Group Techniques - Gerald Corey 1992

This sourcebook of techniques, designed to supplement theory or practicum books, explores the place and the usefulness of techniques, as well as their abuse. The authors hope to stimulate creativity in the readers approach to group work and to encourage group leaders to develop their own therapeutic styles. They there-fore offer this book as an outline for leaders to build upon in adapting techniques for their own situations, not as a cookbook of recipes to be rigidly followed. The goal is not to catalog techniques for every conceivable situation, but to teach leaders how to adapt the techniques presented and to develop others sensitively, crea-tively, and appropriately..The authors primarily assume that techniques are means, not ends, and that they are fundamentally at the service of the client, not the therapist. The book is especially strong on the leaders executive functions in the group: maneuvering and facilitating the group to optimize its effectiveness and relying on the members themselves to do the majority of the therapy. In addition, the authors hope to stimulate interest in the philosophical and ethical dimensions of group work, and they make reference to the Association for Specialists in Group Work (ASGW) ethical guidelines when relevant.

How to Teach Now - William Powell 2011

In this book, William Powell and Ochan Kusuma-Powell provide a practical map to navigate some of today's most complicated instructional challenges: How do you help all students succeed when every classroom is, in effect, a global classroom? And what does a successful education look like in a world that is growing smaller and flatter every day? Drawing on research and years of experience in international schools, the authors identify five critical keys to personalizing learning for students who have wildly different cultural, linguistic, and academic backgrounds: * Focus on your students as learners through systematic examination of their cultural and linguistic identities, learning styles and preferences, and readiness. * Focus on yourself as a teacher

and investigate your own cultural biases, preferred teaching style and beliefs, and expectations. * Focus on your curriculum to identify transferable concepts that will be valuable and accessible to all students and further their global competence. * Focus on your assessments to ensure cultural sensitivity and improve the quality of the formative data you gather. * Focus on your collegial relationships so that you can effectively enlist the help of fellow educators with different experiences, backgrounds, skills, and perspectives. The way to teach now is to focus on your students both as individuals and as members of a multifaceted, interdependent community. Here, you'll learn how to design and deliver instruction that prepares students not just to meet standards but to live and work together in our complicated, 21st century world.
