Growing Up Gay in Urban India

- Ketki Ranade 2018-05-09

This book explores the growing up experiences of gay and lesbian individuals within their homes, schools, neighbourhoods, among friends; and their journeys of finding themselves and their communities while living in a heterosexually constructed

society. It is based on an exploratory, qualitative study with young gay and lesbian persons in two cities of Maharashtra, India and employs a life course perspective. The author has written this book from two primary loci: those of a mental health professional and activist, and a queer feminist

activist. Through layered narratives and psychosocial analyses of experiences that are simultaneously attentive to subjectivities and to social and interpersonal processes, the author provides insights into the lives of children who grow up feeling 'different' from their siblings, peers and friends, and receive constant messages about correct ways of being and expression from their parents, teachers, friends and counsellors/doctors; the unique challenges to growing up as gay or lesbian, alongside complex processes involved in the decision of 'coming out'; and the experience of meeting others like oneself, forming intimate, romantic relationships, bonds of friendship, political solidarity, families of choice and so on. In this book, the author employs a critical stance towards mainstream life span development studies, developmental psychology, child

development and childhood studies that make universal assumptions of heteronormativity and gender binarism. This book is of interest to a wide readership, from psychologists, mental health and human rights scholars, to scholars of youth and childhood studies, gender studies, cultural studies, social work, sociology and anthropology.

Becoming Adult - Mihaly Csikszentmihalyi 2008-08-01
How do young people envision their occupational futures? What do teenagers feel about their schooling and after-school work, and how do these experiences affect their passage to adult work? These are the questions that psychologist Mihaly Csikszentmihalyi and sociologist Barbara Schneider posed in their five-year study of adolescents. The results provide an unprecedented window on

society's future through which we can glimpse how today's youth are preparing themselves for the lives they will lead in the decades to come.

Sport, Play, and Ethical

Reflection - Randolph Feezell
2010-10-01

In paperback for the first time, Randolph Feezell's *Sport, Play, and Ethical Reflection* immediately tackles two big questions about sport: "What is it?" and "Why does it attract so many people?" Feezell argues that sports participation is best described as a form of human play, and the attraction for participants and viewers alike derives from both its aesthetic richness and narrative structure. He then claims that the way in which sports encourage serious competition in trivial pursuits is fundamentally absurd, and therefore participation requires a state of irony in the participants, where seriousness and playfulness are combined. Feezell

builds on these conclusions, addressing important ethical issues, arguing that sportsmanship should be seen as a kind of Aristotelian mean between the extremes of over- and under-investment in sport. Chapters on cheating, running up the score, and character building stress sport as a rule-governed, tradition-bound practice with standards of excellence and goods internal to the practice. With clear writing and numerous illuminating examples, Feezell demonstrates deep insight into both of his subjects.

It draws on traditional games and also introduces a wealth of new ones including: * Chasing and catching games * Skipping games and rhymes * Singing and dancing games * Parachute games * Quiet games * Circle games * Cooperative games * Games from around the world.

76 Little Games - Ratna Rao

2021-01-21

76 Little Games is a delightful book that lists and explains games that families can gather around a table and play. Blended Families, single parents, foster homes, Multicultural families - this book will help create the warmth of family bonding. This book is an

easy path to a happy home of understanding and acceptance.

The games are presented as distinct seven chapters. The chapters are based on skill or logistics. Each chapter has games suitable for all age groups. The objective of this book is to make available at one place many ideas for interactive play with young children. This is a book for primary school and middle school children and early teens.

ENGAGE: Educate, Navigate, Grow And Get Empowered.

These games need almost no preparation and certainly no purchases. The games and activities described here will encourage you to think and be creative ✓ challenge you out of your comfort zone ✓ leave you relaxed and laughing. ✓ help you find hidden talent and dreams ✓ ♥ I am bored! What shall we play now? This is a frequent refrain in most homes. Parents and grandparents are constantly looking for ways to engage the

children without resorting to the digital resources of tablets and TV. ♥ Teachers and persons whose work involves being with children in the primary school and middle school years are also in need of activities that they can use for innovative methods of classroom engagement. With increasing attention being paid empowering children with 21st Century Skills and increasing importance now arises in the 4Cs of education. Creativity, Critical thinking, Communication and Collaboration are essential soft skills needed in the 21st Century. The games and activities listed and described here provide and easy means to develop these skills even while the family is having enormous fun and family time. Explore here novel ideas and very new activities. Often in the rush of daily life we find little time available for playing games. These games can be played in limited space like a living-room or a car. There is a child hidden

in each of us. It is quite refreshing to allow that child to come out and play. These games promise to bring out the child in you. The Chapters namely Fun with Paints, Navigate with Imagination, Great with feelings, Go places and Express with a Drawing give you an opportunity to THINK OUT OF THE BOX and try activities you have not tried before. This is a booke for the bored and brilliant! I bring this book with a lot of love and care for stronger happier families. Communicate with your children and get them to express dreams, hopes and fears. Come let us equip our children with the ability to think for themselves and express their thoughts fearlessly. Aimed at imparting the 4Cs of 21st century education this book promises to be Just Great Fun.

My Child "The Quick Fix?" - C S
Harrison 2013-08-07

Children are sponges. They soak
up all that the world has to offer-
-both good and bad. In a world
flooded with insta-fun, insta-

wrong, and lightning speed
access; author C.S. Harrison has
taken an unbiased approach to
sort through practical methods for
parents and educators for tools
leading to successful child
development. Throughout the
text, Harrison places a mirror in
the face of the reader. This
mirror challenges them to look at
the realities of life, change their
perspective, and support their
children in becoming responsible
and respectable adults, while
maintaining their individuality.
My Child replaces "expert" with
"active learner" because the more
we learn, the more we grow.
The focus is not to be the
"perfect" parent or educator, but
to create awareness, on how to
become a better example--one
day at a time.

The Couple and Family Therapist's Notebook - Katherine

M. Hertlein 2014-01-02

Get a “sneak peek” at clinical vignettes that demonstrate the power of creative interventions! Couples and families present unique challenges in therapy, and other books rarely illustrate the effectiveness of particular types of interventions on actual cases. *The Couple and Family Therapist's Notebook* provides clinicians with a wide range of practical field-tested therapy activities and homework that are solidly grounded to each intervention's theoretical underpinning, then explores their effectiveness by briefly relating real-life cases.

Continuing *The Haworth Press Therapist's Notebook* series, respected experts detail how to perform several creative interventions and then follow with insightful clinical vignettes to illustrate under what specific circumstances each particular approach is effective. Each chapter of *The Couple and*

Family Therapist's Notebook: Homework, Handouts, and Activities for Use in Marital and Family Therapy has an objective statement to orient the reader to the homework, handout, or activity, followed by a rationale. Instructions explain how to perform the activity, followed by clinical case vignette, a section of contraindications, and a list of useful resources for both the practitioner and the client. Illustrations and appendixes also provide helpful guides for the therapist. The Couple and Family Therapist's Notebook: Homework, Handouts, and Activities for Use in Marital and Family Therapy gives you the tools for approaches such as: emotionally focused therapy symbolic-experiential therapy transgenerational theory solution-focused therapy experiential therapy and many others And some of the intervention techniques that are illustrated: the Metaphor of Gardens the

Observing Young Children -

Tina Bruce 2014-11-13

This is a book about the process of finding user-friendly and purposeful ways of observing and planning that will help those who are working with young children in a variety of settings to look with insight at children, providing what they need in order to develop and learn optimally. By examining the historic background of observing and planning, and describing examples of good practice in different group settings, this book will help to monitor a child's progress - what is needed now and to work out what is needed next. The real life case studies from various settings including day care, nursery school, primary school, private sector and Soweto examine different observation techniques, looking at their strengths, drawbacks and use in everyday practice. Examples from the UK and internationally illustrate the history and importance of observation in a

range of contexts, while a glossary clearly explains the key terminology. All the examples given in this book can be used with different National Framework documents worldwide, bearing in mind however the authors' belief that curriculum frameworks must be used as a resource and never as a limiting straitjacket. Drawing on key theory and research, the book's chapters cover: Flexible planning Record keeping Working with parents Using technology. Full colour photographs, illustrations and useful charts and diagrams make this an accessible and engaging resource that will no doubt be invaluable to any early years practitioner. This book was originally published as Getting to Know You - part of the 0-8 series.

Growing Up in the Ice Age -

April Nowell 2021-06-30

It is estimated that in prehistoric societies children comprised at least forty to sixty-five percent of the population, yet by default, our ancestral landscapes are peopled by adults who hunt, gather, fish, knap tools and make art. But these adults were also parents, grandparents, aunts and uncles (however they would have codified these kin relationships) who had to make space physically, emotionally, intellectually, and cognitively for the infants, children and adolescents around them. The economic, social, and political roles of Paleolithic children are

often understudied because they are assumed to be unknowable or negligible. Drawing on the most recent data from the cognitive sciences and from the ethnographic, fossil, archaeological, and primate records, *Growing Up in the Ice Age* challenges these assumptions. This volume is a timely and evidence-based look at the lived lives of Paleolithic children and the communities of which they were a part. By rendering the “invisible” children visible, readers will gain a new understanding not only of the contributions that children have made to the biological and cultural entities we are today but also of the Paleolithic period as whole.

Young Children Playing and Learning in a Digital Age -

Christine Stephen 2017-11-27

Young Children Playing and Learning in a Digital Age explores the emergence of the digital age and young children's experiences with digital technologies at home and in educational environments.

Drawing on theory and research-based evidence, this book makes an important contribution to understanding the contemporary experiences of young children in the digital age. It argues that a cultural and critically informed perspective allows educators, policy-makers and parents to make sense of children's digital experiences as they play and learn, enabling informed decision-making about future early years curriculum and practices at home and in early learning and care settings. An essential read for researchers, students, policy-makers and professionals working with children today, this book draws attention to the evolution of digital developments and the

relationship between contemporary technologies, play and learning in the early years.

[The Book of Gardening Projects for Kids](#) - Whitney Cohen
2012-07-12

“What better way to begin to explore the natural world than to experience the magic and beauty of a family garden.” —Arden Bucklin-Sporer, author of *How to Grow a School Garden* Many gardeners find that once they have children gardening goes the way of late-night dinner parties and Sunday morning sleep-ins. Raising kids and maintaining a garden can be a juggling act, leaving the family garden forgotten and neglected. But kids can make great gardening companions, and the benefits of including them are impossible to ignore. Gardening gets kids outdoors and away from television and video games, increases their connection to plants and animals, and helps build enthusiasm for fresh fruits

and vegetables. Their involvement becomes the real harvest of a family garden. In *The Book of Gardening Projects for Kids*, Whitney Cohen and John Fisher draw on years of experience in the Life Lab Garden Classroom and gardening with their own children to teach parents how to integrate the garden into their family life, no matter its scope or scale. The book features simple, practical gardening advice, including how to design a play-friendly garden, ideas for fun-filled theme gardens, and how to cook and preserve the garden's bounty. 101 engaging, family-friendly garden activities are also featured, from making Crunch-n-Munch Vegetable Beds and Muddy Miniature Masterpieces to harvesting berries for Fresh Fruity Pops.

Transforming the Workforce for Children Birth Through Age 8 - National Research Council
2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning.

Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to

the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations

create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the

care and the education that children receive, and ultimately improve outcomes for children.
