The Encyclopedia of Elder Care - Elizabeth A. Capezuti, PhD, RN, FAAN 2013-12-11

"The information [in this book] is amazing. I reviewed topics in which I have expertise and was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary. Score: 90, 4 Stars.--Doody's Medical Reviews "The third edition of this encyclopedia provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. ... In addition, many of the entries include see also references that help readers easily navigate the book. Entries are written at an undergraduate level and would be useful for practitioners, students, and caregivers...Recommended."--Choice: Current Reviews for Academic Libraries This interdisciplinary clinical reference encompasses more than 310 current entries on a broad range of topics related to geriatrics and geriatric care across multiple health care disciplines. The third edition reflects the many advances in geriatrics that have occurred since the publication of the second edition in 2006. It contains the updated, evidence-based contributions of more than 260 nationally recognized geriatric healthcare professionals regarding elder-care concerns relating to society, community, caregiving, and the individual. Completely new entries address Geriatric Care Models (acute care for elders, Project BOOST), Geriatric Health Issues (diarrhea in adults, prolonged hospitalization, frailty, fronto-temporal dementia, re-hospitalization, acute urinary retention, personality and aging, primary palliative care), Technology and Aging (Smart home sensors, Telehealth, Surveillance technology), and more. The Encyclopedia is organized alphabetically and includes links to important Web-based resources and Apps. Clinical topics comprehensively address diagnosis, treatment, and disease management. Health care clinicians across the continuum will find this reference—the only one of its kind—to be a valuable guide to making appropriate referrals to social service providers, and social service professionals will be well informed by highly accessible descriptions of diagnoses, clinical syndromes, and care management. Key Features: Includes over 310 updated geriatric and geriatric care clinical entries across multiple healthcare disciplines Contains state-of-the-art contributions from over 260 nationally recognized geriatric healthcare experts

Provides clinical content for social service professionals and social care information for clinicians Offers new information on multiple topics relating to Geriatric Care Models, Geriatric Health Concerns, and Technology and Aging References numerous Web-based resources and Apps

[Handbook of Geriatric Care Management](#) - Cress 2015-11-02

Handbook of Geriatric Care Management, Fourth Edition is a comprehensive and practical guide for care managers that addresses the multiple needs of aging adults and their families. An ideal teaching tool, it guides students and professionals along the journey of becoming a successful care manager. New to this edition are two new chapters on working with older veterans and helping clients with depression. Completely updated and revised, the Fourth Edition provides updated ethics and standards, a focus on credentialing and certification, numerous case studies, sample forms and letters, and tips for building and growing a care manager business.

Oxford Handbook of Geriatric Medicine - Lesley Bowker 2012-08-09

The Oxford Handbook of Geriatric Medicine provides user-friendly advice in a field that has limited evidence, yet makes up a substantial proportion of the work of most clinicians.

Health Politics and Policy - James A. Morone 2014-01-14

HEALTH POLITICS AND POLICY, 5th Edition walks you through the inner workings of health care policymaking, from the legislative process to socioeconomic impacts, and reveals both modern and historical perspectives in exciting detail. A collection of writings by some of today's sharpest political minds and policy-makers, the book explores factors that shape the U.S. health care system and policy, such as values, government, and private players, and compares them to other countries for international context. Helpful learning features throughout include review questions and problems, supporting tables and graphs, and special Consider This essays that bolster chapter concepts. In an environment of ever-changing policies and politics, the new edition seamlessly integrates themes of the past and present-day dilemmas with a look to the

future of health care politics in America. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Geriatric Emergency Medicine - Joseph H. Kahn 2014-01-16

As the global geriatric population continues to grow, an increasing proportion of people reporting to emergency departments are elderly. The work-up of these patients uses more time and resources than that of younger patients, and is complicated by the fact that acute disease often presents more subtly, without the outward manifestations typically seen in younger patients. This volume focuses on the unique pathophysiology of the elderly, presenting guidelines for resuscitation, evaluation and management. The first section discusses general principles including demographics, pharmacology and pain management. The following sections cover high-risk chief presenting complaints and review geriatric emergencies. Finally, topics of particular relevance in the geriatric population are discussed, including functional assessment, end-of-life care, financial considerations and abuse. This book provides a comprehensive, practical framework for community and academic emergency medicine practitioners, as well as emergency department administrators striving to improve delivery of care to this vulnerable, growing population.

Advanced Age Geriatric Care - Nages Nagaratnam 2018-11-26

As the Baby Boomers age, concerns over healthcare systems' abilities to accommodate geriatric patients grow increasingly challenging. This is especially true with the population deemed to be "the oldest of the old," specifically those over the age of 85. Unlike any other time in history, this demographic is the fastest growing segment of most developed countries. In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030. The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions, diet, public health and advancement in medical care. With this we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke and even dementia. Older persons are healthier today than their counterparts decades ago. More importantly than in any other age group, the care of the oldest old must be individualized; management decisions should be made taking into consideration the older persons' expressed wishes, quality of life, function and mental capacity. The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases, multiple co-existing pathologies and neuro-degenerative diseases. The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old. Furthermore, among the oldest old, physiologically they are more diverse than other segments of the population. Their demographic characteristics are unparalleled and different compared to that of the younger old. Several studies have drawn attention to the differing attitudes among health

professionals towards elderly people and many show prejudice because they are old. As a result, the use of age as a criteria in determining the appropriateness of treatment is of very limited validity, yet there are limited resources that guide physicians through these challenges. This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic. This book is designed for geriatricians, primary care physicians, junior medical officers, specialty geriatrics nurses, and gerontologists. It is divided into 3 sections: General Considerations, Chronic diseases and Geriatric Syndromes. Each chapter provides a summary of important and essential information under the heading of Key Points. Case studies are included in some of the chapters to highlight the principles of management.

The Parkland Trauma Handbook E-Book - Alexander L. Eastman 2008-12-29

Whether you are a physician or surgeon with only occasional trauma duties, a resident rotating in trauma, or part of a full-time trauma team, this handbook will help keep your procedures and practices in line with the latest evidence-based guidelines. Included is current information for alternative airway management, ultrasound in the trauma setting, laparoscopic surgery in trauma, terrorism preparedness, damage control, the trauma systems quality improvement process, bedside procedures in the surgical intensive care unit, massive transfusion protocol, diagnosis of blunt cervical vascular injury, and much more. Presents an evidence- and experience-based guide to the evaluation and initial management of the trauma patient. Provides a comprehensive but concise trauma reference you can carry in your pocket. Consists of information direct from the residents on the frontlines at Parkland Memorial Hospital. Provides "Fast Facts and "Pearls and Pitfalls in each chapter that emphasize key points to help you find information quickly and easily. Incorporates "Evidence boxes highlighting evidence-based guidelines, when available, to help you make more rational judgments about the issues at hand. Contains up-to-date coverage of timely issues in trauma and critical care including damage control, ultrasound, bedside procedures in the ICU, and terrorism preparedness. Reflects the numerous advances made in trauma care since the last edition.

Community Resources for Older Adults - Robbyn R. Wacker 2013-03-14

Community Resources for Older Adults: Programs and Services in an Era of Change, Fourth Edition, by Robbyn Wacker and Karen Roberto, provides an in-depth review of policy and programs for the "aging network," answering such key questions as "How have programs for older adults evolved?" "Who uses these resources?" "How are they delivered?" and "What challenges do service providers face in meeting the needs of the aging baby-boom generation?" To give students the foundational knowledge they need to meet the needs of their older clients, the authors provide a theoretical framework for understanding the forces that shape older adults' likelihood to seek assistance, include in-depth reviews of the current body of empirical

literature in each program area, and discuss the challenges programs and services will face in the future.

Handbook of Mental Health and Aging - James E. Birren 2013-10-22

This book is a thorough revision of one of the most comprehensive reference volumes for persons working in the area of aging and mental health. The thrust of the work is interdisciplinary, and discusses research on both clinical and practical issues in aging and mental health. The multidisciplinary nature of this book and the inclusion of subject matter from the professional as well as research realm result in a level of comprehensiveness which is distinct in the field of mental health and aging. Each chapter contains a comprehensive bibliography, the compilation of which represents a definitive reference source in the field. The chapters review state-of-the-art research in the biological, behavioral, and social sciences and represent the cutting-edge of current practice in psychiatry, neurology, social work, nursing, psychology, and pharmacology, among other professions. The compilation of prevalence data is a much-needed addition to the current literature. The multidisciplinary nature of this book and the inclusion of both clinical and practical issues makes the book distinctively comprehensive.

Practical Guide to the Care of the Geriatric Patient - Tom J. Wachtel 2007

If you need a practical, portable resource to get you through the day-to-day management of older patients, *Practical Guide to the Care of the Geriatric Patient* is the answer! It zeroes in on the differential diagnoses, clinical findings, lab values, and treatment guidelines you need...and makes them easy to access quickly! The latest clinical information on all facets of caring for the older patient, from assessment and health maintenance through to geriatric rehabilitation and socioeconomic and legal issues, helps you provide effective, state-of-the-art care. A comprehensive chapter on optimal pharmacotherapy helps you select the best treatment options and avoid adverse drug interactions for each patient. Authoritative guidance on house calls, respite care, nursing home care, and hospice care and pain management enhances the quality of life for your patients. Helpful treatment algorithms, graphs, comparative tables, appendices, and more, streamline patient management. Over 40 new topics included in 3rd edition, including the latest information on insomnia, restless leg syndrome, wound care, gout, hip fracture, osteoarthritis, rheumatoid arthritis, the elderly driver, multicultural geriatric care, and more . . . New appendices added for functional assessment and mini-cog assessment. New wipe-clean cover will protect the book from frequent use on the wards!

CMSA Core Curriculum for Case Management - 2008

This text contains the core body of knowledge for case management practice as delineated by the Case Management Society of America (CMSA), the largest professional organization of case managers. The core curriculum provides a "synthesis of case management evolution," and presents essential elements, concepts,

and vision for current and future case management practice. This edition is significantly expanded to reflect the dynamic changes taking place in case management. Each chapter is organized in a consistent format that includes learning objectives; introduction; important terms and concepts; key definitions; and references.

Guccione's Geriatric Physical Therapy E-Book - Dale Avers 2019-10-24

Offering a comprehensive look at physical therapy science and practice, *Guccione's Geriatric Physical Therapy*, 4th Edition is a perfect resource for both students and practitioners alike. Year after year, this text is recommended as the primary preparatory resource for the Geriatric Physical Therapy Specialization exam. And this new fourth edition only gets better. Content is thoroughly revised to keep you up to date on the latest geriatric physical therapy protocols and conditions. Five new chapters are added to this edition to help you learn how to better manage common orthopedic, cardiopulmonary, and neurologic conditions; become familiar with functional outcomes and assessments; and better understand the psychosocial aspects of aging. In all, you can rely on *Guccione's Geriatric Physical Therapy* to help you effectively care for today's aging patient population. Comprehensive coverage of geriatric physical therapy prepares students and clinicians to provide thoughtful, evidence-based care for aging patients. Combination of foundational knowledge and clinically relevant information provides a meaningful background in how to effectively manage geriatric disorders. Updated information reflects the most recent and relevant information on the Geriatric Clinical Specialty Exam. Standard APTA terminology prepares students for terms they will hear in practice. Expert authorship ensures all information is authoritative, current, and clinically accurate. NEW! Thoroughly revised and updated content across all chapters keeps students up to date with the latest geriatric physical therapy protocols and conditions. NEW! References located at the end of each chapter point students toward credible external sources for further information. NEW! Treatment chapters guide students in managing common conditions in orthopedics, cardiopulmonary, and neurology. NEW! Chapter on functional outcomes and assessment lists relevant scores for the most frequently used tests. NEW! Chapter on psychosocial aspects of aging provides a well-rounded view of the social and mental conditions commonly affecting geriatric patients. NEW! Chapter on frailty covers a wide variety of interventions to optimize treatment. NEW! Enhanced eBook version is included with print purchase, allowing students to access all of the text, figures, and references from the book on a variety of devices.

Principles and Practice of Geriatric Surgery - Ronnie Ann Rosenthal 2013-06-29

Principles and Practice of Geriatric Surgery presents the fundamentals of surgical care for the fastest growing segment of the US population, providing a vital integration of operative strategies with the physiological changes of aging. Among the topics covered are the endocrine system, otolaryngology, respiratory system,

cardiovascular system, GI system, hepatobiliary system, urogenital system, soft tissue and musculoskeletal system, neurosurgery, and transplantation.

The Encyclopedia of Elder Care - Eugenia L. Siegler MD, FACP 2007-10-25

Focusing on the broad but practical notions of how to care for the patient, The Encyclopedia of Elder Care, a state-of-the-art resource features nearly 300 articles, written by experts in the field. Multidisciplinary by nature, all aspects of clinical care of the elderly are addressed. Coverage includes acute and chronic disease, home care including family-based care provisions, nursing home care, rehabilitation, health promotion, disease prevention, education, case management, social services, assisted living, advance directives, palliative care, and much more! Each article concludes with specialty web site listings to help direct the reader to further resources. Features new to this second edition: More extensive use of on-line resources for further information on topics Thoroughly updated entries and references Inclusion of current research in geriatrics reflecting evidence-based practice New topics, including Assisted Living, Nursing Home Managed Care, Self-Neglect, Environmental Modifications (Home & Institution), Technology, Neuropsychological Assessment, Psychoactive Medications, Pain--Acute and Chronic Still the only reference of its kind, The Encyclopedia of Elder Care will prove to be an indispensable tool for all professionals in the field of aging, such as nurses, physicians, social workers, counselors, health administrators, and more.

Aging With a Plan: How a Little Thought Today Can Vastly Improve Your Tomorrow - Sharona Hoffman 2015-05-12

This book offers a concise, comprehensive resource for middle-aged readers who are facing the prospects of their own aging and of caring for elderly relatives—an often overwhelming task for which little in life prepares us. • Covers a broad range of topics and offers a wealth of practical advice that should be considered by individuals who are planning for old age, supplying a comprehensive "one-stop" resource on the subject • Presents interdisciplinary perspectives that draws on the author's background in law and bioethics as well as personal experience with health care and the elderly • Combines thorough scholarly research and analysis with engaging anecdotes and personal observations • Provides a preparedness checklist at the end of each chapter that summarizes take-away messages and outlines practical next steps for the reader

Legal Nurse Consulting Practices - Vernon J. Geberth 2010-02-19

Over the past generation, the practice of legal nurse consulting has grown to include areas such as life care planning, risk management, and administrative law, as well as taking on a more diversified role in both criminal and civil law and courtroom proceedings. First published in 1997, Legal Nurse Consulting, Principles and Practices provided pro

Handbook of Geriatric Care Management - Cathy Cress 2007

This book is a reference which addresses the many settings that geriatric care managers find themselves in, such as hospitals, long-term care facilities, and assisted living and rehabilitation facilities. It also includes case studies and sample forms.

The Case Manager's Handbook - Catherine Mullahy 2010-10-25

Written by renowned author Catherine Mullahy, The Case Manager's Handbook, Fourth Edition is the ultimate how-to guide for Case Managers. It is designed to define good case management, examine the case management process, and present practical procedural information. The Fourth Edition has been completely revised and updated with new references and pertinent information. This book is an excellent daily reference or can be used as a training guide for new case managers, or a teaching tool for client groups. Accompanied by a CD-ROM and a FREE Student Study Guide is available online.

Aging with Care - Amanda Lambert 2017-11-10

Finding the right fit to match aging adults with the best caregiver to assist them in their home can be fraught with challenge. In today's pressurized world, the process involves overstressed family members and a shortage of great caregivers. So many adult children are seeking a helping hand and a friendly, experienced voice to guide them through this emotionally charged rite of passage. *Aging with Care: Your Guide to Hiring and Managing Caregivers in the Home*, takes a personal, professional, and sometimes humorous approach to the challenges, benefits, pitfalls and problems of hiring in-home caregivers. Here, two geriatric care experts explore the essential credentials and experience a home caregiver should have, pitfalls to avoid, hiring options and managing costs, and the decisions that go into finding the right fit for your loved one to be able to age in place. Sharing stories and insights from interviews with caregivers and elders, as well as industry experts, they walk you through the ins and outs, and provide you with the tools necessary to making the best care choices you can for the ones you love.

Handbook of Social Work in Health and Aging - Barbara Berkman 2006-02-09

The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care, aging, and social work in a single, authoritative volume. These areas are too often treated as discrete entities, while the reality is that all social workers deal with issues in health and aging on a daily basis, regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic, and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews, written by the most experienced and prominent gerontological health care scholars in the United States and across the

world, provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families; new models for intervention in both community-based practice and institutional care; and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.

Geriatric Nutrition - Ronni Chernoff 2013-08-02

A authoritative reference written to help professionals understand the role of nutrition in the maintenance of health, the management of chronic conditions, and the treatment of serious illness. The fourth edition of this text provides a comprehensive review of nutritional assessment, intervention programs for the elderly, and health promotion activities.

Textbook of Geriatric Dentistry - Poul Holm-Pedersen 2015-08-17

Textbook of Geriatric Dentistry, Third Edition provides a comprehensive review of the aging process and its relevance to oral health and dentistry. Now in full colour, this third edition has been fully revised and updated with new material encompassing recent research and clinical developments within geriatric dentistry. Written in a clear and accessible style, this is an essential guide to geriatric dental practice for undergraduate and postgraduate dentistry students and practicing clinicians alike. Key features include: Contributions from an international group of expert authors Comprehensive coverage of oral healthcare issues in the older adult, from demographics and physiology through to nutrition and pharmacology Provides both foundational knowledge and a guide to clinical management New chapters including material on orofacial pain, quality of life and treatment planning

Handbook of Clinical Nutrition and Aging - Connie Watkins Bales 2014-11-27

This is the new and fully revised third edition of the well-received text that is the benchmark book in the field of nutrition and aging. The editors (specialists in geriatric nutrition, medical sociology, and clinical nutrition, respectively) and contributors (a panel of recognized academic nutritionists, geriatricians, clinicians, and other scientists) have added a number of new chapters and have thoroughly updated the widely acclaimed second edition. This third edition provides fresh perspectives and the latest scientific and clinical developments on the interaction of nutrition with age-associated disease and provides practical, evidence-based options to enhance this at-risk population's potential for optimal health and disease prevention. Chapters on a wide range of topics, such as the role of nutrition in physical and cognitive function, and coverage of an array of clinical conditions (obesity, diabetes, heart failure, cancer, kidney disease, osteoporosis), compliment chapters on food insecurity, anti-aging and nutritional supplements, making this third edition uniquely different from

previous editions. Handbook of Clinical Nutrition and Aging, Third Edition, is a practical and comprehensive resource and an invaluable guide to nutritionists, physicians, nurses, social workers and others who provide health care for the ever-increasing aging population.

Physical Therapy Clinical Handbook for PTAs - Cikulin-Kulinski 2017-02-10

Preceded by Physical therapy clinical handbook for PTAs / Olga Dreeben-Irimia. 2nd ed. c2013.

Brocklehurst's Textbook of Geriatric Medicine and Gerontology E-Book - Howard M. Fillit 2016-05-06

The leading reference in the field of geriatric care, Brocklehurst's Textbook of Geriatric Medicine and Gerontology, 8th Edition, provides a contemporary, global perspective on topics of importance to today's gerontologists, internal medicine physicians, and family doctors. An increased focus on frailty, along with coverage of key issues in gerontology, disease-specific geriatrics, and complex syndromes specific to the elderly, makes this 8th Edition the reference you'll turn to in order to meet the unique challenges posed by this growing patient population. Consistent discussions of clinical manifestations, diagnosis, prevention, treatment, and more make reference quick and easy. More than 250 figures, including algorithms, photographs, and tables, complement the text and help you find what you need on a given condition. Clinical relevance of the latest scientific findings helps you easily apply the material to everyday practice. A new chapter on frailty, plus an emphasis on frailty throughout the book, addresses the complex medical and social issues that affect care, and the specific knowledge and skills essential for meeting your patients' complex needs. New content brings you up to date with information on gerontechnology, emergency and pre-hospital care, HIV and aging, intensive treatment of older adults, telemedicine, the built environment, and transcultural geriatrics. New editor Professor John Young brings a fresh perspective and unique expertise to this edition.

Handbook of Geriatric Care Management - Cathy Cress 2011-03-30

A comprehensive guide for Geriatric Care Managers (GCMs) to help define duties and procedures while providing guidelines for setting up a geriatric care practice. --from publisher description.

Nutrition Care of the Older Adult: a Handbook for Dietetics Professionals Working Throughout the Continuum of Care - Kathleen C. Niedert 2004

Completely revised with new chapters and sections covering everything the health-care provider needs to know when working with the older adult either at home or in nursing and long-term care facilities. Chapters cover factors affecting nutrition, nutrition and disease, nutritional assessment, dining challenges and regulatory compliance. This scientifically sound and practical resource for new and experienced nutrition professionals includes new forms, resources, the food guide pyramid for older adults and an index of tales.

Life Care Planning and Case Management Handbook, Third Edition - Roger O. Weed 2004

Life Care Planning and Case Management Handbook, Second Edition brings together the many concepts, beliefs, and procedures regarding life care plans into one state-of-the-art publication. This second edition of a bestseller is focused on prioritizing and managing the spectrum of services for people with serious medical problems and their families. Keeping up with advances in the field, this is the most comprehensive reference for everyone concerned with coordinating, evaluating, assessing, and monitoring care.

Long-Term Care Administration and Management - Darlene Yee-Melichar, EdD 2014-02-07

Print+CourseSmart

A Guidebook to Human Service Professions - William George Emener 2009

The twenty-one all new chapters in this second edition poignantly review a variety of different careers designed for individuals undecided about their future, beyond a desire or "a calling" to work with people, and provide excellent cutting edge information about a large variety of human service professions and occupations, wrapped in the authors' "real passion for helping people." Part I discusses some of the tangible and intrinsic reasons why people want to be human service professionals, and defines and discusses career choice and human service, as well as the concepts of career, job and PR.

Oxford Textbook of Geriatric Medicine - Jean-Pierre Michel 2018

Over the past two decades there has been a marked change in global age demographics, with the number of over-60s increasing by 82% and the number of centenarians by 715%. This new-found longevity is testament to the success of recent advances in medicine, but poses significant challenges to multiple areas of health care concerning older patients. Building upon its predecessor's reputation as the definitive resource on the subject, this new edition of the Oxford Textbook of Geriatric Medicine offers a comprehensive and multinational examination of the field. Fully revised to reflect the current state of geriatric medicine, it examines the medical and scientific basis of clinical issues, as well as the ethical, legal, and socio-economic concerns for healthcare policy and systems. Over 170 chapters are broken up into 16 key sections, covering topics ranging from policy and key concepts through to infection, cancer, palliative medicine, and healthy ageing. New material includes focus on the evolving concepts of malnutrition, sarcopenia, frailty, and related geriatric syndromes and integration of geriatric principles from public health, primary and specialized care, and transitional stages from home to emergency, medicine and surgery, rehabilitation, and long term care. The Oxford Textbook of Geriatric Medicine brings together specialists from across the globe to provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter, as well as on related psychological, philosophical, and social issues.

The Oxford Handbook of Social Work in Health and Aging - Daniel B. Kaplan 2015-11-12

Revised edition of Handbook of social work in health and aging, 2006.

The Life Care Management Handbook - Jennifer Crowley 2021-02

Care Managers: Working with the Aging Family - Cathy Cress 2009-10-07

Care Managers: Working with the Aging Family addresses the unmet needs of care managers working with aging clients as well as the client's entire family. With its in-depth focus on the "aging family system, this book fills a gap for medical case managers and geriatric care managers giving them tools to better meet the treatment goals of aging clients and their families, as the older clients move through the continuum of care in institutional based settings or community based settings. Care Managers: Working With the Aging Family uniquely focuses on helping the entire family unit through the process of death and dying, helping midlife siblings to work together to render care to aging parents. It adds proven techniques to the care manager repertoire such as family meetings, forgiveness, technology, and care giver assessment. It offers multiple tools to do an effective care plan so that both the needs of the family and the older client are met.

Compact Clinical Guide to Geriatric Pain Management - Ann Quinlan-Colwell 2011-12-20

Print+CourseSmart

Days in the Lives of Gerontological Social Workers - Linda May Grobman 2007

"This book, like its predecessors Days in the Lives of Social Workers and More Days in the Lives of Social Workers, highlights the experiences of social workers through first-person narratives. This volume focuses on professional social work in direct and indirect practice with and on behalf of older adults. The contributors to this book are social workers at the BSW, MSW, and doctoral levels. Here are some of the social work practice settings, roles, and topics you will read about: working in communities; hospitals, hospice, and home health; nursing home social work, administration, inspection, and advocacy; addictions, mental illness, and homelessness in older adults; Alzheimer s and Parkinson s diseases; international settings;gerontological research; policy and macro practice; social work student experiences in gerontology; centenarians and their secrets to long life. Gerontological social work is a growing and exciting practice specialty! The stories told by these gerontological social workers will transform your thinking about what this type of work entails. You will gain a better understanding of the issues facing older adults and their social workers, and you may be inspired to pursue this career path. This engaging collection will make a welcome supplement to the theory found in traditional textbooks. Organizations, Web sites, additional readings, and a glossary of terms are included to assist you in further exploring these areas of social work practice. Photographs by social worker/photographer Marianne Gontarz York are featured to expand your visual images of real people as they

grow older."--pub. desc.

Geriatric Palliative Care - Suzanne Goldhirsch 2014-04-11

The growing geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties. Yet, palliative medicine lacks the resources to carry such a workload itself. Geriatric Palliative Care addresses this need by encouraging individual specialties to "own" the management of elderly with the same vigor as they "own" other key management competencies within their specialty. This clinically focused and highly practical handbook, which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier (Oxford University Press, 2003), encourages this process of learning and ownership across many medical specialties. Designed to be readable and easily accessible to a range of health care providers, Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients. The handbook also provides evidence based advice for helping patients, relatives, and staff cope with such issues as polypharmacy, dementia and consent, multiple pathologies, home care, elderly caregivers, and supporting the elderly in the place where they would like to be.

Handbook of Mental Health and Aging - Nathan Hantke 2020-04-11

The Handbook of Mental Health and Aging, Third Edition provides a foundational background for practitioners and researchers to understand mental health care in older adults as presented by leading experts in the field. Wherever possible, chapters integrate research into clinical practice. The book opens with conceptual factors, such as the epidemiology of mental health disorders in aging and cultural factors that impact mental health. The book transitions into neurobiological-based topics such as biomarkers, age-related structural changes in the brain, and current models of accelerated aging in mental health. Clinical topics include dementia, neuropsychology, psychotherapy, psychopharmacology, mood disorders, anxiety, schizophrenia, sleep disorders, and substance abuse. The book closes with current and future trends in geriatric mental health, including the brain functional connectome, repetitive transcranial magnetic stimulation (rTMS), technology-based interventions, and treatment innovations. Identifies factors influencing mental health in older adults Includes biological, sociological, and psychological factors Reviews epidemiology of different mental health disorders Supplies separate chapters on grief, schizophrenia, mood, anxiety, and sleep disorders Discusses

biomarkers and genetics of mental health and aging Provides assessment and treatment approaches

Handbook of Geriatric Assessment - Terry Fulmer 2018-04-15

Handbook of Geriatric Assessment, Fifth Edition is a multidisciplinary text that takes a contemporary approach in line with patient and family centered care. With contributions from the foremost experts in the field, it contains the latest information on geriatric assessments for older adults. Completely updated and revised, the Fifth Edition includes several new chapters, including demographic trends, age friendly health systems, payment reform and impact, the VA health system, self-care and management, impact on familial relations, vulnerable populations, building geriatric interdisciplinary teams, advance care planning, caregiver information, spiritual assessment, senior hunger, and transitions of care.

Leadership and Nursing Care Management - E-Book - Diane Huber 2013-08-07

Comprehensive and easy to read, this authoritative resource features the most up-to-date, research-based blend of practice and theory related to the issues that impact nursing management and leadership today. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. Research Notes in each chapter summarize relevant nursing leadership and management studies and show how research findings can be applied in practice. Leadership and Management Behavior boxes in each chapter highlight the performance and conduct expected of nurse leaders, managers, and executives. Leading and Managing Defined boxes in each chapter list key terminology related to leadership and management, and their definitions. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key chapter concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. A new Patient Acuity chapter uses evidence-based tools to discuss how patient acuity measurement can be done in ways that are specific to nursing. A reader-friendly format breaks key content into easy-to-scan bulleted lists. Chapters are divided according to the AONE competencies for nurse leaders, managers, and executives. Practical Tips boxes highlight useful strategies for applying leadership and management skills to practice.
