Montessori Madness - Trevor Eissler 2009

improve our traditional

school system, both public

Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"-- Back cover.

Electron Paramagnetic Resonance Spectroscopy - Patrick Bertrand 2020-02-03
Although originally invented and employed by physicists, electron paramagnetic resonance (EPR)

spectroscopy has proven to be a very efficient technique for studying a wide range of phenomena in many fields, such as chemistry, biochemistry, geology, archaeology, medicine, biotechnology, and

environmental sciences. Acknowledging that not all studies require the same level of understanding of this technique, this book thus provides a practical treatise clearly oriented toward applications, which should be useful to students and researchers of various levels and disciplines. In this book, the principles of continuous wave EPR spectroscopy are progressively, but rigorously, introduced, with emphasis on interpretation of the collected spectra. Each chapter is followed by a section highlighting important points for applications, together with exercises solved at the end of the book. A glossary defines the main terms used in the book, and particular topics, whose knowledge is not required for understanding the main text, are developed in appendices for more inquisitive readers. Hamiltonian Systems and Their Integrability - Mich'le Audin 2008

"This book presents some modern techniques in the theory of integrable systems

viewed as variations on the theme of action-angle coordinates. These techniques include analytical methods coming from the Galois theory of differential equations, as well as more classical algebro-geometric methods related to Lax equations. This book would be suitable for a graduate course in Hamiltonian systems."--

Modeling the Ecorche Human Figure in Clay -
Netra Bahadur Khattri
2021-06-19

This book is meant for those people or artists, Sculptors,

Painters, or Students studying human anatomy or Fine Art. As a Sculptor, Netra Khattri has made this book with the language of Art (Sculpture), how muscles attach to the human skeleton, and from where the muscle originates and inserts with muscle function. Initially, Netra Khattri thought of human muscles as sculptures, beginning to end with skeletons, partial muscled figures, and the origin and function of muscular structures. For example, the reader can look at the skeleton to see how the bones and muscles are constructed in this process of evolution and metamorphosis. Nevertheless, there are more interesting facts in human anatomy than here. The difference between this book shows the Ecorche sculpting process is finished anatomical references rather than, other anatomy book shows drawings of muscles attach with bone and structures of human

anatomy.

Twelve Years a Slave -

An Introduction to Child Language Development -

Susan H.Foster- Cohen

2014-06-17

This volume introduces the field of child language development studies, and presents hypotheses in an accessible, largely non-technical language, aiming to demonstrate the relationship between these hypotheses and interpretations of data. It

makes the assumption that having a theory of language development is as important as having reliable data about what children say and understand, and it advocates a combination of both 'rationalist' and more 'empiricist' traditions. In fact, the author overtly argues that different traditions provide different pieces of the picture, and that taking any single approach is unlikely to lead to productive understanding. Susan Foster-Cohen explores a range of issues, including the nature of prelinguistic communication and its possible relationship to linguistic development; early stages of language development and how they can be viewed in the light of later developments; the nature and role of children's experience with the language(s) around them; variations in language development due to both pathological and non-pathological differences

between children, and (in the latter case) between the languages they learn; later oral language development; and literacy. The approach is distinctly psycholinguistic and linguistic rather than sociolinguistic, although there is significant treatment of issues which intersect with more sociolinguistic concerns (e.g. literacy, language play, and bilingualism). There are exercises and discussion questions throughout, designed to reinforce the ideas being presented, as well as to offer the student the opportunity to think beyond the text to ideas at the cutting edge of research. The accessible presentation of key issues will appeal to the intended undergraduate readership, and will be of interest to those taking courses in language development, linguistics, developmental psychology, educational linguistics, and speech pathology. The book will also serve as a useful

introduction to students wishing to pursue post-graduate courses which deal with child language development.

Post-Mortem Journal Communications from Lawrence of Arabia Through the Mediumship of Jane Sherwood - Jane

Sherwood 2009-07
There is probably no stranger nor more controversial book than Jane Sherwood's report, through automatic writing, of the identity of a communicator from the other side of the grave who chose to call himself 'Scott'. After many years of enforced silence, as a result of a solemn promise given to Scott, Jane Sherwood reveals his true identity, namely, Colonel T. E. Lawrence (Lawrence of

Arabia). Post-Mortem Journal opens at the moment of Lawrence's death when he finds himself lying at the roadside by his shattered motorbike, unaware that he is actually 'dead'. It continues over the years and shows us the development and salvation of a tortured and guilty man who, for the first time, is forced into admitting his weaknesses and vanities during his earthly life and is only now able to come to terms with himself. Such revelations are both harrowing and magnificent. 'As to the validity', says Jane Sherwood, 'of the information contained in "Scott's" journal I can only vouch for my own honesty; what I have received is here set down without addition or modification. The readers must judge of its probability for themselves.'

Tacky - Rax King

2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper

perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. A VINTAGE ORIGINAL [The Germanic Tribes, the Gods and the German Far Right Today](#) - Georg Schuppener 2021-12-30 [The Germanic Tribes, the Gods and the German Far Right Today](#) deals with the

question of how right-wing extremists in German-speaking countries adapt and adopt elements from the history, culture, and mythology of the Germanic tribes. It provides the first in-depth study of the adoption of these historical motifs by right-wing extremists. Using linguistic and historical perspectives, and drawing on both publicly accessible material and sources gathered by the intelligence services, the book delineates the influence and impact of Germanic tribal history and culture within extremist subcultures. The author demonstrates that references to the Germanic peoples, their history, culture, and mythology, are even more widespread among contemporary right-wing extremists than they were in the interwar National Socialist era. This book will be of interest to researchers of right-wing extremism, German politics, and social movements.

Computational Approaches to the Lexicon - B.T.S. Atkins 1994

The new science of computational lexicology and lexicography has arisen through contact and collaboration between representatives of three hitherto distinct disciplines: lexicography, linguistics, and computer science. The Pisa International Summer Schools on Computational Lexicology and Lexicography have played a crucial role, providing a regular forum for interdisciplinary contact. In this volume, which had its

origins in the fifth summer school, distinguished scholars provide a broad perspective on the field. In their overview paper Sue Atkins, Beth Levin, and Antonio Zampolli trace the development of computational lexicography and its links to theoretical linguistics. The sections which follow discuss the collection and pre-processing of textual data, the theoretical infrastructure of lexical analysis, and current tools and methodologies.

[The Life and Death of Sophie Stark](#) - Anna North

2015-05-19

Winner of the 2016 Lambda Literary Award for Bisexual Fiction "I read *The Life and Death of Sophie Stark* with my heart in my mouth. Not only a dissection of genius and the havoc it can wreak, but also a thunderously good story."—Emma Donoghue, *New York Times*

bestselling author of *Room* "This novel is perceptive, subtle, funny and lingers in unexpected ways. The analysis of a woman who puts her art above all else is equal parts inspiration and warning story. Anna North makes prose look easy."—Lena Dunham
Gripping and provocative, *The Life and Death of Sophie Stark* is a haunting story of fame, love, and legacy told through the propulsive rise of an iconoclastic artist. Sophie Stark begins her filmmaking career by creating a documentary about her obsession, Daniel, a college basketball star. But when she becomes too invasive, she finds herself the victim of a cruel retribution. The humiliation doesn't stop her. Visionary and unapologetic, Sophie begins to use stories from the lives of those around her to create movies, and as she gains critical recognition and acclaim, she risks betraying the one she loves most. Told in a chorus of voices

belonging to those who knew Sophie best, *The Life and Death of Sophie Stark* is an intimate portrait of an elusive woman whose monumental talent and relentless pursuit of truth reveal the cost of producing great art. It is "not only a dissection of genius and the havoc it can wreak, but also a thunderously good story" (Emma Donoghue).

Anna Zaires,

Bestsellerautorin der New York Times Vor sechs Jahren hat Harold Dalton mich mit einem fingierten Diebstahl reingelegt und mich ins Gefängnis gebracht, um

meinen Diamantfund zu stehlen. Im Austausch für die Grabungsrechte gab er seine Tochter Jack Clarke. Heute bin ich ein freier Mann, und will meine Rache. Sechs Jahre voller Grausamkeiten machen aus Menschen Bestien. Ich werde mir das zurückholen, was er mir gestohlen hat, und noch mehr. Ich bin nicht an seinen Immobilien oder Aktien interessiert. Ich will sein Kleingeld nicht. Ich will seinen größten Schatz, die schöne, mental instabile Angelina Dalton-Clarke. Mit ihren Milliarden ist sie die reichste Witwe des Landes, und auch die verrückteste. Ihre selbstverletzenden Tendenzen hatten Jack dazu veranlasst, sie für unzurechnungsfähig erklären zu lassen, bevor er sich eine Waffe an den Kopf hielt und sich das Gehirn rausblies. Mind Over Matter - François Gay 2021-07-29

Mind Over Matter tells the story of François Gay, one of Europe's best-known natural bodybuilding pioneers, who went all out 24/7 for 14 years to pursue his goal of becoming the world's best amateur bodybuilder and win the prestigious Mr. Universe title. drugs, he knew that there was only one way to fulfill his vision: 100% dedication. Dive into François's inspiring life story, from his peaceful childhood on the shores of Lake Geneva in Switzerland through his turbulent youth, then on to the discovery of his passion in California, culminating in his victory at the Natural Mr. Universe in the USA. François will guide you through the subculture of bodybuilding, where he spent more than decade on a journey of total discipline. severe health issue he has recently been confronted with. Mind Over Matter will motivate and encourage you to get up off the couch and to start doing instead of just wishing. It will serve as a wake-up call, reminding you that now is the time to start living, instead of just existing, and that you too can achieve anything you set your mind to if you want it badly enough.
