**Dark Territory** - Fred Kaplan 2016

Originally published in hardcover in 2016 by Simon & Schuster.

[Black Identities](#) - Mary C. WATERS 2009-06-30

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

*Dragonfire* - Andrew Kaplan 2014-10-07

In master storyteller Andrew Kaplan's action-packed thriller, the CIA sends its top agent to Southeast Asia to stop a war that threatens to be even bloodier than the conflict in Vietnam. The photograph in the CIA vault shows four men relaxing in the jungle, green berets draped over their rifles, enjoying a break from combat. On the day after the picture was taken, their friendship was torn apart forever. Now, ten years after the United States pulled out of Vietnam, the CIA has sent one of the men,

Parker, to Thailand to track a troop movement across the Cambodian border, which is about to explode, luring the Americans back into another disastrous ground war. When Parker disappears, the CIA deploys its best agent, Parker's former friend Sawyer, in a secret operation code-named Dragonfire, to rescue Parker and prevent the war. But in the forbidden jungles of the Golden Triangle, a mysterious Asian beauty will lead Sawyer into a strange and savage world of opium traders, warlords, and militant factions, where nothing is as it seems and the only certainty is death.

**Five Dimensions of Homeland and International Security** - Esther Brimmer 2008

"The book considers the intersections between homeland and international security and the implications of these connections for preparedness. After the terrorist attacks of September 11, 2001, many analysts abandoned traditional strategic tools, such as deterrence and dissuasion, arguing that a new era had begun in which such mechanisms were no longer relevant. Yet policymakers need to consider a range of effective actions to enhance preparedness. The possibility of catastrophic, high consequence events demands that policymakers go beyond

piecemeal extensions of current policies or stovepiped approaches to specific challenges and devise comprehensive defense-in-depth. They could develop policy in "5D" - by integrating new approaches to five dimensions of policy: deterrence, dissuasion, denial, diplomacy and defense. The 5Ds could contribute to a more resilient society by giving policymakers ways to work with others to influence the international context to support homeland security. Each of the 5Ds suggests ways to "project resilience" with others abroad as we build resilience at home."--BOOK JACKET.

**Review of the Department of Homeland Security's Approach to Risk Analysis** - National Research Council 2010-10-10

The events of September 11, 2001 changed perceptions, rearranged national priorities, and produced significant new government entities, including the U.S. Department of Homeland Security (DHS) created in 2003. While the principal mission of DHS is to lead efforts to secure the nation against those forces that wish to do harm, the department also has responsibilities in regard to preparation for and response to other hazards and disasters, such as floods, earthquakes, and other "natural" disasters. Whether in the context of preparedness, response or recovery from terrorism, illegal entry to the country, or natural disasters, DHS is committed to processes and methods that feature risk assessment as a critical component for making better-informed decisions. Review of the Department of Homeland Security's Approach to Risk Analysis explores how DHS is building its capabilities in risk analysis to inform decision making. The department uses risk analysis to inform decisions ranging from high-level policy choices to fine-scale protocols that guide the minute-by-minute actions of DHS employees. Although DHS is responsible for mitigating a range of threats, natural disasters, and pandemics, its risk analysis efforts are weighted heavily toward terrorism. In addition to assessing the capability of DHS risk analysis methods to support decision-making, the

book evaluates the quality of the current approach to estimating risk and discusses how to improve current risk analysis procedures. Review of the Department of Homeland Security's Approach to Risk Analysis recommends that DHS continue to build its integrated risk management framework. It also suggests that the department improve the way models are developed and used and follow time-tested scientific practices, among other recommendations.

*The Chinese Navy* -

*Asia's Cauldron* - Robert D. Kaplan 2015-01-06

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES From Robert D. Kaplan, named one of the world’s Top 100 Global Thinkers by *Foreign Policy* magazine, comes a penetrating look at the volatile region that will dominate the future of geopolitical conflict. Over the last decade, the center of world power has been quietly shifting from Europe to Asia. With oil reserves of several billion barrels, an estimated nine hundred trillion cubic feet of natural gas, and several centuries’ worth of competing territorial claims, the South China Sea in particular is a simmering pot of potential conflict. The underreported military buildup in the area where the Western Pacific meets the Indian Ocean means that it will likely be a hinge point for global war and peace for the foreseeable future. In *Asia’s Cauldron*, Robert D. Kaplan offers up a vivid snapshot of the nations surrounding the South China Sea, the conflicts brewing in the region at the dawn of the twenty-first century, and their implications for global peace and stability. One of the world’s most perceptive foreign policy experts, Kaplan interprets

America's interests in Asia in the context of an increasingly assertive China. He explains how the region's unique geography fosters the growth of navies but also impedes aggression. And he draws a striking parallel between China's quest for hegemony in the South China Sea and the United States' imperial adventure in the Caribbean more than a century ago. To understand the future of conflict in East Asia, Kaplan argues, one must understand the goals and motivations of its leaders and its people. Part travelogue, part geopolitical primer, *Asia's Cauldron* takes us on a journey through the region's boom cities and ramshackle slums: from Vietnam, where the superfueled capitalism of the erstwhile colonial capital, Saigon, inspires the geostrategic pretensions of the official seat of government in Hanoi, to Malaysia, where a unique mix of authoritarian Islam and Western-style consumerism creates quite possibly the ultimate postmodern society; and from Singapore, whose "benevolent autocracy" helped foster an economic miracle, to the Philippines, where a different brand of authoritarianism under Ferdinand Marcos led not to economic growth but to decades of corruption and crime. At a time when every day's news seems to contain some new story—large or small—that directly relates to conflicts over the South China Sea, *Asia's Cauldron* is an indispensable guide to a corner of the globe that will affect all of our lives for years to come. Praise for *Asia's Cauldron* "Asia's Cauldron is a short book with a powerful thesis, and it stands out for its clarity and good sense. . . . If you are doing business in China, traveling in Southeast Asia or just obsessing about geopolitics, you will want to read it."—The New York Times Book Review "Kaplan has established himself as one of our most consequential geopolitical thinkers. . . . [*Asia's Cauldron*] is part treatise on geopolitics, part travel narrative. Indeed, he writes in the tradition of the great travel writers."—The Weekly Standard "Kaplan's fascinating book is a welcome challenge to the pessimists who see only trouble in China's rise and the hawks who view it as malign."—The

Economist "Muscular, deeply knowledgeable . . . Kaplan is an ultra-realist [who] takes a non-moralistic stance on questions of power and diplomacy."—Financial Times

**When Scotland Was Jewish** - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This

book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

*The Wages of Whiteness* - David R. Roediger 2022-11-22

Combining classical Marxism, psychoanalysis, and the new labor history pioneered by E. P. Thompson and Herbert Gutman, David Roediger's widely acclaimed book provides an original study of the formative years of working-class racism in the United States. This, he argues, cannot be explained simply with reference to economic advantage; rather, white working-class racism is underpinned by a complex series of psychological and ideological

mechanisms that reinforce racial stereotypes, and thus help to forge the identities of white workers in opposition to Blacks.

**An Indigenous Peoples' History of the United States -**

Roxanne Dunbar-Ortiz 2015-08-11

New York Times Bestseller Now part of the HBO docuseries

"Exterminate All the Brutes," written and directed by Raoul Peck

Recipient of the American Book Award The first history of the

United States told from the perspective of indigenous peoples

Today in the United States, there are more than five hundred

federally recognized Indigenous nations comprising nearly three

million people, descendants of the fifteen million Native people

who once inhabited this land. The centuries-long genocidal

program of the US settler-colonial regimen has largely been

omitted from history. Now, for the first time, acclaimed historian

and activist Roxanne Dunbar-Ortiz offers a history of the United

States told from the perspective of Indigenous peoples and

reveals how Native Americans, for centuries, actively resisted

expansion of the US empire. With growing support for movements

such as the campaign to abolish Columbus Day and replace it

with Indigenous Peoples' Day and the Dakota Access Pipeline

protest led by the Standing Rock Sioux Tribe, An Indigenous

Peoples' History of the United States is an essential resource

providing historical threads that are crucial for understanding the

present. In An Indigenous Peoples' History of the United States,

Dunbar-Ortiz adroitly challenges the founding myth of the United

States and shows how policy against the Indigenous peoples was

colonialist and designed to seize the territories of the original

inhabitants, displacing or eliminating them. And as Dunbar-Ortiz

reveals, this policy was praised in popular culture, through

writers like James Fenimore Cooper and Walt Whitman, and in

the highest offices of government and the military. Shockingly, as

the genocidal policy reached its zenith under President Andrew

Jackson, its ruthlessness was best articulated by US Army general

Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The

country can be rid of them only by exterminating them."

Spanning more than four hundred years, this classic bottom-up

peoples' history radically reframes US history and explodes the

silences that have haunted our national narrative. An Indigenous

Peoples' History of the United States is a 2015 PEN Oakland-

Josephine Miles Award for Excellence in Literature.

**Trauma and Cinema -** E. Ann Kaplan 2004-02-01

This volume addresses the relation of trauma to transnational

modern mass media. The first of its kind, Trauma and Cinema:

Cross-Cultural Explorations provides ten essays which explore the

ways trauma works itself out as media — in images in (and as)

film, photography, and video — in global cultural flows. The focus

of our volume on the matrix of trauma, visual media and

modernity seeks to engage and go beyond current tendencies in

trauma studies. The book discusses how trauma presented in the

media spills over national boundaries and can be found in images

across divergent cultures in Africa, Asia, Australia, Europe and

America. From the Holocaust to the Chinese Cultural Revolution,

from Taiwan's colonial experience to the catastrophe of

Hiroshima, from attempted annihilation of Australian Aborigines

to attempted reconciliation in South Africa, these essays offer the

reader a plethora of images of trauma for comparison and

contrast.

**Pre-Incident Indicators of Terrorist Incidents -** Brent L.

Smith 2011-01

This is a print on demand edition of a hard to find publication.

Explores whether sufficient data exists to examine the temporal

and spatial relationships that existed in terrorist group planning,

and if so, could patterns of preparatory conduct be identified?

About one-half of the terrorists resided, planned, and prepared

for terrorism relatively close to their eventual target. The

terrorist groups existed for 1,205 days from the first planning

meeting to the date of the actual/planned terrorist incident. The

planning process for specific acts began 2-3 months prior to the

terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

—Therese Anne Fowler, New York Times bestselling author In the vein of the New York Times bestseller *Loving Frank*, this fascinating and compelling novel "will have you humming, toe-tapping, and singing along with every turn of the page" (Kate Quinn, New York Times bestselling author) as it explores the decade-long relationship between the celebrated composer George Gershwin and gifted musician Katharine "Kay" Swift. Transfixed, she's helpless to resist the magnetic pull of George's talent, charm, and swagger. Their ten-year love affair, complicated by her conflicted loyalty to her husband and the twists and turns of her own musical career, ends only with George's death from a brain tumor at the age of thirty-eight. George Gershwin left behind not just a body of work unmatched in popular musical history, but a woman who loved him with all her heart, knowing all the while that he belonged not to her, but to the world.

*Aerial Aftermaths* - Caren Kaplan 2017-01-05

From the first vistas provided by flight in balloons in the eighteenth century to the most recent sensing operations performed by military drones, the history of aerial imagery has marked the transformation of how people perceived their world,

better understood their past, and imagined their future. In *Aerial Aftermaths* Caren Kaplan traces this cultural history, showing how aerial views operate as a form of world-making tied to the times and places of war. Kaplan's investigation of the aerial arts of war—painting, photography, and digital imaging—range from England's surveys of Scotland following the defeat of the 1746 Jacobite rebellion and early twentieth-century photographic mapping of Iraq to images taken in the immediate aftermath of 9/11. Throughout, Kaplan foregrounds aerial imagery's importance to modern visual culture and its ability to enforce colonial power, demonstrating both the destructive force and the potential for political connection that come with viewing from above.

**The Revenge of Geography** - Robert D. Kaplan 2013-09-10  
NEW YORK TIMES BESTSELLER • In this "ambitious and challenging" (The New York Review of Books) work, the bestselling author of *Monsoon* and *Balkan Ghosts* offers a revelatory prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. In *The Revenge of Geography*, Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the near and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. The Russian steppe's pitiless climate and limited vegetation bred hard and cruel men bent on

destruction, for example, while Nazi geopoliticians distorted geopolitics entirely, calculating that space on the globe used by the British Empire and the Soviet Union could be swallowed by a greater German homeland. Kaplan then applies the lessons learned to the present crises in Europe, Russia, China, the Indian subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia. Remarkably, the future can be understood in the context of temperature, land allotment, and other physical certainties: China, able to feed only 23 percent of its people from land that is only 7 percent arable, has sought energy, minerals, and metals from such brutal regimes as Burma, Iran, and Zimbabwe, putting it in moral conflict with the United States. Afghanistan's porous

borders will keep it the principal invasion route into India, and a vital rear base for Pakistan, India's main enemy. Iran will exploit the advantage of being the only country that straddles both energy-producing areas of the Persian Gulf and the Caspian Sea. Finally, Kaplan posits that the United States might rue engaging in far-flung conflicts with Iraq and Afghanistan rather than tending to its direct neighbor Mexico, which is on the verge of becoming a semifailed state due to drug cartel carnage. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms.
