### *How To Think Like A Manager for the CISSP*

*Exam* - Luke Ahmed 2020-08-03

"How do you think like a manager?" It is one of the most common questions asked when preparing for the CISSP exam. Using 25 CISSP practice questions with detailed explanations, this book will attempt to answer how to think like a member of a senior management team who has the goal of balancing risk, cost, and most of all, human life. The questions will take you through how to resist thinking from a technical perspective to one that is more holistic of the entire organization. Like all of Study Notes and Theory's CISSP practice questions, these questions correlate multiple high-level security concepts and require thinking like a manager. Extracting the most value comes from understanding not only which choice is correct, but more importantly, why the other choices are wrong.

Essential CISM - Phil Martin 2018-03-29

Essential CISM has been written with a single goal in mind - to present the CISM material in a way that is easy to absorb without leaving any content behind. Plenty of examples are included to drive the points home so that when it comes time to take the CISM exam, you are ready! This exam guide covers all four ISACA domains, including: \* Information Security Governance\* Information Risk Management\* Information Security Program Development and Management\* Information Security Incident Management The book is broken down into two

sections. Section 1 covers basic concepts you will need to understand before hitting each domain. The CISM official exam guide is overwhelmingly redundant across the domains, and so in this book you will encounter each topic once instead of having to rehash the same subject in different (and chaotic) ways. By the time you start covering the domains, you will already be 60% of the way there! Section 2 presents the four domains and ties together the concepts covered in Section 1, plus subjects that are unique to each domain. Some books provide test questions embedded in the material, but Essential CISM leaves that to the experts to keep the cost down. There are plenty of online resources and tests you can take to test your knowledge that are a much better use of your time.
