Transactions on Large-Scale Data- and Knowledge-Centered Systems XXIX - Abdelkader Hameurlain
2016-12-15

The LNCS journal Transactions on Large-Scale Data- and Knowledge-Centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability. Current decentralized systems still focus on data and knowledge as their

main resource. Feasibility of these systems relies basically on P2P (peer-to-peer) techniques and the support of agent systems with scaling and decentralized control. Synergy between grids, P2P systems, and agent technologies is the key to data- and knowledge-centered systems in large-scale environments. This, the 29th issue of Transactions on Large-Scale Data- and Knowledge-Centered Systems, contains four revised selected regular papers. Topics covered include optimization and cluster validation processes for entity matching, business intelligence systems, and data profiling in the Semantic Web.

A Second Coming - David Swartz 2005-12

A terrifying descent into madness, the first fearful steps on the path to recovery, this uncompromising memoir captures all the urgent and hypnotic tension of a commercial thriller. A Second Coming- the companion volume to Swartz's great long-poem "The Will to Christ"-is a probing investigation of the unconscious and metaphysical wellsprings of a singular poetic gift. And yet it is more. This story is without question the most accurate portrayal to date of the largely uncharted regions of schizophrenia, a compelling and solitary journey into yogic meditation and a massive abuse of cannabis non-indica. Swartz's manic delusion was the very overthrow of God and cleansing of the evolutionary process. After a twelve-day descent into terror, strapped to a hospital gurney, he emerges to an uncertain future and the realization that his whole experience was neither reality, nor, even more strangely, anything approaching fantasy.
