Halo: Oblivion - Troy Denning
2019-09-24

A Master Chief story and original full-length novel set in the Halo universe—based on the New York Times bestselling video game series! 2526. It has been more than a year since humanity first encountered the hostile military alliance of alien races known as the Covenant, and several weeks after the United Nations Space Command's devastating counterattack of Operation: SILENT STORM was deemed an overwhelming success. The UNSC has put its faith in the hands of the Spartans, led by the legendary Master Chief, John-117: enhanced super-soldiers raised and trained from childhood via a clandestine black ops project to be living weapons. But the Covenant—enraged and fearful of their enemy's unexpected strategies and prowess—is not taking its recent defeat lightly, and is now fully determined to eradicate humanity from

existence, brutally overrunning the ill-fated planets of the Outer Colonies faster than retreats can be ordered. If the UNSC has any chance of stemming the tide of the war, the Master Chief and Blue Team must drop onto an empty, hellish world in order to capture a disabled Covenant frigate filled with valuable technology. It has all the makings of a trap, but the bait is far too tempting to ignore—and this tantalizing prize is being offered by a disgraced and vengeful Covenant fleetmaster, whose sole opportunity for redemption lies in extinguishing humanity's only hope of survival...

The Story of Gaia - Jude Currivan 2022-11-01

- Examines our emergence as self-aware members of a Universe that is itself a unified and innately sentient entity that exists TO evolve
- Shares leading-edge scientific breakthroughs and shows how they support traditional visions of Earth as a living being--Gaia
- Rewrites evolution as not driven by random occurrences and mutations but by intelligently informed and meaningful information flows and processes

Exploring our emergence as self-aware members of a planetary home and entire Universe that is a unified and innately sentient entity, Jude Currivan, Ph.D., shows that mind and consciousness are not what we possess but what we and the whole world fundamentally are. She reveals our Universe as "a great thought of cosmic mind," manifesting as a cosmic hologram of meaningful information that, vitally, exists to evolve. Sharing scientific breakthroughs, the author

details the 13.8 billion-year story of our Universe and Gaia, where everything in existence has inherent meaning and evolutionary purpose. Showing how the Universe was born, not in an implicitly chaotic big bang, but as the first moment of a fine-tuned and ongoing "big breath," she shares the latest evidence for the innate sentience that has guided our universal journey from simplicity to ever-greater complexity, diversity, and self-awareness--from protons to planets, plants, and people. She explains how evolution is not driven by random occurrences and mutations but by profoundly resonant and harmonic interplays of forces and influences, each intelligently informed and guided. In Gaia, the Universe's evolutionary impulse is embodied in collaborative relationships and dynamic co-evolutionary partnerships on a planetary scale and as a wholistic giasphere. She reveals how the conscious evolution of humanity is an integral part of Gaia's own

evolutionary progress and purpose. By perceiving and experiencing our planet as a sentient being and ourselves as Gaians, we open ourselves to a deeply ecological, evolutionary, and, above all, hopeful worldview.

The End of Everything - Katie Mack 2020-08-04

A NEW YORK TIMES NOTABLE BOOK OF 2020 NAMED A BEST BOOK OF THE YEAR BY * THE WASHINGTON POST * THE ECONOMIST * NEW SCIENTIST * PUBLISHERS WEEKLY * THE GUARDIAN From one of the most dynamic rising stars in astrophysics, an “engrossing, elegant” (The New York Times) look at five ways the universe could end, and the mind-blowing lessons each scenario reveals about the most important concepts in cosmology. We know the universe had a beginning. With the Big Bang, it expanded from

a state of unimaginable density to an all-encompassing cosmic fireball to a simmering fluid of matter and energy, laying down the seeds for everything from black holes to one rocky planet orbiting a star near the edge of a spiral galaxy that happened to develop life as we know it. But what happens to the universe at the end of the story? And what does it mean for us now? Dr. Katie Mack has been contemplating these questions since she was a young student, when her astronomy professor informed her the universe could end at any moment, in an instant. This revelation set her on the path toward theoretical astrophysics. Now, with lively wit and humor, she takes us on a mind-bending tour through five of the cosmos's possible finales: the Big Crunch, Heat Death, the Big Rip, Vacuum Decay (the one that could happen at any moment!), and the Bounce. Guiding us through cutting-edge science and major concepts in quantum mechanics, cosmology, string theory, and much more, The

End of Everything is a wildly fun, surprisingly upbeat ride to the farthest reaches of all that we know.
