Local Economic Development in the Changing World - Christian Rogerson 2018-01-16

Over the last two decades the concept and practice of Local Economic Development (LED) has gained widespread acceptance around the world as a locally-based response to the challenges posed by globalization, devolution, local-level opportunities, and economic crises. Support for local economic development is now firmly on the agenda of many national governments and key international agencies. This volume examines the debates about Local Economic Development and examines some of the unfolding experiences of LED in the developing world. The focus is upon the region of southern Africa, and more especially upon post-apartheid South Africa. LED emerged in South Africa as one of the more significant post-apartheid development options being pursued by empowered localities with the overt encouragement of national government. Elsewhere in the developing world, much interest surrounds the experience of LED in post-apartheid South Africa, which is seen as a laboratory for experimentation, innovation, and learning. The seventeen chapters in this book examine the range of LED interventions that have been the basis for experimentation in the last decade, including both pro-market as well as pro-poor interventions. Key themes include debates about the most appropriate policy directions for LED, its contribution towards sustainable development, the role of social capital, cluster support, public procurement, eco-development, good governance and tourism-led LED. The book also contains a series of detailed case studies on the implementation of LED in South Africa and the wider region of southern Africa, including analyses of LED undertaken at a variety of scales from the provincial, metropolitan, and small-town level. Until now, most research on local economic development has focused on the developed world. This volume breaks new ground in applying LED policy and practices to problems specific to the developing world. It will be of interest to scholars of development studies, urban and regional planning, human geography, and urban studies.

How to use this Rough Guides Snapshot This Rough Guides Snapshot is one of a new generation of informative and easy-to-use travel-guide eBooks that guarantees you make the most of your visit. An essential tool for pre-trip planning, it also makes a great travel companion when you're on the road. Introduction to the KwaZulu-Natal is a good place to start, with an overview of the region's big attractions

and a list of highlights. From the table of contents, you can click straight to the main sections of the guide, which includes features on all the main sights and attractions. You'll find practical information on the country as a whole, including details on flights, in Basics. Shorter contents lists appear at the start of every section in the guide to make chapter navigation quick and easy. You can jump back to these by tapping the links that sit with an arrow icon. Detailed area maps can be found in the guide and in the dedicated map section, which also includes a full country map, accessible from the table of contents. Depending on your hardware, you can double-tap on the maps to see larger-scale versions, or select different scales. There are also thumbnails below more detailed maps - in these cases, you can opt to "zoom left/top" or "zoom right/bottom" or view the full map. The screen-lock function on your device is recommended when viewing enlarged maps. Make sure you have the latest software updates, too. Throughout the guide, we've flagged up our favourite places - a perfectly sited hotel, an atmospheric café, a special restaurant. You can select your own favourites and create a personalized itinerary by bookmarking the sights, venues and activities that are of interest, giving you the quickest possible access to everything you'll need for your time away.
