Finder sections, there is advice on horse transport takes into account new research, and the latest information on equine passports and microchipping.
Core Conditioning for Horses - Simon Coccozza 2019-10-22
Gentle ways to improve the horse's core fitness while relieving pain related to conditions such as kissing spine. Every equestrian wants to know: what is the difference between the horse that "dances" when you are on him, and the one that doesn't? According to Visconte Simon Coccozza, Trainer and Examiner for the La Fédération Française d'Equitation (FFE), it all comes down to the horse's posture. The horse's ability to use the powerful mechanisms already built into his body relies not upon the strength we can see on the outside but the strength on the inside. This invisible and complex arrangement of internal "core" muscles control the horse's posture,

suppleness, and agility. Their good condition is the key to the dance. Equine core muscles are very difficult to isolate with the traditional training techniques common to horse sports. However, by examining what we do with the human body when faced with a weak core, we can find new methods for conditioning these areas of the equine body. Coccozza has taken principles of the human practice of yoga and used them to develop novel ways of reaching deep within the horse's body and: Gently "unlock" areas that may be a little "rusty." Improve core fitness. And even relieve pain related to conditions such as kissing spine. In this highly illustrated book, he provides step-by-step instruction explaining easy mounted exercises that enhance the horse's posture, and boost his confidence in his body and movement, making him easier to ride, and ultimately, the dance partner you've always imagined.

The Domestic Horse - D. S. Mills
2005-03-10

Humans have had a profound influence on the horse since its domestication in the late Neolithic period. Used for transport, labour, food and recreation, horses have become important in many facets of our society. Daniel Mills and Sue McDonnell have produced an exceptional account of our current knowledge of the development and management of the behaviour of the horse, from its wild roots. *The Domestic Horse*, first published in

2005, brings together, for the first time, an unrivalled collection of international scientific authors to write on the latest findings concerning the behaviour and welfare of this beautiful animal. Illustrated throughout, *The Domestic Horse* will appeal to animal scientists, those working with horses in a professional capacity and the owner/enthusiast. It also provides sound complementary reading for animal/equine science courses and veterinary students.

World-Class Grooming for Horses - Cat Hill 2019-11-15

When owning, training, riding, and showing horses, there is a certain "look" to which one aspires. World-

class "turnout"—a horse in peak condition, perfectly coiffed and luminous with health, outfitted with gleaming and well-fit tack appropriate for his sport—can take your breath away. And while it can certainly play a significant role in a competitive rider's success, it is just as appealing to have any horse "groomed to the nines," whether he's headed for an afternoon lesson or just out on the trail. Achieving this superior look is not just about clean tack, shiny brass, spotless stockings, or perfect braids. The most important steps are in the day-to-day nitty-gritty of grooming and caring for the horse: noticing "something not-quite-right" about the way the horse looks or moves before it becomes "something wrong"; brushing and combing and trimming a little every day so the horse's skin and coat remain healthy; knowing how to prepare a horse properly for training, and how to cool him down afterward. Now, two of the best professional grooms in the business share their trade secrets, with over 1200 color photographs accompanying the ultimate modern-day guide for all riders who want their horses to look and feel their best.

Business Management for the Equine Industry - Sharon Eastwood 2008-04-15
Written by a team of consultants who combine modern business knowledge with decades of direct experience of working in the equine industry, this book bridges the gap between modern

business theory and equine business practice. After providing overviews of the equestrian industry and the livery sector as a detailed example, Part I (Assessing a Business) sets out how to access the business environment, externally, competitively and with regard to its internal resources. Part 2 (Management) goes on to deal with resource management and how to go about strategic planning and marketing, concluding with an overall Business Plan. Part 3 sets out a series of case histories to illustrate the principles as discussed in Part 1 and 2. No other book applies a truly modern business approach to equine enterprise. The Authors Sharon Eastwood, Anne-Lise Riis Jensen and Anna Jordon work together at Dark Horse Consultancy, a team of equine business consultants offering a wide range of advice and services to the industry. Horse and Stable Management - Jeremy Houghton Brown 2013-03-13

Since the first edition was published in 1984 *Horse and Stable Management* has become the recognised source of reliable information on all aspects of the practical management of horses and ponies. It is now the established textbook for everyone who owns a horse or works with horses. This fourth edition has been radically revised and reorganised to include the most up-to-date and accurate procedures and advice. With many new photographs, *Horse and Stable Management* includes chapters covering evolution and behaviour, conformation and action, routine preventive measures, nursing the sick horse, first aid, lameness and the management of breeding stock. *Horse and Stable Management* is essential reading for those taking British Horse Society and Association of British Riding Schools examinations as well as those taking college equine courses or National Vocational Qualifications in horse care and management. The Authors Jeremy Houghton Brown was manager of the British National Equestrian Centre and the British Racing School, then for many years principal lecturer in equine studies at Warwickshire College, where he started and pioneered British equine education. Above all, he is an experienced, practical horseman. Sarah Pilliner is an equine consultant specialising in horse care. She is also an experienced lecturer, competition rider,

seniorexaminer, and the author of several books. Zoe Davies is a former lecturer in equine science, a consultant equine nutritionist, author and external examiner for higher education courses. She has substantial experience in equine management and training. From previous reviews: 'A new classic... a clearly written and easily understood handbook.' Riding 'It is extremely comprehensive. It is also accurate. Infact, a most valuable book for anyone who owns a horse.' Horse and Hound 'The approach and contents are refreshingly different... very informative and a valuable source of reference.' Horse and Rider *BHS Manual for Coaching and Teaching Riding* - Islay Auty 2011-07

The official handbook for those studying the BHS teaching qualifications has now been fully updated and revised. Written for the BHS by a chief examiner, this handbook provides clear guidelines on how the skills of riding should be taught and how riding school lessons should be conducted. It is aimed at less experienced and trainee riding instructors, especially those involved with weekly riders and covers: * How to develop communication skills and effective body language * Advice on teaching adult novices and children, whether in groups or one-to-one * Valuable multi-option lesson plans * Choosing school horses and keeping them happy in their work * Safety and insurance, and how to cope with mishaps and accidents * Dealing with rider problems, such as nervousness, stiffness, poor co-ordination, etc. The BHS Complete Manual of Equitation - 2011

The BHS Complete Manual of Equitation is the official handbook for all those learning to ride and/or train horses and also for teachers of

riding. It is based on the hugely successful BHS Manual of Equitation which was first published nearly thirty years ago and which was updated and reprinted many times. The Complete Manual retains core material from The Manual and this has been updated and new chapters have been added by leading specialists, all of whom are Fellows of the BHS, on The Historical Review, The Scales of Training, The Training of the Dressage Horse, Jump Training and Cross-country Riding. The BHS Complete Manual of Equitation is a complete, authoritative training guide for horse and rider both on the flat and over show jumps and cross-country fences, based on sound classical principles that have stood the test of time.

Horse Pasture Management - Paul H. Sharpe 2018-11-09

Horse Pasture Management begins with coverage of the structure, function and nutritional value of plants, continuing into identification of

pasture plants. Management of soil and plants in a pasture is covered next, followed by horse grazing behavior, feed choices of horses, management of grazing horses, and how to calculate how many horses should be grazing relative to land size. Management of hay and silage are included, since year-round grazing is not possible on many horse farms. A number of chapters deal with interactions of a horse farm with the environment and other living things. As an aid in good pasture management, one chapter explains construction and use of fencing and watering systems. Contributions are rounded out with a chapter explaining how the University of Kentucky helps horse farm managers develop their pasture management programs. The purpose of the book is to help people provide a better life for horses Provides the basic principles of pasture management for those involved in equine-related fields and study Covers a variety of strategies for managing the behavior, grouping, environmental, and feeding needs of grazing horses to ensure high levels of welfare and health Includes information on environmental best practices, plant and soil assessment, and wildlife concerns Explains pasture-related diseases and toxic plants to be avoided Includes links to useful resources and existing extension programs
