Contributed seminar papers presented at the National Seminar on "The State of Indian Economy: Implication of Present Structured Reforms" held on 8th Aug. 1992, in the Dept. of Commerce, Gauhati University.

Economics of Development and Planning - Jhingan M L 1992

Development and Planning -

Jagdish Bhagwati 2012-08-06

First published in 1972, this is a book of essays offered in honour of Paul Rosenstein-Rodan, the distinguished economist whose career started in mid-1920s Vienna and subsequently spanned Europe, Britain, the USA and many of the less developed countries of the world. The book includes reviews of past developments, chapters on development trade and value theory, an assessment of

contemporary emerging economic patterns, development and trade policy, and investment policy. Further essays cover the intellectual history of development economics, general aspects of growth and economic policy in underdeveloped countries and the problems of income distribution and sectoral and regional development.

MONEY AND BANKING - E. NARAYANAN NADAR

2013-06-21

Intended for undergraduate students of Economics, Commerce and Management, this book discusses the concepts and functions of monetary and banking system. It also incorporates the recent trends and developments in the fields of money and banking. It is written in an easy-to-understand language. Divided into twenty-seven chapters under two parts. Part I on Money discusses evolution, nature, value, role and significance of money; monetary standards; monetary theories; and analysis of interest rates, inflation and

deflation. It also describes trade cycles; money, capital and stock markets; and monetary policy. Part II on Banking discusses evolution, structure and systems of banking, functions, credit creation process, balance sheet, investment policy and nationalization of commercial banks. It describes structure, management, functions and role of SBI and RBI in economic development. Besides, it dwells an India's lead bank scheme, credit control methods and central banking systems in India, the UK and the USA. The book concludes with a discussion on international financial institutions such as IMF and IBRD. The text is supported with examples, tables and figures. Chapter-end multiple choice questions and review questions are also provided. Besides the undergraduate students, this book will also be useful to the postgraduate students of Economics, Commerce and Management. Modern Economic Growth - Simon Smith Kuznets 1966

Environmental Economics: Theory, Management & Policy - Jhingan M L

The Economics of Development and Planning - M. L. Jhingan 1978

Principles of Environmental Economics - Ahmed M. Husen 2004

This text offers a systematic exposition of environmental and natural resource economics. It considers a variety of real world examples to illustrate the policy relevance and implications of key economic and ecological concepts.

Economics of Development and Planning - Jhingan M. L. 1964

Advanced Economic Theory (Micro and Macro Economics) - Jhingan ML. 2008

Regional Economic Development - Robert J. Stimson 2013-03-09
Regional economic development has attracted the interest of economists, geographers, planners and

regional scientists for a long time. And, of course, it is a field that has developed a large practitioner cohort in government and business agencies from the national down to the state and local levels. In planning for cities and regions, both large and small, economic development issues now tend to be integrated into strategic planning processes. For at least the last 50 years, scholars from various disciplines have theorised about the nature of regional economic development, developing a range of models seeking to explain the process of regional economic development, and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time. Regional scientists in particular have developed a comprehensive tool-kit of methodologies to measure and monitor regional economic characteristics such as industry sectors, employment, income, value of production,

investment, and the like, using both quantitative and qualitative methods of analysis, and focusing on both static and dynamic analysis. The 'father of regional science', Walter Isard, was the first to put together a comprehensive volume on techniques of regional analysis (Isard 1960), and since then a huge literature has emerged, including the many titles in the series published by Springer in which this book is published.

Macroeconomics Theory - M. L. Jhingan 1998

Economics - Richard G. Lipsey 2015

DEVELOPMENT ECONOMICS : A CRITICAL PERSPECTIVE - APARAJITA MUKHERJEE 2016-05-16

Development economics is a branch of study that focuses on improving the economies of developing countries examining both macroeconomic and microeconomic factors relating to the structure of a developing economy. The main objective of the book is to present major issues of development economies. It takes up an

analysis of the limitations of accumulation-centric growth process and introduces the readers to alternative development paradigms along with their critics. Organised into fourteen chapters, the initial chapters discuss historical background of less developed economies, post-colonial development patterns in the context of establishment of the World Bank, the IMF and the GATT, economic models like classical development ideas, Marxian model, the Marginalist economies, Alfred Marshall and the neoclassical school and ideas of Keynes. The book skillfully explains some of the development macro models based on industry-agriculture interactions, structure of agriculture, population and role of market and state in economic development. The later chapters delve on capability approaches to development and thematic deficiency of traditional development economics, and relation between inequality, poverty and development. In

this context the book takes up the analysis of the concept of 'Development Management' and its application to less developed economies.

An Evolutionary Theory of Economic Change - Richard R. Nelson 1985-10-15

This book contains the most sustained and serious attack on mainstream, neoclassical economics in more than forty years. Nelson and Winter focus their critique on the basic question of how firms and industries change overtime. They marshal significant objections to the fundamental neoclassical assumptions of profit maximization and market equilibrium, which they find ineffective in the analysis of technological innovation and the dynamics of competition among firms. To replace these assumptions, they borrow from biology the concept of natural selection to construct a precise and detailed evolutionary theory of business behavior. They grant that firms are motivated by profit and engage in search for ways of improving profits, but they do not

consider them to be profit maximizing. Likewise, they emphasize the tendency for the more profitable firms to drive the less profitable ones out of business, but they do not focus their analysis on hypothetical states of industry equilibrium. The results of their new paradigm and analytical framework are impressive. Not only have they been able to develop more coherent and powerful models of competitive firm dynamics under conditions of growth and technological change, but their approach is compatible with findings in psychology and other social sciences. Finally, their work has important implications for welfare economics and for government policy toward industry.

Money, Banking, International Trade and Public Finance - M. L. Jhingan 1993-01-01

Performance of Development Programmes in India-Issues and Challenges - Prof. P. Jayalakshmi 2019-11-01

The main objective of this Seminar proceedings book is to

analyse the performance of the present development programmes, the issues and challenges and also reflect and think about whether and to what extent the benefits of these programmes have percolated to the weaker sections of our society- indeed, have they reached those they were meant to reach ?

Modern Economics □ *An Analytical Study, 20th Edition* - Ahuja H.L. 2016

Microeconomic Theory - M.L. Jhingan 1999

Globalization and Sustainable Development in Africa - Bessie House-Soremekun 2011

The first comprehensive work on globalization within the context of sustainable development initiatives in Africa.

Economics for Law Students

- K. C. Gopalakrishnan 1990

Economics and Development Studies - Michael Tribe

2010-09-13

Development studies textbooks and courses have sometimes tended to avoid significant economic content. However, without an understanding of the economic aspects of international development many of the more complex issues cannot be fully comprehended. Economics and Development Studies makes the economic dimension of discourse around controversial issues in international development accessible to second and third year undergraduate students working towards degrees in development studies. Following an introductory chapter

outlining the connections between development economics and development studies, this book consists of eight substantive chapters dealing with the nature of development economics, economic growth and structural change, economic growth and developing countries, economic growth and economic development since 1960, the global economy and the Third World, developing countries and international trade, economics and development policy, and poverty, equality and development economists, with a tenth concluding chapter. This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable. The concern is to distinguish differences within the economics profession, and between economists and non-economists, so that the reader can make informed judgments about the sources of these differences, and about their

impact on policy analysis and policy advice. The book features explanatory text boxes, tables and diagrams, suggestions for further reading, and a listing of the economic concepts used in the chapters.

Tourism, Development and Growth - John J. Pigram
2005-10-05

Distinguishing between sustainable development and sustainable tourism, the authors examine whether, and in what form, tourism can contribute to sustainable development and growth. Focusing on different types of tourism appropriate to particular situations, the team of leading contributors draws on examples from around the world - Canada, USA, Spain, Belgium, UK, Australia - to explore tourism's contribution to the economic, social, political and environmental advancement of developing countries and the importance of tourism in industrialised nations. This book examines the new policies and initiatives established by both the private

sector and the state to pursue sustainable tourism growth and identifies the opportunities and challenges inherent in achieving it.

Modern Microeconomics - HL Ahuja 2017

The nineteenth edition of *Modern Microeconomics* continues to provide a detailed understanding of the foundations of microeconomics. While it provides a solid foundation for economic analysis, it also lucidly explains the mathematical derivations of various microeconomic concepts. This textbook would be extremely useful for the students of economics.

Economics of Development and Planning with Special Reference to India - M. L. Jhingan 1969

Indian Books in Print - 2003

Business Environment - A.C. Fernando 2011

Principles of Economics - Libby Rittenberg 2011-07

Economics of Development -

A.P. Thirlwall 2017-09-16
This classic, bestselling textbook provides a comprehensive introduction to the field of development economics. The 10th edition of Tony Thirlwall's book, now co-written with Penélope Pacheco-López, provides a clear, comprehensive and rigorous introduction to the theory of development economics and the experience of developing countries. Balancing a historic approach with current data and references, it provides a wide-ranging analysis of the subject. This all-inclusive methodology succeeds at representing different schools of thought with a balance of micro and macro topics. An ideal textbook for undergraduate students of economics and other social sciences, it is also suitable for upper undergraduate and master's level modules on development economics as an option on a non-economics degree. New to this Edition: - A brand new chapter on human capital: education, nutrition, health, and the role of women in development - New material

on the Sustainable Development Goals, the measurement of poverty, and the multidimensional poverty index - Discussion of randomized control trials - The role of structural change in economic development - New IMF lending facilities
Macroeconomics, 20e - Ahuja H.L. 2019

Economics Of Development And Planning 38e - M. L. Jhingan 2005

Modern Economic Theory - Dewett K.K. & Navalur M.H.
Modern Economic Theory is a critique on how monetary revolution across the globe is changing the course of world economies, financial systems and markets. Beginning with discussion on price theory and microeconomics, this classic textbook progresses to describe comprehensively, theory of income and

employability or macroeconomics, money and banking, international economies and public finance. Economic systems, economics of development and planning and economies of welfare provide a clear idea about recent developments in and criticism of compensation principle, market structures and social welfare. It adequately meets the requirements of the BA and B.Com courses (Pass and Honours). In addition, postgraduate students of Arts and Commerce and aspirants of various competitive examinations will also find the book very useful and informative.

Advanced Economic Theory - HL Ahuja 2017

This authoritative and comprehensive text is an advanced treatise on microeconomics. Featuring simplified mathematical treatment, the book covers a

wide spectrum of theories and concepts aimed at effective understanding of advanced economic theory. This revised edition explores further the concept of economic efficiency and the concept of utility and its critique by Prof. Amartya Sen. It further includes an incisive analysis of Hicksian and Slutsky substitution effect. The revision also includes important distinctions and critical analysis of several functions expositing the latest developments in the field.

Africa in the Twenty-First Century - Gashawbeza Bekele
2018-12-04

This book, written by African scholars on both sides of the Atlantic, explores contemporary debates, controversies, achievements, challenges, and future prospects of African development and democratization from diverse theoretical perspectives.
