Higher Education in Ethiopia - Tebeje Molla 2018-01-18
This book focuses on higher education in Ethiopia, analysing persisting inequalities and policy responses against the backdrop of the extensive expansion and reform that the system has experienced in recent years. Drawing on empirical data generated through interviews, policy reviews and focus-group discussions, it explicates factors of structural inequality ranging from neoliberal policy orientations to repressive gender culture and geo-political peripherality. In a departure from conventional studies that consider policy a response to social problems, the book takes a critical perspective to show the constitutive role of policy, and explains how the representation of the problem of social inequality undermines equity policy outcomes in Ethiopian higher education. Not only does the book problematise the framing of the problem of inequality in the system, it also outlines strategies for designing transformative equity instruments. In explaining structural factors of inequality and equity provisions, the book productively combines sociological concepts with historical accounts and political economy insights. Given the increased economic optimism associated with higher education in sub-Saharan Africa and the neoliberal ideals underpinning much of the restructuring of the system in the region, this is a timely and important contribution that sheds light on the social justice implications and consequences of such changes. It offers fresh accounts of largely neglected qualitative cases of inequality, making it a valuable read for students and researchers in the areas of Ethiopian education policy studies, international and comparative education, and international development.

Social Media Generation in Urban China - Hanyun Huang 2014-01-18
Social media such as instant messaging (IM), social networking sites (SNS), blogs and microblogs are an integral part of adolescents' lives in China. Anecdotal evidence reported in the news has suggested that the increasing popularity of social media could make adolescents more vulnerable to being addicted. This exploratory study proposes the concept of "social media addiction" and examines (a) whether social media addiction exists among adolescents in urban China and, if so, who the addicts are, what their symptoms are and to what extent they are addicted; (b) whether sociopsychological traits (e.g., need for affiliation, impression management, narcissism and leisure boredom) can predict social media addiction among adolescents; (c) what gratifications are obtained by adolescents from their use of social media and whether these gratifications can predict social media addiction and (d) to what degree social media addiction influences adolescents' academic performance and social capital. This study employed quantitative questionnaire surveys among adolescents as the main research method, supplemented by qualitative pre-survey focus groups among adolescents and post-survey in-depth interviews among parents and teachers. Questionnaire surveys were conducted based on a multi-stage cluster sampling of seven middle schools in five urban Chinese cities: Beijing, Shanghai, Guangzhou, Shenzhen and Xiamen. The final sample consisted of 1,549 adolescents, of whom 90% had used social media. Using Young's classic definition of Internet addiction, 15.6% of participants were classified as social media addicts. The addicted adolescents were often self-absorbed, bored with their leisure time, and good at using manipulation through social media for impression management. Addicts experienced four major social media addiction symptoms: preoccupation, adverse consequences, alleviation of negative emotions and loss of interest in social activities. The seven social media gratifications identified in this study can be categorized into social, information and entertainment gratifications. Among these, entertainment gratifications had the most power to predict social media addiction, while information gratifications were the least likely to lead to addiction. Furthermore, these gratifications were found to be powerful mediators between the adolescents' sociopsychological traits and social media addiction. Finally, the results also indicated that social media addiction and its symptoms had a

significant negative impact on adolescents' academic performance and social capital.

Test bank for Baron and Byrne Social psychology - Eric D. Miller 2003

Instructor's Manual for Baron and Byrne Social Psychology, 10th Ed - George E. Schreer 2003

<u>EDUCATION FOR THE JOY OF IT</u> - Dr. Robert J. Pellegrini 2014-07-01
This book is targeted to all current or prospective high school students, college students, or anyone else who aspires to strengthen the educational foundation upon which to build the rest of her/his life -- with the hope that it is especially helpful to people who might otherwise become, or have already been formal educational program dropouts or lockouts. I cannot guarantee that applying what is offered here will ensure an "A" grade, or achievement of one's life goals. But I do guarantee that I have tried to summarize critical elements of thought, feeling, and action oriented to such objectives. Part I of this book is all about how to work both hard and "smart" to experience the joy of academic success. Hard work is necessary to achieve anything worthy of pride in our own creative effort. But it's not just how much or how hard we work at things. It is also "how smart" we work that determines our life outcomes. And what I mean by "working smart" is working efficiently and effectively. The goal here is to help all students reap as much as possible from their educational investment, whatever that investment may be in terms of time, money, energy, and self-disciplined personal sacrifices. Part II is about what it takes to achieve great success at anything in life. The format for this second part is, essentially, a psychological profile of outstanding achievers. From both my professional and personal experience, I've learned how vitally important education can be as an avenue to a pro-socially valued and personally satisfying life. And once again in 2014, I find myself championing an approach designed to facilitate human development through educational opportunity in a program I call "Life Construction 101" -- designed not just to augment efforts to help at-risk students, but to help every student enjoy academic success experiences. Education For The Joy Of It is the "user's manual" for that Life Construction 101 program. Accordingly, the Appendix to this book presents a brief, structured exercise designed to provide a very preliminary template for initiating the construction or reconstruction of one's life. And that's it. A little book that I hope will be one of the biggest books its readers ever read. RJP

Social Psychology - Robert A. Baron
The primary focus of Social Psychology, 14e, is the social world which has changed tremendously in recent years under technological advancements. These changes have important implications for how we think about ourselves and other people. Social psychology is the branch of psychology that studies all aspects of our behaviour with and toward others, our feelings and thoughts about them and the relationships we develop with them. The central message for social psychology as a field and for any book that seeks to represent it, is: Keep up with these technological changes in terms of their implications for social life and this is precisely what has been done in the 14th edition of this book.

Stereotype Dynamics - Yoshihisa Kashima 2008
This volume addresses the role of communication in stereotype dynamics, while placing the phenomenon of social stereotypes appropriately in the socio-cultural context. Stereotype Dynamics assembles top researchers in the field to investigate stereotype formation, maintenance, and transformation through interpersonal facets of communication. Section one presents meta-theoretical perspectives, strongly informed by theories and empirical research. Subsequent parts address the following research questions in the perspectives of language-based communication: What do the signs in a language mean, and how do the meanings of the signs shape stereotypes? How do people use those signs intentionally or unintentionally? Is language use biased in some way? How do language users' identities affect the meaning of a particular language use in social context? What are the social consequences of language-based communication? Does language-based communication provide a basis for the formation, maintenance, and transformation or social stereotypes? This timely book is ideal for advanced students, scholars, and researchers in social psychology, and related disciplines such as human communications and sociolinguistics. It is also appropriate for use as a supplement in upper level courses on prejudice and stereotyping.

Ethnicity in College - Anna M. Ortiz 2018-12-07
This book explores the importance, and construction, of ethnic identity among college students, and how ethnicity interfaces with students' interactions on campus, and the communities in which they live. Based on qualitative interviews with White, Latina/o, African American and Asian students, it captures both the college context and the individual experiences students have with their ethnicity, through the immediacy of the students' own voices. The authors observe how students

negotiate their ethnic identity within the process of becoming adults. They identify the influences of family, the importance of socio-historical forces that surround students' educational experiences, and the critical role of peers in students' ethnic identity development. While research has begun to document the positive outcomes associated with diverse learning environments, this study emphasizes and more closely delineates, just how these outcomes come to be. In addition, the study reveals how the freedom to express and develop ethnic identity, which multicultural environments ideally support, promotes student confidence and achievement in ways which students themselves can articulate. This work is distinctive in eschewing an ethnic minority perspective through which Whites are the primary reference group, and the standard from which all ethnic and racial identity processes evolve; as well as in considering the influences that growing up in a multi-ethnic context may have on ethnic identity processes, particularly where the "other" is not White. This perspective is particularly important at a time when students entering universities are more likely to come from highly segregated high school environments, and will confront ethnic and social differences for the first time in college. This book is intended as a resource for researchers and practitioners in psychology and higher education. It offers insights for student affairs and higher education administrators and leaders about the ways in which their campus policies and practices can positively influence the development of more supportive campus climates that draw on the strengths of each ethnic group to create an overarching pluralistic culture. It can also serve as a cultural diversity text for upper division or graduate courses on pluralism. Moreover, understanding students' ethnic identity, their personal growth, and adjustment to college, it is central to preparing individuals for life in a pluralistic society.

Social Policy and Human Development in Zambia - Ndangwa Noyoo 2010-01-30 Social Policy And Human Development In Zambia discusses social policy and human development endeavours in Zambia, including the various societal forces that converged on the country in both the pre-colonial and colonial periods and which later influenced post-colonial social policy

initiatives. The pre-colonial era epitomised indigenous forms of social protection that safeguarded the well-being of Africans. Colonial rule, which was foreign in orientation, was geared towards meeting the needs of a small European settler population through social policy programmes. Most of the discussions in the book unfold in the setting of a post-colonial society. The central thesis of the book is that social policy and human development in Zambia are inextricably bound up with the political and economic forces in the country and that they constantly reinforce each other. Politics is taken as an important variable that legitimises the role of politicians and policy-makers in determining the development path of the country. Thus, their efficacy, lack of depth or ineptitude will be translated into the way public policies, including social policy, are formulated and implemented. Given the normative nature of social policy, it is argued that ideology plays a critical role in both its formulation and execution. This argument is brought home by showing how the socialist government in Zambia during the 1960s and 1970s relied upon ideology to marshal social policy towards the goal of national development. Based on the analyses of different political eras in the country the book also argues that the economy is the central pillar in the implementation of social policy and the provision of social services.

Your Inner Mammal: How to Meet Your Real Emotional Needs and Become Stronger-for Self and Others - Ron Neff, Ph.D 2017-04-22 Your Inner Mammal takes on anxiety, anger and depression -- the major emotional maladies that afflict us in the cold, impersonal and threatening modern world. To do that, Dr. Neff builds on the concept of "your inner child." That concept has served us well in mental health for many years. If you are still a child – and a lucky one -- someone else may meet your emotional needs. But not if you are an adult. Your lover doesn't want to love you as a needy child. They want – and need – a competent adult. In short, the inner child concept tells you to attend to your own emotional needs. Your Inner Mammal tells you a lot more. It tells you what those needs are. And it provides chapter after chapter of tools to meet those needs – including chapters entitled, " The Importance of Being Calm," "Your Angry

Mammal," "Your Inner Playmate," " Your Inner Dancer, " "Getting In Touch," and "You Are Part of Nature – Embrace It. "

GradeAid with Practice Tests for Baron and Byrne, Social Psychology, Tenth Edition - Eric D. Miller 2003

Gender Issues in Entrepreneurship - Maria Minniti 2009
Entrepreneurship is a human universal. All over the world, and throughout history, people have created businesses. Yet, although women make up more than 50 percent of the world population, they own and manage significantly fewer businesses than men. Venture types and management styles vary across genders as well. Women entrepreneurship presents several distinctive characteristics that differentiate it from men entrepreneurship. But variations exist also across women entrepreneurs in various countries, and between women who are involved in entrepreneurship and those who are not. Overall, the explanation for the behavior of

women entrepreneurs and its distinctiveness is complex and multifaceted. Evidence to date suggests that reasons contributing to explaining these differences include demographic and socio-economic variables, subjective perceptions, and cultural factors and institutions, and that such differences have significant implications at the macro-economic level. Studying female entrepreneurship allows researchers to ask questions that shed light on the linkages between entrepreneurship and wealth creation, employment choices and cognition, human capital accumulation and labor market structure, employment choice and family dynamics, business creation and peace, and many others. From a scientific point of view, the study of female entrepreneurship as a distinct area of inquiry informs us not only about women behavior, but also about entrepreneurial and human behaviors in general. All over the world, female entrepreneurship has become an important component of academic and policy conversations around entrepreneurship. Still, there is much we don't yet understand. Taking stock of what has been learned so far, identifying the main gaps, and encourage scholars to push the frontier of knowledge in this area further are the goals of this work.

The Scope of Social Psychology - Miles Hewstone 2007-03-12
Social psychology attempts to understand, explain, predict and, when needed, change people's thoughts, feelings and behaviours. For a relatively young discipline it has already made great strides toward this awe-inspiring goal. Pioneers such as Lewin, Asch, Kelley and Festinger began groundwork in the 1940s and 1950s, but it was only in the late 1960s that social psychology came of age. Since then it has blossomed, both in investigating the basics of the discipline and in applying the insights from fundamental social psychology to different fields related to the area. This volume is devoted to the development of understanding in the field of social psychology over the last four decades, focusing on both basic and applied social psychology. Contributions are gathered under five main areas: attitudes and attitude change; social cognition and emotions; interpersonal and group processes; health behavior; and bereavement and coping. These five domains not only illustrate the scope of social psychology, but also pay tribute to one of the key figures in modern social psychology, Wolfgang Stroebe. Remarkably, he has made significant contributions across all five of these areas, and his research achievements exemplify the progress, prospects and problems faced by modern social psychology over the last 40 years. This volume includes contributions from some of the most distinguished names in the field, and all authors provide an overview or critical look at their specific area of expertise, tracing historical developments where appropriate. The Scope of Social Psychology provides a broad-ranging, illustrative review of the field of modern social psychology.

Mano Dura - Sonja Wolf 2017-01-31
In 1992, at the end of a twelve-year civil war, El Salvador was poised for a transition to democracy. Yet, after longstanding dominance by a small oligarchy that continually used violence to repress popular resistance, El Salvador's democracy has proven to be a fragile one, as social ills (poverty chief among them) have given rise to neighborhoods where gang activity now thrives. Mano Dura examines the ways in which the ruling ARENA party used gang violence to solidify political power in the hands of the elite—culminating in draconian "iron fist" antigang policies that undermine human rights while ultimately doing little to address the roots of gang membership. Drawing on extensive ethnographic fieldwork and policy analysis, Mano Dura examines the activities of three nongovernmental organizations (NGOs) that have advocated for more nuanced policies to eradicate gangs and the societal issues that are both a cause and an effect of gang proliferation. While other studies of street gangs have focused on relatively distant countries such as Colombia,

Argentina, and Jamaica, Sonja Wolf's research takes us to a country closer to the United States, where forced deportation has brought with it US gang culture. Charting the limited success of NGOs in influencing El Salvador's security policies, the book brings to light key contextual aspects—including myopic media coverage and the ironic populist support for ARENA, despite the party's protection of the elite at the expense of the greater society.

Psychoanalysis, Classic Social Psychology and Moral Living - Paul Marcus 2019-12-20
In Psychoanalysis, Classic Social Psychology and Moral Living: Let the Conversation Begin, Paul Marcus uniquely draws on psychoanalysis and social psychology to examine what affects the ethical decisions people make in their everyday life. Psychoanalysis traditionally looks at early experiences, concepts and drives which shape how we choose to behave in later life. In contrast, classic social psychology experiments have illustrated how specific situational forces can shape our moral behaviour. In this ground-breaking fusion of psychoanalysis and social psychology, Marcus gives a fresh new perspective to this and demonstrates how, in significant instances, these experimental findings contradict many presumed psychoanalytic ideas and explanations surrounding psychoanalytic moral psychology. Examining classic social psychology experiments, such as Asch's line judgement studies, Latané and Darley's bystander studies, Milgram's obedience studies, Mischel's Marshmallow Experiment and Zimbardo's Stanford Prison Experiment, Marcus pulls together insights and understanding from both disciplines, as well as ethics, to begin a conversation and set out a new understanding of how internal and external factors interact to shape our moral decisions and behaviours. Marcus has an international reputation for pushing boundaries of psychoanalytic thinking and, with ethics being an increasingly relevant topic in psychoanalysis and our world, this pioneering work is essential reading for psychoanalysts, psychoanalytic psychotherapists,

moral philosophy scholars and social psychologists.
