Banking, Lending and Real Estate - Claudio Scardovi 2019-05-23

This book deals directly with the risk/return multiple trade-offs coming out of the closely intertwined relationship between banking and real estate. The authors explore how banks could embrace a more proactive approach to make the most of their, mostly 'long only', exposure to real

estate, and create positive spillover effects on their real estate counterparts and the sector as a whole. It provides a "state of the art" representation and analysis of the strategies that best practices in banking are adopting to manage these issues and plan for a new set of interrelations, driving a "virtuous circle" as opposed to the current one. Banking, Lending

and Real Estate is built on the academic knowhow and professional expertise of the authors, who have been researching, writing and working on this joint topic for over a decade. With its pragmatic approach, it allows the reader to capture which leading hedge active and holistic approaches are available today and proven to treat, for example, the banks' overexposure to this asset class; to manage "unlikely to pay" and sub-performing positions; and to optimize the recovery value coming from the work out of real estate related NPL (and underlying assets). Case studies and relevant examples are provided, leveraging on the authors' experience in consulting projects in the EMEA region and from working with global, regional and domestic banks and the real estate players acting across its value chain. This book will appeal to both academics and business practitioners within the banking, financial services and real estate sectors, as well as professionals from financial and strategic/industrial advisory working in those

fields.

Quantitative Trading - Xin Guo 2017-01-06

The first part of this book discusses institutions and mechanisms of algorithmic trading, market microstructure, high-frequency data and stylized facts, time and event aggregation, order book dynamics, trading strategies and algorithms, transaction costs, market impact and execution strategies, risk analysis, and management. The second part covers market impact models, network models, multi-asset trading, machine learning techniques, and nonlinear filtering. The third part discusses electronic market making, liquidity, systemic risk, recent developments and debates on the subject.

Gender Based Violence in University

Communities - Anitha, Sundari 2018-06-27

Until recently, higher education in the UK has largely failed to recognise gender-based violence (GBV) on campus, but following the UK government task force set up in 2015, universities are becoming more aware of the

issue. And recent cases in the media about the sexualised abuse of power in institutions such as universities, Parliament and Hollywood highlight the prevalence and damaging impact of GBV. In this book, academics and practitioners provide the first in-depth overview of research and practice in GBV in universities. They set out the international context of ideologies, politics and institutional structures that underlie responses to GBV in elsewhere in Europe, in the US, and in Australia, and consider the implications of implementing related policy and practice. Presenting examples of innovative British approaches to engagement with the issue, the book also considers UK, EU and UN legislation to give an international perspective, making it of direct use to discussions of 'what works' in preventing GBV.

Gender Violence - Laura L. O'Toole 2007-08
The approach of the year 2000 has made the study of apocalyptic movements trendy. But groups anticipating the end of the world will

continue to predict Armageddon even after the calendar clicks to triple 0s. A Domsday Reader brings together pronouncements, edicts, and scriptures written by prominent apocalyptic movements from a wide range of traditions and ideologies to offer an exceptional look into their belief systems. Focused on attaining paradise, millenarianism often anticipates great, cosmic change. While most think of religious belief as motivating such fervor, Daniels' comparative approach encompasses secular movements such as environmentalism and the Montana Freeman, and argues that such groups are often more political than religious in nature. The book includes documents from groups such as the Branch Davidians, the Order of the Solar Temple, Heaven's Gate, and white supremacists. Each document is preceded by a substantive introduction placing the movement and its beliefs in context. This important overview of contemporary politics of the End will remain a valuable resource long after the year 2000 has

come and gone.

Tourism and Gender-based Violence - Paola Vizcaino 2020-08-14

"This book focuses on the multiple and interconnected manifestations of violence that women/girls encounter in tourism consumption and production while seeking to open the debate on violence against sexual minorities (LGBT) and discussing men/boys as victims and perpetrators of GBV"--

Women and Mental Health - Dora Kohen 2014-02-04

We know that gender traits and mental disorders are based on social, cultural, personal and physiological background. In order to formulate the best management plan for the patient, the mental health practitioner needs to incorporate all available information. *Women and Mental Health* provides a comprehensive overview of the most prominent mental health problems in women today. Examining the physiological, social and psychological factors of mental illness, and

providing an up-to-date perspective on the etiology of different disorders, the book will help mental health professionals formulate the best management plan for the individual. Covering issues including perinatal psychiatric disorders, depression, eating disorders, schizophrenia, and alcohol and drug abuse - from a female perspective - *Women and Mental Health* will prove a valuable tool for all those working in the fields of mental health.

The Effects of School-Related Gender-Based Violence on Academic Performance - Shahriar Kibriya 2016-02-01

Scandalous Economics - Aida A. Hozic 2016
While feminist economists and movements such as Occupy Wall Street have pointed to the distributional inequalities that are an effect of financial deregulation, scholars haven't really grappled with the representational inequalities inherent in the way we view the politics of the market. *Scandalous Economics* breaks new

ground by doing precisely this.

Social Media Management - Amy Van Looy

2015-09-14

This undergraduate textbook adopts the perspective of organizations - not individuals - and clarifies the impact of social media on their different departments or disciplines, while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach, embracing IT, marketing, HR and many other fields. Readers will benefit from a comprehensive selection of current topics, including: tools, tactics and strategies for social media, internal and external communication, viral marketing campaigns, social CRM, employer branding, e-recruiting, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues.

Routledge Handbook of the Business of Women's Sport - Nancy Lough 2019-05-21

Combining knowledge from sport management,

marketing, media, leadership, governance, and consumer behavior in innovative ways, this book goes further than any other in surveying current theory and research on the business of women's sport around the world, making it an unparalleled resource for all those who aspire to work in, or understand, women's sport. Featuring international perspectives, with authors from North America, South America, Europe, Asia, and Oceania, and insightful, in-depth profiles of real leaders within different sectors of women's sport in the global sport industry, the Routledge Handbook of the Business of Women's Sport offers an integrated understanding of the ways traditional media and social media impact both the understanding and advancement of women's sport properties, businesses, teams, and athletes. Innovative case studies show how societal issues such as gender, power, and framing impact the business of women's sports and those who work in women's sport. An essential reference for any researcher or

advanced student with an interest in women's sport or women in business, and useful supplementary reading for researchers and advanced students working in sport business, sport management, mainstream business and management, or women's studies.

Gender Violence in Peace and War - Victoria Sanford 2016-09-16

Reports from war zones often note the obscene victimization of women, who are frequently raped, tortured, beaten, and pressed into sexual servitude. Yet this reign of terror against women not only occurs during exceptional moments of social collapse, but during peacetime too. As this powerful book argues, violence against women should be understood as a systemic problem—one for which the state must be held accountable. The twelve essays in *Gender Violence in Peace and War* present a continuum of cases where the state enables violence against women—from state-sponsored torture to lax prosecution of sexual assault. Some contributors

uncover buried histories of state violence against women throughout the twentieth century, in locations as diverse as Ireland, Indonesia, and Guatemala. Others spotlight ongoing struggles to define the state's role in preventing gendered violence, from domestic abuse policies in the Russian Federation to anti-trafficking laws in the United States. Bringing together cutting-edge research from political science, history, gender studies, anthropology, and legal studies, this collection offers a comparative analysis of how the state facilitates, legitimates, and perpetuates gender violence worldwide. The contributors also offer vital insights into how states might adequately protect women's rights in peacetime, as well as how to intervene when a state declares war on its female citizens.

Analytics in Healthcare - Christo El Morr 2019-01-21

This book offers a practical introduction to healthcare analytics that does not require a background in data science or statistics. It

presents the basics of data, analytics and tools and includes multiple examples of their applications in the field. The book also identifies practical challenges that fuel the need for analytics in healthcare as well as the solutions to address these problems. In the healthcare field, professionals have access to vast amount of data in the form of staff records, electronic patient record, clinical findings, diagnosis, prescription drug, medical imaging procedure, mobile health, resources available, etc. Managing the data and analyzing it to properly understand it and use it to make well-informed decisions can be a challenge for managers and health care professionals. A new generation of applications, sometimes referred to as end-user analytics or self-serve analytics, are specifically designed for non-technical users such as managers and business professionals. The ability to use these increasingly accessible tools with the abundant data requires a basic understanding of the core concepts of data, analytics, and interpretation of

outcomes. This book is a resource for such individuals to demystify and learn the basics of data management and analytics for healthcare, while also looking towards future directions in the field.

Core Commitments for Children in Humanitarian Action - UNICEF Staff 2010-05

Annotation. The Core Commitments for Children in Humanitarian Action the CCCs constitute UNICEF s central policy on how to uphold the rights of children affected by humanitarian crisis. They are a framework for humanitarian action, around which UNICEF seeks to engage with partners. The intent of the updated CCCs remains to promote predictable, effective and timely collective humanitarian action, and to clearly outline the areas in which UNICEF can best contribute to results. Initially developed in 1998 and reviewed in 2004, this latest edition of the CCCs brings UNICEF s humanitarian policy in line with evolving humanitarian contexts, including humanitarian reform and the cluster approach,

informed by field-based evidence and practice. Multicultural Counseling Applications for Improved Mental Healthcare Services - Jegathesan, Anasuya Jegathevi 2018-10-12
The availability of practical applications, techniques, and case studies by international therapists is limited despite expansions to the fields of clinical psychology and counseling. As dialogues surrounding mental health grow in the East, it is important to maintain therapeutic modalities that ensure the highest level of patient-centered rehabilitation and care are met across global networks. Multicultural Counseling Applications for Improved Mental Healthcare Services is an essential reference source that discusses techniques in addressing different religions and cultures in counseling and therapy. The research in this publication provides a platform and a voice for Eastern therapists to contribute to the body of knowledge and build a more robust therapeutic framework for practitioners worldwide. Featuring topics such as

psychotherapy, refugee counseling, and women empowerment, this book is ideally designed for mental health professionals, counselors, therapists, clinical psychologists, sociologists, social workers, researchers, students, and social science academicians seeking coverage on significant advances in therapy, as well as the skills, challenges, and abilities that practitioners facing diverse populations must manage on a daily basis.

Mobility-as-a-Service - Malte Ackermann
2021-07-05

The advent of mobility-as-a-service and the disruption of the automotive industry are both overlapping and fuelled by the same developments and thus raise a very fundamental question: are we at peak car? Based on the author's extensive field research, academic study, and professional experience, this book explores this very question as well as the underlying social, economic, generational, and regulatory changes that lead to a new mobility

regime. Through rich descriptions of established OEMs and mobility start-ups, it discusses the current forms of mobility and the promise of autonomous technology. It further explores the strategic dimension of these developments so as to navigate and succeed within the disruptive and ever-changing environment of mobility services.

The Political Economy of Violence Against Women - Jacqui True 2012-09-06

Violence against women is a major problem in all countries, affecting women in every socio-economic group and at every life stage. Yet, when women enjoy good social and economic status they are less vulnerable to violence across all societies. This book develops a political economy approach to understanding violence against women - from the household to the transnational level - accounting for its globally increasing scale and brutality.

Pricing Analytics - Walter R. Paczkowski
2018-06-27

The theme of this book is simple. The price - the number someone puts on a product to help consumers decide to buy that product - comes from data. Specifically, it comes from statistically modeling the data. This book gives the reader the statistical modeling tools needed to get the number to put on a product. But statistical modeling is not done in a vacuum. Economic and statistical principles and theory conjointly provide the background and framework for the models. Therefore, this book emphasizes two interlocking components of modeling: economic theory and statistical principles. The economic theory component is sufficient to provide understanding of the basic principles for pricing, especially about elasticities, which measure the effects of pricing on key business metrics. Elasticity estimation is the goal of statistical modeling, so attention is paid to the concept and implications of elasticities. The statistical modeling component is advanced and detailed covering choice (conjoint, discrete choice, MaxDiff) and

sales data modeling. Experimental design principles, model estimation approaches, and analysis methods are discussed and developed for choice models. Regression fundamentals have been developed for sales model specification and estimation and expanded for latent class analysis.

Collaborating for Change - Susan Marine 2020

"In the midst of unprecedented attention to gender based violence (GBV) globally, prompted in part by the #MeToo movement, this book provides a new analysis of how higher education cultures can be transformed. It offers reflections from faculty, staff and students about how change has happened and could happen on their campuses in ways that go beyond implementation of programmes and policies. Building on what is already known from decades of scholarship and practice in the US, and more recent attention elsewhere, this book provides an inter-disciplinary, international overview of

attempts to transform higher education cultures in order to eradicate GBV.. Change happens because people act, usually with others. At the heart of transformative efforts lie collaborations between faculty, staff, students, activists and community organisations. The contributors to the book reflect on what makes for constructive, effective collaborations and how to avoid the common mistakes in working with others to end GBV. They consider what has worked to challenge the reluctance-or outright hostility-they have encountered in their work against GBV and how their collaborations have succeeded in transforming the ways we think about GV and what we do about it.Chapters focus on experiences in Canada, the US, England, Scotland, France and India to examine different approaches to tackling GBV in higher education. They reveal the cultural variations in which GBV occurs as well as the similarities across cultures-that GBV is committed overwhelmingly by men against women and reflects a determination to

assert masculine power. Together, they demonstrate that, to make higher education a safe environment for all, nothing short of a transformation is required"--

Believing - Anita Hill 2021-09-28

"An elegant, impassioned demand that America see gender-based violence as a cultural and structural problem that hurts everyone, not just victims and survivors... It's at times downright virtuosic in the threads it weaves together."—NPR Winner of the 2022 ABA Silver Gavel Award for Books From the woman who gave the landmark testimony against Clarence Thomas as a sexual menace, a new manifesto about the origins and course of gender violence in our society; a combination of memoir, personal accounts, law, and social analysis, and a powerful call to arms from one of our most prominent and poised survivors. In 1991, Anita Hill began something that's still unfinished work. The issues of gender violence, touching on sex, race, age, and power, are as urgent today as they were

when she first testified. *Believing* is a story of America's three decades long reckoning with gender violence, one that offers insights into its roots, and paths to creating dialogue and substantive change. It is a call to action that offers guidance based on what this brave, committed fighter has learned from a lifetime of advocacy and her search for solutions to a problem that is still tearing America apart. We once thought gender-based violence--from casual harassment to rape and murder--was an individual problem that affected a few; we now know it's cultural and endemic, and happens to our acquaintances, colleagues, friends and family members, and it can be physical, emotional and verbal. Women of color experience sexual harassment at higher rates than White women. Street harassment is ubiquitous and can escalate to violence. Transgender and nonbinary people are particularly vulnerable. Anita Hill draws on her years as a teacher, legal scholar, and advocate, and on the experiences of the

thousands of individuals who have told her their stories, to trace the pipeline of behavior that follows individuals from place to place: from home to school to work and back home. In measured, clear, blunt terms, she demonstrates the impact it has on every aspect of our lives, including our physical and mental wellbeing, housing stability, political participation, economy and community safety, and how our descriptive language undermines progress toward solutions. And she is uncompromising in her demands that our laws and our leaders must address the issue concretely and immediately.

Digitization in Controlling - Andre Große
Kamphake 2020-01-02

Andre Große Kamphake deals with the digitization in controlling and focuses in this context on the analysis of automated forecasting processes within a chemical company. He aims at outlining to what extent and how accurate forecasting processes can be automated in the age of digitization and big data. Therefore, the

forecast of the working capital is put at the center since it plays a leading role for the cash collection process. Based on data from 2015 to 2018, two different forecasting models are combined to optimally predict the different components contained in the working capital. The author manages to prove that both a trained forecasting algorithm achieves a prediction accuracy of 92.49 % and statistical methods in machine learning lead to a significant increase in forecasts compared to naive forecasting models. Addressing Gender-based Violence in the Latin American and Caribbean Region - Andrew R. Morrison 2004

The authors examine good practice approaches in justice, health, education, and multisectoral approaches. In each sector, they identify good practices for: (1) law and policies; (2) institutional reforms; (3) community-level interventions; and (4) individual behavior change strategies. The authors offer conclusions and recommendations for future work on gender-based violence: It is

essential to focus on the prevention of GBV, not just on services for its survivors. Prevention is best achieved by empowering women and reducing gender disparities, and by changing norms and attitudes which foster violence. Interventions should employ a multisectoral approach and work at different levels--individual, community, institutional, and laws and policies. GBV may be common in the Latin America and the Caribbean region, but there are promising approaches available to begin working toward its elimination"--Abstract.

A trailblazing text, *Gender Violence, Third Edition* is an essential read for students, activists, and others.

Fintech Business Models - Matthias Fischer
2021-02-08

This book on fintechs shows an international comparison on a global level. It is the first book where 10 years of financing rounds for fintechs

have been analyzed for 10 different fintech segments. It is the first book to show the Canvas business model for fintechs. Professionals and students get a global understanding of fintechs. The case examples in the book cover Europe, the U.S. and China. About the author: Matthias Fischer is professor of finance and banking at the Institute of Technology Nuremberg Georg-Simon-Ohm in Germany. His research has focused on strategy and M&A in the banking sector, value-based management, robo-advisory and fintechs. Dr. Fischer also serves as a member of the Groupe de Recherche en Management at the IAE Nice Graduate School of Management, Université Côte d'Azur in France. He is internationally active as a strategy and financial advisor. Reviews of the book: FinTech is not the next 'big thing.' It is the big thing now! FinTech is the new business model for the global financial sector, offering clear and enormous potential for vast economies of scale and scope, massive cost savings and efficiency gains, significant risk reduction, and

opening the door to banking for literally billions of currently unbanked people. Professor Fischer has done a masterful job of expertly and informatively taking us through all aspects of the revolutionary new FinTech business models. Using state-of-the-art research techniques, he insightfully shows us how FinTech firms are financed and how they aspire to create value. His in-depth case studies unlock the keys to success in the FinTech sector. His fascinating book is a 'must read' for all financial professionals. Dr. Stephen Morrell, Professor of Economics and Finance, Andreas School of Business, Barry University, Miami, USA Matthias Fischer's latest book offers a comprehensive overview of Fintech business models around the world. With a very pedagogical approach, and in a particularly fluid style, the author takes us into the strategic logics of these new entrants to finance, who are carriers of innovation and sometimes of disruption, and whose strategies are focused on the need to always meet the emerging

expectations of their customers. This precise and well-documented analysis should enable banks to reposition themselves in their ecosystem by studying these new business models, which will enable them to boost their growth. Professor Dr. Nadine Tournois, Dean of IAE Nice Graduate School of Management, Université Côte d'Azur, France, Chevalier de la Légion d'honneur Fintech Business Models is a must-have book to understand the rapid and intense changes occurring in the financial sector. New technologies have allowed the birth of new financial species, such as Fintech, more adapted to the new digital economy. The content dedicated to the application of blockchain technology helps to understand its opportunities in the financial sector, not only in the means of payment and cryptoactives, but also in how blockchain can make multiple internal processes improve, allowing to optimize the management, efficiency and even security of operations. Without any doubt, this book offers an

extraordinary vision of how the fintech sector has become a catalyst for change in banking in the context of the current Digital Society. Phd. Ricardo Palomo, Full Professor of Finance, Deputy Chancellor for Digital Transformation at Universidad CEU San Pablo, Madrid, Spain and member of the Board of Alastria Blockchain Ecosystem This book provides a detailed and original overview of the most important fintech business models in the major global markets. Through a savvy use of the well-known Business Model Canvas methodology, the author explores the unique ecosystem, business model's components, and sources of competitive advantage of successful fintech firms. The book, in particular, offers an insightful and comprehensive analysis of the winning and losing strategies and performances of fintech firms by segment of activity such as, instant digital payments, crowd-funding, robo-advisory, alternative finance, credit & factoring, social trading, personal finance management,

blockchain and cryptocurrencies. It is indeed a very unique and valuable study on the fintech industry, its trends, and its emerging business models. Prof. Ivo Pezzuto, The International School of Management, Paris, France and Adjunct Professor of International Business and Strategic Management Università Cattolica del Sacro Cuore, Department of Business Management, Milan, Italy The emergence of fintechs is one of the most relevant drivers of change in the financial services industry. The book presented here delivers an impressive overview of fintechs' activity areas, business models and funding patterns. The book reflects the state of the art of the current fintech world. Prof. Dr. Jürgen Moormann, Professor of Bank and Process Management at Frankfurt School of Finance & Management, Germany

Home SOS - Katherine Brickell 2020-05-21

Drawing on 15 years of fieldwork and over 300 interviews, *Home SOS* argues that the home is central to the violence and gendered contingency of existence in crisis ordinary Cambodia. Provides an original book-length study which brings domestic violence and forced eviction into twin view Offers relational insights between different violences to build an integrated understanding of women's experiences of home life Mobilises the crisis ordinary as a critical pedagogy and imaginary through which to understand everyday gendered politics of survival Positions domestic violence and forced eviction as manifestations of

intimate war against women's homes and bodies located inside and outside of the traditional purview of war Reaffirms and reprioritises the home as a political entity which is foundational to the concerns of human geography

Gender Violence - Sally Engle Merry 2009-09-28

Taking an anthropological perspective, this comprehensive book offers a highly readable and concise overview of what constitutes gender violence, its social context, and important directions in intervention and reform. Uses stories, personal accounts, case studies and a global perspective to provide a vivid and engaging portrait of forms of violence in gendered relationships Extensively covers many forms of gender violence including domestic violence, rape, murder, wartime sexual assault, prison and police violence, female genital cutting, dowry murders, female infanticide, "honor" killings, and sex trafficking Examines major approaches to diminishing gender violence such as criminalization, batterer retraining programs,

and human rights interventions Highlights the role of social movements in defining the problem and mobilizing reforms in the US and internationally

The Effects of Provider Choice Policies on Workers' Compensation Costs - David Neumark 2017

We examine the effects of provider choice policies on workers' compensation medical and indemnity costs. We find no difference in average medical costs between states where policies give employers control over the choice of provider and states where policies instead give workers the most control. But a richer distributional analysis indicates that developed medical costs for the costliest cases are higher in states where policies give workers more control over provider choice. We find similar evidence for indemnity costs, although the point estimates also indicate (statistically insignificantly) higher average costs where policy gives workers the most control over provider choice. Overall, the evidence suggests

little relationship between provider choice policies and average medical or indemnity costs, but a higher incidence of high-cost cases when policies give workers more control of the choice of provider.

Closer You Are - Matthew Cutter 2018-08-21

The authorized biography of Robert Pollard, indie rock icon and founder of the music group Guided By Voices Robert Pollard has been a staple of the indie rock scene since the early '80s, along with his band Guided By Voices. Pollard was a longtime grade school teacher who toiled endlessly on his music, finding success only after adopting a do-it-yourself approach, relying on lo-fi home recordings for much of his and his band's career. A prolific artist, Pollard continues to churn out album after album, much to the acclaim of critics and his obsessive and devoted fans. But his story has never been faithfully told in its entirety. Until now. Author Matthew Cutter is a longtime friend of Pollard and, with Pollard's blessing, he's set out to tell the whole, true story

of Guided By Voices. Closer You Are is the first book to take an in-depth look at the man behind it all, with interviews conducted by the author with Pollard's friends, family, and bandmates, along with unfettered access to Pollard himself and his extensive archives. Robert Pollard has had an amazing and seemingly endless career in rock music, but he's also established himself as a consummate artist who works on his own terms. Now fans can at long last learn the full story behind one of America's greatest living songwriters.

Politics after Violence - Hillel Soifer

2019-01-14

Between 1980 and 1994, Peru endured a bloody internal armed conflict, with some 69,000 people killed in clashes involving two insurgent movements, state forces, and local armed groups. In 2003, a government-sponsored "Truth and Reconciliation Committee" reported that the conflict lasted longer, affected broader swaths of the national territory, and inflicted higher costs,

in both human and economic terms, than did any other conflict in Peru's history. Of those killed, 75 percent were speakers of an indigenous language, and almost 40 percent were among the poorest and most rural members of Peruvian society. These unequal impacts of the violence on the Peruvian people revealed deep and historical disparities within the country. This collection of original essays by leading international experts on Peruvian politics, society, and institutions explores the political and institutional consequences of Peru's internal armed conflict in the long 1980s. The essays are grouped into sections that cover the conflict itself in historical, comparative, and theoretical perspectives; its consequences for Peru's political institutions; its effects on political parties across the ideological spectrum; and its impact on public opinion and civil society. This research provides the first systematic and nuanced investigation of the extent to which recent and contemporary Peruvian politics, civil society, and

institutions have been shaped by the country's 1980s violence.

Regional Economic Development in India -
Susheela Subrahmanya 1995

Supply Chain Resilience - Omera Khan
2022-11-15

This book provides insights from research and practice in how organizations were able to sustain resilience in their global supply chains during the COVID-19 pandemic and to advance the understanding of supply chain risk management. The chapters highlight the lessons learned, insist on new models for resilience, suggest improved supply chain risk methodologies and bridge the gap between research and practice. It helps readers acquire greater knowledge, strategic approaches, new methods, and practical tools for ensuring global supply chain resilience.

Gender Violence & Human Rights - Aletta
Biersack 2016-12-14

The postcolonial states of Fiji, Papua New Guinea and Vanuatu operate today in a global arena in which human rights are widely accepted. As ratifiers of UN treaties such as the Convention on the Elimination of All Forms of Discrimination against Women and the Convention on the Rights of the Child, these Pacific Island countries have committed to promoting women's and girls' rights, including the right to a life free of violence. Yet local, national and regional gender values are not always consistent with the principles of gender equality and women's rights that undergird these globalising conventions. This volume critically interrogates the relation between gender violence and human rights as these three countries and their communities and citizens engage with, appropriate, modify and at times resist human rights principles and their implications for gender violence. Grounded in extensive anthropological, historical and legal research, the volume should prove a crucial resource for the many scholars, policymakers

and activists who are concerned about the urgent and ubiquitous problem of gender violence in the western Pacific. 'This is an important and timely collection that is central to the major and contentious issues in the contemporary Pacific of gender violence and human rights. It builds upon existing literature ... but the contributors to this volume interrogate the connection between these two areas deeply and more critically ... This book should and must reach a broad audience.'

— Jacqui Leckie, Associate Professor, Anthropology and Archaeology, University of Otago 'The volume addresses the tensions between human and cultural, individual and collective rights, as played out in the domain of gender ... Gender is a perfect lens for exploring these tensions because cultural rights are often claimed in defence of gender oppression and because women often have imposed upon them the burden of representing cultural traditions in attire, comportment, restraint or putatively cultural conservatism. And Melanesia is a perfect

place to consider these gendered issues because of the long history of ethnocentric representations of the region, because of the extent to which these are played out between states and local cultures and because of the efforts of the vibrant women's movements in the region to develop locally workable responses to the problems of gender violence in these communities.'

— Christine Dureau, Senior Lecturer, Anthropology, University of Auckland

Gender Violence, Third Edition - Laura L. O'Toole 2020-07-14

An updated edition of the groundbreaking anthology that explores the proliferation of gendered violence From Harvey Weinstein to

Brett Kavanaugh, accusations of gender violence saturate today's headlines. In this fully revised edition of *Gender Violence*, Laura L. O'Toole, Jessica R. Schiffman, and Rosemary Sullivan bring together a new, interdisciplinary group of scholars, with up-to-date material on emerging issues like workplace harassment, transgender violence, intersectionality, and the #MeToo movement. Contributors provide a fresh, informed perspective on gender violence, in all of its various forms. With twenty-nine new contributors, and twelve original essays, the third edition now includes emerging contemporary issues such as LGBTQ violence, sex work, and toxic masculinity. A trailblazing text, *Gender Violence, Third Edition* is an essential read for students, activists, and others.

Women, Business and the Law - Bloomsbury Publishing 2013-11-07

Women perform 66% of the world's work, produce 50% of the food, but earn 10% of the income and own 1% of the property. To shed light on why this grim statistic still holds true, *Women, Business and the Law* aims to examine legal differentiations on the basis of gender in 143 of the world's economies. *Women, Business and the Law* tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit and going to court. The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account and work at night. These issues are of fundamental importance. When, because of tradition, social taboos or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the

economy will suffer. The empirical evidence does suggest that, slowly but surely, governments are making progress in expanding opportunities for women. It is our hope that data presented in *Women, Business and the Law* will both facilitate research on linkages between legal differentiation and outcomes for women, and promote better informed policy choices on what governments can do to expand opportunities for women.

Female Child Soldiering, Gender Violence, and Feminist Theologies - Susan Willhauck
2019-09-10

This book examines the phenomenon of female child soldiering from various theological perspectives. It is an interdisciplinary work that brings Christian feminist theologies into dialogue to analyze the complex ethical, geopolitical, social, and theological issues involved in the militarization of girls and women and gender-based violence. With contributions from a range of interdisciplinary and multicultural authors, this

book offers reflections and perspectives that coalesce as a comprehensive overview of feminist theological insights into child soldiering.

Your Computer Is on Fire - Thomas S. Mullaney
2021-03-09

Technology scholars declare an emergency: attention must be paid to the inequality, marginalization, and biases woven into our technological systems. This book sounds an alarm: we can no longer afford to be lulled into complacency by narratives of techno-utopianism, or even techno-neutrality. We should not be reassured by such soothing generalities as "human error," "virtual reality," or "the cloud." We need to realize that nothing is virtual: everything that "happens online," "virtually," or "autonomously" happens offline first, and often involves human beings whose labor is deliberately kept invisible. Everything is IRL. In *Your Computer Is on Fire*, technology scholars train a spotlight on the inequality, marginalization, and biases woven into our

technological systems.
