Professional Education with Fiction Media -

Christine Jarvis 2019-07-15

This book analyses how narrative fictions can be used by faculty and staff in the teaching of professionals in higher education. As professional life becomes ever more demanding, this book draws together the work of researchers and practitioners who have explored the tremendous impact that narrative fictions - novels, short stories, drama and poetry - can have on development. The editors and contributors posit that fiction can help professionals imagine new ways of being, reinvent their roles and tackle problems without a road map. Using fiction can also provide a safe place for the exploration of ethics and decision making, as well as furnishing tools for the development of empathy and engagement by offering vicarious experiences of drastically different lives and situations. A medium that by its very nature contains a multiplicity of interpretations, using fiction in professional education can enhance the education of professionals working in a range of disciplines, including health, education, social care, law and science.

Emotion and Cognition - Patrick Lemaire 2021-12-29

This cutting-edge, yet accessible book provides a complete and integrated assessment of the role of emotions in a wide variety of cognitive functions. Including both empirical and theoretical works and debates, this book presents the results of research aimed at understanding how our emotions influence cognitive performance in diverse areas such as attention, memory, judgment, decision-making or reasoning, and emotional regulation. Drawing on years of research that has enabled psychologists to know when emotions have beneficial versus deleterious effects on cognition, the book explores the mechanisms

responsible for these effects. Each chapter focuses on a specific cognitive function and is mirrored by a chapter examining the individual differences in the role of emotions on this aspect of cognition, and how this role changes during aging and in patients with mood disorders.

Emotions play a central role in the life of every human being as they crucially guide our actions, thoughts, and relationships, helping us detect and identify what is important, as well as what to memorize, understand, and decide. As such, *Emotion and Cognition* is a valuable source for all undergraduate and graduate students in the disciplines of cognitive and affective sciences, as well as for experts in the field.

Reclaiming English Language Arts Methods Courses - Jory Brass 2014-09-04

Reclaiming English Language Arts Methods Courses showcases innovative work in teacher education that fosters teachers' capacities as

reflective practitioners and public intellectuals; extends traditional boundaries of methods courses on teaching the English language arts, literacy, children's and young adult literature; and embodies democratic and critical politics that go beyond the reductive economic aims and traditional classroom practices sanctioned by educational policies and corporate educational reforms. Featuring leading and emerging scholars in English language arts teacher education, each chapter provides rich and concrete examples of elementary and secondary methods courses rooted in contemporary research and theory, on-line resources, and honest appraisals of the possibilities, tensions, and limits of doing teacher education differently in a top-down time of standards-based education, high-stakes testing, teacher assessment, and neoliberal education reforms. This book offers important resources and support for teacher educators and graduate students to explore alternative visions for aligning university methods courses with current trends in English and cultural studies, critical sociocultural literacy, new literacies and web 2.0 tools, and teaching the English language arts in multiethnic, multilingual, and underserved urban communities.

Time Slips - Jaclyn Pryor 2017-07-15

This bold book investigates how performance can transform the way people perceive trauma and memory, time and history. Jaclyn I. Pryor introduces the concept of "time slips," moments in which past, present, and future coincide, moments that challenge American narratives of racial and sexual citizenship. Framing performance as a site of resistance, Pryor analyzes their own work and that of four other queer artists—Ann Carlson, Mary Ellen Strom, Peggy Shaw, and Lisa Kron—between 2001 and 2016. Pryor illuminates how each artist deploys performance as a tool to render history visible, trauma recognizable, and transformation possible by laying bare the histories and ongoing systems of violence woven deep into our society. Pryor also includes a case study that examines the challenges of teaching queer time and queer performance within the academy in what Pryor calls a post-9/11 "homeland" security state. Masterfully synthesizing a wealth of research and experiences, *Time Slips* will interest scholars and readers in the fields of theater and performance studies, queer studies, and American studies.

The Idea of a Social Studies Education - James A. Duplass 2017-09-22

Offering a fresh take on the purpose of social studies today, James A. Duplass positions philosophical counseling as a way for teachers to engage students in thinking deeply about what it means to be a citizen in a democratic society. The Idea of a Social Studies Education takes a uniquely humanistic approach to the idea of a

social studies education to show how teachers can act as philosophical counselors in preparing students for active civic engagement. Duplass reminds the reader of the needs of students in modern society who seek to develop an identity worth living and the role social studies can play in students achieving that process. By focusing on the cultivation of students' autonomy, authenticity, efficacy, and agency, Duplass' approach avoids political biases and instead encourages critical thinking to decipher what a

democratic ideology truly is.
