*Compositionality and Concepts in Linguistics and Psychology* - James A. Hampton 2017-09-19  
By highlighting relations between experimental and theoretical work, this volume explores new ways of addressing one of the central challenges in the study of language and cognition. The articles bring together work by leading scholars and younger researchers in psychology, linguistics and philosophy. An introductory

chapter lays out the background on concept composition, a problem that is stimulating much new research in cognitive science. Researchers in this interdisciplinary domain aim to explain how meanings of complex expressions are derived from simple lexical concepts and to show how these meanings connect to concept representations. Traditionally, much of the work on concept composition has been carried out

within separate disciplines, where cognitive psychologists have concentrated on concept representations, and linguists and philosophers have focused on the meaning and use of logical operators. This volume demonstrates an important change in this situation, where convergence points between these three disciplines in cognitive science are emerging and are leading to new findings and theoretical insights. This book is open access under a CC BY license.

**Technology for Intelligent Systems** -

Tomonobu Senjyu 2020-10-29

This book gathers papers addressing state-of-the-art research in all areas of information and communication technologies and their applications in intelligent computing, cloud storage, data mining and software analysis. It presents the outcomes of the Fourth International Conference on Information and Communication Technology for Intelligent Systems, which was held in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analysis techniques and algorithms, making it a valuable resource for researchers and practitioners alike.

## **Nanobiotechnology in Agriculture** - Khalid

Rehman Hakeem 2020-04-17

Agriculture is considered as a backbone of developing nations as it caters the needs of the people, directly or indirectly. The global agriculture currently faces enormous challenges like land degradation and reduced soil fertility, shrinking of land, low production yield, water accessibility and a dearth of labor due to evacuation of individuals from farming. Besides, the global population increases at an exponential rate and it is predicted that the global population will be 9 billion by 2050 that in turn leads to food crisis in near future. Although, green revolution revolutionizes the agriculture sector by enhancing the yield but it was not considered as a sustainable approach. Exorbitant use of chemical fertilizers and pesticides to boost the crop yield is definitely not a convenient approach for agriculture sustainability in the light of the fact that these chemical fertilizers are considered as double-

edged sword, which on one hand enhance the crop yield but at the same time possess deleterious effect on the soil microflora and thus declines its fertility. Besides, it cause irreversible damage to the soil texture and disrupts the equilibrium in the food chain across ecosystem, which might in turn lead to genetic mutations in future generations of consumers. Thus, the increased dependence on fabricated agricultural additives during and post green revolution has generated serious issues pertaining to sustainability, environmental impact and health hazards. Therefore, nano-biotechnology has emerged as a promising tool to tackle the above problems especially in the agriculture sector. Nano-agribusiness is an emerged field to enhance crop yield, rejuvenate soil health, provide precision farming and stimulate plant growth. Nano-biotechnology is an essential tool in modern agriculture and is considered as a primary economic driver in near future. It is evaluated that joining of cutting

edge nanotechnology in agribusiness would push the worldwide monetary development to approximately US\$ 3.4 trillion by 2020 which clearly indicates that how agri-nanobiotechnology plays a pivotal role in the agricultural sector, without any negative impact on the environment and other regulatory issues of biosafety. Agri-nanobiotechnology is an innovative green technology, which provides the solution to global food security, sustainability and climate change. The current book is presenting the role of nano-biotechnology in modern agriculture and how it plays a pivotal role to boost the agri-business.

**Intelligent Vehicle Technologies** - Ljubo Vlacic 2001

An exploration of the growing field of intelligent

technologies, from intelligent control systems to intelligent sensors. Systems such as in-car navigation devices and cruise control are already being introduced into modern vehicles, but manufacturers are now racing to develop systems such as smart cruise control, on-vehicle driver information systems, collision avoidance systems, vision enhancement and roadworthiness diagnostics systems. There are practical examples and illustrations throughout the book.

**Transgender Medicine** - Leonid Poretsky 2019-02-22

Although transgender persons have been present in various societies throughout human history, it is only during the last several years that they have become widely acknowledged in our society and their right to quality medical care has been established. In the United States,

endocrinologists have been providing hormonal therapy for transgender individuals for decades; however, until recently, there has been only limited literature on this subject, and non-endocrine aspects of medical care for transgender individual have not been well addressed in the endocrine literature. The goal of this volume is not only to address the latest in hormonal therapy for transgender individuals (including pediatric and geriatric age groups), but also to familiarize the reader with other aspects of transgender care, including primary and surgical care, fertility preservation, and the management of HIV infection. In addition to medical issues, psychological, social, ethical and legal issues pertinent to transgender individuals add to the complexities of successful treatment of these patients. A final chapter includes extensive additional resources for both transgender patients and providers. Thus, an endocrinologist providing care to a transgender person will be able to use this single resource to

address most of the patient's needs. While Transgender Medicine is intended primarily for endocrinologists, this book will be also useful to primary care physicians, surgeons providing gender-confirming procedures, mental health professionals participating in the care of transgender persons, and medical residents and students.

*A Guide to Parking* - International Parking Institute 2018-05-30

If you own a car, use public transportation, go to work or school, use health care, shop or dine out, or are part of a metropolitan community, parking affects you, probably in more ways than you've thought about. Because parking has such a huge effect on what happens in cities and towns and how the greater transportation system functions, decision-makers are beginning to realize that it's critical to employ parking expertise at the beginning of the planning process. Designing and implementing an effective, professionally managed parking

strategy can mean the difference between frustrating and costly traffic congestion and efficient, time-saving traffic flow. A Guide to Parking provides information on the current state of parking, providing professionals and students with an overview on major areas of parking and the transportation and mobility industry, punctuated by brief program examples. *Economic Model Predictive Control* - Matthew Ellis 2016-07-27

This book presents general methods for the design of economic model predictive control (EMPC) systems for broad classes of nonlinear systems that address key theoretical and practical considerations including recursive feasibility, closed-loop stability, closed-loop performance, and computational efficiency. Specifically, the book proposes: Lyapunov-based EMPC methods for nonlinear systems; two-tier EMPC architectures that are highly computationally efficient; and EMPC schemes handling explicitly uncertainty, time-varying cost

functions, time-delays and multiple-time-scale dynamics. The proposed methods employ a variety of tools ranging from nonlinear systems analysis, through Lyapunov-based control techniques to nonlinear dynamic optimization. The applicability and performance of the proposed methods are demonstrated through a number of chemical process examples. The book presents state-of-the-art methods for the design of economic model predictive control systems for chemical processes. In addition to being mathematically rigorous, these methods accommodate key practical issues, for example, direct optimization of process economics, time-varying economic cost functions and computational efficiency. Numerous comments and remarks providing fundamental understanding of the merging of process economics and feedback control into a single framework are included. A control engineer can easily tailor the many detailed examples of industrial relevance given within the text to a

specific application. The authors present a rich collection of new research topics and references to significant recent work making Economic Model Predictive Control an important source of information and inspiration for academics and graduate students researching the area and for process engineers interested in applying its ideas.

**Machine Learning and Knowledge Discovery in Databases** - Hendrik Blockeel 2013-09-12

This three-volume set LNAI 8188, 8189 and 8190 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases, ECML PKDD 2013, held in Prague, Czech Republic, in September 2013. The 111 revised research papers presented together with 5 invited talks were carefully reviewed and selected from 447 submissions. The papers are organized in topical sections on reinforcement learning; Markov decision processes; active learning and optimization; learning from sequences; time series and spatio-temporal data; data streams; graphs and networks; social network analysis; natural language processing and information extraction; ranking and recommender systems; matrix and tensor analysis; structured output prediction, multi-label and multi-task learning; transfer learning; bayesian learning; graphical models; nearest-neighbor methods; ensembles;

statistical learning; semi-supervised learning; unsupervised learning; subgroup discovery, outlier detection and anomaly detection; privacy and security; evaluation; applications; and medical applications.

**Pathways to a Hydrogen Future** - Thomas E Drennen 2007-08-29

Hydrogen may someday fuel our cars and power and heat our homes and businesses and revolutionize the way we use energy. Moving to a hydrogen economy could help reduce our reliance on foreign oil, improve local air quality, and reduce the risk of climate change. Despite the potential of hydrogen, there is no guarantee that the hydrogen economy will happen as the obstacles are considerable and the competing visions are many. Pathways to a Hydrogen Future seeks to untangle the competing visions of a hydrogen economy, explain the trade-offs and obstacles and offer recommendations for a path forward. The results are based on a detailed simulation model developed at Sandia

National Laboratories: "The Hydrogen Futures Simulation Model (H2Sim)". The H2Sim is a high-level strategic tool for evaluating the economic and environmental trade-offs of alternative hydrogen production, storage, transport, and end use options in the year 2020. An executive version of H2Sim is included with the book allowing readers to explore the various scenarios discussed. H2Sim's ease of use and its ability to provide answers to these types of questions make it a powerful educational and policy making tool. The model's structure is ideal for exploring "what-if" questions, such as: Can fuel cell vehicles (FCVs) compete economically with current cars if the FCVs are 2.5 times as efficient? Should the hydrogen be produced at fueling stations or at central locations and transported to fueling stations? \* Includes an executive version of H2Sim allowing readers to explore the various scenarios discussed \* H2Sim's ease of use and ability to provide answers makes it a powerful educational and

*Natural Resources, Neither Curse nor Destiny* - Daniel Lederman 2006-10-23

'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in

developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.

*The Economics of the Environment and Natural Resources* - Quentin Grafton 2008-04-15

The Economics of the Environment and Natural Resources covers the essential topics students need to understand environmental and resource problems and their possible solutions. Its unique lecture format provides an in-depth exploration of discrete topics, ideal for upper-level undergraduate, graduate or doctoral study. Each chapter depicts the key theoretical insights, major issues, and real-life problems that motivate the subject. In addition, the chapters feature practical applications and case studies, a list of annotated further reading, and extensive references. Offers broad treatment of issues in Environmental and Resource Economics. Provides in-depth

exploration of a wide range of topics with its unique lecture format. Depicts key theoretical insights, major issues, and real-life problems for each subject. Features case studies, annotated further reading, extensive references, and a detailed glossary.

**Chemistry and Technology of Flavours and Fragrances** - David Rowe 2009-02-12

Modern flavours and fragrances are complex formulated products, containing blends of aroma compounds with auxiliary materials, enabling desirable flavours or fragrances to be added to a huge range of products. From the identification and synthesis of materials such as cinnamaldehyde and vanillin in the 19th Century to the current application of advanced analytical techniques for identification of trace aroma compounds present in natural materials, the flavour and fragrance industry has developed as a key part of the worldwide specialty chemicals industry. With contributions mainly coming from industry based

experts, *Chemistry & Technology of Flavours and Fragrances* provides a detailed overview of the synthesis, chemistry and application technology of the major classes of aroma compounds.

With separate chapters covering important technical aspects such as the stability of aroma compounds, structure - odour relationships and identification of aroma compounds, this book will be essential reading for both experienced and graduate level entrants to the flavour & fragrance industry. It will also serve as an important introduction to the subject for chemists and technologists in those industries that use flavours and fragrances, eg food, cosmetics & toiletries, and household products. David Rowe is Technical Manager at De Monchy Aromatics Ltd., Poole UK

[Reading behind Bars](#) - Jill Grunenwald  
2019-07-02

In December 2008, twenty-something Jill Grunenwald graduated with her master's degree in library science, ready to start living her dream

of becoming a librarian. But the economy had a different idea. As the Great Recession reared its ugly head, jobs were scarce. After some searching, however, Jill was lucky enough to snag one of the few librarian gigs left in her home state of Ohio. The catch? The job was behind bars as the prison librarian at a men's minimum-security prison. Talk about baptism by fire. As an untested twentysomething woman, to say that the job was out of Jill's comfort zone was an understatement. She was forced to adapt on the spot, speedily learning to take the metal detectors, hulking security guards, and colorful inmates in stride. Over the course of a little less than two years, Jill came to see past the bleak surroundings and the orange jumpsuits and recognize the humanity of the men stuck behind bars. They were just like every other library patron—persons who simply wanted to read, to be educated and entertained through the written word. By helping these inmates, Jill simultaneously began to recognize the humanity

in everyone and to discover inner strength that she never knew she had. At turns poignant and hilarious, *Reading behind Bars* is a perfect read for fans of *Orange Is the New Black* and *Shakespeare Saved My Life*.

**Hearthstone: Innkeeper's Tavern Cookbook** - Chelsea Monroe-Cassel 2017-11-07

Sheathe your sword, draw your cards, and summon more than 50 delicious bites and cocktails inspired by Blizzard Entertainment's smash-hit digital card game. From the best-selling author of *World of Warcraft: The Official Cookbook* and *A Feast of Ice and Fire: The Official Game of Thrones Companion Cookbook* comes a new collection of delicious recipes. With the *Innkeeper's Tavern Cookbook*, fans will unlock *Hearthstone*-inspired eats, cocktails, and mocktails. A replica of Harth Stonebrew's own private cookbook, this delightful guide contains

more than fifty all-new recipes perfect for any Fireside Gathering or game night, from Sarge's Easy Mac & Cheese to Medivh's favorite martini—and, of course, funnel cake. Complete with mouthwatering color photos and Harth's personal notations, recipe modifications, and reflections, the Innkeeper's Tavern Cookbook brings the world of Hearthstone to life like never before. Hearthstone is a fast-paced digital card game where players sling spells, summon minions, and command powerful heroes in duels of epic strategy. Featuring familiar characters from the Warcraft® universe, Hearthstone has won over legions of fans with its humor and deceptively simple gameplay.

*Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems* - Laurent Perron  
2008-05-08

This book constitutes the refereed proceedings of the 5th International Conference on Integration of AI and OR Techniques in

Constraint Programming for Combinatorial Optimization Problems, CPAIOR 2008, held in Paris, France, in May 2008. The 18 revised long papers and 22 revised short papers presented together with 3 invited talks were carefully reviewed and selected from 130 submissions. The papers describe current research in the fields of constraint programming, artificial intelligence, and operations research to explore ways of solving large-scale, practical optimization problems through integration and hybridization of the fields' different techniques.

This book is the outcome of a series of discussions at the Philips Symposium on

Intelligent Algorithms, held in Eindhoven in December 2004. It offers exciting and practical examples of the use of intelligent algorithms in ambient and biomedical computing. It contains topics such as bioscience computing, database design, machine consciousness, scheduling, video summarization, audio classification, semantic reasoning, machine learning, tracking and localization, secure computing, and communication.

Clean My Space - Melissa Maker 2017-03-07

The wildly popular YouTube star behind CLEAN MY SPACE presents the breakthrough solution to cleaning better with less effort. Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every

day. In her long-awaited debut book, she shares her revolutionary 3-step solution:

- Identify the most important areas (MIAs) in your home that need attention
- Select the proper products, tools, and techniques (PTT) for the job
- Implement these new cleaning routines so that they stick

Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!), her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple, groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Hayley's Help - Life of a Homemaker - Hayley Leitch 2017-04-26

Hayley Leitch, star of the popular TV series "Obsessive Compulsive Cleaners" brings to you: 'Hayley's help- Life of a Homemaker' the first in the series of Hayley's help books. Since starting on the Channel 4 series Hayley has helped many people restore order in their otherwise chaotic lives, and the love of helping others is what inspired 'Hayley's help' 'Life of a Homemaker'. This is a lighthearted book that delves into the daily struggles of living the life as a homemaker. Join Hayley as she shares her trials & tribulations in a week of her homemaking life. From the struggle of the school run and its playground, to surviving the weekly food shopping trips! Hayley reveals the different cleaning regimes she utilizes to keep the household ticking over. 'Hayley's help - Life of a Homemaker', is a must for all homemakers seeking handy, time saving tips and tricks to help make the tough job of being a homemaker, that little bit easy. Hayley shares her helpful cleaning hacks in her usual open and honest

humor that she has become known, and loved for on TV and her very own YouTube channel, If you're after lots of laughs, inspiration and homemaker ideas then this is the book for you!

### **50 Years of Integer Programming**

**1958-2008** - Michael Jünger 2009-11-06

In 1958, Ralph E. Gomory transformed the field of integer programming when he published a paper that described a cutting-plane algorithm for pure integer programs and announced that the method could be refined to give a finite algorithm for integer programming. In 2008, to commemorate the anniversary of this seminal paper, a special workshop celebrating fifty years of integer programming was held in Aussois, France, as part of the 12th Combinatorial Optimization Workshop. It contains reprints of key historical articles and written versions of survey lectures on six of the hottest topics in the field by distinguished members of the integer programming community. Useful for anyone in mathematics, computer science and operations

research, this book exposes mathematical optimization, specifically integer programming and combinatorial optimization, to a broad audience.

*Strategic Retail Management* - Joachim Zentes  
2016-10-07

This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like

corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.

**Air Fryer Perfection** - America's Test Kitchen  
2019-01-29

Get the best possible results from your air fryer and discover the best ways to use it (not just

frying!) with 75 fast, convenient, great-tasting recipes. Air fryers promise crisp fried food without actual deep frying. Was it too good to be believed? And what can you cook in them besides French fries? In truth, air fryers cook food by blasting it with circulated hot air. The method is fast, convenient, and can be surprisingly good--if you have the right recipe. We cooked more than 70 pounds of potatoes to create the perfect air fryer French fry, with an evenly crisp exterior and creamy center. But what really drew us to this appliance was the variety of what you can make in it, effortlessly and without having to enlist numerous pots and pans. In addition to crispy fried chicken and fries, you'll turn out evenly cooked steaks, such as Spice-Rubbed Steak with Snap Pea and Cucumber Salad (the spice rub gives them a bold crust), Sweet and Smoky Pork Tenderloin with Roasted Butternut Squash (the pork cooks directly on top of the squash to save time), and Tandoori Chicken Thighs. Many of the recipes

yield both a main and a side for a complete meal. Most recipes take only 45 minutes or even less time, and all come with complete nutrition information. Frozen foods cook up crisp in the air fryer, but the results are so much better when you start with homemade. So we offer freeze-it-yourself Chicken Nuggets, Southwestern Beef Hand Pies, and more that go straight from freezer to air fryer and cook to perfection. And we share plenty of kid-friendly meals and snacks, from Better-Than-Boxed Fish Sticks to Zucchini Fries.

*Pelvic and Acetabular Fractures* - Dana C. Mears  
1986

**JIAC2009 book of abstracts** - C. Lokhorst  
2009-07-01

The broad range of research topics reported in this abstract book is a valuable resource for

researchers, advisors, teachers and professionals in agriculture. ICT in agriculture, the field of EFITA's interest, precision agriculture and precision livestock farming are becoming ever more relevant as the agricultural industry struggles to come to terms with various developments. These include issues of cooperation, Internet, standardisation, software architecture, robotics, environment, animal and human welfare, economics, traceability, farm management, vehicle guidance, crop management, animal disease and livestock management. Whilst some benefits have proved elusive, others contribute positively to today's agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming and the 7th ECPA conference are presented in companion publications.

*Inside My Mother* - Ali Cobby Eckermann

2015-07-01

'...an outstanding achievement that will, with its skill and elegance, deeply enrich Australian poetry and whoever reads it.' Judges' citation, 2013 NSW Premier's Literary Award for Poetry. Ali Cobby Eckermann, a Yankunytjatjara/Kokatha poet, is at the forefront of Australian Indigenous poetry. *Inside My*

*Mother* is both a political and personal collection, angry and tender, propelled by the need to remember, yet brimming with energy and vitality - qualities that distinguished her previous, prize-winning verse novel, *Ruby Moonlight*. Tributes to country, to her elders, and to the animals and spirits that inhabit the landscape, coupled with the rhythms of mourning and celebration that pulse through the poems, make this a moving and personal collection. Grief is deeply felt and vividly portrayed in poems such as 'Inside My Mother' and 'Lament'. There is defiance and protest in 'Clapsticks' and 'I Tell You True'. In the final section there is a marked generational shift as the elders begin to pass away and the poet as grandmother comes to accept her rightful place as matriarch.
