through the examination of original case studies, as well as quantitative studies. The volume offers new insights to researchers and policymakers to understand the ecosystem surrounding cooperatives and actions to take to work towards their strengthening and welfare.

The New Asian Hemisphere - Kishore Mahbubani 2008-01-23

One of Asia's leading intellectuals illuminates what will be on the agenda as Western domination ends and the Asian renaissance impacts world politics, markets, and history

Entrepreneurship - Sílvio Manuel Brito 2018-04-04

Entrepreneurship is a powerful attitude that, in such a way, in the last few years, has become a discipline increasingly transversal to different areas of knowledge. Many times, we think about the things we want such as a good house, a brand new car, a beautiful relationship, a good friendship, and a good way to be in the world. Is that possible that you convert into an entrepreneur? This book shows some examples of that possibility, from simple people to a big organization. In all cases, if you become an entrepreneur, it will be for your taste and pleasure, a means to survive and enjoy the uncertainty, and rejoice that you have all

these in your hands and will. Can you find out the trends and overcome the challenges? We would say yes. It all depends on whether you want to develop and apply this attitude.

Asian Models Of Entrepreneurship - From The Indian Union And Nepal To The Japanese Archipelago: Context, Policy And Practice (2nd Edition) - Leo-paul Dana 2014-06-13

In this book, Leo-Paul Dana makes it clear that much can be learnt about the nature of entrepreneurial activity when we delve into the unique characteristics of different nations of South Asia, South-east Asia and East Asia. Through in-depth analyses and comprehensive reviews of many Asian countries, the profound differences both among and within countries of the region become vividly apparent. Dana juxtaposes the explosion in entrepreneurial growth within China against the struggles to build an entrepreneurial community in Japan, or the enlightened public policy leadership in Singapore against the crisis-driven developments in Korea. The range of factors identified within each of the 15 countries examined by Dana is not an example of random influences on the entrepreneurial process, because they can be construed in more systematic and logical ways. Thus, the book uncovers the Chinese model of gradual transition, the Royal Cambodian model, and the Doi-Moi model, among many others. The reader is challenged to grasp these different models, and identify their commonalities and differences.
