With the recent scrapping of GCSEs fresh in everyone's minds, The O Level Book is the perfect book to settle that age-old argument between the generations: were the exams of yesteryear really harder than anything children have to face today in the age of calculators and spell checkers? Are contemporary kids less intelligent than previous generations? Here is the chance to find out as the whole family pit their wits against one another in the ultimate generation game, contrasting the schooling of yesteryear with modern educational practices. Testing you on a range of old-school topics: English Language; General Science; Geography and History; Household Cookery; Mathematics. A wonderfully nostalgic yet testing anthology, The O Level Book encourages you to dust off your slide rules and get your thinking caps on to see who will come out on top in your family!

Examinations in Singapore - Yap Kwang Tan 2008

The first book to explore the development of Singapore's much-talked-about

education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore.

Innovative Strategies for Accelerated Human Resources Development in South Asia - Asian Development Bank 2017-12-01

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries---Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.
