Framing and Managing Lean Organizations in the New Economy - Darina Lepadatu 2020-02-18

This book examines the dominance and significance of lean organizing in the international economy. Scholars from each discipline see lean production as positive or negative; the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways. The first part synthesizes academic research from a range of disciplines—including, engineering, sociology, and management—to present the reader with an integrated understanding of the benefits and drawbacks of lean management. The second part links this theory to practice, with a set of case studies from companies like Apple, Google, Nike, Toyota, and Walmart that demonstrate how lean is implemented in a variety of settings. The book concludes with three models, explaining how Toyotism, Nikefication with offshoring, and Waltonism provide full or less complete models of lean production. It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations. With its rich interdisciplinary approach, *Framing and Managing Lean Organizations in the New Economy* will benefit researchers and students across a range of classes from management, sociology, and public policy to engineering.

Organizational Change through Lean Methodologies - A. Heri Iswanto 2020-11-10

Lean is a type of organizational change brought about through improvement methods based on cost reduction mechanism. The assumption is that by reducing costs, the organizations can work better and more efficiently. All changes in lean-based organizations are directed at reducing these costs by identifying and eliminating waste. The thinking is that cost reduction will increase efficiency since, basically, it removes process inefficiencies and decreases cycle time. Why are targets directed at cost reduction? Because costs are a crucial factor for sustainable business organization. Lean thinking cuts the value of scale production by looking at the existing waste in a process. Production remains the same, but the costs of goods production are reduced due to the elimination of waste in the process. As a result, companies do not have to increase their production if it is not required, giving companies an increase in average profits due to lean and the elimination of identified waste. The focus on cost reduction can be included in the overall lean concept since cost wasting is only a part of the existing waste. In other words, other waste can be converted into costs or perceived as a value. This book starts the mental process of organization change through lean thinking. It provides the background and history of lean, and then gets into how the lean process works. The author also discusses why an organization should implement lean as a method to increase quality and engage workers in the process, thereby increasing efficiency and, ultimately, profitability. Through case studies and examples from Indonesia, the author describes how to create a value stream to identify waste and discusses the concept of a pull system and its impact on the process.

The Godfather of New England Stock Car Racing - Adrienne J Venditti 2019-05-18

This book is dedicated to the man whose life inspired me to tell his story. His name is D. Anthony Venditti, widely known as the Godfather of Stock Car Racing in New England. It is also dedicated to my mother, with her eternal love and devoted support of her beloved Anthony, her family, and racing. She and the Godfather enabled and empowered our family to persevere in the sport. This is to all those with unending convictions in the Godfather and to the Seekonk Fraternity of racing. This book is a pictorial and a closer look at the life of the Godfather. He was the youngest promoter in motor sports in the United States in the 1940s. And as a twenty-five-year-old, he planned, engineered, and built his speedway. He was young and full of ambition. It was his dream, an American dream, to build, open, and operate his speedway at the end of World War II, in 1946. Yet when in his advanced years, he then became known as the oldest living promoter in stock car racing. He consecutively ran his race plant each year, faithfully opening his facility, without fail. He never missed a season under his reign—an unheard-of feat of forty-five years as a stock car racing promoter. Seekonk Speedway continues to run without any ambiguity by the same family. The speedway is proudly still in business all these seventy-three consecutive years of racing in the books. Anthony is celebrated and acclaimed for his pioneering in the American sport of auto racing, awarded RPM's "1978 Promoter of the Year." It was with great adoration of the sports community that he is acknowledged for his forethought and far-reaching ideas of innovation pertaining to mechanical engineering, safety features in facility construction, and administrative procedures. Mr. Venditti is attributed to numerous awards for his devotion for the betterment of the sport of auto racing.

Biofuels for Transport - Worldwatch Institute, 2012-05-04

The world is on the verge of an unprecedented increase in the production and use of biofuels for transport. The combination of rising oil prices, issues of security, climate instability and pollution, deepening poverty in rural and agricultural areas, and a host of improved technologies, is propelling governments to enact powerful incentives for the use of these fuels, which is in turn sparking investment. *Biofuels for Transport* is a unique and comprehensive assessment of the opportunities and risks of the large-scale production of biofuels. The book demystifies complex questions and concerns, such as the food v. fuel debate. Global in scope, it is further informed by five country studies from Brazil, China, Germany, India and Tanzania. The authors conclude that biofuels will play a significant role in our energy future, but warn that the large-scale use of biofuels carries risks that require focused and immediate policy initiatives. Published in association with BMELV, FNR and GTZ.
