*Between Pacific Tides* - Edward Flanders Ricketts 1964

*The Continental Drift Controversy* - Henry R. Frankel 2012-04-26  
This book describes the expansion of the land-based paleomagnetic case for drifting continents and recounts the golden age of marine geoscience.

**Marine Algae of California** - Isabella A. Abbott 1992-08-01  
This is a complete, systematic treatment of the marine algae (seaweeds) flora of California. The 726 species treated are each illustrated by a detailed line drawing made from an actual specimen. The two authors have drawn upon their phycological research to offer a definitive representation of benthic marine algae from the Californian coast. The floristic treatment in this first paperback edition should aid accurate and speedy identification of flora due to the improved keys, descriptions, illustrations and more detailed coverage of taxa, and should enhance the reader's knowledge of Californian macro-algae.

**Plants and Climate Change** - Jelte Rozema 2007-01-19  
This book focuses on how climate affects or affected the

biosphere and vice versa both in the present and in the past. The chapters describe how ecosystems from the Antarctic and Arctic, and from other latitudes, respond to global climate change. The papers highlight plant responses to atmospheric CO2 increase, to global warming and to increased ultraviolet-B radiation as a result of stratospheric ozone depletion.

**Kids who Walk on Volcanoes** - Paul Otteson 1996  
Describes the activities of Central American children--their work, their play, and their celebrations.

**Ethics for the Information Age** - Michael Jay Quinn 2006  
Widely praised for its balanced treatment of computer ethics, Ethics for the Information Age offers a modern presentation of the moral controversies surrounding information technology. Topics such as privacy and intellectual property are explored through multiple ethical theories, encouraging readers to think critically about these issues and to make their own ethical decisions.

*Rocks in His Head* - Carol Otis Hurst 2001-05-08  
Some people collect stamps. Other people collect coins. Carol

Otis Hurst's father collected rocks. Nobody ever thought his obsession would amount to anything. They said, "You've got rocks in your head" and "There's no money in rocks." But year after year he kept on collecting, trading, displaying, and labeling his rocks. The Depression forced the family to sell their gas station and their house, but his interest in rocks never wavered. And in the end the science museum he had visited so often realized that a person with rocks in his head was just what was needed.

Anyone who has ever felt a little out of step with the world will identify with this true story of a man who followed his heart and his passion.

*Let's Go Rock Collecting* - Roma Gans 1997-04-11

Holly Keller has created vivacious new paintings for this favorite Reading Rainbow title about geology. Readers follow two enthusiastic rock hounds around the globe as they add to their collection. Along the way they will learn how sedimentary, metamorphic, and igneous rocks are formed. From the Egyptian pyramids to Roman roads, from the diamond ring on your finger to the pebbles under your feet'rocks are everywhere!

*If You Find a Rock* - Peggy Christian 2000

Discover the joy of rock hunting.

Show-and-Tell Learning Letters - Kristine Lombardi 2005-06-28

"This unique book teaches kids to write letters with the aid of a fun story ..."--Cover back.

**My Visit to the Dinosaurs** - Aliko 2009-07-10

A visit to a museum of natural history provides a little boy with an introduction to the habits, characteristics, and habitats of fourteen kinds of dinosaurs.

**Shanleya's Quest** - Thomas J. Elpel 2005-03

The story of a girl who paddles her canoe out to the tree islands to learn the plant traditions of her people is presented to help readers learn the patterns that will help them correctly match many species of plants to their proper families.

*Dictionary of Earth Science* - McGraw Hill 2002-11-22

Derived from the content of the respected McGraw-Hill Dictionary of Scientific and Technical Terms, Sixth Edition, each title provides thousands of definitions of words and phrases encountered in a specific discipline. All include: \* Pronunciation guide for every term \* Acronyms, cross-references, and abbreviations \* Appendices with conversion tables; listings of scientific, technical, and mathematical notation; tables of relevant data; and more \* A convenient, quick-find format

**Debating Lapita** - Stuart Bedford 2019-12-12

'This volume is the most comprehensive review of Lapita research to date, tackling many of the lingering questions regarding origin and dispersal. Multidisciplinary in nature with a focus on summarising new findings, but also identifying important gaps that can help direct future research.' — Professor Scott

Fitzpatrick, Department of Anthropology, University of Oregon

'This substantial volume offers a welcome update on the definition of the Lapita culture. It significantly refreshes the knowledge on this foundational archaeological culture of the Pacific Islands in providing new data on sites and assemblages, and new discussions of hypotheses previously proposed.' — Dr Frédérique Valentin, Centre national de la recherche scientifique (CNRS), Paris This volume comprises 23 chapters that focus on the archaeology of Lapita, a cultural horizon associated with the founding populations who first colonised much of the south west Pacific some 3000 years ago. The Lapita culture has been most clearly defined by its distinctive dentate-stamped decorated pottery and the design system represented on it and on further incised pots. Modern research now encompasses a whole range of aspects associated with Lapita and this is reflected in this volume. The broad overlapping themes of the volume—Lapita distribution and chronology, society and subsistence—relate to research questions that have long been debated in relation to Lapita.

How to Dig a Hole to the Other Side of the World - Faith McNulty 1990-03-28

'[An] irresistible account of a child's imaginary 8,000-mile journey through the earth to discover what's inside. Facts about the composition of the earth are conveyed painlessly and memorably.' —SLJ. 'An exciting adventure. . . . Illustrations [by Caldecott Medal winner Marc Simont] explode with color and action.' —CS. Best Books of 1979 (SLJ) Children's Choices for 1980 (IRA/CBC) A Reading Rainbow Selection

**Hill of Fire** - Thomas P. Lewis 1983-09-07

"El Monstruo!" Every day is the same for Pablo's father. Then one afternoon the ground growls, hisses smoke, and swallows up his plow. A volcano is erupting in the middle of his cornfield!

Exploring Rocks and Minerals - Greg Roza 2012-08-01

Exploring Rocks and Minerals is aligned to the Common Core State Standards for English/Language Arts, addressing Literacy.RI.1.9 and Literacy.L.1.4. The exciting minerals and rocks of Earth are explored in this fun volume. Readers are shown how rocks form and the broad variety of them found in Nature. A graphic organizer shows readers where fossils are found. This book should be paired with "Inside Earth: Rocks and Minerals" (9781448890439) from the InfoMax Common Core Readers Program to provide the alternative point of view on the same topic.

**Earthquakes** - Dr. Franklyn M. Branley 2015-10-06

Read and find out about one of nature's most mysterious forces—the earthquake—in this colorfully illustrated nonfiction picture book. Some earthquakes are so small that you don't even feel them, while others can make even big buildings shake. Learn why earthquakes happen, where they are most likely to occur, and what to do if one happens near you. Now with updated text and art, this classic picture book describes the causes and effects of earthquakes (including a tsunami). This book features rich vocabulary and fascinating cross-sections of mountains, volcanoes, and faults in the earth's moving crust. This is a clear and appealing science book for early elementary age kids, both at

home and in the classroom. The text and art were vetted by Dr. Roland Burgmann, Professor of the Department of Earth and Planetary Science at the University of California, Berkeley. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRFOS: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series. Management Information Systems for the Information Age - Stephen Haag 2005

Some things about management information systems and information technology.

**Privacy as Trust** - Ari Ezra Waldman 2018-03-29

Proposes a new way of thinking about information privacy that leverages law to protect disclosures in contexts of trust.

Learn about the basic materials that make up the planet Earth, to the tune of "Home on the Range."

The Early Prehistory of Fiji - Geoffrey Richard Clark 2009-12-01

I enjoyed reading this volume. It is rare to see such a comprehensive report on hard data published these days, especially one so insightfully contextualised by the editors' introductory and concluding chapters. These scholars and the others involved in the work really know their stuff, and it shows. The editors connect the preoccupations of Pacific archaeologists with those of their colleagues working in other island regions and on "big questions" of colonisation, migration, interaction and patterns and processes of cultural change in hitherto-uninhabited environments. These sorts of outward-looking, big-picture contextual studies are invaluable, but all too often are missing from locally- and regionally-oriented writing, very much to its detriment. In sum, the work strongly advances our understanding of the early prehistory of Fiji through its well-integrated combination of original research and the reinterpretation of existing knowledge in the context of wider theoretical and historical concerns. In doing so The Early Prehistory of Fiji makes a truly substantial contribution to Pacific and archaeological scholarship. Professor Ian Lilley, The University of Queensland

Military Thought of Asia - Kaushik Roy 2020-11-05

Military Thought of Asia challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West, by analysing the history of ideas of warfare in Asia from the ancient period to the present. The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia. The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions. The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu. At the same time,

it also highlights publications on military affairs by small men like mid-ranking officers and scattered ideas regarding the origin, nature and societal impact of organised violence present in miscellaneous sources like coins, inscriptions, paintings and fictional literature. In so doing, the book fills a historiographical gap in scholarship on military thought, which marginalises Asia to the part of cameo, and historicises the evolution of theory and the praxis of warfare. The volume shows that the 'East' has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age. It is essential reading for those interested in the evolution of military thought throughout history, particularly in Asia.

Ethics in Information Technology - George Walter Reynolds 2007

Ethics in Information Technology, Second Edition is a timely offering with updated and brand new coverage of topical issues that we encounter in the news every day such as file sharing, infringement of intellectual property, security risks, Internet crime, identity theft, employee surveillance, privacy, and compliance.

Plants of the Pacific Northwest Coast - Jim Pojar 2016

This easy-to-use field guide features 794 species of plants commonly found along the Pacific coast from Oregon to Alaska, including trees, shrubs, wildflowers, aquatic plants, grasses, ferns, mosses and lichens. PLANTS OF THE PACIFIC NORTHWEST COAST covers the coastal region from shoreline to alpine, including the western Cascades. Includes: \* 1100 color photographs \* More than 1000 line drawings and silhouettes \* Clear species descriptions and keys to groups \* Descriptions of each plant's habitat and range \* 794 new color range maps. \* Rich and engaging notes on each species describe aboriginal and other local uses of plants for food, medicine and implements, along with unique characteristics of the plants and the origins of their names. For both amateurs and professionals, this is the best, most accessible, most up-to-date guide of its kind.

**Appreciating Physical Landscapes** - T.A. Hose 2016-02-01  
Geotourism, as a form of sustainable geoheritage tourism, was defined and developed, from the early 1990s, to contextualize modern approaches to geoconservation and physical landscape management. However, its roots lie in the late seventeenth century and the emergence of the Grand Tour and its domestic equivalents in the eighteenth century. Its participants and numerous later travellers and tourists, including geologists and artists, purposefully explored wild landscapes as 'geotourists'. The written and visual records of their observations underpin the majority of papers within this volume; these papers explore some significant geo-historical themes, organizations, individuals and locations across three centuries, opening with seventeenth century elite travellers and closing with modern landscape tourists. Other papers examine the resources available to those geotourists and explore the geotourism paradigm. The volume will be of particular interest to Earth scientists, historians of science, tourism specialists and general readers with an interest in landscape history.

**Dave's Down-to-Earth Rock Shop** - Stuart J. Murphy  
2000-01-05

Josh is the best collector on the block. And now he has something new to collect - rocks! Soon Josh and his best friend, Amy, have so many rocks they need to organize their collection. But how? Young collectors will be fascinated by all there is to know about rocks and about classifying - sorting and organizing objects by attributes like color, shape, or size. Grab your rock hammer and join the fun with this entertaining story by Stuart J. Murphy and lively art by Cat Bowman Smith.

**Dictionary of Geological Terms** - American Geological Institute  
1984-04-11

From Aa to Zweikanter, this popular dictionary has now been revised and updated. This edition includes over 1,000 new terms plus: -accurate definitions without technical jargon -many word

origins -hyphenation and pronunciation guide -commonly used abbreviations -a geologic time and life chart The definitions in this book are drawn largely from the authoritative 36,000-term Glossary Of Geology, to which nearly 150 specialists from all fields of the geosciences contributed. Both the Glossary and this Dictionary were prepared as a service of the American Geological Institute, a federation of geoscience societies united to provide information to the science community and the public.

**Plant Identification Terminology** - James G. Harris 1994  
A marvelous resource for anyone who wishes to familiarize themselves with plant identification keys, this volume (first published in 1994, with numerous reprints) assembles a visual glossary of botanical terms. The first section presents the alphabetical glossary of some 2,400 terms commonly used in plant description and identification. The second part groups related terms to facilitate study and comparison. Illustrated with clear bandw line drawings. c. Book News Inc.

*Creating Robust Vocabulary* - Isabel L. Beck 2008-04-27  
The authors provide tools, tips, and examples for teaching vocabulary in this complementary companion to Bringing words to life.

**Shanleya's Quest** - Thomas J. Elpel  
Shanleya's Quest: Patterns in Plants Card Game is a fun way to test your skills at identifying the plant family patterns introduced in the book Shanleya's Quest (sold separately). By playing the game you will learn to recognize the plant families in the fields and meadows of the real world. Includes 52 cards and instructions.

**Volcanoes** - Franklyn M. Branley 2008-03-25  
When Mount Vesuvius blew up in A.D. 79, ash, cinders, and stones buried a great city below the mountain. Volcanoes are dramatic and powerful. There are thousands of them all over the earth. Franklyn M. Branley's clear text and Megan Lloyd's striking illustrations explore the fascinating subject of

volcanoes—how they form and erupt, where they are found, and when you can expect a volcano to blow its top.

*Forest Quality* - Nigel Dudley 2012-04-27

Deforestation is frequently a topic of discussion in the environmental arena, but it is not just the number of trees that matters; the quality of the forest is also important. Even where the forest area is stable or increasing, there are often rapid changes in its character. Natural forests are being replaced by plantations or by intensively managed forests. Around the world, forests are becoming younger and less diverse, in both species and structure; this has important impacts for biodiversity and also affects many human values. In this groundbreaking text, forest quality is discussed as a useful new concept in forest conservation and management. Three main assessment criteria are used: authenticity; environmental benefits; and social and economic benefits. The book describes a methodology and protocol for collecting and analysing data, and outlines in detail the approach required with each indicator. The authors advocate a landscape approach to assessment and demonstrate how assessment works through a series of case studies that show how this approach can be used in many ways to help forest conservation management. This hands-on manual is for professionals involved in forestry, conservation and resource management worldwide, and contains case study material from Europe, Asia, Africa and Latin America that demonstrates practical uses of the new 'landscape' approach to forest conservation. Published with IUCN and WWF

**Seaweeds of the Pacific Coast** - Jennifer Mondragon 2003

"Created for those who work and play on the shores and in the shallow subtidal of the Pacific, this easy-to-use field guide is suitable for amateurs and professionals alike. Featuring a "quick key" and filled with interesting details, this comprehensive book will enable you to readily identify 128 species of marine algae commonly found along the coast from Alaska to Baja California. Each species is accompanied by at least one color photograph, and text that covers identifying characteristics, range, and habit. Contains 138 color photographs, 14 line drawings that illustrate algal structures and life cycles, 3 easy-to-use keys to help sort and identify specimens and 9 recipes for cooking with seaweed." - Amazon.com viewed March 30, 2021.

**Planet Earth/Inside Out** - Gail Gibbons 1998-05-27

What if we could open up our planet and look inside? From its red-hot core to the highest mountain peak, come see Earth as you've never seen it before in a colorful introduction to the powerful forces shaping our home.

**Oceanic Explorations** - Stuart Bedford 2007-11-01

Lapita comprises an archaeological horizon that is fundamental to the understanding of human colonisation and settlement of the Pacific as it is associated with the arrival of the common ancestors of the Polynesians and many Austronesian-speaking Melanesians more than 3000 years ago. While Lapita archaeology has captured the imagination and sustained the focus of archaeologists for more than 50 years, more recent discoveries have inspired renewed interpretations and assessments. Oceanic Explorations reports on a number of these latest discoveries and includes papers which reassess the Lapita phenomenon in light of this new data. They reflect on a broad range of interrelated themes including Lapita chronology, patterns of settlement, migration, interaction and exchange, ritual behaviour, sampling strategies and ceramic analyses, all of which relate to aspects highlighting both advances and continuing impediments associated with Lapita research.

*Digging Up Dinosaurs* - Aliko 1988-10-05

How did those enormous dinosaur skeletons get inside the museum? Long ago, dinosaurs ruled the Earth. Then, suddenly, they died out. For thousands of years, no one knew these giant creatures had ever existed. Then people began finding fossils --

bones and teeth and footprints that had turned to stone. Today, teams of experts work together to dig dinosaur fossils out of the ground, bone by fragile bone. Then they put the skeletons together again inside museums, to look just like the dinosaurs of millions of years ago.
