50 Timeless Scientists - K. Krishna Murty 2008-09-04

Here we have scientists who missed Nobel Prize and those whom Nobel missed. - A Nobel Prize awarded to Pauling was branded as an insult! But he is the only one to receive two unshared Nobels. - Bardeen returned to Swedish king for another Nobel as if to fulfill earlier promise. - Ironically an Agricultural Scientist received a Nobel Peace Prize. Yes!

What is peace without food? - An anguished Barbara Mc Clintock refused to publish her papers, but Nobel committee discovered her. - Then we have scientists who received awards in prison cells, scientists who made discoveries in the prison cells. - Tesla was thrown out of his labs, cheated by another great man but his alternating current runs our homes now. - Carlson went from pillar to post with his photocopy machine and it is now the Xerox. - Townes had a revelation for LASER on a park bench. - When Maiman made it practical, a Hollywood actress, Bette Davis wondered if it is a death Ray. - Medicines from Jenner, Pasteur and the like consigned some diseases to history. - If only Subba Rao had lived a few years more, he would have killed some more diseases. - A trio of scientists transformed the twentieth century by inventing the transistor. - To top it, a scientist who was not allowed to go on a holiday invented the microchip. - New York Times reversed its ridicule ladled out on a rocket scientist after 40 years only after man landed on the moon. - A school teacher testified in the court to save his old student, Fansworth for his rightful invention, the television. - Davy openly declared his student as his greatest discovery, Michael Faraday! You have them all! Biographies that educate and entertain too!!

47 Ways to Raise Prices... Without Losing Customers - Marlene Jensen

2020-11-30

It's a tough time to have a small business! Shrinking sales and rising costs have many entrepreneurs: * Waking up in a cold sweat afraid their business can't survive * Pouring over financials – without finding anything else they can cut In this economy, there's only one answer that can help the business survive – you have to raise prices. But what will your customers do? You won't find a faster, easier blueprint for raising prices without alienating your customers. Thirteen of the tactics don't require you do anything else but raise the price – each utilizing a different psychological principle. Others are tactics you can use in negotiations, or with changes in the product, promotion, positioning, packaging, or distribution. And you get the 1-2-3 PriceChangeModel™ that lets you assess the likely results of your price changes – and whether to respond to a competitor's change. You can read a tactic, raise your price, and immediately protect your business. AND you have this “idea book” for any time in the future when you face another pricing decision.

Rapeseed - Nancy Freund 2013-09-01
Can you trust your own brain?
Challenging what we know about our senses, Rapeseed features a synesthetic mom from Kansas with cross-wired colors, smells, and sounds in her letters, her numbers, and her turbulent memories. She's been quietly keeping secrets from and with her husband until his job moves the family to England and rocks their carefully constructed history. The Coopers are displaced by geography, by psychology, and by the subtle tangos of their family: teenaged indiscretions, alcohol, church-going, long-term family feuds, neuroscience, and very worrying new friends. Desperate to untangle the mixed textures of her past while her teenage son confronts a dangerous future, Carolann navigates busy London and winding country roads in search of the one thing promising resolution at home. A funny and painfully true debut novel from a bright new voice in American fiction.
Smart Moves for Liberal Arts Grads - Sheila Curran 2012-06-20

Most people would love to have 20/20 hindsight on their careers. In *Smart Moves for Liberal Arts Grads*, college career experts Sheila Curran and Suzanne Greenwald have assembled the next best thing: the collective wisdom of a diverse and inspiring cast of success stories—twenty-three liberal arts graduates who have gone on to all manner of fascinating and satisfying professions. The authors have combined lessons from the stories with their own hands-on experience with thousands of students and graduates to outline a framework for finding a perfect career. What makes *Smart Moves* different is that it provides essential career advice while being fun to read. Readers will be struck by the frankness of the biographies of real graduates whose careers have taken twists and turns.

Todd turned his passion into a living as the founder and CEO of several small businesses and a professional cellist; Thad's path took him from English major to a dream job in the front office of a major league baseball team; and a subway ride helped Sharon speed her intended career leap from a luxury department store to journalism. What binds them together is that they have all made smart moves on the way to career success—both during their liberal arts education and in the real world. *Smart Moves* not only champions the value of a liberal arts education, it also embraces the complexity of careers, and the notion that many different factors contribute to success: education, experience, attitude, personal characteristics, and a good dose of luck. *Smart Moves* is an inspiration to all those who are seeking proven strategies to follow their passion—no matter what their age. The quarter million liberal arts students who receive diplomas each year will truly benefit from the insights of *Smart Moves*. But this book is equally helpful for high school students (and their guidance counselors) looking at colleges, for graduates still looking for their life's work, and for parents who want to understand career realities for their children. An innovative career guide for our stressful, fast-paced world, *Smart Moves for Liberal Arts Grads* illuminates valuable career lessons with sharp advice and an unparalleled framework for success.

Dream Quartet - June Ballantyne
2021-09-24
I received four stories over a few months from dreams that came over a period of days and stayed in my mind

until I wrote them down, and others via my subconscious. When I was sitting in my car at the beach and events happened that forced me to go home and sit at my computer, the stories came at great speed into my mind, and I typed them out and read them afterwards. The first is about a young girl who has moved to London for her new job working for the government. She meets a young gypsy who wants to tell her something. They have a connection, and events lead her to join him in the summer at the gypsy encampment, where she learns of her true family. Her life changes from there. The second story, again from a dream over a period of days, is a love story. A girl has a past that gets in the way. The third story I love. I was sitting in my car at the beach and words ran across the book I was trying to read. I drove home, and before I arrived at my door, the words were pushing their way into my head. I sat and typed as fast as my fingers could keep me going, and then it ended. I did not know what I wrote, so I read the story: an amusing plan by six young adults to have a mystery holiday, while at the same time creating fun things for each of them to do while waiting for clues at their hotel, each one filled with mischief. It had an amusing twist for the ending. However, that night I had to get up and go to my computer and continue with a second part to the story. I really enjoyed it. The final story was very emotional for me. There was heartache, the mystery of where your soul goes after death, how life continues on a new path, and who is in charge.
