Born to Inspire - Vinit K. Bansal 2020-12-20

Some people are not just professionally successful but also achievers, not just because they are successful in their respective fields but also because they are a source of inspiration for everyone. They not only make a name for themselves but also add value and name to their institutions and countries. This book will give you an insight into the life, times, and world of some of these people. It takes you through the little-known journeys of these true achievers, who are leaders in their fields and have set examples in merit, excellence, and dedication. Their lives were never beds of roses. There were times when conditions were adverse and luck betrayed them, and yet, they refused to stop, and emerged winners in the race of life. There is the story of man who had only \$8 in his pocket when he went to the US and became the greatest engineer of modern times—today, he is known as the 'Father of the Pentium Chip'. There is the journey of a small town boy becoming a 'Hall of Fame' investor as per Forbes. From the son of a school teacher, an ordinary boy became a world-famous scientist, having 30 patents and 22 books to his credit. There is the tale of a man who once seemed to be "uninterested in academics" but went on to found one of India's most popular online fashion portals—Jabong.com. Another is the story of a Delhi boy who founded billion dollar companies like MTC and Soin LLC. This book aims at not only giving the reader the story of these stalwarts, but also spur them to be inspired and motivated to do something different in their own lives.

*Women in Science and Technology* - Namrata Gupta 2020-01-07

Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.
