*Employment, Trade Unionism, and Class*

- Gregoris Ioannou 2021-07-16

The economic crisis has brought about a watershed in institutional, political, and social relations, reshaping the labour market and the class structure in southern Europe.

This book provides a critical comparative assessment of the dynamics of change in the employment field, focusing on Spain, Greece, and Cyprus. The book assesses how the liberalization and deregulation processes and the promotion of

market-enhancing reforms progressed in three different national settings, identifying the forces, agents, contexts, and mechanisms shaping the employment and industrial relations systems. The comparative perspective used deciphers the interplay of external and internal dynamics in the restructuring of the labour field in Southern Europe, examining austerity and its contestation in connection with prevailing societal ideologies and class shifts. The first part of the book sets the theoretical and historical context, the second is comprised of three empirical national case studies, and the third discusses comparatively the handling of the crisis, its impact, and its legacy from the standpoint of a decade later. The book presents differences in industrial relations systems,

trade union forms, and class composition dynamics, accounting for the development of the crisis and the reshaping of the employment field after one decade of crisis. It will be of value to researchers, academics, professionals, and students working on issues of employment and industrial relations, labour market and labour law, political economy and class structure, as well as those interested in the contemporary society and economy of southern Europe in general, and Spain, Greece, and Cyprus in particular.

*Emerging Market Multinationals in  
Europe* - Louis Brennan 2016-06-17

This book makes a timely and highly stimulating contribution to the discourse on emerging-market multinationals, (EMNCs), as Foreign Direct Investment (FDI) in Europe from emerging countries (especially from the BRICs - Brazil, Russia, India, China) continues to grow in significance. Unsurprisingly, the emergence of EMNCs from emerging economies raises a wide range of challenges and opportunities for scholars, business professionals, and policymakers alike. While explaining the sudden rise of these companies

has become a major concern among scholars, we have very limited knowledge on drivers, motivations, strategies, and impact of these EMNCs in Europe and their policy implications. This volume provides fresh insights into EMNCs activities and their impact in Europe. The contributors argue that EMNCs combine various country specific advantages, existing firm-specific advantages (exploitation), and/or new FSAs (exploration) in their FDI, and that there is considerable heterogeneity across EMNCs, even those from the same southern economy. Highlighting the importance of considering this divergent behaviour when implementing future European FDI policies, this book will be of interest to students and scholars of European Politics, International Political Economy,

International Business and European Integration.

*EU Law for UK Lawyers* - Aidan O'Neill  
2011-07-27

This is the second edition of this wide-ranging survey of EU law. The new edition has been significantly enlarged. Unlike many other EU law books it takes full account not only of the Lisbon Treaty changes to the EU treaties, but also of the fact that the EU Charter of Fundamental Rights now has the same legal value as the EU Treaties. It therefore not only covers the relevant case law of the Court of Justice of the European Union, but also ties that case law into the decisions of the European

Court of Human Rights, because it is clear that EU law can only now properly be understood and applied against this background of European fundamental rights jurisprudence. The book sets out very clearly the broad shape of the European Union's legal systems, while also giving the reader a good feel for the policy motivations in the Court of Justice of the European Union and the scope of EU legislative activity. Written in a lively and accessible style, it is an ideal guide for practitioners, whether those coming to the subject for the first time or those already with a background in EU law. Among the additions and changes in this expanded edition the book includes new chapters on the EU and fundamental rights, on commercial agency, on criminal law and on

private international law in the EU. It also contains a full treatment of EU equality law. The first edition 'EC Law for UK Lawyers' by Aidan O'Neill and Jason Coppel (ISBN: 9780406024596) was published by Butterworths in 1994.

**Global Oligopoly** - Chris Carr  
2020-02-18

The era of globalisation brought waves of consolidation in business

ownership alongside Leviathan-like state actors. Digital disruption too can leave market power in a relatively small number of hands. In organisational and economic terms, global oligopoly is now a fundamental idea for business and society, which this book explores and analyses. This book focuses on global oligopolies, starting with an analysis of global concentration and profits in all sectors, before moving on to illuminate the geographical spread and global strategic orientation choices and performance outcomes of global oligopoly. Contemporary cooperation modes, such as cross-border M&As and strategic alliances, niche and Emerging Market champion strategies are also analysed in detail to move the reader towards understanding likely future

directions for the field. Presenting empirical data on strategies and performance outcomes, the book covers a range of industries to provide practical, research-based guidance for more effective global business strategies and policy perspectives. *EU Anti-Dumping and Other Trade Defence Instruments* - Van Bael & Bellis 2011-06-06  
European trade defence law has expanded sufficiently in the last few years to require a new edition of this definitive work, last revised in 2004. As trade law practitioners and scholars have come to expect from the Brussels law firm Van Bael & Bellis, the fifth edition provides comprehensive, up-to-date analysis and critical commentary on EU trade defence instruments dealing with anti-dumping measures, countervailing

measures, and safeguard measures, as well as measures under the Trade Barriers Regulation. It gives detailed attention to all EU cases and other developments at WTO level that have occurred up to December 2010. The emphasis throughout is on practical application of the rules. The authors cover every issue likely to arise in any trade defence matter, including all of the following and more: determining the dumping and injury margins; determining the subsidy margin; determining the causal link between dumping or subsidy and injury; determining if 'Union interest' calls for intervention; differences between anti-dumping and anti-subsidy legislation; procedural rules applicable to complaints, initiation of proceedings, investigations,

protective measures, reviews, and refunds; conditions for accepting an undertaking; measures that may be taken to prevent 'circumvention' of anti-dumping measures; rules for the determination of permissible adjustments; rules governing the standing of various interested parties before the European Courts; rules and procedure applicable to non-market economy countries; special rules on products originating in a developing country; allocation and administration of quantitative quotas; surveillance measures; and whether and to what extent safeguard measures are subject to judicial review. For each of the four major categories of trade defence instruments, chapters deal with the substantive rules of the trade defence instruments concerned, the

relief that may be ordered under these instruments, and the procedural provisions. The important changes in the EU decision-making process for trade defence cases to be introduced in March 2011 are taken fully into account. An extensive battery of tables and annexes leads the practitioner to all the essential primary source material in the field. As a detailed and practical commentary on the international trade legislation of the Union as actually applied by the Union Institutions, this is the preeminent work in the field. Lawyers and academics involved with trade contracts or disputes need have no doubt that it is still without peer as a guide to EU trade defence instruments.

State Aid Law of the European Union -

Herwig C. H. Hofmann 2016-08-18

Rules controlling State aid and subsidies on the EU and the WTO level can have a decisive influence on both regulatory and distributive decision-making. This field of law has grown exponentially in importance and complexity over the past decades. Rules on State aid and subsidies control are one of the key instruments to ensure that public spending and regulatory measures do not lead to discriminatory distortions of competition. As a consequence, hardly any part of national law is free from review under criteria of State aid and subsidy regulation. In turn, State aid and subsidies law is linked to

economic, constitutional, administrative law of the EU and the Member States as well as to public international law. This book brings together leading experts from academia, the judiciary, civil servants from the European Commission, and practising lawyers to provide expert opinion and commentary on the diverse dimensions of the complex and vital area of law. Critically analysing and explaining developments and current approaches in State aid law and subsidies, the chapters take into account not only the legal dimensions but also the economic and political implications. They address the EU law applicable to State aid in the aftermath of the recent State Modernisation reform, and coverage includes: an in-depth analysis of the notion of State aid

as interpreted by the Court's case-law and the Commission's practice; the rules on compatibility of State aid with the internal market; the rules governing the procedure before the Commission; the litigation before the Court of Justice of the European Union; and analysis of the other trade defence instruments, including WTO subsidy law and EU anti-subsidy law.

**Health Politics in Europe** - Ellen M. Immergut 2021

Health Politics in Europe: A Handbook is a major new reference work, which

provides historical background and up-to-date information and analysis on health politics and health systems throughout Europe. In particular, it captures developments that have taken place since the end of the Cold War, a turning point for many European health systems, with most post-communist transition countries privatizing their state-run health systems, and many Western European health systems experimenting with new public management and other market-oriented health reforms. Following three introductory, stage-setting chapters, the handbook offers country cases divided into seven regional sections, each of which begins with a short regional outlook chapter that highlights the region's common characteristics and divergent paths taken by the separate countries,

including comparative data on health system financing, healthcare access, and the political salience of health. Each regional section contains at least one detailed main case, followed by shorter treatments of the other countries in the region. Country chapters feature a historical overview focusing on the country's progression through a series of political regimes and the consequences of this history for the health system; an overview of the institutions and functioning of the contemporary health system; and a political narrative tracing the politics of health policy since 1989. This political narrative, the core of each country case, examines key health reforms in order to understand the political motivations and dynamics behind them and their impact

on public opinion and political legitimacy. The handbook's systematic structure makes it useful for country-specific, cross-national, and topical research and analysis.
