Geoarchaeology - Carlos Cordova 2018-08-30

Geoarchaeology is traditionally concerned with reconstructing the environmental aspects of past societies using the methods of the earth sciences. The field has been steadily enriched by scholars from a diversity of disciplines and much has happened as the importance of global perspectives on environmental

change has emerged. Carlos Cordova, provides a fully up-to-date account of geoarchaeology that reflects the important changes that have occurred in the past four decades.

Innovative features include: the development of the human-ecological approach and the impact of technology on this approach; how the diversity of disciplines contributes to archaeological questions; frontiers of archaeology in the deep past, particularly the Anthropocene; the geoarchaeology of the contemporary past; the emerging field of ethno-geoarchaeology; the role of geoarchaeology in global environmental crises and climate change.

Construction Equipment Management for Engineers, Estimators, and Owners,

Second Edition - Douglas D. Gransberg 2020-05-31

Construction Equipment Management for Engineers, Estimators, and Construction Managers, Second Edition has been extensively rewritten to not only bring it up to date with the state of current practice, but also to serve as a textbook for university courses in construction engineering and management. The authors advanced the previous edition's

practical, hands-on approach and added material on the future of construction equipment fleet management, which they believe will require a new technology-based skillset to maximize the cost-effectiveness of construction equipment operations. As such, the book covers the latest construction equipment technologies. Features: Examines emergent technologies in the field, including automated machine guidance systems, intelligent compaction operations, and equipment-related civil integrated management tools. Provides information on how to reduce an equipment fleet's environmental impact, decreasing greenhouse gas emissions through enhanced equipment management and optimization practices. Discusses estimating equipment ownership, operating costs, economic life and optimal replacement timing. Demonstrates how to maximize profit by determining the optimum equipment mix and estimating productivity.

Illustrates the use of production-based linear scheduling and stochastic simulations to maximize project cost and schedule certainty. This new edition will serve as an essential textbook for students as well as a valuable reference for a wide range of professionals within the construction, architecture, and engineering industries.

Leaves in the Wind - Kit Cain
2006-05

Montana LeFandra claims to be the founding father of the Iron Horsemen Motorcycle Club, which started out as himself and a bunch of buddies drinking, carousing with women, and spending weekends at various hydeaways on the desert and in the mountains of Southern California. They had so much fun that the Club gradually grew in size to over 200,000 members ... and also became a major management problem! How Montana handled it is a story in itself, but what he did after an all-out life and death war with Hell's Angels is another story again ...

Death and Douglas - J. W. Ocker
2017-10-31

Douglas has grown up around the business of death. Generations of his family have run the Mortimer Family Funeral Home. The mortician and gravediggers are all his buddies. And the display room of caskets is an awesome place for hide and seek. It's business as usual in Douglas's small New England town. Until one day an incredibly out of the ordinary murder victim is brought to the funeral home. And more startling: others follow. On the cusp of Halloween, a serial killer has arrived. And unsatisfied with the small-town investigation, Douglas enlists his friends to help him solve the mystery. With sumptuous descriptions of a bucolic town and it's quirky people, fascinating yet middle grade-appropriate insider information about the funeral process, and a crackling mystery with a heart-pounding conclusion—*Death and Douglas* has something for readers young and old.

Diggum - Isaac Thorne

2016-10-01

When personal tragedy strikes, some men pray. Other men despair. This man goes to war. Meet Diggum, the local graveyard caretaker, who lives in a small cottage at the edge of the lot. Diggum has spent most of his life angry with God, whom he blames for the devastating house fire that cost Diggum his family. But Diggum has a secret. It is a secret he hopes to carry to his own grave. It is a secret that he hopes will finally get him his ultimate revenge on God.

DIGGUM is a short tale of dark horror from the mind of Isaac Thorne, a nice man who simply wants to provide you with a few frights. His story is one of rage and revenge. At some point in our lives we all ask the "why" question. Diggum demands an answer.

The Inlet - Helen Piddington
2001

The Inlet is a rich historical document of a wild and beautiful part of BC's west coast and a gripping tale of one family's struggles to navigate a modern-day pioneer existence in a place called Loughborough. The author/artist Helen Piddington and her husband Dane Campbell settled there in 1975 with their two-year-old daughter Arabella. Their reasons for moving were different. For Dane, a professional photographer wanting to write, the place offered safe moorage for his beloved sailboat Native Girl. For Helen, an artist at the height of her career, it meant the possibility of more time for printmaking and that the family would be together year round. But, captivated by problems ashore, they found little time for extras. Inlet life is not easy. Everything depends on you: your effort, wit and commitment. If you want to be warm you must drop a tree, buck it, split it, and stack it -- a

year in advance. If you want electricity you must make it. If you are thirsty, then you must find a source of drinking water and pipe it into your house. And as for food, it is wise to grow as much as you can for shops are far away and travel by small boat is often hazardous. The following year, their son, Adam, was born. Together the family raised chickens, ducks, turkeys, wild boar and grew much of their food. When the two small Campbells were ready for school there were no other children left in the inlet so they did correspondence courses in the kitchen. Once Dane had solved the major problems at home he worked as a fisherman, a boom-man and a logger. And Helen's jobs kept multiplying until time in her studio became a rare treat. The pastels in this book were done "each of its own necessity" before a text was considered. The tales are of old-timers and their memories plus the Campbells' adventures living on the edge: the very narrow edge between forest and sea. They capture the joys, hazards and

complications of the so-called simpler life "beyond convenience" where one's four-legged neighbours can be very large indeed and not always entirely welcome. Some are as fresh as journal entries--written the day events took place--while others were carefully crafted over months, if not years. We predict you'll treasure them, read and reread them and share them with friends. Their boat, Native Girl, didn't last a year, by the way. She went back to her builder to be schooner-rigged. Eventually the children grew up and moved away but Dane and Helen stayed on. Now considered the inlet's "old-timers," both of them love the place as much as life itself.

How People Grow - Henry Cloud 2009-05-18

How People Grow reveals why all growth is spiritual growth and how you can grow in ways you never thought possible. Our desire to grow runs deep. Yet the issues in our lives and relationships that we wish would change often stay the same, even with our best efforts at spiritual growth. What does it take to experience increasing strength and depth in our spiritual walk, our marriages and family lives and friendships, our personal development--in everything life is about? And how can we help others move into growth that is profound and lasting? Unpacking the practical and passionate theology that forms the backbone of their counseling, Drs. Henry Cloud and John Townsend shatter popular misconceptions about how God operates to reveal how growth really happens. You'll discover: What the essential processes are that make people grow. How those processes fit into a biblical understanding of spiritual growth and theology. How spiritual growth and real-life

issues are one and the same. What the responsibilities are of pastors, counselors, and others who assist people in growing. What your own responsibilities are in your personal growth. Shining focused light on the great doctrines and themes of Christianity, How People Grow helps you understand the Bible in a way that will help you head with confidence down the high road of growth in Christ. Dictionary of Civil Engineering - Jean-Paul Kurtz 2007-05-08

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building

masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Wain-Roy and the Invention of the Backhoe - Lee Horton 2018-06-21

In 1947 Vaino J. Holopainen (Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the

world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry led to the development of twenty-six major backhoe related breakthrough designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted

to capture this fascinating history before it was lost to time.

Digging in the City of Brotherly Love - Rebecca Yamin 2008-10-07

Beneath the modern city of Philadelphia lie countless clues to its history and the lives of residents long forgotten. This intriguing book explores eighteenth- and nineteenth-century Philadelphia through the findings of archaeological excavations, sharing with readers the excitement of digging into the past and reconstructing the lives of earlier inhabitants of the city. Urban archaeologist Rebecca Yamin describes the major excavations that have been undertaken since 1992 as part of the redevelopment of Independence Mall and surrounding areas, explaining how archaeologists gather and use raw data to learn more about the ordinary people whose lives were never recorded in history books. Focusing primarily on these unknown citizens—an accountant in the first Treasury

Department, a coachmaker whose clients were politicians doing business at the State House, an African American founder of St. Thomas's African Episcopal Church, and others- Yamin presents a colorful portrait of old Philadelphia. She also discusses political aspects of archaeology today-who supports particular projects and why, and what has been lost to bulldozers and heedlessness. Digging in the City of Brotherly Love tells the exhilarating story of doing archaeology in the real world and using its findings to understand the past.

Digger to the Rescue - Mandy Archer 2016-10-01

It's going to be a busy day on the building site. Digger needs to dig a hole so the foundations can be laid. There's earth to dig up and rubble to clear. Things are looking good - then there's an emergency phone call. Digger needs to attend a rescue, but will he arrive in time to be a hero? It's time to get busy with machines that roar, whizz, vroom, and zoom! The stories feature a popular vehicle as the central

character, and involve a group of animal characters in a supporting role. A detailed spread on different parts of the vehicle will help children understand what makes up the machines and will help familiarize them with vehicle vocabulary.

Skipped Parts - Tim Sandlin 2010-09-01

"Skipped Parts is somewhere between *The Catcher in the Rye* and *Even Cowgirls Get the Blues*."-Los Angeles Times Book Review The novel that inspired the movie starring Mischa Barton and Drew Barrymore Banished to the hinterlands of Wyoming, rebellious Lydia Callahan and her thirteen-year-old son Sam have no choice but to cope. But while Lydia drinks and talks to the moose head on the wall, Sam finds a friend in local girl Maurey Pierce. Sam and Maurey set out to discover for themselves what happens in the "skipped parts" of the novels they read between the first kiss and the next morning. With Lydia's support the two teens set out on their sexual exploration, and deal with its

consequences. One of the wildest, raunchiest, most heartfelt coming-of-age novels of the past thirty years, *Skipped Parts* puts Tim Sandlin in the upper echelon of contemporary comic novelists. This contemporary novel is raunchy, funny, and full of heart, perfect for fans of Nick Hornby, Jack Kerouac, Tom Robbins, Larry McMurtry, Joseph Heller, John Irving, Kurt Vonnegut, Carl Hiaasen. Other books in Tim Sandlin's GroVant Trilogy: *Skipped Parts*, Book 1 *Sorrow Floats*, Book 2 *Social Blunders*, Book 3 *Lydia*, Book 4 *What*

readers are saying about *Skipped Parts*: "deals with coming of age in a humorous and often poignant way" "Plot twists that would make J.K. Rowling jealous, humor, beautifully drawn characters, a great sense for the detail of the West" "sometimes heartwarming, often heartbreaking" "poignant, FUNNY, SHOCKING, and even heartbreaking" "the deep humor comes from the extraordinary characters" "funny, sad, and full of heart"

What reviewers are saying about *Skipped Parts*: "DAZZLING...moving...Sam's carapace is humor...He thinks like Holden Caulfield and has Joseph Heller's take on despair. His Walter Mitty like fantasies are tiny comic gems... In the end you'll find yourself rooting for Sam." -New York Times Book Review "A lighthearted, amusing, and tender story of preteen wisdom, adult immaturity, and the fine line between...An offbeat, engaging novel." -Publisher's Weekly "This witty, often touching portrayal of a dirt-street-wise youth's coming-of-age sparkles with intelligence." -Booklist "Thoughtful, surprising, and delightful entertainment." -St. Louis Post-Dispatch

What everyone is saying about Tim Sandlin: "Tim Sandlin's stuff is as tight and funny as anyone doing this comedy novel thing." -Christopher Moore "His prose, his characters, all amazing." "A story of grand faux pas and dazzling dysfunction...a wildly satirical look at the absurdities of modern life." -The New York Times Book Review

Trespassing - John Hanson Mitchell 2015-04-22

Trespassing, "a thoughtful, beautifully written addition to environmental and regional literature" (Kirkus Reviews), is a historical survey of the evolution of private ownership of land, concentrating on the various land uses of a 500-acre tract of land over a 350-year period. What began as wild land controlled periodically by various Native American tribes became British crown land after 1654, then private property under US law, and finally common land again in the late twentieth century. Mitchell considers every aspect of the important issue of land ownership and explores how our attitudes toward land have changed over the centuries.

Popular Mechanics Plumbing & Heating - Albert Jackson 2006
Plumbers and other repairmen charge a mint these days—but with *Popular Mechanics* on your side, it's possible to cut these costs dramatically by both preventing and managing pipe-related emergencies on your own. It lays out the basics, explaining what's involved in a typical plumbing system, along with supply lines, drainage, and venting. Hundreds of line drawings and easy-to-follow instructions lead you through every step, including: dealing with frozen and split pipes; making an epoxy patch repair; fitting the bathroom with a sink, toilet or tub; fixing leaky faucets; checking the heating system for faults; putting in a wood-burning stove; and replacing damaged radiators. An illustrated glossary presents the complete plumber's toolkit, and the skills needed to use them safely.
