**Teaching the Critical Vocabulary of the Common Core** - Marilee Sprenger 2013-06-14

Your students may recognize words like determine, analyze, and distinguish, but do they understand these words well enough to quickly and completely answer a standardized test question? For example, can they respond to a question that says "determine the point of view of John Adams in his 'Letter on Thomas Jefferson' and analyze how he distinguishes his position from an alternative approach articulated by Thomas Jefferson"? Students from kindergarten to 12th grade can learn to compare and contrast, to describe and explain, if they are taught these words explicitly. Marilee Sprenger has curated a list of the critical words students must know to be successful with the Common Core State Standards and any other standardized assessment they encounter. Fun strategies such as jingles, movements, and graphic

organizers will engage students and make learning these critical words enjoyable and effective. Learning the critical vocabulary will help your students with testing and college and career readiness, and will equip them with confidence in reading, writing, and speaking. Marilee Sprenger is also the author of How to Teach So Students Remember, Learning and Memory, and Brain-Based Teaching in the Digital Age.

[Tense and Aspect in Second Language Acquisition and Learner Corpus Research](#) - Robert Fuchs 2020-06-30

The expression of temporal relations, notably through tense and aspect, is central in all processes of communication, but commonly perceived and described as a major hurdle for non-native speakers. While this topic has already received considerable attention in the SLA literature, it features less prominently in recent corpus-based studies of learner language. This volume

intends to close this gap. It shows which additional insights into the area of tense and aspect in learner language can be gained using corpus data, addressing the following questions: In which ways do corpus-based studies complement work based on other methods?; How can a corpus-based approach inform theories on the acquisition of tense and aspect specifically, and of language acquisition in general?; Are results language-specific or can universal principles be established?; How pervasive are effects of mode/register within learner corpus data?; What role does native and non-native input play?; Which methodological challenges come to the fore when using corpus data instead of elicited data?; How can the notion of “target(-like)” performance be operationalized for corpus material?; Which implications do the findings from the learner corpora have for the teaching and learning of the target language? **Incorporating Technology for Teaching Vocabulary to Second Language Learners** - Ehsan Rassaei 2023-04-04

*EXPLICIT MORPHOLOGICAL INSTRUCTIONS AND ENGLISH VOCABULARY MASTERY* - Asfi Aniuranti, S.Pd.,M.A.

One of essential elements of English is vocabulary. English has enormous number of vocabularies, therefore, mastering English is frequently troublesome for most of Indonesian students who learn English as a foreign language. Every English teacher in Indonesia are encouraged to use effective ways or strategies in teaching vocabularies. One of recommended ways of teaching vocabularies is using explicit morphological instructions. This means that English teachers have to

explain or discusses explicitly the morphological components of English like how English words are constructed. The English teacher may introduce how affixation, compounding or clipping work in English vocabulary building. The researchers as English lecturer commonly hear the complaints of English university students about the difficulty of learning English vocabulary. Besides the huge number of English vocabularies, the limitation of learning time, and the differences between the English and Indonesian language system commonly become the causes of this struggle. Based on this situation, the researchers concurred to conduct action research to overcome this problem. This book is a monograph of a study entitled “Promoting Students’ English Vocabulary through Explicit Morphological Instructions and Exploring Students’ Voices”. This monograph consists of Five Chapters called Chapter I (Introduction), Chapter II (English Vocabulary), Chapter III (Morphology), Chapter IV (Explicit Morphological Instructions), and Chapter V (The Example) Some relevant documents to this study are also attached on the appendixes. The appendixes consist of the test questions, the observation sheet, the questionnaire, and the teaching materials.

**Defining with Simple Vocabulary in English Dictionaries** - Mariusz Piotr Kamiński 2021-04-15

This book investigates an important but under-researched aspect of dictionary making: the use of a controlled vocabulary in definitions. The main concern of the author is the role of a definition vocabulary in how foreign learners understand and perceive dictionary definitions. The author takes the reader through a detailed historical account of controlled vocabularies and examines definitions in a range of English

dictionaries with respect to their vocabulary loads. He performs a series of experiments with university students to reveal merits and shortcomings of restricted vocabularies. This monograph has been written with the aim to fill a gap in the literature on defining vocabulary. It is intended for lexicographers, dictionary editors, course designers, teachers, and students, as well as anyone who wishes to explain words in an intelligible way.

*Advances in Electrical and Computer Technologies* -  
Thangaprakash Sengodan 2021-02-26

This book comprises select proceedings of the International Conference on Advances in Electrical and Computer Technologies 2020 (ICAECT 2020). The papers presented in this book are peer-reviewed and cover latest research in electrical, electronics, communication and computer engineering. Topics covered include smart grids, soft computing techniques in power systems, smart energy management systems, power electronics, feedback control systems, biomedical engineering, geo informative systems, grid computing, data mining, image and signal processing, video processing, computer vision, pattern recognition, cloud computing, pervasive computing, intelligent systems, artificial intelligence, neural network and fuzzy logic, broad band communication, mobile and optical communication, network security, VLSI, embedded systems, optical networks and wireless communication. The volume can be useful for students and researchers working in the different overlapping areas of electrical, electronics and communication engineering.

Oxford English Dictionary - John Simpson 2000

The ultimate authority on the usage and meaning of English words and phrases, unparalleled in its accuracy

**Corpus Linguistics for Writing Development** - Philip Durrant 2022-11-30

Corpus Linguistics for Writing Development provides a practical introduction to using corpora in the study of first and second language learners' written language

over time and across different levels of proficiency. Focusing on development in the use of vocabulary, formulaic language, and grammar, this book • discusses how corpus research can contribute to our understanding of writing development and to pedagogical practice; • reviews a range of corpus techniques for studying writing development from the perspectives of vocabulary, grammar, and formulaic language and interrogates the methodological bases of those techniques; and • guides readers to perform practical analyses of learner writing using the R open-source programming language. Aimed at the novice researcher, this book will be key reading for advanced undergraduate and postgraduate students in the fields of education, language, and linguistics. It will be of particular interest to those interested in first or second language writing, language assessment, and learner corpus research.

Electronic Lexicography - Sylviane Granger 2012-10-25 Professional and academic lexicographers present and discuss innovations, ideas, and developments in all aspects of electronic lexicography including dictionary-writing systems and the integration of corpora for every kind of dictionary in every format.

**Vocabulary Learning in the Wild** - Barry Lee Reynolds 2023-05-11

This book provides a timely and valuable resource to explore second language vocabulary learning outside the formal language learning classroom. Rapidly evolving technology and the increasing impact of the global village have resulted in dramatic changes to and increased occasions for second language vocabulary learning. This book offers new and valuable insights into the radically different opportunities both the physical and digital wild provide for language learners

to increase their vocabulary knowledge. Practical advice is also given on how second language teachers can integrate vocabulary learning in the wild into their formal classroom instruction. This collection of cutting-edge studies by international experts working within the fields of second language teaching and learning, second language acquisition, applied linguistics, informal language learning, and technology enhanced learning offers an essential resource for language teachers and researchers. The internet is a powerful source of incidental language learning, but this is only part of language learning in the wild. This excellent book shows the range of opportunities available for learning another language outside the classroom in this much neglected research area. --Paul Nation, Emeritus Professor, Victoria University of Wellington

Evaluating Second Language Vocabulary and Grammar Instruction - Frank Boers 2021-03-14

Providing a much-needed critical synthesis of research on teaching vocabulary and grammar to students of a second or foreign language, this book puts the research into perspective in order to distil recommendations for language teaching. Boers evaluates a comprehensive range of both well-established and lesser-known research strands and classroom practices to draw out the most effective instructional approaches to teaching words, multiword expressions and grammar patterns. Chapters discuss learning as a by-product of communicative activities, language-focused instruction, diverse types of exercises, mnemonic techniques and more, with a view to building bridges between the available research on such instructional approaches and how they are commonly implemented in actual language courses and textbooks.

This book helps teachers make research-informed decisions regarding their instructional approaches to words, phrases and patterns, and direct researchers to specific areas in need of further inquiry. Boers not only demonstrates how research findings can inform effective teaching, but also calls for a deeper appreciation on the part of researchers of the realities of the teaching profession, making this a worthwhile text for preservice teachers, teacher educators, graduate students and scholars.

**Endangered Languages and New Technologies** - Mari C. Jones 2014-12-04

This book discusses how new technologies have the potential to revolutionise the documentation, analysis and revitalisation of endangered languages for the linguist and indigenous community alike. It addresses the challenges that come with these new resources and debates how their application may be advanced.

**The Routledge Handbook of Second Language Acquisition and Technology** - Nicole Ziegler 2022-01-31

Technology-mediated language learning has matured over the past few decades, with various tools and contexts now widely used in language education for all ages and levels. Many of today's language learners have experienced technology as an ever-present feature both within and beyond the classroom, highlighting how the role of technology has expanded into many daily activities, and underscoring how research in Second Language Acquisition (SLA) can inform and support the use of established and emerging technologies. The role of technology in language learning has continued to grow, with the recent COVID-19 global pandemic further demonstrating the potential contributions of technology for supporting and facilitating second language

development. Answering this increasing interest, this Handbook provides students, teachers, and scholars with a comprehensive collection of chapters on foundational topics and key issues related to technology, SLA, and where relevant, pedagogical applications.

**Building Vocabulary: Level 2 Kit** - Timothy Rasinski, Nancy Padak, Rick M. Newton, and Evangeline Newton 2009-08-31

Building Vocabulary provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary: Foundations for grades 1-2, empowers beginning readers to learn words by identifying word parts or word families that share common sounds. Students will build vocabulary through the use of poetry, word endings, and simple roots. Building Vocabulary: Foundations: Level 2 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

**Bermudian English** - Nicole Eberle 2021-05-15

Bermudian English. A sociohistorical and linguistic profile focuses on a hitherto severely under-researched variety of English. The book traces the origins and development of Bermudian English, so as to situate the variety within the canon of other lesser-known varieties of English, and provides a first in-depth description of its variable morphosyntactic structure. Relying on

sociolinguistic interview data and combining qualitative, typological and quantitative, variationist analyses of selected morphosyntactic features, it sheds light on structural affiliations of Bermudian English and argues for a two-way transfer pattern where Bermudian English plays an important role in the development of a number of other English(-based) varieties in the wider geographical region.

Complementing existing studies which document such varieties, this book contributes to the body of research that describes the diversity of English(-based) varieties around the globe, filling a notable gap.

*Computer Supported Education* - Beno Csapó 2022-08-20

This book constitutes selected, revised and extended papers from the 13th International Conference on Computer Supported Education, CSEDU 2021, held as a virtual event in April 2021. The 27 revised full papers were carefully reviewed and selected from 143 submissions. They were organized in topical sections as follows: artificial intelligence in education; information technologies supporting learning; learning/teaching methodologies and assessment; social context and learning environments; ubiquitous learning; current topics.

Recent Trends in Intensive Computing - M. Rajesh  
2021-12-22

In a world where computer science is now an essential element in all of our lives, a new opportunity to disseminate the latest research and trends is always welcome. This book presents the proceedings of the first International Conference on Recent Trends in Computing (ICRTC 2021), which was held as a virtual event on 21 – 22 May 2021 at Sanjivani College of Engineering, Kopergaon, India due to the restrictions of the COVID-19

pandemic. This online conference, aimed at facilitating academic exchange among researchers, enabled experts and scholars around from around the globe to gather for the discussion of the latest advanced research in the field despite the extensive travel restrictions still in place. The book contains 134 papers selected from 329 submitted papers after a rigorous peer-review process, and topics covered include advanced computing, networking, informatics, security and privacy, and other related fields. The book will be of interest to all those eager to find the latest trends and most recent developments in computer science.

**CALL in a climate of change: adapting to turbulent global conditions – short papers from EUROCALL 2017** -

Kate Borthwick 2017-12-03

2017 saw the 25th conference for the European Association of Computer-Assisted Language Learning (EUROCALL). Every year, EUROCALL serves as a rich venue to share research, practice, new ideas, and to make new international friends – and this year was no different. It is an innovative and inspiring conference in which researchers and practitioners share their novel and insightful work on the use of technology in language learning and teaching. This volume of short papers captures the pioneering spirit of the conference and you will find here both inspiration and ideas for theory and practice.

Loanwords in the World's Languages - Martin Haspelmath  
2009

"This landmark publication in comparative linguistics is the first comprehensive work to address the general issue of what kinds of words tend to be borrowed from other languages. The authors have assembled a unique database of over 70,000 words from 40 languages from

around the world, 18,000 of which are loanwords. This database allows the authors to make empirically founded generalizations about general tendencies of word exchange among languages." --Book Jacket.

The Routledge Research Companion to Electronic Music: Reaching out with Technology - Simon Emmerson 2018-05-16

The theme of this Research Companion is 'connectivity and the global reach of electroacoustic music and sonic arts made with technology'. The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years. The definitions of the field itself are now broader - there is no clear boundary between 'electronic music' and 'sound art'. Also, what was previously an apparently simple divide between 'art' and 'popular' practices is now not easy or helpful to make, and there is a rich cluster of streams of practice with many histories, including world music traditions. This leads in turn to a steady undermining of a primarily Euro-American enterprise in the second half of the twentieth century. Telecommunications technology, most importantly the development of the internet in the final years of the century, has made materials, practices and experiences ubiquitous and apparently universally available - though some contributions to this volume reassert the influence and importance of local cultural practice. Research in this field is now increasingly multi-disciplinary. Technological developments are embedded in practices which may be musical, social, individual and collective. The contributors to this companion embrace technological, scientific, aesthetic, historical and social approaches and a host of hybrids – but, most importantly, they try to show how these join up. Thus the intention has been to allow a wide variety of new

practices to have voice – unified through ideas of 'reaching out' and 'connecting together' – and in effect showing that there is emerging a different kind of 'global music'.

*Reading in the Digital Age: Young Children's Experiences with E-books* - Ji Eun Kim 2019-07-23

This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

Equity Moves to Support Multilingual Learners in Mathematics and Science, Grades K-8 - Ivannia Soto 2023-01-17

A strengths and assets-based approach to multilingual learner success As the number of multilingual learners (MLLs) in US schools continues to grow, educators need to learn the moves necessary to support the success of these students in mathematics and science. *Equity Moves to Support Multilingual Learners in Mathematics and Science, Grades K-8* focuses on the literacy opportunities that MLLs can achieve when language scaffolds are taught alongside rigorous math and science content. It provides a framework teachers can use to develop equity-centered, scaffolded math, science, or STEAM lessons. Readers will find Anchor phenomena that demonstrate issues with lesson design and delivery and highlight areas to include language and content scaffolds Examples for honoring the languages of students, families, and communities Culturally responsive techniques and easy-to-use tables featuring the equity moves Vignettes showcasing the equity move in the classroom setting A focus on four language demands: vocabulary, discourse, multiple modes of representation, and text features With an assets-based approach to what MLLs can do, this book helps teachers unpack the language demands of mathematics and science and encourages reflection of their own practices in scaffolding for language and culture.

*Understanding L2 Proficiency* - Eun Hee Jeon 2022-08-04  
This edited volume is a collection of theoretical and empirical overviews of second language (L2) proficiency based on four skills: reading, writing, listening, and speaking. Each skill is reviewed in terms of how it has been conceptualized, measured, and studied over the

years in relation to relevant (sub-) constructs of the language skill under discussion. This is followed by meta-analyses of correlation coefficients that examine the relationship between the L2 skill in question and its component variables. Unlike most meta-analyses that have a limited range of variables under investigation, our meta-analyses are much larger in scope to better clarify such relationships. By combining theoretical and empirical approaches, the book is helpful in deepening the understanding of how subcomponents or various variables are related to a particular L2 skill.

A Practical Guide to Electronic Resources in the Humanities - Ana Dubnjakovic 2010-09-25

From full-text article databases to digitized collections of primary source materials, newly emerging electronic resources have radically impacted how research in the humanities is conducted and discovered. This book, covering high-quality, up-to-date electronic resources for the humanities, is an easy-to-use annotated guide for the librarian, student, and scholar alike. It covers online databases, indexes, archives, and many other critical tools in key humanities disciplines including philosophy, religion, languages and literature, and performing and visual arts. Succinct overviews of key emerging trends in electronic resources accompany each chapter. The only reference guide to electronic resources written specifically for the humanities Addresses all major humanities disciplines in one convenient guide Concise format ideal for students, librarians, and humanities researchers

**World Englishes and Language Assessment** - Chokri Smaoui 2022-01-21

The book is distinguished from previous publications by focusing on assessment issues in the context of world

Englishes. This topic is an important part of recent research in linguistics. This volume can be used as a source and reference for teachers and researchers in the field. It is valuable as it presents a number of case studies from different linguistic contexts. It provides insights into the use of new ways of assessment, and suggests some methods of assessment that should be used in multilingual settings to evaluate the different styles of learners with different local norms.

**The Linguistic Challenge of the Transition to Secondary School** - Alice Deignan 2022-12-30

This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition, which some students struggle with emotionally and academically. The study: • draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings, provided by the project's partner schools; • combines quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers and subjects; • describes the procedures of corpus compilation and analysis of written and spoken academic language, showing how modern corpus tools can be applied to this far-reaching social and educational issue; • uncovers differences and similarities between the academic language that school children are exposed to at primary and secondary school, contrasting this against the backdrop of the non-academic language that they encounter outside school. This book is important reading for advanced students and researchers in corpus linguistics, applied linguistics and teacher education. It carries implications for policymakers and schools looking to support students at this critical point in

their schooling.

*Social Science Resources in the Electronic Age: Geography* - Elizabeth H. Oakes 2004

The Internet has become one of the most efficient and useful ways to obtain information on a particular subject. *Geography Resources in the Electronic Age* provides basic information on how to navigate the Web and helps students to quickly identify the appropriate geography resources. Approximately 500 reliable sites listed alphabetically by topic are reviewed. Each site review provides details about the best (and worst) features, specific grade range, and how to use the site for research. *Geography Resources in the Electronic Age* saves students, teachers, and librarians time in finding the Web's best geography resources. Topics are chosen based on the national geography curriculum, and the Web sites are reviewed by a geographer. Expanded coverage offers information specifically for educators, resources for special needs students, a list of museum and organization Web sites, and information on careers in geography.

Foreign Language Proficiency in Higher Education - Paula Winke 2018-12-18

This volume comprises of chapters that deal with language proficiency relating to a wide range of language program issues including curriculum, assessment, learners and instructors, and skill development. The chapters cover various aspects of a broad-based proficiency initiative, focusing on numerous aspects of foreign language learning, including how skills develop, how assessments can inform curriculum, how learners and instructors view proficiency and proficiency assessment, and how individual use of technology furthers language learning. The concluding

chapter points the way forward for issues and questions that need to be addressed.

**English L2 Vocabulary Learning and Teaching** - Lawrence J. Zwier 2022-10-19

Accessible to experts and non-experts alike, this text is a comprehensive entry to teaching and learning vocabulary in ESL and EFL contexts. Firmly grounded in research, it presents frameworks and methods for teaching vocabulary to English L2 speakers. Overviewing key topics as well as providing in-depth research analyses and critiques, Zwier and Boers address all major areas of vocabulary pedagogy and instruction. Organized in four parts, chapters cover the nature of vocabulary and strands of vocabulary research; curricular approaches; and techniques and activities. Readers are introduced to key topics, including teaching multiword expressions, assessment, discourse, and instruction at different levels. Each chapter includes questions, prompts, and activities to foster discussion. A foundational textbook for courses on L2 instruction and teacher-training courses, it is an essential text for students and scholars in TESOL and Applied Linguistics, and provides the pedagogical grounding future English L2 teachers need to effectively teach vocabulary.

*Blended Learning: Engaging Students in the New Normal Era* - Richard Chen Li 2022-06-17

This book constitutes the refereed proceedings of the 15th International Conference on Blended Learning, ICBL 2022, held in Hong Kong, China, in August 2022. The 31 papers presented in this volume were carefully reviewed and selected from 80 submissions. The conference theme of ICBL 2022 is Blended Learning: Engaging Students in the New Era. The papers are organized in topical

sections named: Game-based Learning and Augmented Learning Environment; Computer Supported Collaborative Learning; Enriching Learning Experience with Blended and Online Learning; Content Development and Practice for Blended Learning and Beyond.

Writing to Learn Academic Words - Breno B. Silva 2022-08-22

This book highlights the importance of English academic vocabulary for success at university and explores written tasks as effective pedagogical tools to promote the acquisition of academic words. The book reviews germane and recent SLA, psycholinguistic, corpus linguistics, and L2 writing research to underscore the challenges associated with the learning of academic words. Then, it reports on three empirical studies conducted in the Polish context. The first study develops a reliable tool to assess the knowledge of academic vocabulary of undergraduate learners. The second and third studies investigate the learning of academic words after the writing of sentences and argumentative essays, and discuss the role of cognition as a mediator of such learning. The book also provides an accessible introduction to linear mixed-effect models, a powerful, reliable, and flexible statistical technique that has been gaining popularity among SLA and psycholinguistics researchers.

*EAL Research for the Classroom* - Gavin Brooks 2023-06-27  
With an estimated 1.6 million English as an Additional Language (EAL) learners in the UK, and over 5 million in the USA, EAL research is urgently needed to inform practice. This edited volume investigates the multifaceted elements that shape EAL pedagogy and research in a variety of settings and research areas, including linguistic ability influences on subject-

specific skills, integrating learners' home languages into classroom environments, and the importance of supporting EAL teachers in the classroom. In doing so, the contributors provide an international perspective on the emerging field of EAL research. The research-based chapters detail fundamental concerns related to EAL learner education. The text is composed of five parts: Part I explores the question of what is EAL and how a definition can shape policy construction; Part II examines the challenges EAL learners face in the classroom, including the use of first languages and the relative impact learner language proficiency has on subject-specific classes; Part III discusses the challenges involved with preparing learners to study in an EAL environment; Part IV investigates concerns relating to supporting EAL teachers in the classroom; and Part V brings together the insights from the previous chapters and provides a road map for future research in the field. The volume draws on researcher expertise from a variety of universities and institutions worldwide. It explores diverse language backgrounds in multilingual contexts. It covers empirical studies with pedagogical, policy, and further research implications. The volume represents a single resource invaluable for EAL teachers, trainers, and trainees, as well as researchers in education, language learning and teaching, bilingualism and multilingualism, and second language acquisition.

*Teacher Education and Professional Development In Industry 4.0* - Ashadi 2020-10-20

The main theme of the proceedings of the 4th International Conference on Teacher Education and Professional Development (InCoTEPD 2019) is "Teacher Education and Professional Development in Industry 4.0".

The papers have been carefully grouped under the subthemes of teacher education and professional development, curriculum, learning materials, teaching-learning process, technology and media, and assessment in Industry 4.0 education. They also cover vocational education in the era in question and one section is devoted to Industrially disadvantaged societies. As these papers were presented at an internationally refereed conference dedicated to the advancement of theories and practices in education, they provide an opportunity for academics and professionals from various educational fields with cross-disciplinary interests to bridge the knowledge gap and promote research esteem and the evolution of pedagogy.

*New Directions in Technology for Writing Instruction* - Gonca Yangın-Ekşi 2023-01-01

This book responds to the changes and needs of English Language Learning by offering insight into online writing pedagogical platforms and atmospheres. Language learning enriched with technology, web tools and applications have become a necessary ingredient in language education internationally. This volume provides an in-depth understanding of writing practices that are responsive to the challenges for teaching and learning writing in local and global contexts of education. It also provides succinct knowledge at the intersection of technology with teaching, learning, and research. The chapters herein creatively take advantage of the affordances of digital platforms and further critiques their limitations. The book also delineates knowledge on concepts, theories, and innovative approaches to digital writing in the field of teaching and learning English. The chapters focus on reviews and provide guidance on the practical use of Web 2.0 and multimedia tools as

well as presenting research on technology integration in writing classes.

**Future-proof CALL: language learning as exploration and encounters – short papers from EUROCALL 2018** - Peppi Taalas 2018-12-08

The 26th EUROCALL conference was organised by the University of Jyväskylä (JYU) Language Campus and specifically the Language Centre. The theme of this year's conference was 'Future-proof CALL: language learning as exploration and encounters', which reflects an attempt to envision language teaching and learning futures in a changing world. What brought researchers together this year are shared concerns in relation to the sustainability of language learning and teaching in technology-rich contexts that are marked by ever-increasing complexity. The collection of short papers in this volume is a very thorough view into the conference proper exhibiting the complexity and novelty of the field of CALL. There are exciting new openings and a more profound exploration of theoretical underpinnings of the contemporary issues in teaching and learning, cross-cultural communication, mobile learning and the like.

**New Approaches to English Linguistics** - Olga Timofeeva 2016-11-01

This book aims at providing a cross-section of current developments in English linguistics, by tracing recent approaches to corpus linguistics and statistical methodology, by introducing new inter- and multidisciplinary refinements to empirical methodology, and by documenting the on-going emphasis shift within the discipline of English linguistics from the study of dominant language varieties to that of post-colonial, minority, non-standardised, learner and L2 varieties.

Among the key focus areas that define research in the field of English linguistics today, this selection concentrates on four: corpus linguistics, English as a global language, cognitive linguistics, and second language acquisition. Most of the articles in this volume concentrate on at least two of these areas and at the same time bring in their own suggestions towards building bridges within and across sub-disciplines of linguistics and beyond.

*CONTEMPORARY RESEARCH ON LANGUAGE STUDIES* - Dr. Öznur ATAŞ AKDEMİR

'Contemporary Research on Language Studies' is a collection of current research and review papers on language teaching/learning studies. The book compiles research and review studies on language testing, vocabulary teaching, authentic materials in ELT, L2 writing, distance learning/teaching practices and MALL. Shanlax Publications is proud of presenting state-of-the-art research on language studies.

**Mobile Lenses on Learning** - Mark Pegrum 2020-01-01

This book explores mobile learning as a form of learning particularly suited to our ever more mobile world, presenting a new conceptualisation of the value of mobile devices in education through the metaphor of lenses on learning. With a principal focus on mobile-assisted language learning (MALL), it draws on insights derived from MALL language, literacy and cultural projects to illustrate the possibilities inherent in all mobile learning. In its broad sweep the book takes in new and emerging technologies and tools from robots to holograms, virtual reality to augmented reality, and smart glasses to embeddable chips, considering their potential impact on education and, indeed, on human society and the planet as a whole. While not shying away

from discussing the risks, it demonstrates that, handled appropriately, mobile, context-aware technologies allow educators to build on the personalised and collaborative learning facilitated by web 2.0 and social media, but simultaneously to go much further in promoting authentic learning experiences grounded in real-world encounters. In this way, teachers can better prepare students to face a global, mobile future, with all of its evolving possibilities and challenges.

Digital Games in Language Learning - Mark Peterson  
2022-08-12

This edited volume provides a comprehensive overview of contemporary research into the application of digital games in second and foreign language teaching and learning. As the use of digital games in foreign language education continues to expand, there is a need for publications that provide a window into recent innovations in this increasingly influential area of language education. This volume is wide ranging in scope incorporating both theory and practice and includes

contributions from authorities in the field. Areas covered include research reviews and a range of case studies conducted in a variety of international contexts. This volume represents an essential guide to developments in this field and will have wide appeal to students, language educators, game and instructional designers.

**Developments in English Historical Morpho-Syntax** -  
Claudia Claridge 2019-06-15

Spanning the time from Old English to modern American English, this volume provides fresh perspectives on core issues and theories in the morphosyntactic history of English nominal, verbal and adverbial constructions. The contributions discuss the loss, rise and restructuring of morphological marking, periphrastic verbal constructions, auxiliary variation and evolution, as well as changing word order options. Favouring corpus-linguistic, frequency-based and statistical approaches, the studies are firmly empirically grounded. The book is aimed at scholars interested in the history of the English language and in language variation and change.
