Kilivila - Gunter Senft 1986-01-01

The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality.

**Makro-Mathematik** - Bodo v. Pape 2016-10-25

Makro-Mathematik ist Mathematik mit einer Tabellenkalkulation unter konsequenter Nutzung der Möglichkeit, kleine Programme - 'Makros' - einzubinden. Vom Fachlichen her erweist sich ein algorithmisch-numerischer Ansatz für die Schule als sehr attraktiv: Der Bereich der Problemlösungen wird befreit von der Fessel der rein algebraischen Verfahren. Gleichzeitig ist der Aufwand an Theorie deutlich reduziert. Der Zugang zu Lösungen konkreter Aufgaben wird sehr viel direkter. Das kommt dem eigenständigen Finden von Lösungen ebenso zugute wie dem Nachvollzug fertiger Lösungen. Im Kern handelt es sich um ein Plädoyer

für eine Neuausrichtung des Mathematikunterrichts im Zeichen der Verfügbarkeit von Rechnern. Die Diskussion um den Einsatz von Computern im Mathematikunterricht wird umfassend aufgearbeitet unter dem Aspekt der Tabellenkalkulation. Die vorgestellten Makros kann man mit den Schülern gemeinsam entwickeln. Besonderes Interesse und Gewicht kommt fünf Prozedurmakros zum Optimieren zu (Minimieren und Maximieren in 1 bis 5 Variablen). Diese Makros werden interessant sein für jedermann, der mit Excel arbeitet oder der Überzeugung ist, dass man mit Excel arbeiten sollte - in der Schule oder darüber hinaus, derzeit oder in Zukunft.

### **Fairy Tales and Fables from Weimar Days** - Jack Zipes 2018-02-15

This book is a collection of traditional German fairy tales and fables, deliberately transformed into utopian narratives and social commentary by political activists in the Weimar Republic (1919-1933). Against a backdrop of financial and political instability, widespread homelessness, and the reformation of public institutions, numerous gifted writers such as Berta Lask, Kurt Schwitters, Hermynia zur Mühlen, Oskar Maria Graf, Bruno Schönlink, and Joachim Ringelnatz responded to the need for hope among the common people by creating fairy tales and fables that offered a new and critical vision of social conditions. Though many of their tales

deal with the grim situation of common people and their apparent helplessness, they are founded on the principle of hope. This revised edition includes over 50 illustrations by contemporary international artists who reveal how similar the Weimar conditions were to the conditions in which we presently live. In this respect, the Weimar fairy tales and fables have not lost their spirit and significance.

"A strong-minded, sharp-witted heroine who will appeal to fans of Charlaine Harris' Sookie Stackhouse series and Laurell K. Hamilton's Anita Blake." (Library Journal) Clouds are brewing over Cadogan House, and

Merit the vampire can't tell if this is the darkness before the dawn, or the calm before the storm. With the city itself in turmoil over paranormals and the state threatening to pass a paranormal registration act, times have never been more precarious for the vampires. If only they could lay low for a bit... Then magic rears its ugly head when Lake Michigan turns black. The mayor insists it's nothing to worry about, but Merit knows a panic is coming. She'll have to turn to friends old and new to find out who's behind this, and stop them before it's too late for both the vampires and humans.

**The Materiality of Magic** - Dietrich Boschung 2015

In the last two decades we have had many books and proceedings of conferences on the history, formulas and incantations of magic in antiquity, both in East and West, but this is the first book of its kind that focuses on the material aspects of magic, such as gems, rings, drawings, grimoires, amulets and figurines. In recent years scholars have focused not only on the discourse and practices of magic in antiquity, but also on its practitioners, literary stereotypes and historical shifts. Much less attention, however, has been paid to the material that was used by the magicians for their curses and incantations. Yet there is no magic without materiality. The practice of magic required a specialist expertise that knew how to handle material such as lead, gold, stones, papyrus, figurines or voodoo dolls. That is why we present new insights on the materiality of magic by studying both the materials used for magic as well as the books in which the expertise was preserved.--Publisher.

**A Manual of Mending and Repairing** - Charles Godfrey Leland 1896

**Challenging Islamic Orthodoxy** - Al Makin 2016-09-22

This book is the first work that comprehensively presents the accounts of Lia Eden, a former flower arranger who claims to have received divine messages from the Archangel Gabriel and founded the divine Eden Kingdom in her house in Jakarta. This book places Lia Eden's prophetic trajectory in the context of diverse Indonesian spiritual and religious traditions, by which hundreds of others also claimed to have been commanded by God to lead people and to establish religious groups. This book offers a fresh approach towards the rich Indonesian religious and spiritual traditions with particular attention to the accounts of the emergence of indigenous prophets who founded some popular religions. It presents the history of prophetic tradition which remains alive in Indonesian society from the colonial to reform period. It also explores the ways in which these prophets rebelled against two hegemonies: colonial power in the past and Islamic orthodoxy in the present. The discussion of

this book focuses on Lia Eden including her biography, claims to prophethood and divinity, the development of her group Eden Kingdom, her challenge to Islamic orthodoxy under the banner of the MUI (Indonesian Ulama Council), her persecution by radical groups, her experiences in court trials and imprisonment, and public responses to her emergence. The discussion also covers other themes currently drawing

public attention in Indonesia, such as pluralism, religious freedom, tolerance, discrimination against minorities, and secularisation.
