Conservative Victory - Sean Hannity 2010-03-30

Barack Obama and his radical team of self-professed socialists, fringe activists, and others are trying to remake the American way of life. They have used their new Democratic majority to launch an alarming assault on our capitalist system—while abandoning the war on terror, undermining our national security, and weakening our position in the eyes of our enemies. The "candidate of change" is threatening to change our country irreparably, and for the worse—if we don't act to stop him

now. Sean Hannity has been sounding the alarms about Obama and his agenda from the start. Now—in his first new book in six years—he issues a stirring call to action. Hannity surveys all the major Obama players—from the president's affiliation with radical theology to his advisers' history of Marxist activism, repression of the media, support for leftist dictators, and worse. He exposes their resulting campaign to dismantle the American free-market system and forfeit our national sovereignty. But he draws on the examples of Ronald Reagan and the GOP's Contract with America to show how conservatives can unite behind this country's most cherished principles and act now to get America back on the right track—while we still can.
