Islam, Economics, and Society (RLE Politics of Islam) - Syed Nawab Haider Naqvi 2013-07-24

The Islamic perception of the socio-economic process is dynamic and its insistence on social justice is uncompromising. To produce the best social structure, according to this view, man's economic endeavours should be motivated by a meaningful moral philosophy. In the face of the challenges presented by the modern world, the practice of Islamic economics raises many complex and profound issues. These are addressed in this highly important work, which must be considered essential reading for all those who live in the vision of the 'right'. First published in 1994.

The Sufi Mystery - Nathaniel P. Archer 1980

The mystery of the Sufis, in the ancient usage of the word, is the experience of self-realization taught by traditional schools of "mysticism." In English, too, the word "mystery" also stands for an art or craft, a skill; and this sense is also preserved in the Sufic usage of the word "Work," or science of the Sufi: "Knowledge without action is like wax without honey." The Sufi Mystery brings together writings by Ameer Ali, the Islamic historian; Professor E. G. Browne, the Orientalist; Sir Richard Burton; Robert Graves; Idries Shah; and many others. It deals with authentic and mutated schools and orders and their literature over a very wide area of geography and belief. Sufi theories and practices are examined, visits to Sufi centers are described, the relationships of master and disciple investigated, and links with other systems noted.

Family Life in Islam - Khurshid Ahmad 1981

Managing Marital Disputes in Malaysia - Sven Cederroth 2012-12-06

A trend found in many Islamic societies in recent years has been the increasing regulation of family life by Islamic law and a corresponding move away from customary law and informal conflict resolution procedures. The situation in

Malaysia, particularly in urban Malay society, is no exception here. Several studies already exist of the nature and extent of Malaysia's Islamic judicial system but the general tendency has been to ignore the actual operation of the syariah courts and related institutions. This study addresses this need with an in-depth analysis of the key area of intra-family conflict and demonstrates that, although formally the counsellor, kadi and judge have defined roles for conflict resolution, in practice much flexibility is evident in the use of consultation, conciliation, mediation, arbitration and adjudication techniques. This study will be of special interest to legal anthropologists and those scholars interested in the increasing application of Islamic law in many different countries.

Law in a Digital World - M. Ethan Katsh 1995

The world of law is a world of information. Rules, judgments, decisions, interpretations, and agreements all involve using and communicating information. Today, we are experiencing a significant transition, from letters fixed on paper to information stored electronically. The digital era, where information is created, stored, and communicated electronically, is quickly approaching, if not already here. The future of law will no longer be found in impressive buildings and leather-bound books, but in small pieces of silicon, in streams of light, and in millions of miles of wires and cable. It will be a world of new relationships and greater possibilities for individual and group communication, an environment where the value of information increases as it is shared. In *Law in a Digital World*, M. Ethan Katsh explores how these new technologies will alter one of our most central institutions. He considers the different ways in which people will not only electronically read and write, but also interact with our vast storehouses of legal knowledge and information. He envisions how sounds and pictures will play into the largely imageless print world of law, and looks at the future importance of graphic and nontextual communication. He explores how the flexible, personalized organization of data will transform the way we gather information, and whether information can or cannot be contained, raising questions of copyright and privacy. What happens to the law when information is more

plentiful and accessible? What happens to those people who suddenly have access to information never before available? Does the use of information in a new form change the institution, the user, and those who come in contact with the user? And, what role does the lawyer play in all of this? For citizens, for lawyers, for all those who will be part of the digital world rushing toward us, Katsh answers these questions while considering the implications of this new era.

"Shari'a is the code of conduct in Islam, but what does it really mean? British-based civil rights lawyer Kadri explains how legal ideas gradually emerged in Islam, how shari'a is practiced in different countries today, and how in the last decades it has been appropriated by extremists to the detriment of everyone."-- Library Journal.

Introduction to Middle Eastern Law - Chibli Mallat 2007-07-12

This book provides an introduction to the laws of the Middle East, defining the contours of a field of study that deserves to be called 'Middle Eastern law'. It introduces Middle Eastern law as a reflection of legal styles, many of which are shared by Islamic law and the laws of Christian and Jewish Near Eastern communities. It offers a detailed survey of the foundations of Middle Eastern Law, using court archives and an array of legal sources from the earliest records of Hammurabi to the massive compendia of law in the Islamic classical age through to the latest decisions of Middle Eastern high courts. It focuses on the way legislators and courts conceive of law and apply it in the Middle East. It builds on the author's extensive legal practice, with the aim of introducing the Middle Eastern law's main sources and concepts in a manner accessible to non-specialist legal scholars and practitioners alike. The book begins with an exploration of the depth and variety of Middle Eastern law, introducing the concepts of shari'a, fiqh, and qanun, (which all mean 'law'), and dwelling on Islamic law as the 'common law' of the Middle East. It provides a historical introduction to the contemporary Middle East, exploring political systems, constitutional law, judicial review, the laws of tort and obligations, commercial law (including Islamic banking, company law, capital markets, and commercial arbitration); and examines legislative reform in family law and the position of women in the legal system. The author considers the interaction between Islamic and Western laws and includes a bibliography designed for further research into the jurisdictions and themes explored throughout the book.

**Challenging Islamic Orthodoxy** - Al Makin 2016-09-22

This book is the first work that comprehensively presents the accounts of Lia Eden, a former flower arranger who claims to have received divine messages from the Archangel Gabriel and founded the divine Eden Kingdom in her house in Jakarta. This book places Lia Eden's prophetic trajectory in the context of diverse Indonesian spiritual and religious traditions, by which hundreds of others also claimed to have been commanded by God to lead people and to establish religious groups. This book offers a fresh approach towards the rich Indonesian religious and spiritual traditions with particular attention to the accounts of the emergence of indigenous prophets who founded some popular religions. It presents the history of prophetic tradition which remains alive in Indonesian society from the colonial to reform period. It also explores the ways in which these prophets rebelled against two hegemonies: colonial power in the past and Islamic orthodoxy in the present. The discussion of this book focuses on Lia Eden including her biography, claims to prophethood and divinity, the development of her group Eden Kingdom, her challenge to Islamic orthodoxy under the banner of the MUI (Indonesian Ulama Council), her persecution by radical groups, her experiences in court trials and imprisonment, and public responses to her emergence. The discussion also covers other themes currently drawing public attention in Indonesia, such as pluralism, religious freedom, tolerance, discrimination against minorities, and secularisation.

*Islamic Development Management* - Noor Zahirah Mohd Sidek 2019-07-10

This book examines a range of current issues in Islamic development management. The first part of the book explores practical issues in governance and the application of Islamic governance in new areas such as quality management systems and the tourism industry, while the second delves into questions of sustainability. The book proposes a new Islamic sustainability and offers new perspectives on CSR in connection with waqf (Islamic endowments) and microfinance. The third part of the book addresses Islamic values and how they are applied in entrepreneurship, inheritance, consumer behavior and marketing. The fourth part examines the issues of waqf and takaful (a form of insurance in line with the Islamic laws), while the fifth discusses the fiqh (the study of Islamic legal codes) and legal framework from the perspectives of entrepreneurship, higher education, reporting and inheritance (wills). The final chapter is dedicated to the application of Islamic principles in various other issues. Written in an accessible style, the book will appeal to newcomers to the field, as well as researchers and academics with an interest in Islamic development management.

Islamic Law and Contemporary Issues - Ahmad Zaki Yamani 2006-03-01

The Islamic Shari'a as a phrase has two scope of meanings. Generally and widely construed it denotes everything that has been written by Moslem jurists throughout the centuries, whether it dealt with contemporaneous issues of the time or in anticipation of future ones. The jurist derived their principles from the Qur'an and the Sunna (way of action and the opinions of the Prophet), and from the other sources of Shari'a such as Ijma', (the consensus of the community represented by its scholars and learned men), and public interest considerations. The Shari'a looked upon in this wide scope constitute a huge Juristic tradition the value of which depends on the individual jurist himself, his era, or even the particular problem confronting him. As such the system has a tremendous scholastic value to the Moslem, however, it has no binding authority; since within it one might find different, and sometimes contradictory principles resolving the same issues, depending on the Juristic school that propagated the principle. Furthermore, it cannot have a binding authority since circumstances that brought about a certain principle might not be in existence any more, and surely we cannot maintain that

previous Moslem Jurists have anticipated all our existing contemporary problems. Yet, as I said before in this wide sense, one cannot deny the Shari'a scholastic value as an elaborate system of deduction which should be relied upon for future derivations of principles. Construed narrowly, the Shari'a is confined to the undoubted principles of the Qur'an, to what is true and valid of the Sunna, and the consensus of the community represented by its scholars and learned men during a certain period and regarding a particular problem, provided such consensus was possible. Viewed as such, the Shari'a has a binding authority on every Moslem, and he is obligated to follow and employ it to resolve his affairs, deriving what is not explicit of its principles by the methods and means. The statement that it is too late for Shari'a to face contemporary issues is an exaggerated prejudiced statement, made possible because of the closing of the doors of investigation many centuries ago. The spirit and general principles of Shari'a are as valid today as they were yesterday many centuries ago and as they will be tomorrow many centuries to come. They are like a green oasis in the desolate desert of our lives which is over crowded with problems and conflicting ideologies. At the time of the original publication Ahmed Zaki Yamani was Minister of Petroleum and Mineral Resources, Kingdom of Saudi Arabia. AUTHOR COMMENTS The Islamic world, relying on the principles of Shari'a, can achieve its own entity, independent of East and West, and by which it can defend and protect itself from the torrent of communism and certain inequities of capitalism. The ability of Shari'a, to developed and evolve to meet the ever-changing needs of society, by relying on the concept of public interest as a source of legislation. The collective notion in Islam should be emphasized, outstanding quality in Shari'a which establishes a profound equilibrium between the individual and the community, should be put in perspective in relation to our own age. When our political leaders begin to think seriously about the happiness and welfare of their people, they shall find in Shari'a a guiding proven system to achieve and fulfill their aims. The immortal principles of Shari'a can be used to correct and cure our social diseases in the Islamic world. Perhaps even the West might find it, again, a ray of light and knowledge to achieve still a more advanced civilization, or at least to preserve its existing one.

*Islam and Democracy* - Asef Bayat 2007

Can islam and democracy exist side by side? Is Islam compatible with democracy? The text examines one of the most frequently-asked and yet misguided questions. Democratic ethos should not and cannot be deduced from some essence of religions supposedly inscribed in the scriptures. Rather, they are the outcome of political struggles that push Islam toward democratic or authoritarian directions. Asef Bayat offers a new approach to examine Islam and democracy arguing how the social struggles of diverse Muslim populations, those with different interests and orientation, render Islam to embrace democratic ideas or authoritarian disposition. "Islamism" and "post-Islamism" are discussed as representing two contrasting movements which have taken Islam into different, authoritarian and inclusive, political directions.
