Climate Change Law - Daniel A. Farber 2018

Softbound - New, softbound print book.

Crime and Markets - Vincenzo Ruggiero 2001

Whereas conventional analysis of criminal behaviour highlights social disadvantage, unemployment or lack of resources, this text develops the argument that abundance of opportunities and resources may lead to specific forms of criminality.

The Rule of Law History, Theory and Criticism - Pietro Costa 2007-05-06

Authors Costa and Zolo share the conviction that a proper understanding of the rule of law today requires reference to a global problematic horizon. This book offers some relevant guides for orienting the reader through a political and legal debate where the rule of law (and the doctrine of human rights) is a concept both controversial and significant at the national and international levels.

Restorative Justice, Self-interest Responsible

Citizenship - Lode Walgrave 2013-05-13

Lode Walgrave has made a highly significant contribution to the worldwide development of the restorative justice movement over the last two decades. This book represents the culmination of his vision for restorative justice.

A Social History of the Media - Asa Briggs 2020-06-02

The first three editions of this bestselling book have established *A Social History of the Media* as a classic, providing a masterful overview of communication media and of the social and cultural contexts within which they emerged and evolved over time. This fourth edition has been revised and updated throughout to reflect the latest developments in the field. Additionally, an expanded introduction explores the wide range of secondary literature and theory that inform the study of media history today, and a new eighth chapter surveys the revolutionary media developments of the twenty-first century, including in particular the rise of social and participatory media and the penetration of these technologies into every sphere of social and private

life. Avoiding technological determinism and rejecting assumptions of straightforward evolutionary progress, this book brings out the rich and varied histories of communication media. In an age of fast-paced media developments, a thorough understanding of media history is more important than ever, and this text will continue to be the first choice for students and scholars across the world.

Minds behind the Brain : A History of the Pioneers and Their Discoveries - Department of Psychology Washington University Stanley Finger Professor 2000-03-02

Attractively illustrated with over a hundred halftones and drawings, this volume presents a series of vibrant profiles that trace the evolution of our knowledge about the brain. Beginning almost 5000 years ago, with the ancient Egyptian study of "the marrow of the skull," Stanley Finger takes us on a fascinating journey from the classical world of Hippocrates, to the time of Descartes and the era of Broca and Ramon y Cajal, to modern researchers such as Sperry. Here is a truly remarkable cast of characters. We meet Galen, a man of titanic ego and abrasive disposition, whose teachings dominated medicine for a thousand years; Vesalius, a contemporary of Copernicus, who pushed our understanding of human anatomy to new heights; Otto Loewi, pioneer in neurotransmitters, who gave the Nazis his Nobel prize money and fled Austria for England; and Rita Levi-Montalcini, discoverer of nerve growth factor, who in war-torn Italy was forced to do her research in her bedroom. For each individual, Finger examines the philosophy, the tools, the books, and the ideas that brought new insights. Finger also looks at broader topics--how dependent are researchers on the work of others? What makes the time ripe for discovery? And what role does chance or serendipity play? And he includes many fascinating background figures as well, from Leonardo da Vinci and Emanuel Swedenborg to Karl August Weinhold--who claimed to have reanimated a dead cat by filling its skull with silver and zinc--and Mary Shelley, whose Frankenstein was inspired by such experiments. Wide ranging in scope, imbued with an infectious spirit of adventure, here are vivid portraits of giants in the field of neuroscience--remarkable

individuals who found new ways to think about the machinery of the mind.

National Health Systems of the World - Milton Irwin Roemer 1993-04-01

This pioneering work is the first comprehensive account of national health systems throughout the world today. In Volume I, the author analyzes the organization, financing, management, and delivery of health services in 68 countries with widely diverse levels of economic development and political ideology. Topics examined include system planning, development, hospital operations, health insurance, cost containment, prevention programs, quality control, primary care, regionalization, privatization, and more. The work clarifies the similarities and differences with which nations have responded to the health and medical needs of their people, offering historical backgrounds and explanations of the current dynamics prevailing in each country. This in-depth study is the product of a uniquely rich research career and represents the author's first-hand experience working in the great majority of the countries described. In Volume II, the principal issues in health systems across countries are carefully examined. These issues are categorized according to the several components by which national health systems may be analyzed. In the general field of health resources, Roemer discusses physicians and traditional healers, nurses, pharmacists, auxiliary health personnel, the background and distribution of hospitals and health centers, and the production and consumption of drugs. The scope and functions of Ministries of Health and social security programs for health care in different types of health systems are reviewed. The book recognizes the contributions of voluntary health agencies, as well as the characteristics of major services in the private sector of national economies. The serious implications of private profit in health systems and the benefits and difficulties of private/public sector relationships are also discussed.

Closing the Books - Jon Elster 2004-09-06

An analysis of transitional justice - retribution and reparation after a change of political regime - from Athens in the fifth century BC to the present. Part I, 'The Universe of Transitional Justice', describes more than thirty transitions, some of them in considerable detail, others more succinctly. Part II, 'The Analytics of Transitional Justice', proposes a framework for explaining the variations among the cases - why after some transitions wrongdoers from the previous regime are punished severely and in other cases mildly or not at all, and victims sometimes compensated generously and sometimes poorly or not at all. After surveying a broad range of justifications and excuses for wrongdoings and criteria for selecting and indemnifying victims, the 2004 book concludes with a discussion of three general explanatory factors: economic and political constraints, the retributive emotions, and the play of party politics.

Corrupt Cities - 2000

Much of the devastation caused by the recent earthquake in Turkey was the result of widespread corruption between the construction industry and government officials. Corruption is part of everyday public life and we tend to take it for granted. However, preventing corruption helps to raise city revenues, improve service delivery, stimulate public confidence and participation, and win elections. This book is designed to help citizens and public officials diagnose, investigate and prevent various kinds of corrupt and illicit behaviour. It focuses on systematic corruption rather than the free-lance activity of a few law-breakers, and emphasises practical preventive measures rather than purely punitive or moralistic campaigns.

Asset Building & Community Development - Gary Paul Green

2015-04-01

A comprehensive approach focused on sustainable change Asset Building and Community Development, Fourth Edition examines the promise and limits of community development by showing students and practitioners how asset-based developments can improve the sustainability and quality of life. Authors Gary Paul Green and Anna Haines provide an engaging, thought-provoking, and comprehensive approach to asset building by focusing on the role of different forms of community capital in the development process. Updated throughout, this edition explores how communities are building on their key assets—physical, human, social, financial, environmental, political, and cultural capital— to generate positive change. With a focus on community outcomes, the authors illustrate how development controlled by community-based organizations provides a better match between assets and the needs of the community.

The Idea of Communism - Costas Douzinas 2010

'The Idea of Communism' was a landmark conference held in London during 2009. This book brings together the conference discussions on the philosophical and political importance of the communist idea, highlighting its continuing significance and the need to reconfigure the concept within a world marked by havoc and crisis.

Social Theory and the Environment - David Goldblatt 2013-05-28

This book establishes whether contemporary social theory can help us understand the structural origins of environmental degradation and environmental politics.

Courts in Latin America - Gretchen Helmke 2011-01-17

To what extent do courts in Latin America protect individual rights and limit governments? This volume answers these fundamental questions by bringing together today's leading scholars of judicial politics. Drawing on examples from Argentina, Brazil, Chile, Mexico, Colombia, Costa Rica and Bolivia, the authors demonstrate that there is widespread variation in the performance of Latin America's constitutional courts. In accounting for this variation, the contributors push forward ongoing debates about what motivates judges; whether institutions, partisan politics and public support shape inter-branch relations; and the importance of judicial attitudes and legal culture. The authors deploy a range of methods, including qualitative case studies, paired country comparisons, statistical analysis and game theory.

In Fairness to Future Generations - Edith Brown Weiss 1988

In this book Professor Weiss combines thorough research and careful analysis with imaginative solutions and a moral fervour, to show how rules of international law can be applied in an intertemporal dimension, and how the basic principles of the intergenerational equity can be developed to provide new standards for human behaviour. She manages to communicate to the reader not only that the situation is getting desperate but also that human intelligence can in time devise adequate remedies, without destroying completely our way of life.

Justice in Robes - Ronald Dworkin 2008-04-30

How should a judge's moral convictions bear on his judgments about what the law is? Lawyers, sociologists, philosophers, politicians, and judges all have answers to that question: these range from "nothing" to "everything." In *Justice in Robes*, Ronald Dworkin argues that the question is much more complex than it has often been taken to be and charts a variety of dimensions—semantic, jurisprudential, and doctrinal—in which law and morals are undoubtedly interwoven. He restates and summarizes his own widely discussed account of these connections, which emphasizes the sovereign importance of moral principle in legal and constitutional interpretation, and then reviews and criticizes the most influential rival theories to his own. He argues that pragmatism is empty as a theory of law, that value pluralism misunderstands the nature of moral concepts, that constitutional originalism reflects an impoverished view of the role of a constitution in a democratic society, and that contemporary legal positivism is based on a mistaken semantic theory and an erroneous account of the nature of authority. In the course of that critical study he discusses the work of many of the most influential lawyers and philosophers of the era, including Isaiah Berlin, Richard Posner, Cass Sunstein, Antonin Scalia, and Joseph Raz. Dworkin's new collection of essays and original chapters is a model of lucid, logical, and impassioned reasoning that will advance the crucially important debate about the roles of justice in law.

The Forensics of Election Fraud - Mikhail Myagkov 2009-05-11

This volume offers a number of forensic indicators of election fraud applied to official election returns, and tests and illustrates their application in Russia and Ukraine. Included are the methodology's econometric details and theoretical assumptions. The applications to Russia include the analysis of all federal elections between 1996 and 2007 and, for Ukraine, between 2004 and 2007. Generally, we find that fraud has metastasized within the Russian polity during Putin's administration with upwards of 10 million or more suspect votes in both the 2004 and 2007 balloting, whereas in Ukraine, fraud has diminished considerably since the second round of its 2004 presidential election where between 1.5 to 3 million votes were falsified. The volume concludes with a consideration of data from the United States to illustrate the dangers of the application of our methods without due consideration of an election's substantive context and the characteristics of the data at hand.

Classics in Environmental Studies - Nicolaas Johannes Maria Nelissen 1997

Having established the 35 most significant works in the field of environmental studies, the editors have selected the most relevant passage (typically about 10 pages) to reproduce in full and set in a historical perspective.

The Power of Precedent - Michael J. Gerhardt 2011

The author connects the vast social science data and legal scholarship to provide a wide-ranging assessment of precedent. He outlines the major issues in the continuing debates on the significance of precedent and evenly considers all sides.

Judicial Reform in Latin America and the Caribbean - Malcolm Rowat 1995

Comparative Federalism - Thomas O. Hueglin 2015-01-01
Comparative Federalism: A Systematic Inquiry, Second Edition is a uniquely comprehensive, analytic, and genuinely comparative introduction to the principles and practices, as well as the institutional compromises, of federalism. Hueglin and Fenna draw from their diverse research on federal systems to focus on four main models—America, Canada, Germany, and the European Union—but also to range widely over other cases. At the

heart of the book is careful analysis of the relationship between constitutional design and amendment, fiscal relations, institutional structures, intergovernmental relations, and judicial review. Such analysis serves the dual role of helping the reader understand federalism and providing a comparative framework from which to assess the record of federal systems. The second edition has been extensively revised and updated, taking into account new developments in federal systems and incorporating insights from the growing body of literature in the field. It includes two new chapters, "Fiscal Federalism" and "The Limits of Federalism."

The Politics of Military Rule in Brazil, 1964-85 - Thomas E. Skidmore 1988

The largest and most important country in Latin America, Brazil was the first to succumb to the military coups that struck that region in the 1960s and the early 1970s. In this authoritative study, Thomas E. Skidmore, one of America's leading experts on Latin America and, in particular, on Brazil, offers the first analysis of more than two decades of military rule, from the overthrow of João Goulart in 1964, to the return of democratic civilian government in 1985 with the presidency of José Sarney. A sequel to Skidmore's highly acclaimed *Politics in Brazil, 1930-1964*, this volume explores the military rule in depth. Why did the military depose Goulart? What kind of "economic miracle" did their technocrats fashion? Why did General Costa e Silva's attempts to "humanize the Revolution" fail, only to be followed by the most repressive regime of the period? What led Generals Geisel and Golbery to launch the liberalization that led to abertura? What role did the Brazilian Catholic Church, the most innovative in the Americas, play? How did the military government respond in the early 1980s to galloping inflation and an unpayable foreign debt? Skidmore concludes by examining the early Sarney presidency and the clues it may offer for the future. Will democratic governments be able to meet the demands of urban workers and landless peasants while maintaining economic growth and international competitiveness? Can Brazil at the same time control inflation and service the largest debt in the developing world? Will its political institutions be able to represent effectively an electorate now three times larger than in 1964? What role will the military play in the future? In recent years, many Third World nations—Argentina, the Philippines, and Uruguay, among others—have moved from repressive military regimes to democratic civilian governments. Skidmore's study provides insight into the nature of this transition in Brazil and what it may tell about the fate of democracy in the Third World.

Goethe and His Age - György Lukács 1978

Social Dialogue and Pension Reform - Emmanuel Reynaud 2000

This revealing study examines the important, but little known, involvement of employers' and workers' organizations, academics, professionals, and experts in developing and reforming public policy. It illustrates the variety of approaches that can be taken to pensions by analyzing the schemes of seven industrialized countries: the U.S., the United Kingdom, Germany, Japan, Sweden, Italy, and Spain. The book shows how these groups and conservative bodies work—in conjunction with government administrations—to run pension systems. The study traces the activities of these groups, the forms of dialogue used, and the routes followed in the implementation of change. It reflects on how their work is "the hidden face" of recent pension reform and shows how various forms of consultation, negotiation, and public debate can ensure the long-term viability of systems. It reviews the mechanisms and institutional structures involved in the conception and implementation

of reforms, highlights common features, and evaluates the strengths and weaknesses of national social dialogue on the pension issue. At a time when pensions are a major topic of debate, this book is a welcome and valuable contribution to the discussion.

Corruption in Public Administration - Davide Torsello 2016-08-26

Despite the growth in literature on political corruption, contributions from field research are still exiguous. This book provides a timely and much needed addition to current research, bridging the gap and providing an innovative approach to the study of corruption and integrity in public administration.

Limites às restrições de direitos fundamentais - Ricardo de Alencar Igreja 2013-09-01

Ricardo de Alencar Igreja publica sua monografia de pós-graduação em Direito, abordando a questão dos limites que se impõem à restrição dos direitos fundamentais e a forma de sua compatibilização com demais direitos fundamentais. A relatividade dos direitos fundamentais, as leis restritivas e os conflitos de direitos. A partir da premissa da relatividade dos direitos fundamentais e tendo em vista a interpretação constitucional, o autor estuda as questões referentes ao conteúdo, alcance e limites às restrições de direitos fundamentais, buscando uma sistematização de critérios acerca de leis restritivas e dos métodos de solução dos conflitos entre os direitos fundamentais na seara da esfera judicial. Aborda ainda questões da prática jurídica como a garantia de instância no processo administrativo e o direito ao sigilo bancário à luz da teoria dos limites dos limites. O presente trabalho, sob a orientação do Prof. Dr. Nagib Slaib Filho e da Profa. Ângela Maria Rebel de Carvalho, foi laureado com grau 10, após defesa. O livro destina-se a estudantes, advogados e operadores do Direito em geral.

Folclore Do Brasil - Luís da Câmara Cascudo 1967

A Treatise on the Kaleidoscope - David Brewster 1819

Stuffing the Ballot Box - Fabrice E. Lehoucq 2002-06-13
Stuffing the Ballot Box is a pioneering study of electoral fraud and reform. It focuses on Costa Rica, a country where parties gradually transformed a fraud-ridden political system into one renowned for its stability and fair elections by the mid-twentieth century. Lehoucq and Molina draw upon a unique database of more than 1,300 accusations of ballot-rigging to show that parties denounced fraud where electoral laws made the struggle for power more competitive. They explain how institutional arrangements generated opportunities for executives to assemble legislative coalitions to enact far-reaching reforms. This book also argues that nonpartisan commissions should run elections and explains why splitting responsibility over election affairs between the executive and the legislature is a recipe for partisan rancour and political conflict. *Stuffing the Ballot Box* will interest a broad array of political and social scientists, constitutional scholars, historians, election specialists and policy-makers interested in electoral fraud and institutional reform.

The End of Lawyers? - Richard Susskind OBE 2010-09-16
This widely acclaimed legal bestseller has ignited an intense debate within the legal profession. It examines the effect of advances in IT upon legal practice, analysing anticipated developments in the next decade. It urges lawyers to consider the sustainability of their traditional role.

The Economic Structure of Corporate Law - Frank H. Easterbrook 1996

This text argues that the rules and practices of

corporate law mimic contractual provisions that parties involved in corporate enterprise would reach if they always bargained at zero cost and flawlessly enforced their agreements. It states that corporate law

Reflections on the UN Declaration on the Rights of Indigenous Peoples - Stephen Allen 2011-01-12
The adoption of the Declaration on the Rights of Indigenous Peoples by the United Nations General Assembly on 13 September 2007 was acclaimed as a major success for the United Nations system given the extent to which it consolidates and develops the international corpus of indigenous rights. This is the first in-depth academic analysis of this far-reaching instrument. Indigenous representatives have argued that the rights contained in the Declaration, and the processes by which it was formulated, obligate affected States to accept the validity of its provisions and its interpretation of contested concepts (such as 'culture', 'land', 'ownership' and 'self-determination'). This edited collection contains essays written by the main protagonists in the development of the Declaration; indigenous representatives; and field-leading academics. It offers a comprehensive institutional, thematic and regional analysis of the Declaration. In particular, it explores the Declaration's normative resonance for international law and considers the ways in which this international instrument could catalyse institutional action and influence the development of national laws and policies on indigenous issues.

Development and Environment - Warren Burggren 2018-09-24
Rather than a loosely connected list of facts/topics, this book addresses virtually every field that involves the use of developing animals in environmental science. In doing so, it will help define the scientific collective within these fields to both those readers who are "outside" of a particular field (students and professionals alike) and those who work within said field, where multiple iterations of the same job description exist. Both the content and choice of authors fully support this goal, as the editors and contributing authors represent contemporary thought and experimentation in their respective fields – ranging from developmental physiology through environmental toxicology to medicine. As such, this work will appeal to a broad audience, including any scientist or trainee interested in the nexus of environment, development and physiology.

Tell Me No Secrets - Maggie Hudson 2009-05
Kelly is running with the family gang. Her sister Jackie dreams of respectability and marries a policeman, Raymond. And Rosamund, Raymond's sister, meets Kevin Rice. When the men in their lives lie, cheat and betray them, they decide that it will be for the last time.

The Birth of Bioethics - Albert R. Jonsen 2003-08-28
This book is the first broad history of the growing field of bioethics. Covering the period 1947-1987, it examines the origin and evolution of the debates over human experimentation, genetic engineering, organ transplantation, termination of life-sustaining treatment, and new reproductive technologies. It assesses the contributions of philosophy, theology, law and the social sciences to the expanding discourse of bioethics. Written by one of the field's founders, it is based on extensive archival research into resources that are difficult to obtain and on interviews with many leading figures. A very readable account of the development of bioethics, the book stresses the history of ideas but does not neglect the social and cultural context and the people involved.

Essays on the Nature of International Trade Law - Robert E. Hudec 1999

Buzios Island - Emílio Willems 1952
