Illinois Tort Law 4th Edition - Michael J. Polelle 2021-05-14
The newly revised, Fourth Edition of Illinois Tort Law provides the Illinois practitioner with a

quick-reference guide that summarizes the legal requirements of virtually every cause of action based in tort and examines in detail the common law and statutory requirements of each cause of action under Illinois law. This one-volume treatise is organized so that a glance of the appropriate section will let you focus on the relevant facts and critical issues of your client's case--whether you are conducting the investigation, preparing your pleadings, drafting interrogatories, or getting ready for trial. In the Fourth Edition, Professors Bruce Ottley and Rogelio Lasso have updated all 26 chapters and incorporated changes in the law that occurred since the last edition of the book. Easy reference to discussions and case law, Illinois Tort Law, Fourth

Edition, includes information on: • The liability of HMOs • Claims for fear of contracting AIDS and for failure to disclose HIV status • Federal and Illinois court rulings on the constitutionality of limitations on punitive and noneconomic damages • Court decisions on the Wrongful Death Act and the Tort Immunity Act • The "right of publicity" created by the Right to Privacy Act • U.S. Supreme Court decisions regarding federal preemption and punitive damages •

Municipal/Police liability under the Domestic Violence Act The eBook features links to Lexis Advance for further legal research options.

Guide for the Care and Use of Laboratory

Animals - National Research Council
2011-01-27

A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into

consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is

now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and

noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

**Space Shuttle Missions
Summary
(NASA/TM-2011-216142)** -
Robert D. Legler
2011-09-01

Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically "as flown" data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of

mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

New York City Tattoo -
Michael McCabe 1997

New York City Tattoo documents the lively, humorous and often violent history of the art from the early years of the 20th century, in the words of the men who "pushed the pins" in places like Coney Island and the Bowery. Tattooing at the time evoked the dangerous fringes of society, and for over a decade Michael McCabe assiduously gained the confidence of the few surviving practitioners of this vanished era. These highly-charged interviews provide a privileged look into a clannish world of honor, respect, and jealously guarded trade secrets. They reveal facets of New York social history and a volatile, misunderstood and

secretive art form.
