Coros Y Danzas - Daniel David Jordan 2023
"This book explores how women of the early Franco regime (1939-53) adapted rural music traditions and Spanish nationalism according to different political circumstances. The Sección Femenina (Women's Section) of the fascist Falange party officially represented the regime's views and policies on female gender roles. Through their Music Department, these women shaped traditional Spanish songs and dances to promote ideas of Catholic morality throughout the nation's culturally diverse regions, helped legitimize colonial involvement in Spain's African territories, and formed political ties with the Allied powers after the Second World

War. This book is particularly relevant to readers with interests in 20th-century Spanish history, cultural diplomacy, and the Cold War"--

Franco-German Relations Seen from Abroad - Nicole Colin 2020-11-03

This book examines external perceptions of the Franco-German relationship, both from a historical perspective and as a driving force for regional integration. By providing various country and regional studies, it analyses the various types of perception and self-perception in several regions around the globe. Here, Franco-German cooperation serves as a mirror in which third-party countries view their own situation, today and in the future. The contributions address the questions of if and how the Franco-German reconciliation and cooperation is perceived as a role model for other regions, especially for the reconciliation of other inter-state and international conflicts. A concluding chapter highlights the divergences and convergences between the respective conflicts, and proposes recommendations for actors involved in diplomacy and international relations. The book

is intended to provide scientific support for the implementation of the Franco-German Aachen Treaty of January 2019. It will appeal to scholars in political science and cultural studies, and to anyone interested in learning more about the Franco-German relationship and on external perspectives on it.

Gender, Separatist Politics, and Embodied Nationalism in

Cameroon - Jacqueline-Bethel Tchouta Mougoué 2019-10-14

Gender, Separatist Politics, and Embodied Nationalism in

Cameroon illuminates how issues of ideal womanhood shaped the Anglophone Cameroonian nationalist movement in the first decade of independence in Cameroon, a west-central African country. Drawing upon history, political science, gender studies, and feminist epistemologies, the book examines how formally educated women sought to protect the cultural values and the self-determination of the

Anglophone Cameroonians state as Francophone Cameroon prepared to dismantle the federal republic. The book defines and uses the concept of embodied nationalism to illustrate the political importance of women's everyday behavior—the clothes they wore, the foods they cooked, whether they gossiped, and their deference to their husbands. The result, in this fascinating approach, reveals that West Cameroon, which included English-speaking areas, was a progressive and autonomous nation. The author's sources include oral interviews and archival records such as women's newspaper advice columns, Cameroon's first cooking book, and the first novel published by an Anglophone Cameroonian woman.

Britain, France and the Decolonization of Africa - Andrew W.M. Smith 2017-03-01
Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view

decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.

Diplomatic Games - Heather L. Dichter 2014-08-15
The National Association for the

Advancement of Colored People (NAACP) is the nation's oldest civil rights organization, having dedicated itself to the fight for racial equality since 1909. While the group helped achieve substantial victories in the courtroom, the struggle for civil rights extended beyond gaining political support. It also required changing social attitudes. The NAACP thus worked to alter existing prejudices through the production of art that countered racist depictions of African Americans, focusing its efforts not only on changing the attitudes of the white middle class but also on encouraging racial pride and a sense of identity in the black community. *Art for Equality* explores an important and little-studied side of the NAACP's activism in the cultural realm. In openly supporting African American artists, writers, and musicians in their creative endeavors, the organization aimed to change the way the

public viewed the black community. By overcoming stereotypes and the belief of the majority that African Americans were physically, intellectually, and morally inferior to whites, the NAACP believed it could begin to defeat racism.

Illuminating important protests, from the fight against the 1915 film *The Birth of a Nation* to the production of anti-lynching art during the Harlem Renaissance, this insightful volume examines the successes and failures of the NAACP's cultural campaign from 1910 to the 1960s. Exploring the roles of gender and class in shaping the association's patronage of the arts, *Art for Equality* offers an in-depth analysis of the social and cultural climate during a time of radical change in America.

The Foreign Policy of France from 1914 to 1945 - Jacques Néré 1975

Francophone Africa at fifty -

Tony Chafer 2015-11-01

France's presence on the African continent has often been presented as 'cooperation' and part of French cultural policy by policy-makers in Paris – and quite as often been denounced as 'the longest scandal of the republic' by French academics and African intellectuals.

Between the last years of French colonialism and France's sustained interventions in former African colonies such as Chad or Côte d'Ivoire during the 2000s, the legacy of French colonialism has shaped the historical trajectory of more than a dozen countries and societies in Africa. The complexities of this story are now, for the first time, addressed in a comprehensive series of essays, based on new research by a group of specialists in French colonial history. The book addresses the needs of both academic specialists and those of students of history and

neighbouring disciplines looking for structural analysis of key themes in France's and Africa's shared history.

Complex Adaptive Systems, Resilience and Security in Cameroon - Manu Lekunze
2019-06-14

Complex Adaptive Systems, Resilience and Security in Cameroon comprehensively maps and analyses Cameroon's security architecture to determine its resilience. The author examines the key actors involved in Cameroon's security and evaluates the organisational structures, before analysing the different security systems that arise from the interplay between the two. He also shows how these security networks can be better conceived as complex adaptive systems, interdependent on other environmental, economic and societal systems. In this regard, security actors become security agents. Finally, arguing that security should be pursued from a

resilience perspective, this book seeks to comment on the contemporary situation in Cameroon and its possible trajectory for the future. Providing a timely assessment of security in Cameroon, this book will be of interest to scholars and students of African politics and Security Studies.

A History of Diplomacy - Jeremy Black 2010-05-15

In *A History of Diplomacy*, historian Jeremy Black investigates how a form of courtly negotiation and information-gathering in the early modern period developed through increasing globalization into a world-shaping force in twenty-first-century politics. The monarchic systems of the sixteenth century gave way to the colonial development of European nations—which in turn were shaken by the revolutions of the eighteenth century—the

rise and progression of multiple global interests led to the establishment of the modern-day international embassy system. In this detailed and engaging study of the ever-changing role of international relations, the aims, achievements, and failures of foreign diplomacy are presented along with their complete historical and cultural background.

State Building in Boom Times -

Ryan Saylor 2014

"State Building in Boom Times argues that commodity booms and coalitional politics are central to understanding the state building variation within and across Latin America and Africa. It shows how resource booms can trigger the provision of new public goods and institutional strengthening and thus help

countries expand their state capacity. But these possibilities hinge on coalitional politics, as seen through six cases. Countries ruled by export-oriented coalitions (Argentina, Chile, and Mauritius) expanded their state capacity as a direct result of commodity booms. But countries in which exporters were politically marginalized (Colombia, Ghana, and Nigeria) missed analogous state building opportunities because ruling coalitions preyed upon export wealth, rather than promoting export interests via state building. The coalitional basis of these divergent outcomes suggests that, contrary to the prevailing belief in a resource curse, natural resource wealth does not necessarily dispose countries to low state capacity. Instead, export-oriented coalitions can harness boom times for developmental gains, even in the context of weak institutions. This finding warrants reappraising

some widespread presumptions about the relationship between resource wealth and state building, as well as the public policies that are commonly proposed for developing countries to manage their natural resource wealth"--

Diplomacy and Nation-Building in Africa - Mélanie Torrent

2012-04-11

Cameroon stands as a remarkable example of nation-building in the aftermath of European domination. Split between the French and British empires after World War I, it experienced a unique drive for self-determination at the turn of the 1960s, culminating in both independence from European power and the re-unification of two of its divided territories. This book investigates the influence of foreign policy on nation-building in West Africa in the context of both the Cold War and European integration. Shedding fresh light on the challenges of bridging the

political, economic and linguistic divide that France and Britain had left, Melanie Torrent explores the evolution of a nation, charting both Cameroon's importance in Franco-British relations and Cameroon's use of bilateral and multilateral diplomacy in asserting its independence. This work should be essential reading for students of African studies, International Relations and the post-colonial world.

How the Church Under Pius XII Addressed Decolonization -

Marialuisa Lucia Sergio

2023-03-10

By paying attention to Algerian Independence, this book reconstructs the action of the Catholic Church regarding the issues of the spread of Islam in colonies, to Arab nationalism, Marxist propaganda in non-European countries, and the effects of the Algerian crisis upon the French political system. The complex relations between the

Holy See and France, as well as those between the Vatican and the Episcopates and clergy of the overseas territories, are vital aspects of decolonisation, a topic which, to date, has been overlooked by historiography because of the impossibility of accessing documents relating to the pontificate of Pius XII (1939-1958) held in the Vatican archives. The opening in March 2020 of the archives of Pius XII, the Pope who had succeeded in imposing the strategic role of the Holy See upon the international scene, has made a vast amount of unpublished documentary material available to scholars. This book is useful for all students and scholars interested in the Cold War, the history of contemporary Europe, the history of the Church, postcolonial studies, and religious phenomenon in post-World War II Europe.

geography, cultural studies and politics.

French Foreign Policy, 1918-1945 - Robert J. Young 1991

France, Britain and the United States in the Twentieth Century: Volume 2, 1940–1961 - Andrew J. Williams 2019-12-31

"In his account of the relationship between France, the UK and the US Andrew Williams successfully intertwines diplomatic history with international thought. We are presented with a historical stage that includes both the doers and the thinkers of the age, and as a result this is a must read for both diplomatic historians and historians of international thought. The second in a multivolume study, this volume takes the story beyond the fall of France into the war years, the period of post-war reconstruction, and the Cold War. As with the first volume, Williams is an excellent guide, stepping over

the ruins of past worlds, and introducing us to an epoch with more than its fair share of both visionaries and villains. Yet in this second volume the stakes are higher, as the United States comes to terms with its role as the paramount world power, Britain faces a world that challenges its imperial order, and France is picking up the pieces from its defeat." Lucian Ashworth, Memorial University, Canada "Following on from his outstanding first volume reviewing the complex interwar relationships between France, Britain and the United States, Williams' second volume is an indispensable and lucid overview of the vitally important era of post-war reconstruction. From national post-war developments to institutional structures and superpower shifts, Williams examines clearly and engagingly the final passing of pre-modern power structures and the emergence of a new Europe."

Amelia Hadfield, University of Surrey, UK /div" At a time of intense debates about Europe, the 'Anglosphere' and empires old and new, Andrew Williams's book is a timely demonstration that the weight of emotion in the shaping of foreign policy and its makers should not be forgotten. Unearthing some of the 'forces profondes' in diplomacy and reflecting on feelings of humiliation and liberation in national constructs, Andrew Williams discusses the cultural conceptions and misconceptions that French, American and British diplomats had of each other, thereby revisiting the reasons why the 'special relationship' was largely a myth – but one which had tangible consequences on French and British policies in their retreat from empire. By connecting the personal and the national, the structural and accidental, Williams offers essential insights into the major conflicts of the

period and their impact on diplomatic cultures across the Atlantic." Mélanie Torrent, Université Picardie Jules Verne, Amiens, France The second volume of this study of France's unique contribution to the international relations of the last century covers the period from the Fall of France in 1940 to Charles de Gaulle's triumphant return to power in the late 1950s. France had gone from being a victorious member of the coalition with Britain and the United States that won the First World War to a defeated nation in a few short weeks. France then experienced the humiliation of collaboration with and occupation by the enemy, followed by resistance and liberation and a slow return to global influence over the next twenty years. This volume examines how these processes played out by concentrating on France's relations with Britain and the United States, most

importantly over questions of post-war order, the integration of Europe and the withdrawal from Empire.

Nation Branding in Modern History - Carolin Viktorin
2018-08-24

A recent coinage within international relations, “nation branding” designates the process of highlighting a country’s positive characteristics for promotional purposes, using techniques similar to those employed in marketing and public relations. *Nation Branding in Modern History* takes an innovative approach to illuminating this contested concept, drawing on fascinating case studies in the United States, China, Poland, Suriname, and many other countries, from the nineteenth century to the present. It supplements these empirical contributions with a series of historiographical essays and analyses of key primary documents, making for a rich and

multivalent investigation into the nexus of cultural marketing, self-representation, and political power.

Science Diplomacy - Lloyd S.

Davis 2014-12-09

As modern foreign policy and international relations encompass more and more scientific issues, we are moving towards a new type of diplomacy, known as "Science Diplomacy". Will this new diplomacy of the 21st century prove to be more effective than past diplomacy for the big issues facing the world, such as climate change, food and water insecurity, diminishing biodiversity, pandemic disease, public health, genomics or environmental collapse, mineral exploitation, health and international scientific endeavours such as those in the space and the Antarctic?

Providing a new area of academic

focus that has only gathered momentum in the last few years, this book considers these questions by bringing together a distinguished team of international specialists to look at various facets of how diplomacy and science are influenced by each other. The book not only dissects the ways that politics, science and diplomacy have become intertwined, but also highlights how the world's seemingly most intractable problems can be tackled with international collaboration and diplomacy that is rooted in science, and driven by technology. It, therefore, challenges the conventional wisdom concerning the juxtaposition of science and the world of diplomacy.

A Ritual Geology - Robyn d'Avignon

2022-06-10
Set against the ongoing corporate enclosure of West Africa's goldfields, *A Ritual Geology* tells the untold history of one of the world's oldest indigenous gold mining industries: Francophone West Africa's orpaillage.

Establishing African miners as producers of subterranean knowledge, Robyn d'Avignon uncovers a dynamic "ritual geology" of techniques and cosmological engagements with the earth developed by agrarian residents of gold-bearing rocks in savanna West Africa. Colonial and corporate exploration geology in the region was built upon the

ritual knowledge, gold discoveries, and skilled labor of African miners even as states racialized African mining as archaic, criminal, and pagan. Spanning the medieval and imperial past to the postcolonial present, d'Avignon weaves together long-term ethnographic and oral historical work in southeastern Senegal with archival and archeological evidence from Burkina Faso, Côte d'Ivoire, Guinea, and Mali. *A Ritual Geology* introduces transnational geological formations as a new regional framework for African studies, environmental history, and anthropology.
