**Classical Islam** - G. E. von Grunebaum  
2017-07-28

In a book written with the poignancy and beauty appropriate to its subject matter, the author opens by reminding us that the essence of a

society is in a sense identical with its history. Classical Islam also serves as a reminder that in the case of Islam, despite its triumphs on the fields of battle, telling its history is the only way open to us to render that essence accessible and

show it from all sides. The work offers a grand narrative of a faith that offers an interpretation of the world, a way of life, and a style of thinking, that goes far beyond institutional or political supports. The relevance of this historical perspective is beyond dispute. The period from 610 A.D. when Muhammad received his call until the conquest of Baghdad by the Mongols in 1258 is known as the classical period of Islam. This was the period of the great expansion of Islam both as a political structure and as a religious and intellectual community. It established the base for the development of the high Islamic civilization of North Africa, the Near East, Persia, and India, as well as further expansion of the Islamic religious and intellectual community throughout the world. This book presents an authoritative history of the period written by one of the world's leading experts on the subject. Classical Islam examines the relationships, both cultural and political, between the Islamic world and the Mediterranean

countries and India and elaborates on the economic, social, and intellectual factors and forces that shaped the Muslim world and molded its interactions with infidels. The work is written in a clear and direct narrative form, emphasizing simultaneously the major intellectual trends and the political events and tendencies of the formative period in Islamic history that still resonates today.

**Vespasian** - Barbara Levick 2016-10-04

From a pre-eminent biographer in the field, this volume examines the life and times of the emperor Vespasian and challenges the validity of his perennial good reputation and universally acknowledged achievements. Levick examines how this plebeian and uncharismatic Emperor restored peace and confidence to Rome and ensured a smooth succession, how he coped with the military, political and economic problems of his reign, and his evaluation of the solutions to these problems, before she finally examines his posthumous reputation. Now updated to take

account of the past 15 years of scholarship, and with a new chapter on literature under the Flavians, Vespasian is a fascinating study for students of Roman history and the general classical enthusiast alike.

**Rethinking Ethnicity** - Richard Jenkins 2008-01-18

"A welcome and brilliantly crafted overview of this field. It represents a major advance in our understanding of how ethnicity works in specific social and cultural contexts. The second edition will be an invaluable resource for both students and researchers alike." - John Solomos, City University, London The first edition of Rethinking Ethnicity quickly established itself as a popular text for students of ethnicity and ethnic relations. This fully revised and updated second edition adds new material on globalization and the recent debates about whether ethnicity matters and ethnic groups actually exist. While ethnicity - as a social construct - is imagined, its effects are far from imaginary. Jenkins draws on specific examples to demonstrate the social mechanisms that construct ethnicity and the consequences for

people's experience. Drawing upon rich case study material, the book discusses such issues as: the 'myth' of the plural society; postmodern notions of difference; the relationship between ethnicity, 'race' and nationalism; ideology; language; violence and religion; and the everyday construction of national identity.

study to date of the social and technical aspects  
of milling during the ancient and medieval  
periods. Drawing on the latest archaeological

evidence and historical studies, the book examines the chronological development and technical details of handmills, beast mills, watermills and windmills from the first millennium BCE to c. 1500. It discusses the many and varied uses to which mills were turned in the civilisations of Rome, China, Islam and Europe, and the many types of mill that existed. The book also includes comparative regional studies of the social and economic significance of milling, and tackles several important historiographical issues, such as whether technological stagnation was a characteristic of late Antiquity, whether there was an industrial revolution" in the European Middle Ages based on waterpower, and how contemporary studies in the social shaping of technology can shed light on the study of pre-modern technology."
