A History of Organized Labor in the English-speaking West Indies - Robert J. Alexander 2004

This volume deals with the history of organized labor in all of the countries of the English-speaking West Indies. It is the fourth in a series of histories of the organized labor movement in Latin America and the Caribbean. Alexander traces the countries' origins, early struggles, experiences with collective bargaining, and the key roles in the politics of their respective countries, particularly their participation in the struggle for self-government and independence. He also examines the international organizations of trade unions in the West Indian area, and their association with the

hemisphere and worldwide labor groups. This work is based on the author's personal contacts with these labor movements and their leaders, as well as on printed material, including collective contracts, histories of some of the labor groups and other similar sources. Scholars and students of labor relations, economic and social development, and those interested in the history of the West Indies and Latin America will enjoy this book.

*Teacher Inquiries in Literacy Teaching-Learning* -

Christine C. Pappas 2001

This book consists of the reports of 13 urban elementary teacher researchers' year-long inquiries around literacy topics--conducted as part of a collaborative school-university action research project. The focus is on how they attempted to transform their teaching practices to meet the needs of students from diverse ethnic and linguistic backgrounds, and how their inquiry efforts resulted in developing more collaborative styles of

teaching. These teachers explore how collaborative classroom interactions occur when teachers move away from teaching-as-transmission approaches to ones in which they share power and authority with their students--viewing them not as 'at risk' but instead as 'at promise.' Because the everyday interactions between teachers and students are realized by social talk in the classroom, classroom discourse was analyzed to study and document the teacher researchers' efforts to make changes in the locus of power in literacy teaching and learning. Their chapters are filled with classroom discourse examples to illustrate their points. The volume includes teacher inquiries conducted in elementary classrooms from kindergarten through eighth grade. Three took place in bilingual classrooms, one in a special education class. These inquiries cover a range of literacy topics, including reading-aloud, language richness, writing, literature discussion groups, drama, and 'pretend' reading. The background and theoretical underpinnings of the project are discussed in an introduction written by the editors; in the conclusion they pull together the major themes in the teacher researchers' chapters and discuss the political implications of their efforts to change literacy teaching and learning in their urban classrooms.

**Talk a Lot Elementary Book 2** - Matt Purland 2014-10-10  
From the introduction: This book is a companion volume to Book 1 and features ten exciting new lesson topics: Crime, Sport, Music, Weather, Animals, Cars, The Human Body, Colours and Numbers, Life Events, and Nature. The lesson topics in this book can be used alongside those in Book 1, according to your needs. For example, it is now possible for you to plan a longer Talk a Lot course, using lesson material from both books! A great new feature in Book 2 is the inclusion of information exchange activities. For more details see page 14. Once again, the aim of this book is to teach students to

think in English and Talk a Lot! The Talk a Lot course objectives are very simple: \* Every student talking in English \* Every student listening to and understanding English \* Every student thinking in English, and \* Every student taking part in class Talk a Lot is structured so that every student can practise and improve English grammar, vocabulary, pronunciation, intonation, word and sentence stress, and interpersonal skills, by working in pairs, groups, and one to one with the teacher.

*Code-switching* - Rebecca S. Wheeler 2006

Wheeler and Swords show K-6 teachers how to use code-switching and contrastive analysis to help students use prior knowledge to translate vernacular English into Standard English. When African American students write or say "Mama jeep is out of gas" or "The Earth revolve around the sun," many teachers--labeling this usage poor English or bad grammar--assume that their students have problems with possession or don't know how to make subjects and verbs agree. Forty years of linguistic research, however, demonstrates that the student is not making errors in Standard English--the child is writing or speaking correctly in the language patterns of the home and of the community. Building on the linguistic knowledge that children bring to school becomes the focus of this book, which advocates the use of "code-switching" to enable students to add another linguistic code--Standard English--to their linguistic toolbox. Rather than drill the idea of "Standard English" into students by labeling their home language as "wrong," the authors recommend teaching students to recognize the grammatical differences between home speech and school speech so that they are then able to choose the language style most appropriate to the time, place, audience, and communicative purpose. University researcher Rebecca Wheeler and urban elementary teacher Rachel Swords offer a practical, hands-on guide to code-switching, providing teachers with step-by-step instructions and numerous code-switching charts that can be reproduced for classroom use. The success of Wheeler's presentations in urban school districts and the positive results that

Swords has observed in her own classroom speak to the effectiveness of the research and of this approach. While the book focuses on language use in the elementary classroom, the procedures and materials introduced can be easily adapted for middle and high school students.

**Teaching Science in Elementary and Middle School** - Cory A. Buxton 2010-07-08

A practical methods text that prepares teachers to engage their students in rich science learning experiences Featuring an increased emphasis on the way today's changing science and technology is shaping our culture, this Second Edition of Teaching Science in Elementary and Middle School provides pre- and in-service teachers with an introduction to basic science concepts and methods of science instruction, as well as practical strategies for the classroom. Throughout the book, the authors help readers learn to think like scientists and better understand the role of science in our day-to-day lives and in the history of Western culture. Part II features 100 key experiments that demonstrate the connection between content knowledge and effective inquiry-based pedagogy. The Second Edition is updated throughout and includes new coverage of applying multiple intelligences to the teaching and learning of science, creating safe spaces for scientific experimentation, using today's rapidly changing online technologies, and more. New to This Edition: Links to national content standards for Mathematics, Language Arts, and Social Studies help readers plan for teaching across the content areas. Discussions of federal legislation, including No Child Left Behind and Race To The Top, demonstrate legislation's influence on classroom science teaching. New "Scientists Then and Now" biographies provide practical examples of how great scientists balance a focus on content knowledge with a focus on exploring new ways to ask and answer questions. Sixteen additional video demonstrations on the Instructor Teaching Site and Student Study Site illustrate how to arrange and implement selected experiments.

The Nongraded Elementary School - John I. Goodlad  
1987-06-15

Since its first publication in 1959, *The Nongraded Elementary School* has become a classic in school reform literature. This reissue includes a retrospective introduction on what happened to nongraded alternatives in the aftermath of "Sputnik" educational reforms, what is occurring amid the current resurgence of school reform, and what the prospects are for the future. The value of this book lies in its still contemporary theoretical underpinnings for the nongraded school. The book's treatment of the issue of promotion versus non-promotion is of particular interest in the current debate on school reform.

Introduction to Teaching - Donald P. Kauchak 2005

The second edition of the best-selling case-based introduction to teaching text, "Introduction to Teaching: Becoming A Professional," is organized around three themes--Professionalism, Reform, and Decision Making--which provide the threads that bind the topics of the chapters together. As the only case-based introduction to teaching text, each chapter begins with a case study that provides a framework for the discussions that follow and helps the reader understand how chapter topics relate to the real world of teaching. NEW! Expanded emphasis on "decision making" as a critical aspect of professionalism is introduced as a theme in Chapter 1 and further developed at the end of each chapter in a section titled "Decision Making: Defining Yourself as a Professional." In this section students are asked to think about personal and professional decisions that will influence the kinds of teachers they will be. NEW! Expanded development of professionalism in Chapter 1 also includes discussion of "INTASC principles, Praxis II," and "professional portfolios," and continues throughout each chapter to help students understand what professionalism means and how it is connected to classroom planning and practice. NEW! "Praxis Practice," a case-based, end-of-chapter feature, helps students prepare to successfully pass the Praxis II exam. Readers can submit their responses and receive feedback on our companion website. NEW! Chapter case studies and corresponding icon are reformatted to help readers identify and more easily make the connection between the cases, chapter content, and

classroom application. Continued in this edition are the popular features "Reflect on This, Teaching in an Era of Reform," and "Exploring Diversity" which encourage the readers to visit the companion website for further research and applications.

Primary School English-Language Education in Asia - Bernard Spolsky 2013-03-05

In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts.

**Optimizing Elementary Education for English Language**

**Learners** - Guler, Nilufer 2018-01-30

Teaching English language learners has long presented challenges for teachers tasked with bringing these students to a level of language comprehension comparable to that of native speakers. These challenges and issues can lead to difficulty comprehending core academic topics for those learning the English language.

Optimizing Elementary Education for English Language Learners is a critical scholarly publication that explores the importance of English as a Second Language (ESL) education as well as the challenges that can arise in striving for effective and engaging learning environments for the students involved. Featuring a broad scope of topics, such as effective lesson plans, teacher education and preparation, and the education achievement gap, this book is geared toward academicians, practitioners, and researchers seeking current research on effective teaching strategies for teachers of English language learners.

**Internship** - Kira Wieler 2012-02

Internship Report from the year 2010 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 2,0, University of Wuppertal, course: Teaching English as a Foreign Language, language: English, abstract: At the beginning of the internship I decided to observe the discourse of classroom processes. Discourse concerns the use of language and is important

for teaching English as a foreign language: "discourse as real language use is the target of teaching" (Cameron 2001: 37). It occurs in the classroom, when teacher and learner interact. Therefore I chose discourse as my observation task. I observed that children use a mixture of the first language and the foreign language if necessary. It is difficult for the children to learn a completely new language and so they often only have a partial understanding of the foreign language. However, this does not stop them from interacting. They seek sense and work out a meaning (Cameron 2001: 38). If children "want to share understanding with other people through the foreign language, they will search their previous language-using experience for ways to act in the foreign language" (Cameron 2001: 39).

**Time Spent Teaching Core Academic Subjects in Elementary Schools** - Marianne Perie 1997

This report describes the number of hours and the percentage of school time spent on core academic subjects during the elementary school week around the country. It addresses three central issues about using class time to teach core academic subjects. The first issue is the actual number of hours and the percentage of school time the nation's elementary school teachers spend on instruction in the core subject areas of English/reading/language arts, mathematics, social studies, and science. The second issue involves an analysis of how this time varies by characteristics of the local community, school, teacher, classroom, and students. Finally, trends over time are examined to see how the amount and percentage of time spent on the four core subjects has changed from 1987-88 to 1993-94.
