Creative Dimensions of Teaching and Learning in the 21st Century - Jill B. Cummings 2017-09-12

In a rapidly changing world the importance of creativity is more apparent than ever. As a result, creativity is now essential in education. Creative Dimensions of Teaching and Learning in the 21st Century appeals to educators across disciplines teaching at every age level who are challenged daily to develop creative practices that promote innovation, critical thinking and problem solving. Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Leadership in Europe - Heller, Johnny 1998-02

Although leadership is obviously a topic with global significance, this special issue has a distinctive European flavor. This is partly due to the fact that the contributors and editors hail from five European countries, but even the two chapters that describe major

cross-national research covering up to 60 countries, concentrate attention on European issues including eastern countries that only moved into the center of Europe six or seven years ago. The justification for inclusion in this special issue is that each report makes a potentially practical contribution to work and organizational psychologists and those working in organizations in the area of Human Resource Management or Consultancy. European psychology has not yet given leadership anything like the attention it deserves and consequently the contrast with the United States, where this subject is extensively researched, is very noticeable. This special edition may lead to a reassessment of the opportunities and perhaps also act as a stimulus for more applied research to be carded out to engage with the prevalent conditions in Europe. The growth of the European Union and its various harmonization provisions seeks to establish what is often called a 'level playing field' for organizations and this will give leaders in competing enterprises new challenges and new opportunities. Several contributions in the present special issue begin to relate to these developing areas.

Gasoline Engine with Direct Injection - Richard van Basshuysen 2014-10-01

Direct injection spark-ignition engines are becoming increasingly important, and their potential is still to be fully exploited. Increased power and torque coupled with further reductions in fuel consumption and emissions will be the clear trend for future developments. From today's perspective, the key technologies driving this development will be new fuel injection and combustion processes. The book presents the latest developments, illustrates and evaluates engine concepts such as downsizing and describes the requirements that have to be met by materials and operating fluids. Shared Prosperity - Maurizio Bussolo 2014-04-08

The World Bank has recently defined two strategic goals: ending extreme poverty and boosting shared prosperity. Shared prosperity is measured as income growth among the bottom 40 percent of the income distribution in the population. The two goals should be achieved in a way that is sustainable from economic, social, and environmental perspectives. Shared Prosperity: Paving the Way in Europe and Central Asia focuses on the second goal and proposes a framework that integrates both macroeconomic and microeconomic elements. The macro variables, particularly changes in relative prices, affect income growth differentially along the income distribution; at the same time, the microeconomic distribution of assets at the bottom of the distribution determines the capacity of the bottom 40 to take advantage of the macroeconomic environment and contribute to overall growth. Growth and the incidence of growth are thus understood as jointly determined processes. Besides this integration, the main input of the framework is the finding that the trade-off between growth and equity may be an issue only in the short run. Over the long run, redistribution policies that increase the productive capacity of the bottom 40 percent enhance the overall growth potential of the economy. This report considers shared prosperity in Europe and Central Asia and concludes that the performance in sharing prosperity during the period 2000-10 was good, on average, but heterogeneous across countries and that sustainability is unclear. It also describes examples of the

application of the framework to selected countries in the region. Finally, the report provides a tool to structure the policy discussion around the goal of shared prosperity and explains that specific policy links associated with the goal can be established only after a thorough analysis of the country-specific context.

Private Market Financing - International Monetary Fund 1995-01-01

This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.

As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. Race Car Design - Derek Seward 2017-09-16

Based on the principles of engineering science, physics and mathematics, but assuming only an elementary understanding of these, this textbook masterfully explains the theory and practice of the subject. Bringing together key topics, including the chassis frame, suspension, steering, tyres, brakes, transmission, lubrication and fuel systems, this is the first text to cover all the essential elements of race car design in one student-friendly textbook. It avoids the pitfalls of being either too theoretical and mathematical, or else resorting to approximations without explanation of the underlying theory. Where relevant, emphasis is placed on the important role that computer tools play in the modern design process. This book is intended for motorsport engineering students and is the best possible resource for those involved in Formula Student/FSAE. It is also a valuable guide for practising car designers and constructors, and enthusiasts.
