The authors, Dr. Noa Davenport, Ruth Distler Schwartz, and Gail Pursell Elliott have written a book for every employee and manager in America. The book deals with what has become a household word in Europe: Mobbing. Mobbing is a "ganging up" by several individuals, to force someone out of the workplace through rumor, innuendo, intimidation, discrediting, and particularly, humiliation. Mobbing is a serious form of nonsexual, nonracial harassment. It has been legally described as status-blind harassment.

The Five Things We Cannot Change - David Richo 2006-06-13

Why is it that despite our best efforts, many of us remain fundamentally unhappy and unfulfilled in our lives? In this provocative and inspiring book, David Richo distills thirty years of experience as a therapist to explain the underlying roots of unhappiness—and the surprising secret to finding freedom and fulfillment. There are certain facts of life that we cannot change—the unavoidable "givens" of human existence: (1) everything changes and ends, (2) things do not always go according to plan, (3) life is not always fair, (4) pain is a part of life, and (5) people are not loving and loyal all the time. Richo shows us that by dropping our deep-seated resistance to these givens, we can find liberation and discover the true

richness that life has to offer. Blending Western psychology and Eastern spirituality, including practical exercises, Richo shows us how to open up to our lives—including to what is frightening, painful, or disappointing—and discover our greatest gifts.

This book reveals an entirely new, cost-effective model for helping the majority of people quickly and compassionately. This ten-session training program includes topics such as: "The Price of Happiness" (Step 1) "How to Break Out of a Bad Mood" (Step 4) "Self-esteem -What Is It? How Do I Get It?" Undoing Depression - Richard O'Connor 2021-09-28

The bestselling approachable guide that has inspired thousands of readers to manage or overcome depression – fully revised and updated for life in the 21st century. Depression rates around the world have skyrocketed in the 20-plus years since Richard O'Connor first published his classic book on living with and overcoming depression. Nearly 40 million American adults suffer from the condition, which affects nearly every aspect of life, from relationships, to job performance, physical health, productivity, and, of course, overall happiness. And in an increasingly stressful and overwhelming world, it's more important than ever to understand the causes and effects of depression, and what we can do to overcome it. In this fully revised and updated edition – which includes updated information on the power of mindfulness, the relationship between depression and other diseases, the risks and side effects of medication, depression's effect on thinking, and the benefits of exercise – Dr. O'Connor explains that, like heart disease and other physical conditions, depression is fueled by complex and interrelated factors: genetic, biochemical, environmental. But Dr. O'Connor focuses on an additional factor that is often overlooked: our own habits. Unwittingly we get good at depression. We learn how to hide it, and how to work around it. We may even achieve great things, but with constant struggle rather than satisfaction. Relying on these methods to make it through each day, we deprive ourselves of true recovery, of deep joy and healthy emotion. Undoing Depression teaches us how to replace depressive patterns with a new and more effective set of skills. We already know how to "do" depression—and we can learn how to undo it. With a truly holistic approach that synthesizes the best of the many schools of thought about this painful disease, and a critical eye toward medications, O'Connor offers new hope—and new life—for sufferers of depression.
