The Iowa State Fair - 2014-08

In 2013, Kurt Ullrich set out to chronicle the magic of the Iowa State Fair in words and photographs. Join him as August days and nights blow warm and easy over the fairgrounds, brushing lightly against fellow travelers on this earth, both human and not. He captures precious moments of extreme joy and unbridled delight in these beautiful black-and-white images, celebrating the brash rural energy of the fair, from Big Wheel races to people-watching goats, fair queen contestants to arm wrestlers, Percherons to ponies. Prize pigs, prize sheep, prize apples, and the famous butter cow all have their moment in the limelight. Iowa's very best ear of corn and old friends reminiscing outside their RVs draw the photographer's fond eye, as do brightly lit beer stands and the brilliant arc of the Ferris wheel

against the night sky.

Foundations of Analog and Digital Electronic Circuits - Anant Agarwal 2005-07-01

Unlike books currently on the market, this book attempts to satisfy two goals: combine circuits and electronics into a single, unified treatment, and establish a strong connection with the contemporary world of digital systems. It will introduce a new way of looking not only at the treatment of circuits, but also at the treatment of introductory coursework in engineering in general. Using the concept of 'abstraction,' the book attempts to form a bridge between the world of physics and the world of large computer systems. In particular, it attempts to unify electrical engineering and computer science as the art of creating and exploiting successive abstractions to manage the complexity of building useful electrical systems. Computer systems are simply one type of electrical systems. +Balances circuits theory with practical digital electronics applications. +Illustrates concepts with real devices. +Supports the popular circuits and electronics course on the MIT OpenCourse Ware from which professionals worldwide study this new approach. +Written by two educators well known for their innovative teaching and research and their collaboration with industry. +Focuses on contemporary MOS technology.
