Buchanan's Journal of Man, Vol. I, No. 3 - Joseph R Buchanan 2021-01-20

Joseph Rodes Buchanan (1814 in Frankfort, Kentucky - 1899) was an American physician and professor of physiology at the Eclectic Medical Institute in

Covington, Kentucky. Buchanan proposed the terms Psychometry and Sarcognomy. Buchanan came to prominence in the 1840s when mesmerism and spiritualism were popularized. He is given credit for coining the term "Psychometry" (soul-measuring) as the name of his own "science" whereby knowledge is acquired directly by the "psychometer" (the instrument of the soul). Having promoted his science from the 1840s onward in 1893 he released a comprehensive treatise entitled Manual of Psychometry: the Dawn of a New Civilization in which he predicted that Psychometry would eventually supersede and revolutionize every other field of science.

Crop Yield - Donald L. Smith 2012-12-06

This book has been prepared for those seeking a better understanding of the functioning of crop plants, particularly the processes that lead to the generation of products valued by human beings. The contributors, who are among the world's foremost experts on the important crops upon which humanity depends for food or fibre, address the relevant processes for their specific crop. Currently, the world population is continuing to increase. It is projected to plateau around the middle of the next century, and while there is considerable controversy regarding the population level when this plateau is achieved, most estimates are in the area of 10 000 000 000. At present, there are about 800000000 people in the world who do not have secure access to food. Over the last 50 years various aspects of agricultural research have been combined to increase the output of world crops approximately 2.5-fold. Given the need to feed the increasing population, and to provide better access, it is predicted that during the next 50 years the agricultural research community must repeat this achievement.

Anglo-Saxon Oxfordshire - John Blair 1998
This important new study describes the development of the society and landscape of Oxfordshire from the Anglo-

Saxon settlement to the early twelfth century. Before the formation of the shire in around 1000 AD, the area was on the borderland between Wessex and Mercia, and therefore played an important part in the conflict for supremacy between the two kingdoms from the seventh to the ninth centuries. In the eleventh century Oxford was one of the most important English provincial towns, and was of considerable political and economic significance. The book draws heavily on the wealth of recently discovered archaeological material, especially in the Thames Valley, and incorporates the latest work on place-names, charter boundaries, tribal groupings and ecclesiastical organization. A short final chapter describes the Norman impact on the city and county. The book is profusely illustrated with over a hundred photographs, drawings and plans.

With Salisbury Plain at its centre, the chalk hills and downs of southern England radiate out in all directions, and the ridgeways provided natural routes from one place to another, along which the early inhabitants of Britain travelled. Ancient Trackways of Wessex is a practical walker's guide to the pathways across this chalkland as well as a study of such matters as topography, history, sights to be seen and the relevant Ordnance Survey maps. It is arranged into walks along particular routes between given points and includes photographs and simple maps. Leadership Blueprint - Paul Hersey 2012

"There is no MBA, sage mentor or crystal ball that could have prepared us for being a leader in the 21st century. We are all leading at the speed of light, trying to find our way as globalization, social media and unforeseen changes come at us like meteors. Uncertainty and ambiguity rule the day. There is no blueprint for these

complex times. But there is a blueprint for becoming an effective leader, and the time to use it is NOW. Why? Engagement at work is at an all-time low. Job security is a thing of the past. Future leaders are scarce and those with high-potential are being groomed and courted like celebrity athletes. Leadership Blueprint: Why We Better Lead and Lead Better draws on the insights of Dr. Paul Hersey who colorfully weaves together today's cutting edge-research, lessons from history and his life experience to help you better influence and inspire your people. His commonsense framework offers both the reliability of universal leadership principles and the flexibility you need to navigate the now and face the

wild unknowns and excitement of our future."--Page 4 of cover.
